The Journal of Supercomputing

Journal Metrics 2014

Speed

Days from submission to first decision Number of days from submission of a manuscript to first decision.	**88**
Days from acceptance to online first publication Number of days from acceptance to online first publication.	**23**

Usage

Downloads Springer measures the usage on the SpringerLink platform according to the COUNTER (Counting Online Usage of NeTworked Electronic Resources) standards.	**90,721**
Usage Factor – 2013/2014 The Springer Journal Usage Factor 2013/14 was calculated as suggested by the COUNTER Code of Practice for Usage Factors. It is the median value of the number of downloads in 2013/14 for all articles published online in that particular journal during the same time period. The Usage Factor calculation is based on COUNTER-compliant usage data on the SpringerLink platform. (Counting Online Usage of NeTworked Electronic Resources) standards.	**89.0**

Impact

Impact Factor – 2014 Journal Impact Factors are published each summer by Thomson Reuters via Journal Citation Reports®. Impact Factors and ranking data are presented for the preceding calendar year.	**0.858**

SNIP – 2014

Source Normalized Impact per Paper (SNIP) measures contextual citation impact by weighting citations based on the total number of citations in a subject field. The impact of a single citation is given higher value in subject areas where citations are less likely, and vice versa.

1.079

SJR – 2014

SCImago Journal Rank (SJR) is a measure of scientific influence of scholarly journals that accounts for both the number of citations received by a journal and the importance or prestige of the journals where such citations come from.

0.602

h5 Index

Google's h5 Index is a metric based on the articles published by a journal over the previous 5 calendar years with a minimum of 100 articles in this period. If a journal publishes 100 articles sooner, an h5 Index can be calculated earlier. h is the largest number of articles that have each been cited h times. The h5 Index therefore cannot be dominated by one or several highly cited articles.

24

Journal Author Satisfaction, likelihood to publish with Springer again

Springer's Author Satisfaction Survey programme was set up to optimize the journal publishing process from the authors' perspective (results are only included if the number of respondents in two years was higher than 10).
