

NSCI 120

Introductory Scientific Research Challenges

NSCI 120 gives first year science students the opportunity to learn scientific practices in the context of a hands-on, client-based research problem.

- “This class was so valuable. I loved having the opportunity to work in a lab and produce my own work. I learned way beyond just basic lab protocols and I'm very grateful that I took this class. It satisfies the BIOC 111 requirement, but even if you don't need that, if you are interested in research you should take this class.” Student from Spring 2015
- Two sections available:
 - Tues/Thurs 8 – 9:15 AM
 - Tues/Thurs 9:25 – 10:40 AM
 - Tues/Thurs 10:50 AM – 12:05 PM

3 credit hours. Enrollment limited to 15 students per section. For more information, please email Dr. Bishnoi (sbishnoi@rice.edu).
