

Internships for Undergraduate Course Credit

Many students pursue internships to learn more about potential fields of interest and gain work experience while they study at Rice. The Center for Career Development provides extensive resources to help students search for an internship and navigate the selection process.

Some internship opportunities require students to obtain course credit as part of the position's description. International students have specific guidelines for CPT (Curricular Practical Training) and should make an appointment with one of the OISS advisors before acquiring an internship.

The list below outlines course options that students have used in the past in conjunction with their internship. Please note that not all of these classes are offered each semester and that individual instructors have the discretion to decide whether your internship fits the course content.
