Welcome from the President

At Dundalk Institute of Technology (DkIT) we pride ourselves in providing a learning experience that is highly student-centred. You will learn in small groups and with excellent support from your lecturers and other learning-support staff. Life at college is not only about studying, but also about your personal development through participation in a vibrant college community. While studying at DkIT you will also have opportunities to participate in many sports, clubs, and societies and enjoy a lively social life. In June 2015, the Institute opened its new state-of-the-art Sports campus (DkIT Sport) which includes a swimming pool, gym, dedicated high performance strength and conditioning training zone and 10 indoor sports pitches.

As well as looking after your academic needs, the Institute also provides a range of support services including a medical unit, careers service, counselling service, chaplaincy service, an access service, and on-campus accommodation. In addition, our Students Union run a very comprehensive programme of social events.

The extensive range of programmes offered by our Schools of Business & Humanities, Engineering, Health & Science and Informatics & Creative Arts are also described in detail in this handbook. Much of the content of our programmes is now online and we are committed to making even greater use of technology. This is making the learning experience exciting and interactive with a mix of traditional teaching and technology-enhanced learning.

A great deal of progress has been made over the past five years to build a campus that we can all be proud of and DkIT is acknowledged as one of the finest campuses in Ireland. Recently the Institute has completed a €38 million redevelopment of the Carroll Building for the School of Informatics and Creative Arts. We are now completing our new 10-year campus master plan and other facilities will be added as well as upgrading of the original buildings on the campus which accommodate science, engineering and business programmes. Our Student Learning Centre provides a comprehensive range of additional supports in areas such as IT, mathematics and academic writing. These services are particularly popular with students who are returning to education.

I know that your next few years at Dundalk Institute of Technology will be the best years in your life.

Denis Cummins

Fáilte ón Uachtarán

Tá bróid orainn in Institiúid Teicneolaíochta Dhún Dealgan deis foghlama a chur ar fáil atá dírithe go hiomlán ar an mac léinn. Beidh tú ag foghlaim i ngrúpaí beaga, le tacaíocht sármhaith ó do léachtóirí agus ón lucht foirne tacaíochta eile. Ach ní le staidéar amháin a bhaineann an saol sa choláiste, ach freisin le do fhorbairt pearsanta trí rannpháirtíocht i bpobal spleodrach an choláiste. Beidh deiseanna agat, agus tú ag staidéar in ITDD, páirt a ghlacadh i mórán spóirt, clubanna, cumainn agus saol sóisialta sultmhar a bhaint amach. I mí Meitheamh 2015 an Institiúid osclaíodh ionad spóirt nua (ITDD Spóirt) le linn snámha, seomra aclaíochta, neart tiomnaithe ardfeidhmíochta agus crios oiliúna aeroiriúnaithe agus 10 páirceanna spóirt faoi dhion.

Chomh maith le cúram na riachtanas acadúla, cuireann an Institiúid raon seirbhísí tacaíochta ar fáil, ar nós ionad leighis, seirbhís gairmréime, seirbhís comhairleoireachta, seirbhís séiplíneachta, seirbhís rochtana agus cóiríocht ar champas. Ina theannta sin, eagraíonn aontas na mac léinn clár cuimsitheach imeachtaí sóisialta.

Tá cur síos sonrach sa lámhleabhar seo ar raon an-leathan na gclár atá ar fáil ó Scoileanna Gnó & Daonnachtaí, na hInnealtóireachta, Sláinte & Eolaíochta, na Faisnéisíochta & na Meán Cruthaitheach. Tá mórchuid ábhar ár gclár ar fáil ar líne agus táimid dírithe ar úsáid níos mó a bhaint as teicneolaíocht. Mar seo, le go mbeadh sé spreagúil agus idirghníomhach bheith ag foghlaim, agus meascán de mhúinteoireacht traidisiúnta agus cuidiú teicneolaíochta ann.

Tá mórán dul chun cinn déanta le cúig bliana anuas chun campas a thógáil as gur féidir linn uile bheith mórtasach agus aithnítear ITDD mar cheann de na campais is fearr in Éirinn. Chríochnaigh an Institiúid le déanaí athforbairt £38 milliún ar fhoirgneamh Carroll ar son Scoil na Faisnéisíochta agus na Meán Cruthaitheach. Táimid anois ag críochnú plean nua 10 mbliana don champas. Tógfar saoráidí breise, agus déanfar uasghrádú ar fhoirgnimh bunaidh an champais ina n-eagraítear cúrsaí eolaíochta, innealtóireachta agus gnó. Soláthraíonn Mac Léinn Ionad Foghlama raon cuimsitheach tacaíochtaí breise i ar nós na matamaitice agus scríbhneoireacht acadúil. Tá na seirbhísí tóir go háirithe le scoláirí atá ag filleadh ar an oideachas.

Tá fhios agam gurb iad na blianta amach anseo duit in Institiúid Teicneolaíochta Dhún Dealgan na blianta is fearr a bheidh agat i do shaol.

DkIT Mission Statement Ráiteas Misin ITDD

DkIT is fully committed to its role in the economic, social and cultural development of the region. This plan has a particular focus on developing learners and graduates with the following qualities:

- * Excellence in their discipline;
- * Ability to apply disciplinary and trans-disciplinary knowledge, especially focusing on entrepreneurship and sustainability;
- * Ability to contribute globally as well as locally;
- * Personal and employability qualities to include an ability to solve complex problems; communication skills; critical thinking; systems thinking and capacity for on-going learning.

DkIT Vision Fís ITDD

Dundalk Institute of Technology will provide university-level higher education to graduates who will excel in their specialised discipline and have the creativity, confidence, resilience and entrepreneurial flair to thrive in the 21st Century.

Working sustainably and with a practical focus, we will help lead the regeneration of the North East region, and more widely Ireland, by acting locally and thinking globally.

Welcome to Dundalk Institute of Technology

Fáilte chuig Institiúid Teicneolaíochta Dhún Dealgan

Dundalk Institute of Technology (DkIT) has earned a reputation as the leading higher education provider in the North East of Ireland. Through our graduates and our work in regional development, we have contributed to the transformation of our region. Our reputation has been solidly built by providing quality educational opportunities in a broad range of disciplines from undergraduate degree to PhD level.

The DkIT campus which is a 90-acre (360,000 m²) site, situated in Dundalk, County Louth is positioned halfway between the two largest cities on the island of Ireland, Belfast and Dublin (each approximately 80 kilometres away). The campus is one kilometre from the main Dublin-Belfast road and three minutes' drive from the M1 motorway to Dublin. Dublin Airport is a 35 minute drive by car. Dundalk is served by the Dublin-Belfast Train corridor and Dundalk's Clarke Station is approximately a 20 minute walk from the campus.

DkIT has shown through its development and growth over the past 40 years that it is committed to bringing diversity and excellence to all of its academic pursuits. This has been achieved through significant capital investment in a state of the art campus and the development of a culture amongst its staff of the highest possible levels of attainment in teaching and research.

To date, the Institute has put particular emphasis on:

- ✦ enhancing access to educational opportunity;
- ✦ learning and teaching;
- ✦ growing research capacity that impacts directly on learning, teaching, knowledge transfer and regional economic development;
- ✦ working with regional and national partners on social, economic and cultural sustainability.

Over the past decade the Institute has positioned itself as one of the leading Institutes of Technology with an international reputation in terms of its research performance. The Institutes, multi-level suite of programmes provides for a regional, national and global university-level profile.

DkIT is committed to responding to the educational demands of school leavers and lifelong learners both in its region and nationally and supporting the wider economic, cultural and social objectives of the region with a particular focus on its border location. In doing this, it actively cultivates alliances and partnerships with community, public and private sector agencies,

throughout the region and on a cross-border basis, around a common agenda of local and regional development.

DkIT also has a strategic alliance with Dublin City University (DCU). The Memorandum of Understanding between the two higher learning institutions envisages strategic co-operation in areas such as academic programmes, learning and teaching, research, enterprise support, internationalisation and shared services.

At DkIT, you are offered the opportunity to build your qualifications over time, from Higher Certificate through to Degree, Masters and Doctorate level. The Institute is committed to ensuring that students are afforded the opportunity to develop their full potential in a professional and supportive environment. The college has four Schools, and each School has several Departments offering a wide range of courses. You can also study part-time at the Lifelong Learning Centre.

The four schools at DkIT are:

- * School of Business & Humanities
- * School of Engineering
- * School of Informatics & Creative Arts
- * School of Health & Science

Full-time Students	4520
Part-Time Students	409
Apprentices	195

Total Student Population 5124

International Students	959
Mature Students (23+)	488

In 2015 Students at DkIT came from the following counties

Co. Louth	40%
Co. Meath	15%
Co. Monaghan	10%
Co. Dublin	11%
Co. Cavan	5%
Northern Ireland	3%
Other	16%

Schools Liaison Office

Oifig Teagmhála Scoileanna

Open Day

Friday 16th October 2015
9.00am – 3.00pm

Open Information Morning

Saturday 17th October 2015
10.00am – 1.00pm

CAO & Course Information Morning

Saturday 16th January 2016
10.00am – 1.00pm

The Schools Liaison Office in Dundalk Institute of Technology is dedicated to the goal of assisting prospective students to make informed choices about their higher education pathways, while strengthening the links between DkIT and second level schools/ colleges. We offer information, advice and support to prospective students, their families, Guidance Counsellors, teachers, companies and the wider community across the northeast region.

Parent Evenings

DkIT can attend Parent Evening for students in 3rd year and Transition to advise them in making subject choices for Leaving Cert or for senior students, we can give parents information on the courses provided at Dundalk Institute of Technology and the possible careers these qualifications can provide their sons and daughters.

Parent/Teacher Meetings

DkIT Schools Liaison Office can provide an information stand at Parent/Teacher Meetings for senior classes. This provides parents an opportunity to speak with staff from DkIT on a one to one basis and answer any queries they may have.

Amongst the services we provide are:

School Visits

Institute representatives are delighted to visit schools and colleges throughout Ireland (North and South) and can provide either a General School Visit or a Specialised School Visit.

★ General School Visit

A visit that provides students with an overview of the Institute, its facilities and a brief summary of all our courses.

★ Specialised School Visit

A visit which can offer students an introduction to courses and careers in a specified subject area.

If you wish to request a school visit or require further information, please contact the Schools' Liaison Office (Via email: SchoolLiaison@dkit.ie).

Career Guidance/Counsellors Assist

The Schools Liaison Office can assist Career Guidance Counsellors by being on hand to answer your questions or queries on the CAO process and the courses provided at DkIT.

Careers' Exhibitions and Fairs

The Schools Liaison Office attends various exhibitions and fairs throughout the year including Higher Options in Dublin, the UCAS Fair in Belfast and a large number of School Careers Fairs.

Employer and Employee Talks

The Schools Liaison Office can provide talks for employer/employees in the industry wondering about higher education options at DkIT and or provide a speaker from the college to attend seminars etc.

Campus Visits – Taster Days

DkIT welcomes student visits throughout the year (by prior arrangement). Taster days particularly suit Transition Year and 5th Year students who want to get a gentle introduction into a subject-area and a campus visit. It gives students the chance to see lecture theatres and laboratories, as well as the Institute's sporting facilities and social areas. If you would like to bring students for a campus visit and/or taster day please contact the Schools Liaison Office (email: SchoolLiaison@dkit.ie).

Information Sessions - School Principals and Guidance Counsellors

Every year we run information sessions for school principals and guidance counsellors at our annual Open Day (Friday 16th October).

Open Days

Friday 16th October 2015 (9.00am – 3.00pm)

Saturday 17th October 2015 (10.00am – 1.00pm)

Our Open Days provide potential students and their families with a great opportunity to visit the Institute, discover more about going to college, immerse themselves in campus life, meet lecturers and current students, and find out more about what courses we have on offer and the facilities we have in DkIT.

On the day you will be able to:

- * Get advice on your chosen course
- * See exhibitions, stands and demonstrations
- * Talk to current students and lecturers
- * Talk to our support staff
- * Learn about the various Support Services we have available to students including Sports and Societies, Sports Scholarships, Work Placements and the Learning Support Centre
- * Discover your future career options
- * Hear about progression paths through to Postgraduate Level
- * Advice on entry criteria and applying
- * Learn more about Fees and Grants
- * Learn about Accommodation options
- * Tour the Campus

To register your interest in our Open Day or for further information please visit:
www.dkit.ie/thinkdkit/open-day

CAO and Course Information Morning

Saturday 17th January 2016 (10.00am – 1.00pm)

The morning is an opportunity for prospective students to find out more information on courses in DkIT as well as getting help and assistance with filling in their CAO application form. Information will also be available on our Disability Access Route, Mature Student Access Route and the various Support Services that are available.

The Admissions Officer and academic staff from all course areas will be present on the morning to answer any questions potential students may have on any particular courses.

College Life

Saol sa Cholaíste

College is not just about studying, lectures, assignments, project work and exams. College is a place to call home, it's about discovering new interests, and it's about communities, friendships and opportunities. We understand that going to college can be a challenging time. That's why the personal support offered in Dundalk Institute of Technology is second to none. Whether you need help settling in, guidance on achieving your potential, a reference for a job or just a friendly listening ear, there is always someone for you to talk to in DkIT. DkIT Student Support Services - Supporting Students to be Successful!

Student Support Services Seirbhísí Tacaíochta Mic Léinn

Students' Union Aontas Mic Léinn

All full-time registered students in Dundalk Institute of Technology are automatically members of the Students Union. The Students Union is the representative body for the students of DkIT. It is an organisation run by students to represent student views, protect their rights and provide the services that make college life run smoothly.

DkIT Students Union has three main aims:

- * To represent students views
- * To protect students' rights
- * To provide vital services for students

The Union also represents its members on college committees and to outside organisations as well as running major campaigns. There are two elected sabbatical officers who run the various aspects of the Union on a day-to-day basis along with other union staff. If you come to DkIT remember, it's Your Union, Your Voice, so get involved from day one!

Student Health Service Seirbhís Sláinte Mic Léinn

The Student Health Service within the Institute offers a professional confidential health and medical service. The health centre provides a full medical service and can advise on all health-related matters. The health service includes a free nursing service and a doctor attends the Institute each day at times which are published within the Institute.

Student Counselling Service Seirbhís Comhairleoireachta Mic Léinn

The counselling service is operated by one full-time and one part-time counsellor who are both fully trained counselling psychologists. The counsellors are trained in the art of listening and will encourage and support you to explore the issues and find the best options for you.

Some of the issues students often look for help with include: Isolation, Relationship difficulties, Loneliness, Sexuality / Sexual Identity, Sexual Abuse, Depression, Family Breakdown, Bereavement, Study Problems, and Concentration Difficulties. The counselling service is confidential and free for students within Dundalk Institute of Technology.

College Life

Chaplaincy Services Seirbhísí Séiplíneachta

The Chaplaincy provides pastoral care and responds to the personal needs of students in providing a faith presence in the Institute. The Institute's Quiet Room offers a space for quiet reflection, meditation and prayer. The Chaplaincy service is provided by a Roman Catholic Chaplain and visiting Church of Ireland and Presbyterian Ministers. Mass is provided daily during term-time in the Institute's Quiet Room.

Access Office Oifig Rochtana

The Access Officer promotes access to the Institute and co-ordinates support for groups that are under-represented in third level education. These groups include students from a background of socio-economic disadvantage, mature students, students from the traveller community and ethnic minorities. The Access office is also responsible for the coordination of the Institute's scholarships and bursaries programmes.

Further Information on the Access Office in DkIT can be found online at www.dkit.ie/access or by contacting the DkIT Access Officer, Eileen Lynch.

t +353 42 9370236 or **e** access@dkit.ie

Disability and Student Quality Míchumas agus Caighdeán Mic Léinn

The Institute provides support and advocates on behalf of any student with a physical, sensory or learning difficulty, or has a mental health condition that interferes with the learning process. The Disability and Student Quality Office works with students to ensure that their disability does not hinder them from achieving their full academic potential.

Further Information on the Disability and Student Quality Office in DkIT can be found online at

www.dkit.ie/student-quality or by contacting Ciara O'Shea.

t +353 42 9370237 or

e disability@dkit.ie

Student Learning and Development Centre Ionad Foghlama agus Forbartha Mic Léinn

The Student Learning and Development Centre in Dundalk Institute of Technology fulfils an important role in supporting students who wish to improve their academic and study skills.

The main aim of the Centre is to ease the transition to third level while improving retention rates. The purpose of the Centre is to provide a space where students feel comfortable about raising issues that may help them to study or learn more effectively. It helps build confidence and self-esteem, especially when mitigating circumstances arise. The type of support provided depends, primarily, on individual or group needs. Essentially it consists of individual and small group consultations with a learning skills adviser. In addition it provides workshops for all students, undergraduate and postgraduate alike, on a range of academic and study-related skills. Further Information on the Student Learning and Development Centre in DkIT can be found online at www.dkit.ie/sldc.

Careers Service Seirbhís Chairme

The Careers Service within Dundalk Institute of Technology supports students in all years and disciplines and recent graduates of the Institute in exploring their career interests, evaluating opportunities and effectively implementing their career and further study options. The Careers Service will work with students to achieve their realistic career ambitions.

We offer a menu of services, which are designed to address your specific needs. The following are some of the activities, resources and services available to you:

- * Research skills – exploring career options
- * Job Hunting Tools – CV preparation, Cover letter samples and reviews
- * Social Media – How to use LinkedIn, Facebook, YouTube, Slideshare and Twitter as part of your job hunt
- * Mock Interviews – practice sessions available before the real event
- * Assessment Centres – Information & advice
- * One-to-one guidance and support for students who are concerned about their programme choice
- * Company Presentations and interviews
- * Workshop Presentations – A series of career related topics are offered through a workshop presentation delivered by a member of the careers team
- * Access to the GradIreland Careers Fair and Postgraduate Studies Fair held annually in the RDS

Sport, Recreation, Clubs and Societies

Spórt, Caitheamh Aimsire, Clubanna agus Cumainn

While at Dundalk Institute of Technology, students have the opportunity to study towards their optimum career, to make new friends and to develop new skills that should stand to them for the rest of their lives. It is our hope in the DkIT Sports and Societies Office that all students are given the opportunity to participate in some form of extra-curricular activity. Whether they are interested in competitive sport or becoming a member of our many active societies, it is our aim to provide something for everyone.

There are over 60 active Sports and Societies available to students in DkIT, so if you come to the Institute make sure you get involved and get active and ensure your time at DkIT is a thoroughly enjoyable and a beneficial experience that will stay with you for many years after you graduate.

Sports Facilities

Áiseanna Spóirt

Dundalk Institute of Technology has facilities for a variety of sports within the campus, these include:

* **DkIT Sports Complex**

A state of the art leisure complex for students where you can swim, train, play ball or relax. For a DkIT facilities charge of just €125 per year, students will enjoy a wide range of facilities close to the DkIT campus:

- * A fully equipped gym
- * A 20m swimming pool
- * Steam Room & Jacuzzi
- * 10 indoor football pitches
- * 450 parking spaces

DkIT Sport is one of the best kitted out gyms in Ireland. The team training strength and conditioning facility design is based on facilities used by professional teams all over Europe and teams will be train in this contemporary environment.

* **Faulkner Hall (MPC)**

The Faulkner Hall is a multi-purpose centre used for indoor activities. It is used for both class activities and also for many of the sports clubs and societies within DkIT. The hall holds four badminton courts, volleyball court, basketball courts and a futsal court. As well as catering for all indoor games, the Faulkner Hall has a seating capacity for 250 spectators and hosts various competitions and shows throughout the year.

* **Outdoor Playing Fields**

The multi-functional playing fields cater for all the main sports, Gaelic Football, Hurling, Soccer, Rugby and Athletics.

The jogging facility is widely used by both staff and students alike and runs along the perimeter of the playing fields and is approximately 1 mile in distance.

* **Slí na Sláinte Walking Route**

The Slí na Sláinte Walking Route measures 2km in distance and comprises of a series of motivational signs along the route to inform people of the benefits of physical activity and also inform them of the distance they have walked at different stages.

The Institute also has access to many local facilities in the area, which are used by students on a regular basis, these include:

- * Muirhevna Mor Sports Complex;
- * O'Faich Institute of Further Education College Gym;
- * Hoey's Lane Pitch and Putt;
- * Dundalk Golf Course;
- * Dundalk Swimming Pool and Leisure Centre *Aura*;
- * Carrickmacross Equestrian Centre;
- * Louth GAA Centre of Excellence *Darver*;
- * Felda Health Fitness and Spa;
- * Dundalk Football Club *Oriel Park*;
- * Dundalk Cricket Club.

Fun from A-Z Spraoi ó A-Z

Sports Scholarships at DkIT

Scoláireachtaí Spóirt in ITDD

Sport Scholarships are intended for persons of outstanding sporting ability. The vision of the DkIT Sports Scholarship Programme is to focus on developing our top athletes so that they are in a position to achieve sporting success and development, during and after their time at Dundalk Institute of Technology.

DkIT is currently working with various organisations to develop the Sport Scholarship Programme within the College, so as to provide a number of benefits to help students achieve at both sporting and academic levels. The scheme is developed to offer recipients a comprehensive package including:

Academic Mentoring Support

- * Study support skills

Sports Science Support

- * Performance planning and analysis
- * Fitness testing
- * Strength and conditioning programme
- * Nutrition
- * Psychology
- * Physiotherapy

Free Use of Facilities

- * Fitness Suite
- * Multi-purpose Centre
- * Outdoor pitches

Free Sports Clothing

- * Branded and Specialist Sports Scholarship Training and Leisure Gear

Currently the following Sports Scholarships schemes are available:

- * DkIT and Dundalk F.C. Soccer Scholarship
- * DkIT and Drogheda United F.C. Soccer Scholarship
- * DkIT and Louth GAA Scholarship
- * DkIT GAA Scholarship
- * General Elite Athlete Sports Scholarship

DkIT and Dundalk FC Soccer Scholarship

This initiative is aimed at those candidates who wish to pursue a full-time third level education whilst simultaneously pursuing a professional soccer playing career at the highest level in Ireland. Candidates for this scholarship must be attached to Dundalk FC.

The minimum soccer achievement level that must be demonstrated by applicants includes:

- * Currently playing at 'Airtricity League of Ireland U19' Level
- * Currently or previously playing 'Airtricity League of Ireland' or equivalent. (Mature or very good younger players)

- * Is currently or has previously represented their country at underage level.

The proposed standard to meet the scholarship criteria will be that the candidate has demonstrated the potential to play at a high level, i.e. 'Airtricity League of Ireland' level with the object and potential of progressing to full 'Airtricity League of Ireland' level. **Applications will close April 2016.**

General Elite Athlete Sports Scholarship

This initiative is aimed at those candidates who wish to pursue a full-time third level education whilst simultaneously pursuing a sporting career at the highest level of their chosen sport (eg Athletics, Basketball, Rugby, Soccer etc).

Applications will close in April 2016.

Sports Scholarship Recipient

I am currently studying z (Honours) in Marketing in Dundalk Institute of Technology, and I play for the Men's Soccer team at the college. I am a squad member at Dundalk F.C and was part of the league winning team in 2014. I have just recently signed for Warrenpoint Town F.C who play in the Irish league.

I have played previously for Rock Celtic F.C and St. Kevin's Boys F.C in Dublin. This year I was selected for the Irish University soccer squad for the World University games in Gwangju, South Korea. The DkIT Sport Scholarship has been a huge help to both myself, in regards to being able to continue playing my sport at a high standard whilst at college and my parents, who were helped hugely by the financial aid the scholarship provides. I have benefitted greatly from the sports science support and I hope to use the new state of the art DkIT Sport facility to further improve as a player.

Conor McDonald
Men's Soccer Team

Additional Services

Seirbhísí Breise

Computing Services / Seirbhísí Ríomhaireachta

Dundalk Institute of Technology Computing Services provide a state-of-the-art IT service for students on campus. Computing facilities in the institute are modern and constantly upgraded to ensure students and staff are well equipped with the IT skills they will need in our College environment.

We provide services such as:

- * IT Technical Support
- * Network Management Services
- * Student Email
- * Computer Accounts and Virtual Desktops
- * Student Wireless access (Wi-Fi)
- * Web for Student
- * Public access PCs and Apple Computers
- * Printing services
- * Moodle – DkIT's online e-learning platform

For more information on these services check out our webpage: www.dkit.ie/comperv.

College Services / Seirbhísí an Cholaíste

All students' stationery and study requirements are provided by College Services. The main facilities are:

Campus Shop

You can get your stationery, text books, class manuals, newspapers (all at student rate), mobile top-up's and past exam papers here.

Photocopying

Students printing and photocopying machines are located throughout the campus, including the library where you can print /copy in both black and white and in colour.

Binding

Presentation material, as well as a binding service is also available in the Shop. Here you can also avail of a laminating service.

Student Lockers

Secure lockers are available for short-term and long-term rental. Rental is arranged through the Campus Shop.

Student Accommodation / Cóiríochtaí Mic Léinn

Purpose-built student apartments, with spaces for approx 550 students are a short walk from the main campus. There is also a large supply of newly built apartments and houses, suitable for renting, beside the Dundalk Institute of Technology campus. Students can also choose to avail of 'digs' with families. Further details on accommodation services can be obtained from the Students' Union Accommodation Service.

t +353 42 9370 390 **w** www.dkitsu.ie

Canteen Services / Seirbhísí Ceaintín

We have six restaurants and canteen facilities available at a number of locations throughout the campus, offering students an excellent range of quality food at prices to suit all pockets. The facilities include a main Campus Restaurant which can accommodate up to 500 dinners, a Costa Coffee Shop and a Starbucks Coffee Shop. All facilities offer Fair-trade Coffee, Tea and other Fair-trade products as well as nutritious food choices.

Student Common Room / Seomra Caidrimh na Mac Léinn

The Student Common Room provides students with an exciting and attractive interaction area which has become a very popular place for students to meet and socialise. The student common room includes comfortable furniture, internet access, Plasma TVs, vending facilities, four pool tables and a deli and hot food facility 'The Snack Box'.

Banking Services / Seirbhísí Baincéireachta

All of the main banks have branches in Dundalk. AIB operates an on-campus banking service. An ATM facility is also available in the Institute in the Faulkner Building.

Welcome to the Library of Dundalk Institute of Technology

The Library plays a central role in the academic life of the Institute. It facilitates access to the learning resources you will need for your studies. Dundalk Institute of Technology Library provides 400 study places, over 50,000 books and journals, access to online information resources and a range of services. The Library supports the learning culture and practices of the Institute and endeavours to provide a high quality learning environment.

Most areas of the Library are designated for quiet study. Collaborative areas are available in

all the Library Group Work rooms and in the Group Work areas on the open floor. The Library operates a 'whisper policy' at certain times of year in answer to student demand.

You can access many services, locate information and manage your DkIT Library account online at www.dkit.ie/library. From this site you can find out what books the Library holds, what online information resources are available to you and information on all our Library services.

The Library offers training courses throughout the year to help you make the most effective use of our resources and services. Library staff are available to help and advise you on finding the best resources for your academic research.

Access to the Library and its services is available once you register with the Institute. Your student ID card is also your library card. It is important to bring your student ID as you may need it when entering the Library.

Fáilte chuig Leabharlann Institiúid Teicneolaíochta Dhún Dealgan

Tá ról lárnach i saol acadúil na hInstitiúide ag an Leabharlann. Cuirtear ar fáil anseo na hacmhainní foghlama riachtanach don staidéar. Seachadann Leabharlann ITDD 400 láthair staidéir, thar 50,000 leabhar agus irisleabhar, rochtain ar acmhainní faisnéise ar líne agus réimse seirbhísí. Tacaíonn an Leabharlann le cultúr agus cleachtais foghlama na hInstitiúide agus cuirtear ar fáil timpeallacht foghlama ar ardchaighdeán.

Tá formhór na Leabharlainne sainithe do staidéar ciúin. Tá limistéir comhoibríocha ar fáil i seomraí Obair Ghrúpa na

Leabharlainne agus ins an limistéar Obair Ghrúpa ceantair ar an urlár oscailte. Oibríonn an Leabharlann 'polasai cogar' ag amanna áirithe den bhliain mar fhreagra ar éileamh na mac léinn.

Tú is féidir teacht tríd ar líne ag www.dkit.ie/library. Ar mhórán seirbhísí, eolas a aimsiú agus do chuntas leabharlainne a bhainistiú. Ón suíomh seo aimseoidh tú na leabhair atá sa Leabharlann, na hacmhainní faisnéise ar líne agus eolas faoi sheirbhísí uile na Leabharlainne.

Cuireann an Leabharlann cúrsaí traenála ar siúl i rith na bliana chun cabhrú le húsáid éifeachtach a bhaint as na hacmhainní agus seirbhísí. Bíonn foireann na Leabharlainne ar fáil le cabhair agus comhairle a thabhairt ar na hacmhainní is fearr a aimsiú don taighde acadúil.

Tá fáil ar an Leabharlann agus a seirbhísí chomh luath agus a chláraíonn tú leis an Institiúid. Is é do chárta Mic Léinn do chárta leabharlainne freisin. Tá sé tábhachtach a thabhairt do ID mac léinn mar b'fhéidir go mbeadh ort é nuair ag dul isteach ar an Leabharlann.

DECISIONS

The Work Placement Office @ DkIT

Oifig Socrúcháin Oibre @ DkIT

Work placement in essence is learning in real time; helping you to develop the right skills, knowledge and attitude for your future employment. For a learning experience that introduces the reality of the professional working environment, there is no better opportunity than a built-in work placement to your programme of study.

By both supporting and challenging your working style and strengths, work placement creates linkages between course learning and the workplace and crucially enhances your future employability. It is learning that lasts. Many of our programmes at Dundalk Institute of Technology offer a formal work placement as part of your studies.

The Placement Office manages the work placement modules within the Schools of Business & Humanities, Health & Science and Section of Creative Media - Coordinating the work placements of approximately 600 students per year. The Office has developed valuable linkages with a wide range of industries across the academic disciplines, throughout Ireland and abroad. We are the point of contact between you as student, the host organisation, and the Institute in relation to the preparation, management and on-going development of work placement. We work to ensure that work placement is a mutually beneficial relationship where you are afforded a unique learning experience and organisations are provided with a student who contributes to the benefit of the workplace.

How does it work?

Conas a oibríonn sé?

Each placement programme has a dedicated Placement Officer who works in conjunction with the academic team to ensure that you secure a placement that will support your learning requirements and nurture your professional development.

All work placements are officially approved by the Placement Office and primarily involves the process of CV selection and competitive interview, but can also be secured by direct matching. The process is determined by the host organisation.

Support services of the Placement Office include / Áirítear i seirbhísí tacaíochta na hOifige Socrúcháin

- * Central contact and information point for all parties involved in student placement;
- * Preparation Workshops for students – Personal and professional skills profiling, CV and interview preparation;
- * Follow-up One-to-One student support and guidance;
- * Developing linkages with employers and host organisations;
- * Providing information and resource packs for students, host organisations and academic staff relevant to each specific placement programme;
- * Feedback from placement experience to improve the process and to inform course development.

International Opportunities at DkIT

Hello, Dia Duit, Witaj, Laba Diena, Sveiki, Hola, Namaste, Guten Tag, Bonjour, Ciao, Selamat Datang, Hallo. Just some of the languages you hear every day on campus at Dundalk Institute of Technology! All international students are assured of a warm welcome and the many languages heard on campus make it an interesting place to meet new people and learn about new cultures.

Some of the many countries our DkIT international students are from:

- | | |
|-------------|-----------------|
| * Brazil | * Malaysia |
| * China | * Nepal |
| * Denmark | * Nigeria |
| * Estonia | * Norway |
| * Finland | * Oman |
| * France | * Portugal |
| * Germany | * Saudi Arabia |
| * India | * Spain |
| * Indonesia | * Sweden |
| * Japan | * United States |
| * Korea | of America |
| * Lithuania | * Vietnam |

There are 600 International and Erasmus exchange Students studying at DkIT this year. Students can select from a broad range of programmes at undergraduate and postgraduate level. The Institute also offers an International Foundation Programme, for students preparing for undergraduate study.

Academic and Pastoral Supports to international students include:

- * Assistance with accommodation
- * International Welcome Days on arrival
- * Airport Collection on Arrival
- * Assistance with visa applications and GNIB

- * Assistance with study and traineeships abroad
- * Medical and Counselling Supports
- * International Social Events
- * English Language Support
- * Mandarin native-speaker International Administrator
- * Out-of-Hours Emergency Support

Free Accommodation Scholarship

Full-time, self-funding undergraduate students commencing Year 1 of a programme are offered a free accommodation scholarship for the first three years of the undergraduate programme. The scholarship covers accommodation rental for the academic year, on the basis of ensuite, twin-share accommodation in a purpose-built hall-of-residence close to the campus.

Tuition Scholarships

Details of tuition scholarships are available from DkIT International Office.

ESN International Society

The International Society (ESN) warmly welcomes all international students. The Society is made up of international students from all

over the world, and is a great way to meet other international and exchange students, and take part in cultural and social events!

International Students feature prominently as frequent Winners at the Institute's annual Clubs and Societies Awards Night!

The Erasmus+ Programme

Dundalk Institute of Technology participates in the Erasmus+ exchange programme, which is the EU's flagship programme for study and traineeships abroad. It also offers short-term mobility opportunities for staff.

DkIT has participated in the Erasmus+ programme for 25 years. The opportunity to work and study in another country is a defining experience that gives students the chance to learn about new cultures, make new friends, and acquire skills to enhance personal and professional development. Scores of DkIT students have taken advantage of the opportunity to undertake part of their studies abroad at one of our partner

colleges. Many of them tell us after graduation that study abroad was the best time of their life!

DkIT has been awarded the Erasmus+ University Charter (2014 – 2020), which guarantees high standards of organisation of student and staff mobility. The International Office works hand-in-hand with students going abroad to make the study or traineeships experience abroad as seamless and rewarding as possible.

Most programmes at DkIT offer the opportunity to go on study, or traineeship abroad for a minimum of 8 weeks, up to a maximum of one year.

Students can study abroad through English. Students taking French, or Spanish as part of their programme at DkIT, study through the target language in France or Spain.

For more information on the International Office in DkIT email erasmus@dkit.ie or visit:

www.dkit.ie/international

General Requirements for Study Abroad

- * To be eligible to go abroad, Dundalk Institute of Technology students must first of all achieve the required standard in their DkIT examinations;
- * Where study abroad is optional on a DkIT programme, students must successfully complete their stage examinations;
- * Students applying for study abroad must be nominated first by their Programme Coordinator, or Head of Department;
- * Students must register in the usual way at DkIT and pay the standard registration fees, prior to going abroad to study;
- * Students are not required to pay tuition fees at the partner college;
- * Students pay their own travel costs and living expenses while abroad;
- * An Erasmus mobility grant can be applied for to DkIT International Office. Entitlement to the grant is dependent on available EU funding;
- * Erasmus funding is not available for study or work placement outside of the EU (unless in limited cases, where International Credit Mobility funding is in place);
- * Participation in a Cultural Preparation Workshop at DkIT is mandatory prior to going abroad;
- * Study abroad for a full academic year is a requirement on the Bachelor of Business (Honours) in Marketing;
- * Outbound Erasmus students from the Department of Business Studies are required to participate in an Erasmus Return Day in September to share their experience of the Erasmus programme.

Graduate Profiles

Dan Li

Civil Engineering

“

I came to DkIT on a Foundation Programme and then went on to study Civil Engineering. I have just finished my studies at DkIT and will study for a Masters in Engineering in the University of Birmingham in September.

It's been a great experience studying at DkIT. I lived in a hall-of-residence at the start and then lived with European students in a rented house. I joined The Young Engineers Society and the Basketball Club at DkIT. Societies were a great way to meet new people.

”

Graduate Profiles

Jie Ying Huang
MBS

“

I came to DkIT to do a Higher Diploma at DkIT in Business in 2012 and went on to do an MBS in Entrepreneurship and Marketing the following year.

DkIT was a great place to study. Lecturers were professional and willing to help.

I am working in National Pen in Dundalk since 2015. I'm enjoying learning more about the local business culture and getting to know new people from all over the world

”

Sustainability at DkIT

Inbhuanaitheacht in ITDD

One of the aims of Dundalk Institute of Technology's new Strategic Plan is to cultivate graduates who understand and can apply the principles of Sustainable Development. Sustainable Development suggests a way of thinking that sees the connections between social, economic and environmental impacts and which aims to ensure that development meets the needs of the present without compromising the ability of future generations to meet their own needs.

This ambition means that in DkIT work is being done to build Sustainable Development into the curriculum and academic work and into the way the College itself operates.

The College is also a Green Campus as recognised by An Taisce in recognition for its work promoting waste reduction and elimination, green transport and biodiversity.

We are also working to demonstrate what Sustainable Development looks like in our day-to-day work. Current initiatives include:

- * Attaining an Taisce's Green Flag award;
- * A Fairtrade Campus;
- * Reducing waste on campus;
- * Promotion of green and sustainable transport;
- * Using the Wind Turbine on campus to meet about 30% of our energy needs;
- * Green Campus Tour;
- * Discussion Groups and a Speaker Series on aspects of Sustainable Development;
- * Raised beds for growing food on campus.

The College invites students who are interested in these issues to get involved in the activities of the Green Campus Group which is chaired by a Student Leader.

At DkIT you will get to be part of sustainability in action and will have an opportunity to develop your knowledge and skills in this area. More and more employers and organisations recognise that we need a new way of thinking about development, so your experience in DkIT will be of enormous benefit to your personal and working life.

Extensive Recycling Programme

The Institute recycles 60% waste, 27% dry recyclables, and 14% compost. Paper, cardboard, floppy disks, aluminium cans, plastic bottles, glass, copper pipe and copper wire, steel, printer cartridges, batteries, and cooking oil are all recycled.

Wind-Energy Generation

Approximately 30% of electricity in DkIT is generated from the Institute Wind Turbine, saving about 900 tonnes of CO₂ emission every year.

Ice Bank

Integration of an Ice Bank into the newly renovated Carroll Building, reduces the need for expensive air conditioning and cooling.

CANDI (Computer-Automated-Nightly-Shut Down Initiative)

PCs on campus are shut down every night at 10.00 pm, resulting in a 60% reduction in energy consumption. The automatic shutoff not only saves power, but also extends the useful life of each pc, thereby reducing the equipment replacement costs and DkIT's carbon footprint.

Fairtrade

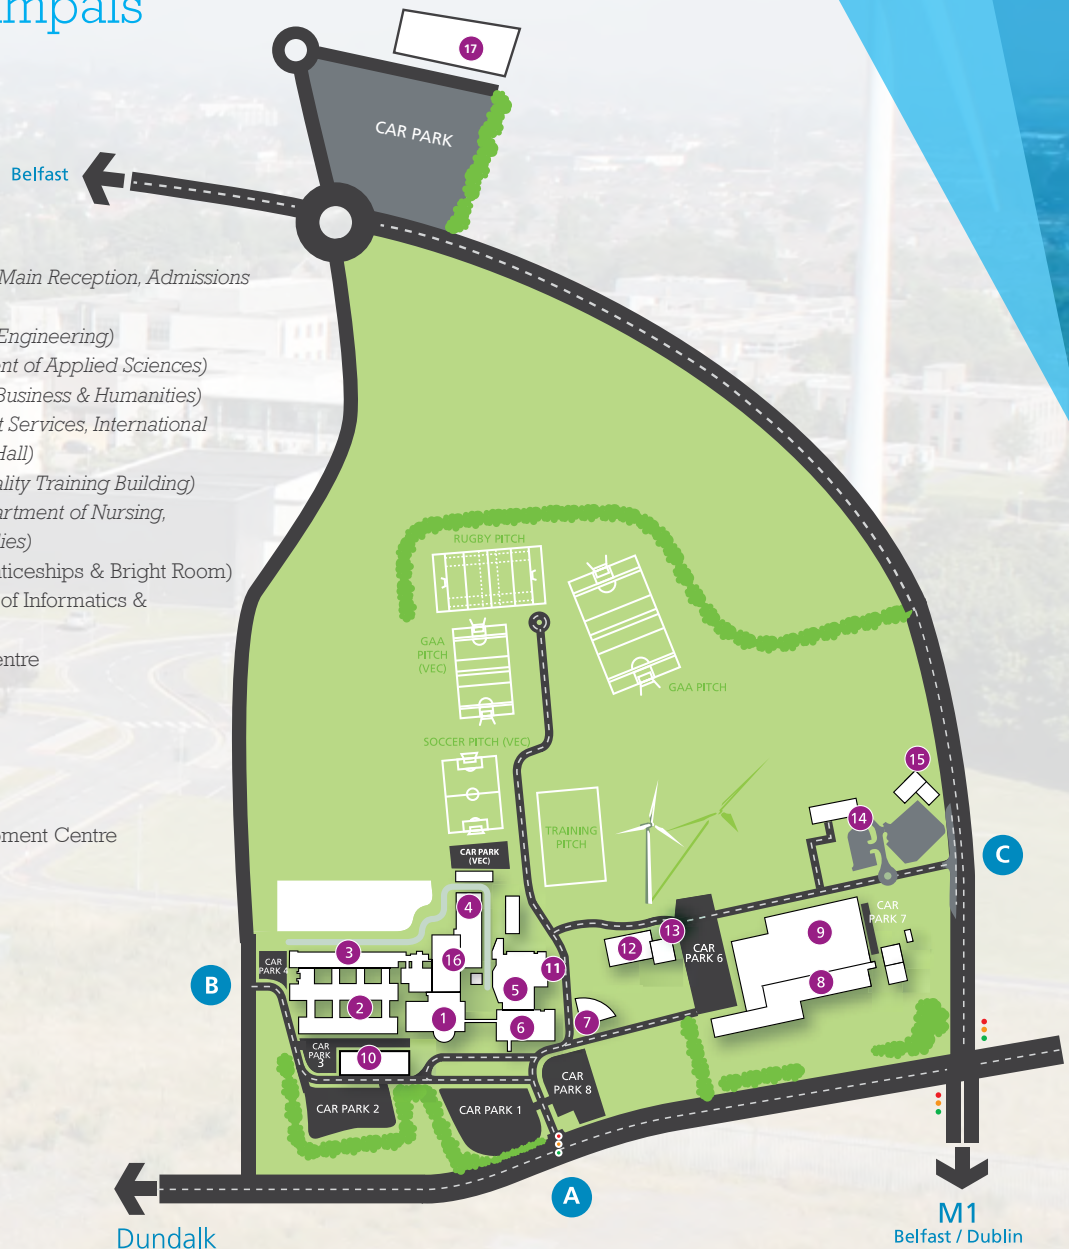

DkIT proudly supports Fairtrade – we serve 100% Fairtrade certified coffee, tea and sugar in all outlets. We are the first Fairtrade organisation in the North East - there are no other towns, villages, parishes or organisations with Fairtrade status in the North East Region.

For other information on sustainability projects in DkIT visit www.dkit.ie/sustainable or check out our Facebook page www.facebook.com/DkITGreenCampus.

Car Sharing to DkIT Ag Comhroinnt Cairr go ITDD

A website for staff and students of DkIT has been established to promote car sharing. The site encourages car sharing in an informal and easy way among staff and students who are travelling the same route. Your DkIT email address is needed for login. The site can be found at www.carsharing.ie/dkit.

Driving to DkIT Ag tiomáint go ITDD

* From Dublin

Follow the M1, direction north towards Belfast. Leave the M1 at junction 16 (signposted Ardee, Dundalk South). At roundabout take the third exit onto Eastern Bypass Road - N52 (signposted Dundalk), continue along the N52 through a set of traffic lights, heading towards Dundalk. Go through roundabout, taking first exit and when you reach Dundalk turn left at XEROX junction (first set of traffic light). DkIT is half a mile along on the right hand side.

* From Belfast and Newry

Follow the M1 heading to Dublin. Leave the M1 at junction 16 (signposted Ardee, Dundalk South). Then at roundabout take the first exit. When you reach Dundalk turn left at XEROX junction (first set of traffic light). DkIT is half a mile along on the right hand side.

Transport

www.dkit.ie/about/directions

College GPS Co-ordinates:

Latitude: 53.98404

Longitude: -6.39527

Please Note:

If you are coming by car please note that DkIT operates a pay and display parking system. Car Parks 2, 3, 4, 5, 6 and 7 all operate on pay and display. Car Parks 1 and 8 are reserved for DkIT staff only, while Car Park 9 is free for all DkIT Students and Staff (See Campus Guide – Page 33).

Please be aware that your car might be clamped if your car is not parked in a designated car parking space or if you park your car without a valid permit and or parking ticket. The charge at present is set at 30 cent per hour, two euro per day or eight euro per week. The payment of a daily or weekly rate does not guarantee a parking space.

Regional Development Centre

Ionad Forbartha Réigiúnach

Established in 1989 by Dundalk Institute of Technology, the Regional Development Centre acts as the Institute's Innovation Support and Technology Transfer organisation making available the expertise, facilities and resources of the Institute for the wider benefit of the regional economy.

The Centre achieves this by providing:

Business Development Support Services aimed at Innovative Graduate Led Start-up Enterprise

The supports offered are provided through the following programmes:

- * Business Viability Assessment (for early stage concept testing);
- * Enterprise Development (to develop the idea into a business plan for investment and implementation);
- * Incubation support (to launch the business, conduct product and process development R&D and develop the customer base);
- * Graduator support (where the business is consolidating and trading).

Knowledge Transfer Services

Knowledge Transfer Services aimed at established enterprises and external organisations. These services include:

- * Innovation support services;
- * Business growth and transition
- * Sectorial support (e.g. digital media, renewable energy);
- * Applied Research that links organisational R&D needs with the Research expertise of the Institute;
- * Consultancy and Advisory services of a customised nature.

Support for the Commercialisation of Institute Intellectual Property

This service is aimed at identifying, protecting and exploiting IP developed through the Institutes research activities. The services include:

- * Auditing Commercialisation potential;
- * Provision of IP protection advice and access to specialist advice and financial support programmes;
- * Commercialisation services and partnering opportunities.

Special Development Projects of a Strategic Nature

Undertaken on behalf of the Institute and in partnership with external partners and agencies.

The Centre provides both on and off campus based incubation facilities at the Regional Development Centre and at Millmount in Drogheda to accommodate start-up technology or knowledge based businesses in their early developmental phases. The Centre also provides a range of entrepreneurial development programmes.

Incubation Support Programme

Through an array of supports, dedicated staff and an inspiring environment incubation at the RDC will help develop your repeatable, scalable and sustainable business model.

* Hosting knowledge intensive enterprises

Innovation, research and development

* Proactive incubation centre manager

Working for you and your business needs

* Brokering access to applied research

Business, engineering, ICT and creative sectors, health, aging, energy and the environment

New Frontiers Entrepreneur Development

This is a new national programme funded and coordinated by Enterprise Ireland and delivered locally by thirteen Institutes of Technology including Dundalk Institute of Technology.

The New Frontiers programme targets high-potential entrepreneurs with the commitment and capability required to develop and deliver sustainable businesses. The programme delivers comprehensive training and practical supports to equip participants to successfully start-up, manage and grow a new business.

The programme is delivered in three phases. Phase 1 and 2 are delivered as a partnership between DkIT and Dublin City

University (DCU). The third phase of the programme is delivered in partnership between DkIT, DCU and Cork Institute of Technology.

Phase 1 is a 6-week part-time programme which assesses the viability of the business idea and the entrepreneurial capabilities of the promoter. The participants benefit from workshops on the business value proposition, market research and validation, sales training and financial management.

Phase 2 participants receive financial support of €15,000.00 from Enterprise Ireland. They also access hot-desking space at the Regional Development Centre and at Invent in DCU, as well as mentoring and access to networking opportunities with potential investors.

Phase 3 focuses on assisting the business enter international markets and to acquire the first customers. Up to 8 participants participate in this phase.

Student Enterprise@DkIT

Student Enterprise@DkIT has been a successful initiative of the Institute, managed by the Regional Development Centre (RDC), since 2007. The objective of the initiative is to promote and encourage an enterprising culture within the student community.

Student Enterprise@DkIT stimulates, educates, facilitates and creates enterprising individuals with the skills to contribute positively to the Irish economy. These individuals may contribute by starting their own businesses or take the role of intrapreneur and use their talents to make an impact in existing organisations. Being enterprising is much more than a grasp of good business know-how and experience; it is a way of thinking and behaving in every part of our daily lives. It is the entrepreneurial instinct combined with key skills in communication, networking, problem solving, risk-taking, etc. that makes us enterprising. The programme achieves this shift in mind-set by allowing students discover and practice their enterprising skills in a safe or low risk environment and in a social setting. To facilitate this process DkIT has, since 2007, appointed Student Enterprise Interns. Currently DkIT have a Student Enterprise Intern embedded in each of the Schools who support both the campus wide and school focused enterprise agenda at DkIT (each for a two year period) while studying for a Master's degree, awarded by scholarship from the President of the Institute.

More information on the Student Enterprise Internship Programme in DkIT can be found on their Facebook page: www.facebook.com/dkitstudententerprise

Lifelong Learning Centre

Ionad um Fhoghlaim ar Feadh an tSaoil

Established in 2000 the Lifelong Learning Centre co-ordinates over fifty flexible part-time professional development and lifelong learning programmes. These programmes are particularly suitable for those who wish to study new topics and course areas, update their professional skills or add to their qualifications. Accredited courses are offered in the areas of Business & Accountancy, Humanities, Engineering, Computing & Creative Arts and Health & Science. Non-accredited courses and customised programmes for industry are also available. The Lifelong Learning Centre is located adjacent to the main Institute Reception and provides information and support services to DkIT's part-time students.

Customised Training

The Lifelong Learning Centre welcomes enquiries from Training Managers in companies, public bodies, state agencies, local development organisations or voluntary bodies. We are open to providing delivery of our courses to their staff or to assist them with other training requirements. Delivery of courses can be adapted to meet company circumstances or a new course delivered where there is sufficient demand. These courses may be conducted on site or at the Institute.

Enrolment and Information Evening

The Lifelong Learning Centre's Autumn Part-time Courses Information Evening will be held in the Institute's Hospitality Building on the second Tuesday in September between 7.00pm and 8.30pm. During this Information Evening you will be able to discuss your course options in detail with Lifelong Learning Centre staff and course lecturers. Further information on our Part-time Courses Information Evening will be published in local newspapers and broadcast on local radio during Aug and Sept.

Part-Time Courses Prospectus

Copies of Dundalk Institute of Technology's Part-Time Courses Prospectus may be downloaded from www.learn.ie/publications. Alternatively email the Life Long Learning at parttime@dkit.ie to request a copy.

How to Enrol?

Registration for a Lifelong Learning course at Dundalk Institute of Technology couldn't be easier. It may be done by calling to our office in person or by submitting your application form and fee by post or fax. You can also choose to attend our Information Evening in September or easiest of all, enrol online at www.learn.ie.

Early registration is advisable as the number of places on many courses is limited. Applications will be dealt with in order of receipt of completed application form and appropriate fee.

*Management and Administration
IUT Le Havre, France*

“

My studies at IUT Le Havre helped me improve my French a lot. I have a better understanding of French and I discovered so much about French culture and way of life.

I was doing 10 subjects at the start which was a lot, but it meant I had to learn how to manage my time better, and focus harder, as classes were all through French.

At the end of my studies there, I did a 10 week work experience in Auchan Mont Gaillard in Le Havre, a huge commercial shopping centre. This experience helped me apply my marketing knowledge and also taught me that I am able to communicate in French and that I can work well under pressure and succeed.

I am so happy that I went on Erasmus, because it has helped me to view things differently. It has taught me to believe in myself and has developed my confidence. It's taught me that anything is possible if you work hard.

I would encourage students who want to get involved on an Erasmus programme to just go for it! It is an unforgettable experience!

”

Strategic alliance with Dublin City University (DCU)

Since their foundation, both Dublin City University (DCU) and DkIT have placed service to Irish society and its economy at the core of their missions. Through national and global engagement, they both deliver on this mission using the key drivers of teaching, research, knowledge transfer and enterprise and innovation for all of the citizens that they serve. These goals unify both Institutions and in July 2012, a Memorandum of Understanding was signed to establish a Strategic Alliance which is based on their shared outlook and history of mutual cooperation.

Since the formalisation of the Alliance in 2012 two important research and innovation milestones have been achieved:

- * In September 2014 the DCU-DkIT Graduate School was created to ensure the enhancement of the structured PhD provision in the Institute whilst sustaining current and emerging research collaborations between the colleges.
- * The partnership between the Institutes Regional Development Centre (RDC) and the Invent Centre at DCU in the area of technology transfer through Enterprise Ireland's Technology Transfer Strengthening Initiative (TTSI 2).

The Graduate Studies Office is aligned to the DkIT's Research Office and is led by the Head of Research and Graduate Studies, Dr Tim McCormac. The Graduate Studies Office supports the development and delivery of research and taught postgraduate programmes across the Institute and provides a range of support services for its graduate students.

Both DCU and DkIT are committed to a research agenda which delivers tangible societal and economic benefit and that addresses current global challenges. The creation of the DCU-DkIT Graduate School will support DkIT's ambitious research agenda and ensure greater access and progression opportunities for all learners, from all backgrounds. DkIT students can now benefit from the breadth of expertise and research activities undertaken by DCU and students who wish to pursue a Masters' Degree or a PhD by research can do so in DkIT and receive a DCU accredited award through the DCU-DkIT Graduate School framework.

Postgraduate Courses

Iarchéime Cúrsaí

New directions are emerging in postgraduate studies with an increasing number of taught and research-based postgraduate programmes now available. The greatest difference between our taught and research-based postgraduate programmes is the level of responsibility you as the student has to take on. There is much greater responsibility on students carrying out research programmes, as each programme is individually tailored.

Our taught Masters Degrees and graduate Diplomas are typically full-time over one year, with opportunities in some instances to take a programme over two years on a part-time basis.

Research Opportunities

Dundalk Institute of Technology offers outstanding students the opportunity to pursue advanced research leading to Masters or Ph.D qualifications. Over the past decade DkIT has positioned itself as one of the leading Institutes of Technology, whose researchers carry out research of both a basic and applied nature. The research agenda at DkIT is embedded within an innovation and entrepreneurial ecosystem with a strong emphasis on research which has real societal and economic impact and which addresses current global challenges. The Institute has consolidated and concentrated its research into key thematic areas through the formation of 'Research Clusters' in which the Institute possesses real international reputation and presence.

The three thematic areas are:

- * ICT, Health and Ageing
- * Energy and Environment
- * Creative Arts

These Research Clusters are comprised of six Research Centres, and three Research Groups which are embedded across the Institutes academic schools. The Research Centres and Groups all share the required critical mass of research which is interdisciplinary and translational with world class researchers whose outputs are internationally benchmarked.

For more information on Research opportunities please contact:

Taught Postgraduate Programmes

School of Business and Humanities

* **MBS in Entrepreneurship and Marketing**

The overall aim of the Master of Business Studies taught programme is to expose programme participants to the latest thinking and practice across a wide range of entrepreneurship and marketing disciplines.

www.dkit.ie/programmes/mbs-entrepreneurship-marketing

School of Engineering

* **MSc in Renewable Energy Systems**

The Master of Science in Renewable Energy Systems critically investigates energy and, crucially, renewable energy. The programme focuses on the technical and economic aspects of wind, solar, ocean and biomass resources and technologies.

www.dkit.ie/electronic-mechanical-engineering/courses/master-science-renewable-energy-systems

School of Informatics and Creative Arts

* **MA in Traditional Music Studies**

This unique, online taught Masters' Degree is rooted in Irish Traditional music but explores outwards into other neighbouring traditions. The course combines academic research, performance practice and the latest technological methods to explore the musical, social and historical dimensions of the folk music traditions of many areas of Europe including Ireland, Scotland, Brittany and Scandinavia.

www.dkit.ie/music/courses/master-arts-traditional-music-taught

* **MA / MSc in Music Technology**

Designed for graduates seeking to combine technological competence with musical creativity and is a response to the increasing demand from Artists, Scientists, Educationalists, and the wider music industry, and the wider music industry, and digital media sector, for courses which bridge the traditionally perceived Arts-Science divide to produce graduates conversant in both new technologies and their creative application.

www.dkit.ie/music/courses/master-artsmaster-science-music-technology-taught

* **MSc in Computing**

The aim of this taught Masters Degree programme is to produce graduates with an advanced level of theoretical knowledge and practice, with highly developed research capability, innovation and entrepreneurial skills to enable their professional development in the IT industry.

www.dkit.ie/programmes/master-science-computing-taught-programme

School of Health and Science

* MSc Ageing Health and Environment

The programme philosophy stems from the beliefs that ageing is a positive life event and that older people benefit when communities and older people services are designed to be age-friendly. Older people are affected in many ways by how and where they live. Their ability to participate in the social, economic and cultural life of a community or residential care setting and their physical and psychological health and well-being are determined by the environment in which they live.

www.dkit.ie/programmes/masterspostgraduate-diplomacertificate-ageing-health-environment

* MSc Agricultural Biotechnology

The aim of this programme is to produce graduates with a deep knowledge, understanding and experience of the use and potential of biotechnology in Agriculture, including animal genetics nutrition and health, crop and feed production, genetic engineering, sustainable food and energy production, ICT and bioremediation. Graduates will be familiar with all aspects of policy and legislation in relation to this field and will be able to appraise the ethical, social, biosafety and policy implications of existing and emerging technologies.

Your Route to Success at DkIT

Do Bhealach go Rath ag ITDD

Dundalk Institute of Technology offers students courses from Higher Certificate through to Degree, Masters and Doctorate level. Dundalk Institute of Technology has four Schools, and each School has several Departments with many courses on offer. You can also study part-time at the Lifelong Learning Centre.

The four schools at DkIT are:

- * School of Business & Humanities;
- * School of Engineering;
- * School of Informatics & Creative Arts;
- * School of Health & Science.

Progression within DkIT

Dul chun cinn laistigh de ITDD

Students, who enter at any level, can either chose to graduate at that level or progress to the next level, assuming adequate grades are achieved. For example, a student enters DkIT at Higher Certificate Level 6, they can chose either to graduate with a Higher Certificate after two years, or can progress on to Level 7 and beyond.

Leaving Certificate (or equivalent) Entry Levels to DkIT

Leibhéil Iontrála Ardteistiméireacht (nó a choibhéis) chuig ITDD

There are three possible entry levels to DkIT at undergraduate level:

- * Higher Certificate Level 6 courses
- * Bachelor Degree Level 7 courses
- * Honours Bachelor Degree Level 8 courses

Progression to a Masters and Postgraduate Qualification

Forchéimniú do Cháilíocht Máistreachta agus Iarchéime

Students who complete an Honours Bachelor Degree at Level 8, often go on to do postgraduate study either in DkIT or other third level colleges. More information on taught and research Masters and Postgraduate options are available in at www.dkit.ie/thinkdkit/postgraduate-study

KEY

- FEAC - Further Education and Training Awards Council
- ME - State Examinations Commission (Department of Education & Science)
- HEAC - Higher Education and Training Awards Council
- DTI - Dublin Institute of Technology
- University

AWARDS IN THE FRAMEWORK

There are four types of award in the National Framework of Qualifications:

- Major Awards are the principal (non-award) made at a level
- Minor Awards are the partial completion of the outcome for a Major Award
- Supplemental Awards are the learning that is addressed to a Major Award
- Special Purpose Awards are the relatively narrow or program-specific achievement

Note: Dundalk Institute of Technology has delegated authority to make its own awards. Therefore all programmes offered at DkIT lead to DkIT awards unless otherwise specifically stated. Each award is recognised on the national Framework of Qualification and DkIT offers programmes from Level 5 - 10. For more detailed information on DkIT's approved courses and modules please visit: www.courses.dkit.ie

Student Admission and Entrance Requirements Riachtanais Iontrála do Mhic Léinn

Dundalk Institute of Technology has a proactive and inclusive approach towards applications, designed to reflect the diversity and richness of the wider community. A comprehensive Equal Access and Participation Policy in conjunction with our Mission Statement underlines our commitment to equality of opportunity in education.

Student Admission and Entrance Requirements Riachtanais Iontrála do Mhic Léinn

Application procedures differ according to the type of course sought.

1 Full-Time Approved Programmes

- * All applicants apply to CAO – Please see next page

2 Advanced Entry and Add-On Ordinary Degree/Honours Degree Programmes

- * Apply to Admissions Office, DkIT
- * Advanced Entry application forms available at:
www.dkit.ie/admissions/undergraduates/advanced-entry
- * Add-on application forms available at:
www.dkit.ie/admissions/undergraduates/add-ordinary-degree-honours-degree-courses

3 Apprenticeships

- * To obtain an apprenticeship, you must be recruited by a prospective employer who will register you with SOLAS and only then can the training programme begin.

First Year Full-Time Programmes

Cláir Lánaimseartha na Céad Bliana

There are two types of applicant for full-time programmes:

- * Standard
- * Non-Standard (Special Category)

Standard Applicants

Iarratasóirí Caighdeánacha

- * Current Year Leaving Certificate
- * Leaving Certificate other years (non-mature)
- * FETAC 2002 to date

Non-Standard Applicants

Iarratasóirí Neamh-Chaighdeánacha

- * Mature Applicants (see section on Mature Student Application, page 56)
- * FETAC/NCVA pre 2002 or PLC Applicants
- * Applicants who have completed a third-level course (all or in part) or who have a special educational/training qualification
- * Applicants with other qualifications and/or relevant work experience
- * A-Level/GCSE and BTEC Applicants from Northern Ireland and elsewhere
- * EU Applicants (Non-Irish)
- * Non-EU Applicants

Central Applications Office – Key Dates and Procedures Lár-Oifig Iontrála - Dátaí Tábhachtacha agus Nósanna Imeachta

A CAO application pack can be obtained from your guidance counsellor or from the CAO directly. For detailed information on the CAO System and relevant fees please see CAO Handbook 2016 or visit the CAO Website (www.cao.ie).

Applications can also be made online at www.cao.ie. When making your application, it is **very important** to list your courses in genuine order of preference.

Key CAO Dates to Remember Eochair Dátaí CAO le Meabhrú

January 20 th Early Online Application Deadline (Reduced Fee €25)	February 1 st Initial CAO Deadline	February 1 st All Mature Applicants (for DkIT)	May 1 st Late Applications Deadline	July 1 st Change of Mind Deadline
--	---	--	---	---

Entry Requirements Riachtanais Iontrála

- * Entry points required for each course are dependent on demand. Recent years points are listed within the course descriptions;
- * We have set out the standard minimum entry requirements in the course descriptions. If you do not meet these, you cannot be offered a place, even if your points are higher than the minimum;
- * In the case of the Leaving Certificate you may combine results from more than one sitting for the purposes of entry requirements only.

Receiving an Offer Tairiscint a Fáil

In order to receive an offer of a place you must:

- 1 **Be qualified (ie meet the minimum entry requirements) for the course and;**
 - 2 **In the event that there is competition for places, you must attain the required minimum points.**
- * We will offer places to qualified applicants in order of decreasing point scores and the minimum score will be that attained by the last candidate offered a place

- * CAO offers are usually made as follows:
 - * **Early-July** – Mature Applicants, deferrals from last year and those living outside the EU who need to make visa arrangements;
 - * **Early-August** – FETAC Applicants for those courses with FETAC quotas;
 - * **Mid-August** – Standard Applicants.
- * All offers of places will be sent by post from the CAO;
- * In addition, offers will be presented online at the CAO website www.cao.ie and you may record your acceptance online.

Offer Procedures Próiseas na dTairiscintí

Offers will be issued independently in respect of Level 8 and Level 7/Level 6 courses, so that some applicants may receive two offers of places simultaneously.

Offer Acceptance Glacadh le Tairiscint

- * If you receive more than one offer, you may make successive acceptances but an acceptance automatically cancels and supersedes any previous acceptance(s) - you may have only one current acceptance in the entire CAO system;
- * You may view an offer on the CAO website at www.cao.ie and accept online;
- * In addition, formal offer notices will be sent by post together with the necessary instructions as to how to proceed;
- * You may accept an offer either online **or** by complying in full with all instructions set out in the Offer Notice.

Do not do both.

N.B. You must record your acceptance by the deadline specified to be eligible to register as a student in DkIT.

Lapse Offers Tairiscintí i Léig

An offer will lapse unless you accept it within a specified period, i.e. unless the online or paper acceptance is received in CAO by 5.15pm on the Reply Date set out in the Offer Notice.

Registration Clárú

Registration of first-year students in Dundalk Institute of Technology will take place early in September with start up of classes commencing immediately.

Deferring a Place Iarchur Áit

Dundalk Institute of Technology will consider sympathetically requests from applicants, who, having been successful in gaining a place in the Institute, decide that they wish to defer their entry until the following year. For more information on deferrals, contact the Admissions Office in DkIT directly or read the deferred entry and deferral procedures in the CAO handbook.

Apply to Central Applications Office (CAO)

Tower House,
Eglinton Street, Galway.
H91 X25V

Application Forms and the CAO Handbook are both supplied by the CAO. You should read The CAO Handbook carefully before submitting an application.

Standard Applicants Entrance Requirements

Riachtanais Iontrála d'iarratasóirí Caighdeánacha

Level 6

Higher Certificate Programmes (Level 6) Cláir Ardteastas (Leibhéal 6)

The standard minimum entry requirement for first year admission to Higher Certificate Programmes in Dundalk Institute of Technology is five passes in the Leaving Certificate including Mathematics and either Irish, or English.

Note:

The standard minimum entry requirement for first year admission to Culinary Arts (Level 6) and Hospitality Studies (Level 6) is five passes in the Leaving Certificate including Irish or English.

Level 7

Ordinary Degree Programmes (Level 7) Cláir Gnáthchéim (Leibhéal 7)

The standard minimum entry requirement for first year admission to three-year Bachelor Ordinary Degree, Level 7 programmes in Dundalk Institute of Technology is six passes in the Leaving Certificate (including Mathematics and either English or Irish) **And**

Either one Grade C3 in a Higher Level paper,
Or an overall points total of 200.

Note:

A grade E in the Leaving Certificate Higher Level paper in Mathematics (HE) meets the entry requirement in Mathematics for those going into Level 6 and 7 programmes that do not have a special Mathematics requirement that is above the normal eligibility requirements. (See also see note on page 51 on Foundation Level Mathematics).

Level 8

Honours Degree Programmes (Level 8) Cláir Céime Onóracha (Leibhéal 8)

The standard minimum entry requirement for first year admission to Honours Degree programmes in Dundalk Institute of Technology is six passes in the Leaving Certificate (including Mathematics and either English or Irish), with at least Grade C3 in two Higher Level papers, together with at least Grade D3 in four Ordinary Level papers plus a minimum of 300 points. [The 300 points requirement does not apply to the BA (Hons) in Applied Music (DK860)].

Bonus Points for Honours Mathematics Pointí Bónas don Mhatamaitic Onóracha

A bonus of 25 points will be allocated to students who achieve a grade D3 or above in higher level mathematics in the Irish Leaving Certificate examination. This means that the maximum cumulative Leaving Certificate points total is 625. Bonus points will be awarded irrespective of the year in which the examinations were taken. The bonus points will only be relevant in cases where the higher level mathematics subject (including bonus points) is scored as one of the candidate's six best subjects for points purposes. Consequently, if higher level mathematics (cumulative points score) is not among these six subjects, the bonus points will not be included in the total points score.

10 - 24.9	F	0	0	0
0 - 9.99	NG	0	0	0

Foundation Level Mathematics Matamaitic Bonnleibhéal

Foundation Level Mathematics will be accepted as a passing subject for Level 6 and Level 7 programmes where Leaving Certificate Mathematics is not a specific subject requirement (See list of programmes on page 52 for exceptions).

Foundation Level Mathematics does not meet the entry requirements for Level 8 programmes.

The minimum Level 6 and Level 7 entry requirement in Mathematics is as follows:
a B2 at Foundation Level

Or

a D3 at Ordinary Level

Or

an E at Higher Level

Where a grade of B2 or higher is achieved and Foundation Level Mathematics is acceptable for entry to a specific programme, the following points scoring system will be used:

Grade	Points
A1	20
A2	15
B1	10
B2	5

Specific Course Entry Requirements

The following programmes have a specific Mathematics entry requirement:

DK740	BEng in Electronic and Electrical Systems	(Page 138)
	Ordinary Level	Grade C3
	Or Higher Level	Grade D3
DK742	BEng in Mechanical Engineering	(Page 134)
	Ordinary Level	Grade C3
	Or Higher Level	Grade D3
DK744	BEng in Civil Engineering	(Page 130)
	Ordinary Level	Grade C3
	Or Higher Level	Grade D3
DK820	BSc (Hons) in Computing in Games Development	(Page 158)
	Ordinary Level	Grade B3
	Or Higher Level	Grade D3

Note

No Mathematics entry requirement for

DK861	Digital Humanities
DK650	Culinary Arts
DK651	Hospitality Studies

Note

Applicants are advised that despite the fact that Foundation Level Mathematics may meet the minimum Mathematics requirement for entry into some academic courses, some employers require Ordinary Level Mathematics or higher to meet minimum educational attainment for some positions.

The following programmes have a specific English entry requirement:

DK770	BA in Theatre and Film Practice	(Page 186)
	Ordinary Level	Grade C3
	Or Higher Level	Grade D3
DK863	BA (Hons) in Communications in Creative Media	(Page 180)
	Ordinary Level	Grade B3
	Or Higher Level	Grade D3
DK864	BA (Hons) in Film and Television Production	(Page 184)
	Ordinary Level	Grade B3
	Or Higher Level	Grade D3
DK861	BA (Hons) in Digital Humanities	(Page 98)
	Ordinary Level	Grade A2
	Or Higher Level	Grade C3

The following programmes require a pass at either Ordinary or Higher Level within a Laboratory Science Subject (Biology, Physics, Chemistry, Physics & Chemistry or Agricultural Science):

DK870	BSc (Hons.) Nursing (General Nursing)	(Page 210)
DK872	BSc (Hons.) Nursing (Intellectual Disability Nursing)	(Page 208)
DK874	BSc (Hons.) Nursing (Psychiatric Nursing)	(Page 206)
DK877	BSc (Hons.) in Midwifery	(Page 204)
DK880	BSc (Hons.) Health and Physical Activity	(Page 200)

The following programme requires a Grade C3 or higher in Higher Level Biology or Agricultural Science:

DK784	BSc in Veterinary Nursing	(Page 214)
--------------	----------------------------------	-------------------

Standard Applicants Entrance Requirements

Riachtanais Iontrála d'iarratasóirí Caighdeánacha

Applications from Leaving Certificate Vocational Programme students

Iarratais ó mhic léinn Ardteiste Clár Gairme

Holders of the Leaving Certificate Vocational Programme (LCVP) apply in the normal way through the CAO system. Points are awarded on the same basis as per the Leaving Certificate. The LCVP subject will be considered as a passing subject provided the student achieves at least a pass grade. This will apply to entry for Honours Degree (NFQ level 8), Ordinary Degree (NFQ level 7) and Higher Certificate (NFQ level 6) academic courses.

Applications from Leaving Certificate Applied Programme students

Iarratais ó mhic léinn Clár na hArdteistiméireachta Feidhmí

The Leaving Certificate Applied Programme (LCAP) subjects do not meet the minimum entry requirements for admission to academic courses and are not considered as passing subjects. Holders of the LCAP may wish to undertake a FETAC course in order to gain eligibility for entry to third-level courses in DkIT.

The following points scoring system will be used:

Grade	Points
Pass	30
Merit	50
Distinction	70

Non-Standard (Special Category) Applications

Iarratais Neamh-Chaighdeánacha (Catagóir Speisialta)

All applications for first year programmes must be made through CAO. The CAO process, including acceptance of offer of a place, must be adhered to. As a non-standard applicant, Parts A and B of the CAO application form must be completed.

The 'Further Details' section on page 4 of the form gives you the opportunity to tell us about yourself, your education, work and life experience, skills, achievements and interests. Tell us about your motivation to pursue third-level study and why you have chosen the programme(s) listed on the inside front cover.

Advanced Entry and Add-On Ordinary Degree/Honours Degree Programmes

All applications for Advanced Entry and Add-On Ordinary Degree/Honours Degree programmes should be made directly to Dundalk Institute of Technology on or before **Friday, 29th April 2016**. Late applications may be accepted in some cases.

Ordinary Degree (Level 7) (post-Higher Certificate) Programmes

In order to proceed to an add-on Ordinary Degree (post-Higher Certificate) programme in DkIT you will need to have completed a Higher Certificate course in DkIT, or equivalent elsewhere.

Honours Degree (Level 8) (post-Ordinary Degree) Programmes

In order to proceed to one of our add-on Honours Degree programmes you will need to have completed an Ordinary Degree course in DkIT, or equivalent elsewhere, and to have obtained the relevant qualifying standard at award level.

Transfer to and from DkIT

We are pleased to welcome students who have completed Higher Certificate (Level 6) / Ordinary Degree (Level 7) programmes in other Institutes and who wish to pursue relevant Ordinary Degree (Level 7) or Honours Degree (Level 8) programmes within DkIT. The same requirements as those listed above apply here. Information about further study possibilities arising from DkIT programmes is featured with each programme.

Postgraduate Education

The Institute offers some postgraduate places for Masters and Ph.D. students in the fields of Science, Nursing, Business, Humanities, Computing, Music, Creative Media, and Engineering.

Details on admissions requirements are available online at: www.dkit.ie/admissions/postgraduates.

Recognition of Prior Learning

RPL is a process that allows students to gain admission to a programme of study or to gain exemptions/credit from some parts of a programme, based on demonstrated learning achieved prior to admission. Learning can be gained formally from previously certified coursework. It can be gained informally or non-formally through the workplace, through involvement with community groups or through voluntary activities.

Students who wish to apply and have RPL considered are advised to check the Institute's RPL policy online.

Application forms are available from the Admissions Office or the relevant Department office in the Institute, or online at: www.dkit.ie/admissions/undergraduates

Students with Disabilities / Specific Learning Difficulties Mic Léinn faoi Mhíchumas / Deacrachtaí Sonracha Foghlama

DkIT believes that all students make a valuable contribution to our community – none more so than students with a disability. We extend a warm and supportive welcome to such students and will do everything we can to help you fulfil your potential.

The Institute continually works to improve access for people with disabilities and/or specific learning difficulties to its programmes. The admissions route is the same for all applicants i.e. through the CAO system.

If your disability and / or specific learning difficulty is such that it requires supplementary / alternative arrangements being made to facilitate your study, it is essential that you indicate this in the relevant section of the CAO application form. We can then invite you to discuss your requirements with us and, insofar as is possible, make the appropriate arrangements. It is also possible to arrange a pre-entry orientation of the built environment if required: this is particularly of benefit to those with mobility and / or sensory disability.

DkIT has developed a supplementary access route for people with disabilities, who may benefit from higher education but may not meet the points required for their preferred course due to the impact of a disability on their educational performance.

If deemed eligible for the scheme, applicants may receive a supplemental allocation of points of 10% of the applicants score, up to a maximum of 50 points.

The following criteria apply:

- * Applicants must be school leavers under the age of 23 at the 1st January on the year of entry;
- * Applicants must have applied to DkIT through the CAO by the 1st February deadline;
- * Applicants who wish to avail of the scheme must disclose their disability and/or specific learning difficulty in the CAO application by March 1st deadline;
- * CAO supplemental information forms and supporting documentation must be submitted to the CAO by 1st April deadline;
- * Applicants must meet the minimum entry criteria for the programme to which they are applying.

Applicants can be assured that disclosure of a disability or specific learning difficulty is required solely to enable colleges to support access to higher education.

Mature Student Applications

Iarratais Mic Léinn Lánfhásta

Who is a Mature Applicant?

Any applicant 23 years of age or over on 1st January in the year of entry to first year of a full-time programme is considered to be a mature applicant. Dundalk Institute of Technology actively encourages applications on mature grounds and we reserve a minimum of 20% of places on all programmes for applicants who access the programme via the mature entry route. Mature students register on all programmes and contribute positively to academic and campus life.

In recent years, mature students have represented approximately 15% of all first year entrants. We offer a specialised induction process for mature students on entry and provide a range of learning supports designed to assist mature students reach their full potential.

How do I decide on a Programme?

It is important that you make an informed choice. Our Undergraduate Handbook provides contact details of academic staff in each department. You should make contact with the relevant person – ideally, arrange a mutually convenient time to meet.

It is important to make sure that the programme is in line with your career plans and that you are

academically prepared for and suited to that particular area of study. Talking with academic staff on the programme is also an opportunity for you to find out the level of demand for certain programmes (among mature applicants) and to find out what the minimum criteria may be.

When do I have to apply?

To be considered as a mature applicant, you must apply to the CAO by 1st February. If the mature student quota is not filled with 1st February applicants, the decision may be taken to assess late applications to the CAO (i.e. those who apply to the CAO **after 1st February**). However, there is no guarantee that late applications will be assessed.

Demand is high for mature student places on many programmes and the quota on each programme is usually filled with **1st February** applicants.

How does the mature entry route operate?

All programmes for which the mature applicants apply are assessed on mature grounds.

Assessment is based on the evaluation of all aspects of the applicant's preparedness and motivation; this includes examining the applicant's:

- * education record to date
- * employment history (e.g. signed references from former employers, etc.)
- * relevant skills gained to date
- * personal statement(s)

The application is assessed on the basis of documentation provided to CAO at the time of application. In the interests of fairness and transparency, only claims supported by evidence are taken into account. Therefore, it is essential that all claims are backed up by the appropriate documentation.

Documentation includes, inter alia, copies of examination transcripts, copies of training certificates, signed and dated employer references on headed paper, etc.) CAO scans the documentation provided by the applicant and it is then available to the relevant members of academic staff at DkIT to view.

For most programmes, interviews do not form part of the assessment process. Currently, interviews are held for BA (Hons) in Social Care (DK862) and BSc in Veterinary Nursing (DK784).

You should regularly keep an eye on www.dkit.ie/mature to keep informed of any changes from year to year.

How can I best keep my options open?

We can only offer applicants programmes for which they have applied. If your mature application for a Level 8 programme is unsuccessful, but academic staff would be willing to offer you a Level 7 programme in the same area, they can only do so if you have also applied for the Level 7 programme. An application for a Level 8 programme is not disregarded because the applicant has also applied for the Level 7 programme. However, by only applying for the Level 8 programme the applicant is limiting his/her possible options. It is worth bearing in mind that often a Level 7 programme leads to Level 8 qualification. (This applies to DK710 and DK810, DK721 and DK821, etc.)

Can I be considered for entry on other grounds?

The mature entry route is a non-standard entry route and it is the applicant's choice as to whether or not to avail of it. The advantage of this entry route is that it takes a number of factors into consideration and not just 'points' from an examination.

Whether an applicant avails of the mature entry route or not, as he/she has applied to the CAO he/she will still be automatically rated by the CAO for each programme on the basis of 'points' from the Leaving Certificate, FETAC examinations, A-Levels or other. This is known as the standard entry route.

The mature entry route, then, is an **additional** entry route for those who meet the age criteria.

Mature applicants are advised to consult our website for further details: www.dkit.ie/mature

Please note:

- * Entry to programmes DK870/ DK871 BSc (Hons) in General Nursing, DK872/DK873 BSc (Hons) in Intellectual Disability Nursing, DK874/DK875 BSc (Hons) in Psychiatric Nursing, and DK877/

My DkIT

Sharon Duffy

As a mature student of BSc. Hons of Biopharmaceutical Science at Dundalk Institute of Technology, I feel the course surpassed all my expectations of 3rd level education.

The success I achieved is not solely as a result of the quality design of the course modules; all of which are extremely applicable in today's industry, but also as a result of the support network provided by my lecturers, whose insight and academic thinking gave me the drive and determination to work hard and be proud of my achievements.

My time spent at DkIT was extremely challenging but very rewarding - the best days of my life.

For more info visit www.dkit.ie

EU Applicants

Applications from other EU nationals will be assessed on academic achievements to date. You will enjoy the same entitlements as Irish students.

Applications must be made through CAO.

Non-EU Applicants

Non-EU applicants living in the EU should apply through CAO.

Applications from non-EU applicants will be assessed on academic achievements. Applicants must provide certified evidence of all relevant qualifications held to date, including, where appropriate, evidence of proficiency in English. Entry to undergraduate programmes requires a proficiency in English at 6.0 on the IELTS scale or equivalent. Entry to postgraduate programmes requires a proficiency in English at 6.5 on the IELTS scale or equivalent.

Non EU applicants living abroad should contact our International Office for more information.

The International Office

t +353 42 9370 350

e international@dkit.ie

w www.dkit.ie/international

Northern Ireland / UK Applications

Iarratais Thuaisceart Éireann / RA

Dundalk Institute of Technology is delighted to welcome applications from Northern Ireland / UK students. While studying in Dundalk Institute of Technology you will advance through a series of internationally recognised qualifications. **All applications must be made through CAO.** The Northern Ireland / UK equivalencies to our qualifications are shown in the accompanying table:

DkIT Qualification	Comparable to NI/UK Qualification
Higher Certificate (Level 6)	BTEC Higher National Diploma
Ordinary Degree (Level 7)	Ordinary Degree
Honours Degree (Level 8)	Honours Degree

Tuition Fees

At the moment, the majority of EU students, including those from Northern Ireland who study at colleges in the Republic of Ireland, are not required to pay tuition fees. Under the present arrangements Northern Ireland students attending courses at publicly funded colleges in the Republic of Ireland can avail of free tuition fees, subject to eligibility.

Student Contribution Fee

Students will be charged a student contribution of €3,000 – this figure is subject to change and is set by the Department of Education every year.

To cover this upfront cost, students can avail of a Student Contribution Loan to help pay up to the full amount of the fee contribution. This is an interest bearing loan repayable from Student Finance NI.

For more information please visit:
www.studentfinanceni.co.uk or
www.nidirect.gov.uk/student-finance.htm

DkIT Facilities Contribution

A €125 Facilities Contribution Fee is payable by all students. This is to provide you with access to facilities such as DkIT Sport.

Maintenance Grants and Loans

There are many costs associated with going to college, such as Accommodation costs, Food, Clothing, Books and Travel expenses. To help you with these costs you may apply for a Maintenance Grant, which you don't need to pay back, and a Maintenance Loan, which you do. Students from Northern Ireland starting undergraduate courses in the Republic of Ireland will be eligible for:

- * A loan to cover the full cost of the student contribution charge;
- * A means-tested non-repayable grant for living costs of up to £3,475 - the maximum grant will be paid to students where the household income is less than £19,203 and a partial grant will

be paid to students where the household income is less than £41,065;

- * A loan for living costs - for students living away from home the maximum will be £4,840 and for students living at home the maximum will be £3,750.

Students should be able to apply for student finance for the academic year 2016/2017 early in 2016.

Extra help

There is also extra help available for students with children or adults who depend on them financially and students who have disabilities. More information is available at www.studentfinanceni.co.uk.

Northern Ireland / UK Applications Iarratais Thuaisceart Éireann / RA

Entry in 2015/2016 academic year	
Student contribution charge	€3,000*
DkIT Facilities Contribution	€125
Support for Student contribution charge	Non-means tested loan for full amount
Maximum maintenance grant	£3,475
Income threshold below which maximum maintenance grant is paid	£19,203
Income threshold above which no maintenance grant is paid	£41,065
Maximum loan for living costs (living away from home rate)	£4,840

* Student contribution charge is subject to change

Please Note:

* Liability for tuition fees is subject to conditions regarding nationality, residency, type of enrolment, previous study and progression.

For more information please see fees section on page 68.

* Students who are repeating a year (or part of a year) of study will be liable for the tuition fee, student contribution fee and the DkIT Facilities Contribution Fee.

Entry Requirements and Points

Standard Matriculation

Some courses may have entry requirements in addition to the standard matriculation see details on page 63

LEVEL 6/7 Matriculation

Meet the matriculation requirement of 5 different subjects which must include:

* Mathematics at GCSE
(Grade A* - C) or better

* English (or Irish) at GCSE
(Grade A* - C) or better

* One subject at: 'A Level'
(Grade A* - E)

or Applied A-Level (Grade
A* - E)

or BTEC National Level 3
(Subsidiary Diploma,
90-Credit Diploma, Diploma
or Extended Diploma) (Pass,
Merit or Distinction).

or OCR Cambridge Technical
Level 3 (Subsidiary Diploma,
90-Credit Diploma, Diploma
or Extended Diploma) (Pass,
Merit or Distinction).

* The remaining subjects must
be different from that presented
above and may be drawn from
recognised subjects at:
GCSE (Grade A* - C)

and/or AS Level' (Grades A - E)

and/or 'A-level' (Grades A* - E)

and/or Applied 'A-level'
(Grade A* - E)

and/or BTEC National Level 3
(Subsidiary Diploma, 90-Credit
Diploma, Diploma or Extended
Diploma) (Pass, Merit or
Distinction).

and/or OCR Cambridge
Technical Level 3 (Subsidiary
Diploma, 90-Credit Diploma,
Diploma or Extended Diploma)
(Pass, Merit or Distinction).

LEVEL 8 Matriculation

Meet the matriculation requirement of 6 different subjects which must include:

* Mathematics at GCSE
(Grade A* - C) or better

* English (or Irish) at GCSE (Grade
A* - C) or better

* Either

Two subjects at either:
'A Level' (Grade A* - C)

and/or Applied A-Level
(Grade A* - C)

and/or BTEC National Level 3
(Subsidiary Diploma, 90-Credit
Diploma) (Grade Merit or
Distinction).

and/or OCR Cambridge
Technical Level 3 (Subsidiary
Diploma, 90-Credit Diploma)
(Grade Merit or Distinction).

or

BTEC National Level 3 Diploma
(Grade min: MM)

or OCR Cambridge Technical
Level 3 Diploma (Grade min: MM)

or BTEC National Level 3
Extended Diploma (Grade min:
MMP)

* The remaining subjects must
be different from that presented
above and may be drawn from
recognised subjects at:

GCSE (Grade A* - C)

and/or AS Level' (Grades A - E)

and/or A-level' (Grades A* - E)

and/or Applied 'A-level' (Grade
A* - E)

and/or BTEC National Level 3
(Subsidiary Diploma, 90-Credit
Diploma, Diploma or Extended
Diploma) (Pass, Merit or
Distinction).

and/or
OCR Cambridge Technical
Level 3 (Subsidiary Diploma,
90-Credit Diploma, Diploma or
Extended Diploma) (Pass, Merit
or Distinction)

and a minimum score of 300
points.

*(the 300 points requirement does
not apply to the BA (Hons) in
Applied Music).*

Northern Ireland / UK Applications Iarratais Thuaisceart Éireann / RA

Scoring

Note

The following criteria and scoring is applicable to Dundalk Institute of Technology. Other colleges may use a different scoring scheme.

Generally, all subjects carry equal points, and points for A-Level (or equivalent Level 3) grades must be obtained at one sitting.

AS-Levels must be in different subjects to those taken at A-Level

and may be carried over from a previous sitting.

A Maximum of 4 subjects will be graded (maximum of three A-Levels plus one AS-Level). Where four A-Levels are presented from the same sitting, the best three A-Levels will be scored and the fourth A-Level will be scored as an AS-Level.

A-Level

A*	175
A	165
B	140
C	120
D	100
E	50

AS Level

A	75
B	65
C	50
D	35
E	20

Note

A-Level Mathematics - a bonus of 25 points will be awarded to students who achieve a Grade E or better. This will apply to only ONE Mathematics subject from Mathematics, Further Mathematics or Pure Mathematics, where that subject is one of the three A-Levels being counted for points purposes.

BTEC

Extended Diploma	(18 modules)	is equivalent	3 A-Levels	Max Score: 495
Diploma	(12 modules)	is equivalent	2 A-Levels	Max Score: 330
90-Credit Diploma	(9 modules)	is equivalent	1 ½ A-Levels	Max Score: 247.5
Subsidiary Diploma	(6modules)	is equivalent	1 A-Level	Max Score: 165

Score per module

Distinction	27.5 points
Merit	18.33 points
Pass	9.17 points

Specific Course Entry Requirements

The following programmes have a specific Mathematics entry requirement:

DK740	BEng in Electronic and Electrical Systems (Page 132)	GSCE	Grade B
		Or AS Level	Grade C
		Or A Level	Grade E
DK742	BEng in Mechanical Engineering (Page 134)	GSCE	Grade B
		Or AS Level	Grade C
		Or A Level	Grade E
DK744	BEng in Civil Engineering (Page 130)	GSCE	Grade B
		Or AS Level	Grade C
		Or A Level	Grade E
DK820	BSc (Hons) in Computing in Games Development (Page 158)	GSCE	Grade A
		Or AS Level	Grade C
		Or A Level	Grade E

The following programmes require a GCSE or A Level Pass in a Laboratory Science Subject (Biology, Physics, or Chemistry):

DK870	BSc (Hons) Nursing (General Nursing) (Page 210)
DK872	BSc (Hons) Nursing (Intellectual Disability Nursing) (Page 208)
DK874	BSc (Hons) Nursing (Psychiatric Nursing) (Page 206)
DK877	BSc (Hons) in Midwifery (Page 204)
DK880	BSc (Hons) Health and Physical Activity (Page 200)

The following programmes have a specific English entry requirement:

DK770	BA in Theatre and Film Practise (Page 186)	GSCE	Grade C
		Or AS Level	Grade D
		Or A Level	Grade E
DK863	BA (Hons) in Communications in Creative Media (Page 180)	GSCE	Grade A
		Or AS Level	Grade C
		Or A Level	Grade E
DK864	BA (Hons) in Film and Television Production (Page 184)	GSCE	Grade A
		Or AS Level	Grade C
		Or A Level	Grade E
DK861	BA (Hons) in Digital Humanities (Page 98)	GSCE	Grade A
		Or AS Level	Grade C
		Or A Level	Grade D

The following programme requires a Grade C in A Level Biology or Agricultural Science:

DK784	BSc in Veterinary Nursing (Page 214)
-------	---

Note:

All other programmes with a language require a Pass in A Level or a B in your GCSE in your chosen language except programmes with Spanish, where no prior knowledge is required.

FETAC Qualifications

Cáilíochtaí FETAC

FETAC level 5 and 6 awards are now made by Quality and Qualifications Ireland (QQI) – For further details please visit: www.qqi.ie.

Applicants must have obtained a **full FETAC Level 5/6 major award** with a minimum credit value of 120. A Component Award will not suffice.

A full FETAC major award normally contains 8 components.

A full award may be accumulated over a number of years. In such cases, it is the responsibility of the applicant to apply to FETAC for a major award prior to release of FETAC results.

The **minimum entry requirement** for graduates of FETAC (Level 5 and 6) awards to:

- * **Higher Certificate** (NQAI level 6) programmes is a full FETAC (Level 5 or 6) award;
- * **Ab-initio Ordinary Degree** (NQAI level 7) programmes (with the exception of Veterinary Nursing– see below) is a full FETAC (Level 5 or 6) award, plus one Distinction or two Merits;
- * **Ab-initio Honours Degree** (NQAI level 8) programmes (with the exception of nursing & midwifery programmes – see below) is a full FETAC (Level 5 or 6) award including a Distinction grade in at least three modules.

In these three cases, a general specific requirement for Mathematics or a language will not apply. Notwithstanding the minimum entry requirements listed above, relevant cognate courses and / or specific pre-requisite FETAC modules may be required for some programmes. Details are available from the Admissions Office or the 'FETAC Information' section of the CAO website (www.cao.ie).

In some programmes, a specific module such as a Mathematics or language module is a mandatory component of the FETAC award being presented. This requirement may be waived if the applicant has evidence of equivalent achievement from other examinations (such as previous Leaving Certificate award). It is the responsibility of the applicant to provide such evidence directly to the Admissions Office.

FETAC has introduced a new awards system known as the Common Awards System, or CAS. All FETAC awards are part of CAS since 2014.

Common Awards System (CAS) Scoring

This scoring scheme only applies where all the requirements for the major award are met, i.e. when the named component awards specified have been achieved to a minimum of 120 credits.

Each component is given a score based on the credit value of the component and the weighting of the grade achieved.

Most component awards have a credit value of 15 (the possible component credit values are 5, 10, 15, 20 and 30).

The following weightings will apply to the grades achieved:

Pass	=	1
Merit	=	2
Distinction	=	3

To calculate a component score, multiply the credit value of the component by the weighting for the grade achieved.

Add all of the component scores up to a cumulative credit value of 120. When adding up these scores begin with Distinctions, then Merits, then Passes.

Finally, multiply the total by 10 and divide by 9 to give the overall score (maximum 400).*

* (Note: this means that effectively, the weighting of a component will be approximately: Pass = 1.111; Merit = 2.222; Distinction = 3.333)

Further information and examples of the scoring scheme are available on the 'FETAC Information' section of the CAO website (www.cao.ie).

FETAC Links to Nursing Honours Degree Programmes

The following qualifications meet the general requirements for Honours Bachelor Degree Programmes in General Nursing, Psychiatric Nursing, Intellectual Disability Nursing, and Midwifery:

FETAC Level 5 award in:

Nursing Studies (DCHSN or 5M4349)

Or

Community and Health Services (DCHSX or 5M4339)

Or

Healthcare Support (DHSXX or 5M4468)

With a minimum of 5 Distinctions, including Distinctions in the following modules

- * D20001 Anatomy and Physiology
or 5N0749
- * D20002 Introduction to Nursing
or 5N4325 Nursing Theory & Practice
- * D20032 Human Growth and Development
or 5N1279
or C20006 Biology
or 5N2746

FETAC Links to Veterinary Nursing

The following qualifications meet the general requirements for the Bachelor Degree Programme in Veterinary Nursing:

FETAC Level 5 award in:

Animal Care (CASAC or 5M2768)

With Distinctions in Biology (C20006 or 5N2746) and Animal Anatomy & Physiology (C20153 or 5N0750).

Applications must be made through the CAO by the 1st February.

Northeast Further and Higher Education Alliance (NEFHEA)

Comhaontas an Oirthuaiscirt um Bhreiseoideachas agus Ardoideachas

In order to enable more people to come to third level and to foster regional higher education strategies to expand participation in higher education, Dundalk Institute of Technology and Further Education Colleges in the North East formed the North East Further and Higher Education Alliance (NEFHEA) in 2007. NEFHEA includes DkIT, O'Faich Institute of Further Education in Dundalk, Dunboyne College of Further Education, Cavan Institute, Monaghan Institute of Further Education and Training and Drogheda Institute of Further Education.

A key focus of NEFHEA is to increase access to the second year of DkIT programmes in a number of areas.

Full details of the courses where this option is available can be found at www.dkit.ie/nefhea in the section called Information for Students. This is an ongoing area of work so please check the website for up to date information.

Currently programmes in Business Studies, Informatics and Science are accepting students via the NEFHEA route.

By availing of further education programmes in NEFHEA partner Colleges throughout the North East that lead to a FETAC award, students have the opportunity to apply for advanced access to degree-level programmes at DkIT. Access in this way is in high demand and is competitive.

Students who enter DkIT via the NEFHEA route are well prepared for College life and evidence to date suggests that they do well in examinations and assessments.

Further information on NEFHEA, including an up to date list of progression routes into Year 2 of designated programmes is available at www.dkit.ie/nefhea.

Fees and Grants

Táillí agus Deontais

Criteria for determining the Tuition Fee Status of an Applicant

Categories of Fee Status: (A) "Free Fees" (B) EU Fees (C) Non-EU Fees

(A) Free Fees Scheme

Please note that in order to qualify for the Free Fees Initiative applicants must:

- 1 Be a first-time undergraduate

And

- 2 have one of the following **(Nationality Test):**

- * EU passport or Original Irish Birth Certificate or Original EU Nationality Identity Card

Or

- * Official Irish Refugee Status (requires the appropriate original letter from the Department of Justice and Law Reform indicating that the appropriate status has been granted)

Or

- * Permission to reside in the State, as a family member of a refugee, under Section

18 of the Refugee Act 1996 (requires the appropriate original letter from the Department of Justice and Law Reform confirming family member status and GNIB registration card)

Or

- * Permission to remain as family member of an EU citizen under the provisions of the European Communities (Free Movement of Persons) Regulations 2006 and 2008 and Directive 2004/38/EC of the European Parliament and of the Council (requires the appropriate original letter from the Department of Justice and Law Reform confirming immigration status)

Or

- * Humanitarian Leave to remain in the State (prior to Immigration Act 1999) (requires the appropriate original letter from the Department of Justice and Law Reform indicating that the appropriate status has been granted)

Or

- * Permission to remain

following a determination not to make a deportation order under Section 3 of the Immigration Act 1999 (requires the appropriate original letter from the Department of Justice and Law Reform indicating that the appropriate status has been granted)

And (Residency Test)

- 3 have been ordinarily resident in an EU Member State for at least three of the five years preceding their entry to an approved third level course. Time spent from date of official lodgement of application papers for refugee status will be included for the purpose of meeting the 3 year residency requirement for refugees. Residency for family members of refugees commences from the date of issue of their GNIB registration card

Applicants falling under categories b (i) or b (ii) below qualify for EU fee rates. Details on EU fee rates are available from the Admissions Office.

(B) EU Fees

Students may be charged EU Fees on the basis of (i) Nationality or (ii) Residency

a (i) EU Fees – Nationality

Students must satisfy both the nationality **and** previous studies tests:

1 Nationality Test – Students must have one of the following:

- * EU passport or **Original Irish Birth Certificate** or Original EU Nationality Identity Card

Or

- * Official Irish Refugee Status (requires the appropriate original letter from the Department of Justice and Law Reform indicating that the appropriate status has been granted)

Or

- * Permission to reside in the State, as a family member of a refugee, under Section 18 of the Refugee Act 1996 (requires the appropriate original letter from the Department of Justice and Law Reform confirming family member status and GNIB registration card)

Or

- * Permission to remain as family member of an EU citizen under the provisions of the European Communities (Free Movement of Persons) Regulations 2006 and 2008 and Directive 2004/38/EC of the European Parliament and of the Council (requires the appropriate original letter from the Department of Justice and Law Reform confirming immigration status)

Or

- * Humanitarian Leave to remain (prior to Immigration Act 1999) (requires the appropriate original letter from the Department of Justice and Law Reform indicating that the appropriate status has been granted)

Or

- * Permission to remain following a determination not to make a deportation order under Section 3 of the Immigration Act 1999 (requires the appropriate original letter from the Department of Justice and Law Reform indicating that the appropriate status has been granted)

And

2 Previous Studies Test

Where an applicant has received ALL his/her full time post-primary education within the EU, but has not been resident for three of the five years immediately prior to university entry

a (ii) EU Fees – Residency

Students must satisfy both the residency and previous work/ studies test:

1 Residency Test

An applicant's principal residence for the purpose of taxation must have been in a European Union Member State for a minimum of 3 of the 5 years prior to entry to Dk'IT. Prior residence as a full-time student alone does not qualify a student for EU fee rates.

If an applicant is **under 23** years of age on the start date of the course then the principal residence for the purpose of taxation of the parents will be examined. If an applicant is over 23 years of age on the start date of the course then the principal residence for the purpose of taxation of the applicant is examined. A P21 form (for each of 3 years out of the last 5 years) will be required in both instances.

And

2 Previous Work/Studies Test

An applicant must have spent 3 of the last 5 years in full time study or work in an EU member state prior to the commencement of the course. Students classified for fee purposes as non-EU will not be permitted to change their fee status following admission.

This full time study/work requirement will be deemed satisfied in the case of an applicant for whom a spouse is claiming a tax benefit which must be confirmed by a P21 form or evidence of social welfare benefits.

(C) Non EU Fees

Applicants not satisfying conditions (a) or (b) are liable for non-EU fee rates. For up-to-date fee rates please contact admissions office.

Students classified for fee purposes as non-EU will not be permitted to change their fee status following admission.

Fees and Grants

Táillí agus Deontais

Tuition fees for those repeating a year or part of a year and for ACCS or Part-time Students

The free fee classification does not apply to students who are repeating a year, or part of year on any programme of study. All repeat students must pay tuition fees at either the EU or non EU rate depending on their circumstances.

Student Contribution Fees

Students who are not entitled to receive a maintenance grant must pay a student contribution fee to the Institute. The student contribution charge for students entering in 2016/17 has been set at €3000. Students may apply directly to the relevant grant-awarding authority for payment of the maintenance grant and the standard student contribution fee.

DkIT Facilities Contribution

A €125 Facilities Contribution Fee is payable by all students, regardless of Free Tuition Fees or SUSI grant entitlements. This is to provide you with access to facilities such as DkIT Sport.

Sources of Funding

There may be a number of sources of funding open to you to assist you with your studies. Some of these include:

*** Student Grant**

The student grant is the main source of financial help available for students in full-time Post Leaving Certificate Courses (PLCs) and full-time higher education undergraduate courses. Support is available to eligible students in most colleges in Ireland, the grant is there to help with the various costs of participating in further or higher education. Students on part-time courses, access or foundation courses (in higher education institutions) and short courses are not eligible to apply for a student grant.

Family and/or personal income is a key factor that will be assessed when you apply for a student grant but there are also some other conditions.

www.studentfinance.ie can help you to assess whether you are eligible and guide you in starting the process.

*** Student Universal Support Ireland (SUSI)**

Student Universal Support Ireland (SUSI) is the new single awarding authority for all new grant applications. The student grant application system is an 'Online Application System' and is accessed at www.studentfinance.ie.

In all cases, the official decision on eligibility is of course made by the grant-awarding bodies. If you think you are eligible for the student grant, you should apply for it as soon as possible. You do not have to wait until you receive an offer of a place or enrol in college. Only when your application has been completed in full and submitted to the grant-awarding authority can your eligibility be determined. Information is correct at time of going to press.

Fees and Grants

Táillí agus Deontais

Visit: www.studentfinance.ie for up-to-date information.

* BTEA (Back to Education Allowance)

BTEA provides financial support for those taking up a place on an approved full-time Further Education Course while retaining Social Welfare entitlements. Full details are available on the Social Welfare website: www.welfare.ie

* Student Assistance Fund

As part of an ongoing funding initiative to tackle educational disadvantage in the third-level sector, an E.S.F.-aided Student Assistance Fund is administered by the Institute on behalf of the H.E.A. The Fund is intended to tackle educational disadvantage by providing financial support to disadvantaged students who require additional support to enable them to fully benefit from third-level studies.

Students who find themselves in severe financial difficulties during the academic year may apply for financial assistance to the Student Services Centre Office. Students will be requested to fill in an application form and will subsequently meet with members of the SAF Committee to discuss their case. This will be done in the strictest confidence. It is important to note that, as the Fund is limited, students are not automatically entitled to assistance based on their circumstances.

* Hardship Fund

Dundalk Institute of Technology has a Hardship Fund available to assist students who face a crisis or an emergency and who need immediate financial assistance. The Hardship Fund is administered by Student Services. The Fund is limited and is only available in exceptional circumstances. In many cases, assistance is provided in the form of a loan. The Hardship Fund is provided jointly by the Department of Education and Science and Institute funds.

My DkIT

Mark McKeown
Navan, Co. Meath

BSc (Honours) in Psychiatric Nursing

“

I entered the course straight from school at 17 years old and I have to say, I never looked back! I've had so many great experiences and met such inspiring people, both clients and staff. The clinical experiences available to DkIT students are second to none in my opinion and the close relationship that such a small class group has with lecturers provides great support and encouragement.

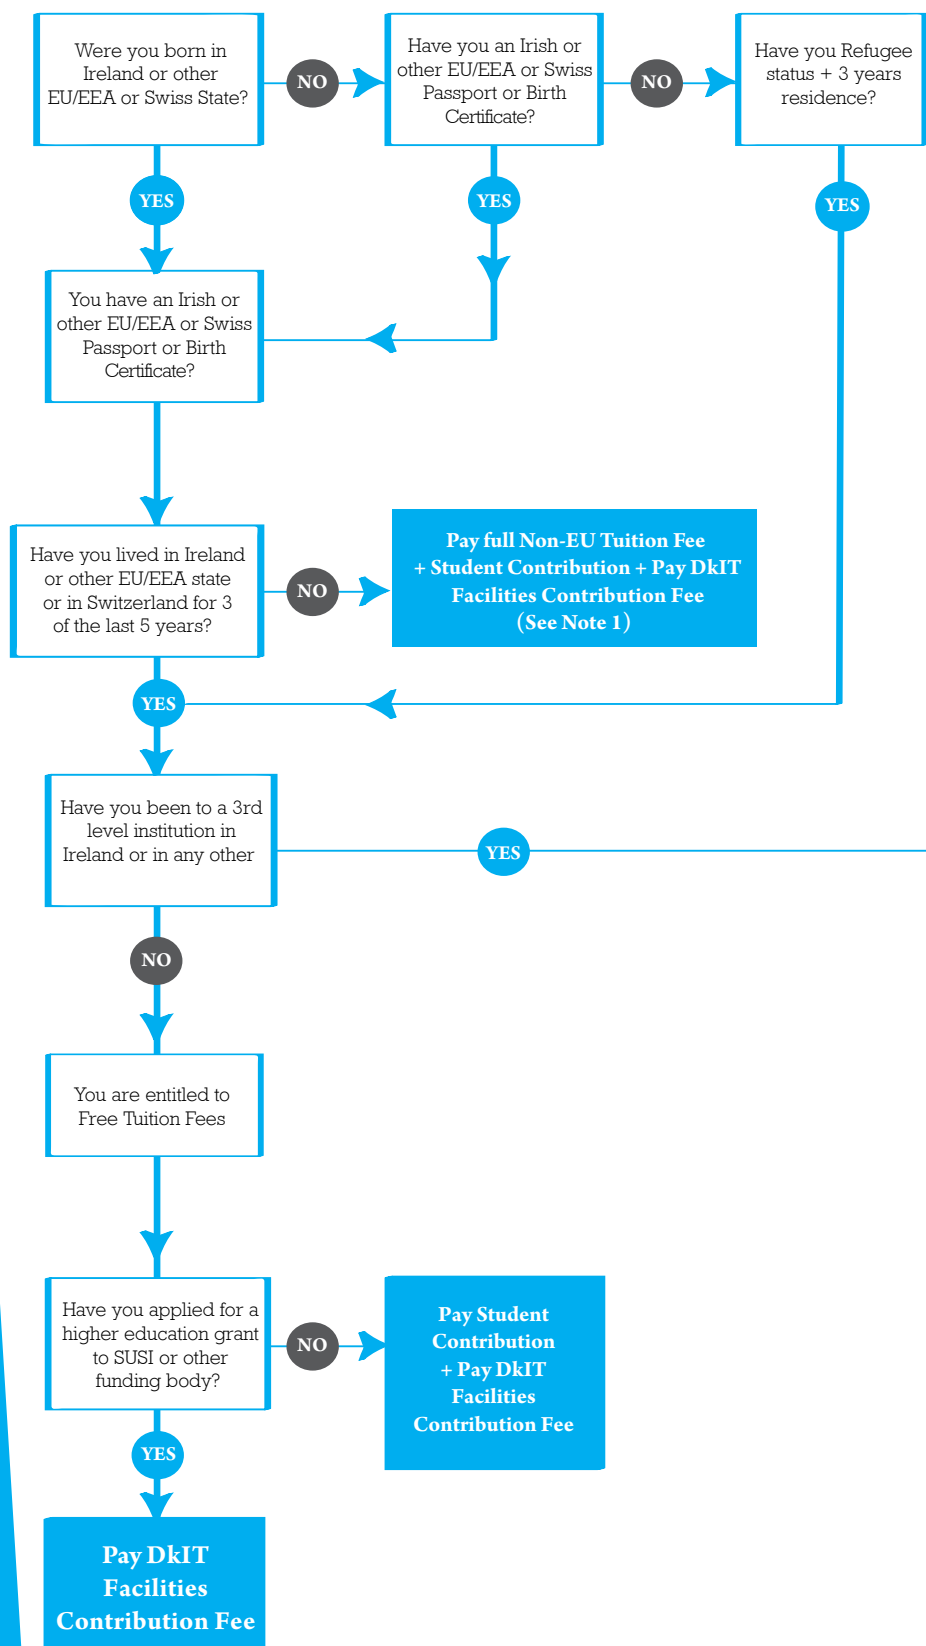

The facilities are modern and meet the needs of students, and there's always a good atmosphere around DkIT! 4 years seems like a long commitment but it goes by so quickly so enjoy it while it lasts!

I would definitely recommend BSc (Honours) in Psychiatric Nursing to anyone with an interest in working with people with mental health problems, although challenging at times, it's a very rewarding job!

”

Fees

How much do I owe?

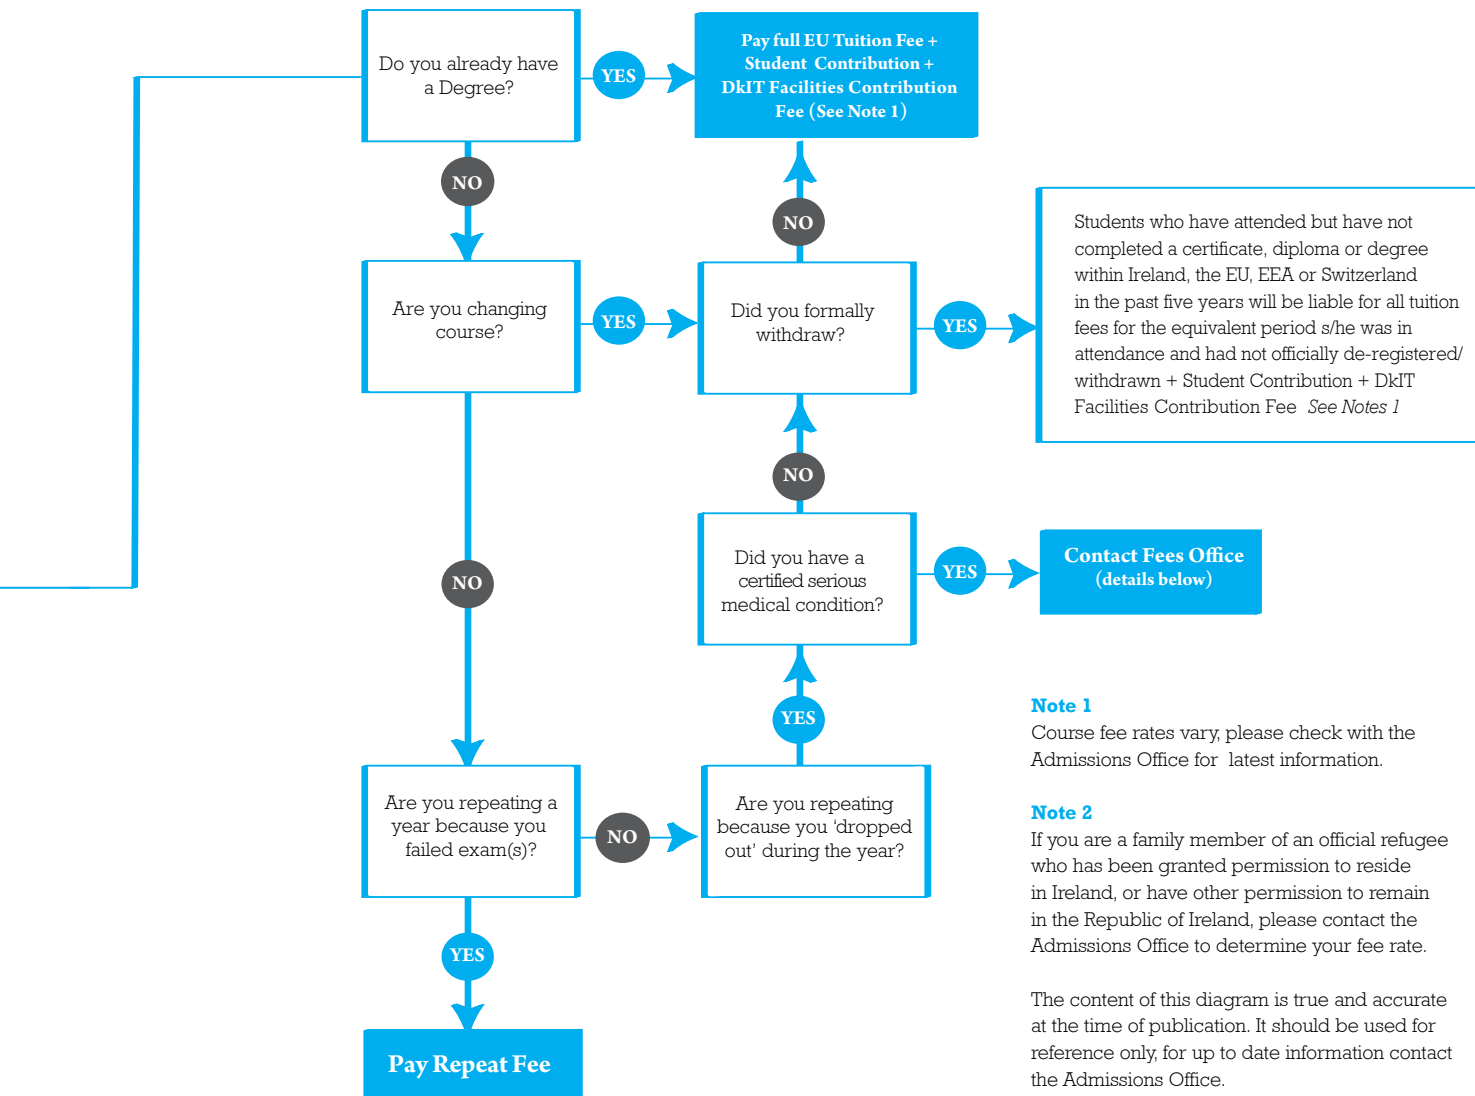

2016/17:

DkIT Facilities Contribution Fee: €125

Student Contribution Charge: €3,000*

EU Repeat Fee: See Admissions Office

Non-EU Repeat Fee: See Admissions Office

Note 1

Course fee rates vary, please check with the Admissions Office for latest information.

Note 2

If you are a family member of an official refugee who has been granted permission to reside in Ireland, or have other permission to remain in the Republic of Ireland, please contact the Admissions Office to determine your fee rate.

* 2016 Charge (set by Department of Education)

School of Business & Humanities An Scoil Gnó & Daonnachtaí

The School of Business & Humanities is the largest School in Dundalk Institute of Technology. The School ensures that graduates of its programmes are equipped with a wide range of skills which will ensure they gain a competitive advantage with prospective employers. Many programmes within the School contain Work Placement as a mandatory element giving students real work-based learning opportunities. The School is divided into:

These are:

- * Department of Business Studies
- * Department of Management & Financial Studies
- * Department of Humanities
- * Section of Hospitality Studies

The School attracts overseas students to its programmes ensuring a vibrant, multi-cultural study environment. Programmes within the School are offered at undergraduate and postgraduate level, and cover a wide spectrum of subject areas including Accounting and Finance; Business and Management; Marketing; Digital Marketing; Digital Humanities; Sport, Exercise and Enterprise; Youth Work; Professional Cookery and Hospitality Management. Postgraduate research opportunities are also available to students on successful completion of their primary degrees. Research Master and Doctoral studies are supported by faculty within the School.

About this Programme

This new Bachelor of Business (Honours) at DkIT is a management award that facilitates the development of the students' interpersonal and intellectual capabilities. This Level 8 Honours degree is completed over 3 years.

The programme will promote your academic, intellectual and personal development while enabling you to work as a business professional that will develop, lead and sustain Irish industry on a national and international basis.

Career Options

The skills and business knowledge acquired on this course will prepare you for work in a variety of different managerial and business contexts including small business management and within the indigenous and multi-national sectors.

Progression Opportunities

Graduates can progress to the Master of Business Studies at DkIT.

Minimum Entry Requirements

A minimum of six passes in the Leaving Certificate (including Mathematics and either English or Irish), with at least Grade C3 in two Higher Level papers, together with at least Grade D3 in four Ordinary Level papers plus a minimum of 300 points.

Subjects

	Semester 1	Semester 2

About this Programme

The Bachelor of Business (Honours) is a management award that facilitates the development of the students' interpersonal and intellectual capabilities. This Level 8 Honours degree is completed over 3 years. Students take Years 1 and 2 within Monaghan Institute and the final year (Year 3) at DkIT. The programme will promote academic, intellectual and personal development and enable graduates to work as a business professional who will develop, lead and sustain Irish industry on a national and international basis. This programme leads to a DkIT award at Level 8 on the National Framework of Qualifications.

Career Options

The skills and business knowledge acquired on this course will prepare you for work in a variety of different managerial and business contexts including small business management and within the indigenous and multi-national sectors.

Progression Opportunities

Graduates can progress to the Master of Business Studies at DkIT.

Minimum Entry Requirements

A minimum of six passes in the Leaving Certificate (including Mathematics and either English or Irish), with at least Grade C3 in two Higher Level papers, together with at least Grade D3 in four Ordinary Level papers plus a minimum of 300 points.

Subjects

	Semester 1	Semester 2

NEW COURSE COMING SOON!

Are you interested in a career in
Marketing, Public Relations **or**
Corporate Communication?

Do you want to become an
expert **in** Digital Marketing
Communication **and** Social
Media?

Would you like to work in a
communication agency **or**
marketing department **for a** dynamic
international organisation?

Digital Marketing, Public Relations and Corporate Communication

Good news!

The School of Business & Humanities is currently developing a new programme in the areas of Digital Marketing, Public Relations and Corporate Communication. This programme will build on DkIT's BBS (Hons) in Marketing and BA (Hons) in Public Relations & Online Communication to form an exciting new Level 7 degree (with proposed Level 8 add-on options).

This new programme will offer students an opportunity to study in these discipline areas using advanced teaching and learning techniques guided by a team of lecturers with considerable experience, expertise and industry links.

The programme will feature a unique semester-long, full-time work placement in the industry, and students will also work alongside real organisations as part of their coursework, enabling them to build a winning portfolio upon graduation.

If this programme might be the one for you, please contact:

About this Programme

Our BBS Honours Degree in Marketing is market focused and exciting, delivering a series of learning activities designed with your career in mind. It is aimed at students who wish to pursue a commercial career within the marketing industry. It places participants upon a platform of career focused continued learning.

A fusion of rigorous theory with practical application provides you with the experience required for a successful and amazing career in marketing. This Degree is perfect for people that like to question the status quo. We actively encourage participants to explore new ways of doing business thus cultivating their true abilities.

Note

This BBS (Hons.) in Marketing is going through a review at present. For updated information please visit the Department of Management and Financial Studies section on the DkIT website: www.dkit.ie/management-financial-studies

Year 4	Mandatory <ul style="list-style-type: none"> * Strategic Management (year-long) * New Venture Development * Product and Brand Development * Customer Relationship Marketing Electives <ul style="list-style-type: none"> * French 7 * English 7 * Digital Marketing 	Mandatory <ul style="list-style-type: none"> * Strategic Management (year-long) * Applied Marketing * Marketing Changes * Business Ethics Electives <ul style="list-style-type: none"> * French 8 * English 8 * Doing Business in Emerging Markets

Our students grow within themselves during their time with us. This is encouraged at all times by a dedicated and experienced team of lecturers constantly providing an exemplar learning environment. As a rule, marketing graduates tend to be commercially and organisationally astute as well as highly numerate. Taking this Degree in Marketing, students develop an essential range of business skills including:

- * A talent for clear expression, both oral and written
- * The ability to plan in advance and think strategically
- * Research, analysis, team-working and presentation skills
- * The ability to think independently
- * The capacity to get things done!

Note

Students who have passed year one of this programme may be considered for transfer to Year Two of Level 8 programmes in Accounting and Finance (DK810) or Business (DK816). This is subject to an interview and places being available. Entry requirements for Year One still applies for transfer into Year Two.

Graduates have had great success in finding worthwhile positions in enterprise at home and overseas. Employers have been very impressed with the quality of graduates from this Marketing Degree from Dundalk Institute of Technology.

Our Marketing Degree equips participants with the contemporary knowledge and skills required to deliver effective and efficient marketing strategies in today's connected global economy. Our students are exposed to real-world experiences through our close ties with a wide spectrum of enterprises. Students engage in activities in association with such enterprises, designed to familiarize them with the cut and thrust of the world of marketing, whilst retaining the comfort of knowing that they are still in learning mode. They quickly learn to appreciate the business impact of professional marketing activity.

Career Options

- * New-business start-up
- * On-line Marketing Management
- * Product Development
- * Customer Support Management
- * Marketing Research
- * Brand Management
- * Domestic & International Selling
- * International Marketing

Progression Opportunities

Course	Code	Places	Level	Duration
Higher Diploma in Business in Enterprise Development	DKA11	20 - 25	8	1 Year

About this Programme

The Higher Diploma in Business in Enterprise Development course is targeted at people thinking of setting up or already running their own business, as well as small business advisors and mentors. The aim of the programme is to enhance your knowledge of small business development theory and practice, as well as your research and presentation abilities.

Objectives of the Programme

- * To provide accredited education and training in business and business support
- * To develop the knowledge, skills and competencies to enhance the learner's capacity to establish a small enterprise
- * To enhance the participants' knowledge, skills and competencies that will enable them to deliver appropriate support, advice and mentoring to new and emerging businesses

Learning Outcomes

Through the completion of the programme, you will learn to:

- * Explore the main issues in starting a new business and how these may be addressed
- * Identify a business idea and carry out the necessary research to assess the feasibility of your idea
- * Develop a business plan for a new venture
- * Explain the entrepreneurial process and analyse why some individuals are more enterprising than others
- * Critically evaluate the theories of small firm growth and their implications for practice
- * Understand the key elements in finance, marketing and operations management of a small enterprise
- * Analyse the main sources of Irish law and their impact on the legal environment for business
- * Evaluate the importance of business strategy and the impact of the business environment on the direction of the firm

Duration

The programme will run on a part-time basis from September to August. The programme will be delivered over 21 days in six 2-day and three 3-day blocks (Friday and Saturday and Thursday to Saturday). The Business Plan will be submitted in August.

Minimum Entry Requirements

Applicants with a Business Level 7 award, or a Level 8 award in another discipline, or equivalent, are eligible to apply for this course. Applicants matching the entry requirements will be interviewed and places will be allocated on the basis of academic qualification, relevant work experience and motivation to complete the programme. Experiential learning will be assessed under the Institute's Recognised Prior Learning (RPL) process.

About this Programme

The Higher Diploma in Business & Marketing will facilitate the development of students' interpersonal and intellectual capabilities. It will provide learners with an understanding of business as a multidisciplinary and open-ended entity. It will support learners to fulfil their potential and make a significant contribution to businesses operating in the ever-changing competitive environment.

Students will gain an in-depth understanding of the theories, concepts and methods pertaining to the field of business and/or the particular sub-field of business, for example:

- * Management and Organisation
- * Business and the Economic Environment
- * Information and Communication Systems

Students will also gain an appreciation of the inter-relationships between business functions and processes.

Do you aspire to be a primary or secondary school teacher?

An archaeologist?

An archivist or librarian?

A political activist?

A journalist?

An arts manager?

Then you could start by studying with us!

This three-year arts degree programme offered at DkIT is a unique programme in Ireland. It offers a traditional arts education in History, English, Archaeology and Politics and Society, alongside three years of digital humanities training. This innovative, new development in arts education will provide you with critical and practical skills to meet the demands of a rapidly changing digital environment.

The degree programme creates Honours-level Arts Graduates that are also skilled users and creators of information in digital media, an increasingly important area in education and publishing. As a graduate you will be able to integrate these new digital media with traditional scholarly activity in the Humanities. As a graduate of this degree, you will be

Academically Qualified in Two of the core Humanities disciplines: **History; English; Archaeology; Politics & Society**; whilst also becoming a sophisticated **Creator and User in Digital Humanities**.

Career Options

Graduates of this programme and the Humanities degree programmes in general are highly employable and widely sought after in careers as diverse as teaching at primary and secondary level, arts and heritage administration; journalism; research; politics; as well as business and industry. Students have excellent literacy and communication skills, excellent skills in Information and Communication Technologies, as well as skills in critical information management, which make them highly employable.

Progression Opportunities

Graduates from the BA (Hons) Humanities degree have been accredited with the Teaching Council for entry for Post-Primary teaching in History, English, Civil Social & Political Education (CSPE), on completion of the Postgraduate Master in Professional Education which now replaces the old H.Dip. Ed. Our Graduates with good degrees in their disciplines and offering a high level of Digital Media skills, are proving highly desirable as teachers in the "Digital Technology" classroom. This is becoming more important with recent developments in the second level environment, where Digital Literacy has been introduced to Junior Certificate Cycle.

Graduates with a good 2.2 or higher degree will also be able to pursue further postgraduate degrees in their

chosen arts subjects; e.g., an MA in History, or in English, Archaeology, Political Science in any university or college. Past graduates of the Humanities at DkIT have studied at UCD, DCU, TCD, UCC, NUI, Galway, NUI, Maynooth, Queen's University of Belfast and Goldsmith's College, London.

If your interest is in the specific area of Digital Humanities an MA in Digital Humanities at NUI Maynooth or a Ph.D in Digital Humanities by a consortium of TCD/UCD/NUI Maynooth will be available to allow you become a specialist in this new field.

Minimum Entry Requirements

A minimum of six passes in the Leaving Certificate with a minimum of two C3 Grades in Higher level papers. Entrants must achieve a C3 in Honours English or an A grade in Pass English. You must have a minimum of 300 points.

We also welcome applicants with other equivalent qualifications such as A-Levels and BTEC's. Please contact Dr Martin Maguire for entry requirements.

Daonnachtaí Digiteacha

Béarla Stair Polaitíocht Seandálaíocht Daonnachtaí Digiteach

Subjects

Mandatory

* Digital Humanities

All students will be required to complete the **Mandatory** Modules 'Digital Humanities' across the three years of the degree. These modules will equip students with knowledge of the foundational concepts and task-specific research methods appropriate to digital humanities. This will enable them to critically assess digital media resources; identify appropriate digital media software tools and create 'born-digital' objects as online resources.

Electives

You will choose **Two** areas of traditional Arts study to accompany your Digital Humanities skills from English, History, Politics and Archaeology.

* English

Students of English at DkIT will study all the traditional aspects of English literature including Shakespeare, the Romantic poets and twentieth century Irish literature, poetry and drama. They will also be introduced to new ways of thinking critically about literature from the perspective of race, gender and cultural theory. Students will study the interaction between literature and digital media in the form of film, television, music and new digital media like Facebook and Twitter.

* History

History is the study of the past within an academic tradition of theories, methodologies and concepts. History as a discipline is essentially a discussion about the production of meaning and significance in the present about the past, as we attempt to explain why things change. The enormous wealth of historical resources now available on the Web is transforming access to sources and debates on historical topics. In History you will study Irish History from the medieval to the contemporary, European History from the Early Modern to the contemporary and Modern American History. Modules will cover social history, political history and the history of ideas.

* Politics and Society

The Politics and Society modules explore the key questions of the way in which power and authority are exercised in contemporary societies. Central to this is the study of the emergence of the modern state, internationally and here in Ireland. We explore how the state is organised, territorially and functionally; how membership of the state, citizenship, is obtained and maintained and how states have dealt and deal with the challenges of ethnically, socially and demographically diverse societies. We explore also the ways in which states affect and are being affected by the forces of globalisation, in particular international migration, and how societies are being changed in response to these powerful social forces.

* Archaeology

Archaeology is the study of past societies through the examination of the material remains they have left behind: sites, monuments, artefacts. Students will receive a thorough grounding in Irish archaeology from prehistoric times to the recent past and will also be introduced to aspects of European archaeology. Much of the material that will be dealt with has been gathered in recent times during commercial and infrastructural development projects and is available online and particular emphasis will be placed on the use of digital media in archaeology from the latest remote sensing and geophysical techniques of non-invasive data acquisition as well as more standard excavation reports and the associated knowledge these generate, particularly through the medium of the Web.

Duration

4 Years

About this Programme

This programme is about social care, a profession characterised by working in partnership with people who experience marginalisation, or disadvantage, or who have special needs. You will explore and analyse the development of current and future trends in social care in Ireland and how legislation in this area is drafted and regulated. As well as learning about different models of social care and their appropriateness to different situations, you will also learn how to deliver a social care service, both alone and as part of a team, to people in community, day-care and residential settings.

Career Options

There are various career options within Social Care. These include working with:

- * Children and adolescents in residential childcare;
- * People with learning or physical disabilities;
- * The homeless;
- * People with alcohol or drug dependency;
- * Families in the community;
- * Older people;
- * Recent emigrants to Ireland;
- * The state sector (for example the Departments of Health and Children, Education and Science, and Equality and Law Reform);
- * The voluntary sector (including organisations like Barnardos and the Brothers of Charity, many of which are fully or partially funded by the government).

Subjects

	Semester 1	Semester 2
Year 1	Mandatory <ul style="list-style-type: none"> * Sociology 1 * Psychology 1 * Issues in Social Care * Study, Research and Writing Skills * Creativity and the Arts in Social Care (year-long) 	Mandatory <ul style="list-style-type: none"> * Sociology 2 * Personal and Professional Development 1 * Themes and Concepts 1 * Skills Development * Creativity and the Arts in Social Care (year-long)
Year 2	Mandatory <ul style="list-style-type: none"> * Practice Placement 1 	Mandatory <ul style="list-style-type: none"> * Legal Framework for Social Care * Psychology 2 * Holistic Health and Wellbeing * The Discourse of Ageing * Art in Community and Social Contexts
Year 3	Mandatory <ul style="list-style-type: none"> * Gender and Social Change * Personal and Professional Development 2 * Themes and Concepts 2 * Social Policy * Qualitative Research 	Mandatory <ul style="list-style-type: none"> * Practice Placement 2
Year 4	Mandatory <ul style="list-style-type: none"> * Legal Issues in Social Care * Principles of Professional Practice * Social Entrepreneurship for Social Care * Care in a Multicultural Context * Research: Stats Analysis Social Care 	Mandatory <ul style="list-style-type: none"> * The Economic and Political Contexts of Care * Working with Children and Families * Social Care and Disability * Addiction Studies * Research Project

Progression Opportunities

Graduates may progress onto postgraduate study.

Minimum Entry Requirements:

A minimum of six passes in the Leaving Certificate (including Mathematics and either English or Irish), with at least Grade C3 in two Higher Level papers, together with at least Grade D3 in four Ordinary Level papers plus a minimum of 300 points.

Note

Because of the nature of the placements on this programme, applicants will be required to successfully pass Police/Garda vetting for all jurisdictions where the applicant was/is resident.

My DkIT

Lorna Lennon
4th Year Social Care
student (2015)

"My experience as a transfer student from IT Sligo into the fourth year of Social Care in Dundalk Institute of Technology was quite welcoming. I felt very much supported by the lecturers and also found the students within my class to be very helpful. They made this transition for me as a student very enjoyable."

Katie Bailey
4th Year Social Care
student (2015)

"The last four years as a social care student in Dundalk Institute of Technology have been amazing. I have made so many life-long friends and I have learned so much. I would like to thank every social care lecturer for all of their support and guidance along the way. I would definitely recommend this course to anybody thinking of doing it."

Laura Ward
4th Year Social Care
student (2015)

"As a transfer student from IT Tallaght, I found Dundalk Institute of Technology to be extremely welcoming. The students and staff made the transition very easy. The applied social care course in DkIT offers a high standard of academic learning and the opportunity to put theory into practice in the work placement section of the course."

Shauna McParland
4th Year Social Care
student (2015)

"Being a student of Dundalk Institute of Technology has been the best experience of my life. The staff at DkIT have been amazing and so supportive throughout the 4 years. I have learned so much about the field of social care and the course has prepared me for future employment in this area."

Kim O'Leary
4th Year Social Care
student (2015)

"In attending Dundalk Institute of Technology I have learned so much about myself personally and professionally. I have learned that I have interests that were not previously explored. The staff have been so supportive and encouraging throughout the past four years and for that I am eternally grateful."

Note

Upon successful completion of Years One and Two, students may exit with a Higher Certificate Award. Upon successful completion of Year Three, students may exit with a Level 7 Ordinary Degree.

in Sport, Exercise
& Enterprise

About this Programme

The BA in Sport, Exercise and Enterprise presents students with a unique opportunity to develop leadership and entrepreneurial skills in an environment that demands academic rigour as well as practical application.

This programme will equip you with the knowledge, skills and attributes to be a leader in your chosen field. The sports and exercise element of the programme focuses on activities the general population engage in throughout the life course. These are specifically aimed at children, youths, adults, older adults and special populations, and reflect the changing nature of participation throughout growth, maturation and ageing. You can attain a wide range of coaching qualifications in GAA, FAI, IRFU, Athletics, Sailing and Kayaking, to name but a few.

You will also have the opportunity to reinforce academic learning with a number of progressive, professional awards in Exercise and Fitness each year with the potential to gain a QCF Level 4 (NFQ level 6) qualification as a specialist trainer by Year 4. This, combined with modules designed to analyse and improve personal and team performance, makes you immediately employable as a professional practitioner.

The Enterprise and Business elements of the programme focus on modules in creativity, innovation and teamwork, entrepreneurship, new venture development, social entrepreneurship and graduate life skills. You will acquire the skills needed to assess current market conditions and develop your own business ideas. You will have an opportunity to put theory into practice on Work Placement, where we have built effective relationships with a number of innovative, supportive and exciting organisations.

Should you wish to broaden your horizons further you have the opportunity to 'Study abroad' in UMEA University, Sweden, as part of our Erasmus programme.

The programme aims to develop analytical leaders with the problem solving skills to drive innovation within the Community and Commercial sectors. Graduates of the BA Sport, Exercise and Enterprise will be equipped to add real value to the economic, social, cultural progress and quality of life of communities. **Therefore, if you have an interest in sport and exercise, are a self-starter, and wish to develop your career prospects within a supportive and challenging academic environment, we look forward to hearing from you.**

Career Options

- * Sports Development Officers
- * Exercise and Fitness professionals
- * Physical Activity Coordinators
- * Leisure Facility Management
- * Adapted Physical Activity Officers
- * Sports Coaching

Progression Opportunities

Students who complete the programme with Enterprise **Electives** are eligible to apply for the Bachelor of Business (Hons) add on in DkIT.

All students are eligible to apply to the Bachelor of Arts (Hons) in Sport, Exercise with Enterprise, (One Year add on).

Minimum Entry Requirements

All applicants into Year 1 must apply through the CAO.

Six Leaving Certificate subjects, (including Mathematics, and either English or Irish)

And

Either one Grade C3 in a Higher Level paper

Or an overall points total of 200

Students who have completed successfully a FETAC Level 6 award in a Sports related area are eligible to apply directly to the School of Business and Humanities for entry to Year 2 of the programme.

We especially welcome applications from mature students.

About this Programme

There is an increased demand within the tourism industry for people who are experienced in more than one area of work. Responsibilities could include periods based in the reception, kitchen, bar, accommodation department or restaurant. This course is particularly attractive to people who enjoy variety and who hope to gain all-round experience. Training covers both theory and practice and includes up to 6 months paid work experience in industry.

Career Options

On completion of this programme graduates will have the competence to work in a multifunctional capacity in a range of operational roles in the hospitality industry including: restaurant service, bar, accommodation service and front office.

About this Programme

The hospitality industry is one of the world's fastest growing industries. It offers excellent opportunities both in Ireland and internationally for suitably qualified people. The starting point for your management career in this industry is this Degree from Dundalk Institute of Technology, which has been designed to help you acquire the business management skills and the specialist knowledge of the industry that you will need to succeed.

The Bachelor of Arts in Hospitality Management is based around specific industry studies and a core of business and management subjects. Each year is split into two 15-week semesters; you will study six modules per semester. The programme is organised into three levels, ranging from introductory modules at year 1 to advanced topics at year 3. The Professional Internship Training takes place between semester four and five.

In Year One and Two of the programme there are a number of practical modules which include restaurant service, food production and event supervision.

Subjects

	Semester 1	Semester 2
Year 1	Mandatory <ul style="list-style-type: none"> * Induction/ Programme Preparation * Communication Skills for Success * Fundamentals of Hospitality Operations 1 * Introduction to the Industry * Essential Office Applications Electives <ul style="list-style-type: none"> * French and Cultural Competence * English 1 * French 1 * Spanish 1 * Chinese 1 * Introduction to the Global Tourism Industry 	Mandatory <ul style="list-style-type: none"> * Fundamentals of Accounting * Communication and Professional Development for the Service Industry * Fundamentals of Hospitality Operations * Marketing for Hospitality and Events Electives <ul style="list-style-type: none"> * The Geography of Travel and Tourism * German and Cultural Competence * English 2 * French 2 * Spanish 2 * Chinese 2
Year 2	Mandatory <ul style="list-style-type: none"> * Sales and Customer Service Operations * Hospitality Industry I.T * Food and Beverage Service Management * Financially Based Decision Making * Placement Preparation Electives <ul style="list-style-type: none"> * English 3 * French 3 * Spanish 3 * Chinese 3 * Spanish and Cultural Competence * Tourism Operations Management 	Mandatory <ul style="list-style-type: none"> * Placement for Hospitality Section (Degree)

	Semester 1	Semester 2
Year 3	Mandatory <ul style="list-style-type: none"> * Economics and Management Accounting * Applied Law for the Hospitality Industry * Hospitality Enterprise Development * Revenue Management for the Hospitality Industry Electives <ul style="list-style-type: none"> * English 5 * French 5 * Spanish 5 * Chinese 5 * Perception and Cultural Understanding * Erasmus English 1 * International Tourism Policy and Planning * Studies Abroad 	Mandatory <ul style="list-style-type: none"> * Human Resource Management for Hospitality and Events * Applied Marketing for Hospitality & Events Management * Hospitality Event Production * Contemporary Management for the Hospitality and Event Industry Electives <ul style="list-style-type: none"> * English 6 * French 6 * Spanish 6 * Chinese 6 * Intercultural Communications * Erasmus English 2 * Contemporary Issues in Tourism

Career Options

Graduates of this programme are highly employable and have a wide range of opportunities to choose from. The hospitality industry allows you to be mobile and there will be opportunities to work abroad. Career prospects will not be limited to the hospitality sector, our graduates have a broad range of transferable skills to offer. Current graduates are

employed in a range of positions across the hospitality industry including: food and beverage service / management, accommodation operations / supervision, front office management, human resource management, and sales and marketing.

Progression Opportunities

Graduates of this programme can progress onto the Level 8 BA Honours in Hospitality Management.

Minimum Entry Requirements

Six Leaving Certificate subjects, (including Mathematics, and either English or Irish)

And

Either one Grade C3 in a Higher Level paper

Or an overall points total of 200.

Students taking the Hospitality Management stream with French must have attained a minimum of B3 in French on an Ordinary Level Leaving Certificate paper or a minimum of D1 in French on a Higher Level Leaving Certificate paper.

No Prior knowledge of Spanish is necessary for this programme.

Hospitality Management (1 Year add-on) Bainistíocht Fáilteachais (1 Bliain Foirlíontach)

APPLY TO
DKIT

Course	Code	Places	Level	Duration
BA (Hons) in Hospitality Management	DKA52	20	8	1 Year (add-on)

About this Programme

This one year add-on Honours Arts Degree in Hospitality Management follows on from the Degree in Hospitality Management to give students an in-depth knowledge of the hospitality industry and generate superb employment opportunities.

The course focuses on business and the workings of the industry, where students learn how to critically analyse and solve business problems, make decisions and generate long term solutions. Graduates can expect to find employment in management positions with the world's finest, Hospitality and Event providers.

Students who have reached the appropriate honours standard have access to a range of Masters Degrees in DkIT and elsewhere in Higher Education.

Subjects

	Semester 1	Semester 2
Year 1	Mandatory <ul style="list-style-type: none"> * Financial Management * International Hospitality Management * Leadership and Innovation * Strategic Management for Hospitality and Events * Research Paper Electives <ul style="list-style-type: none"> * Strategic Destination Marketing * Spanish 7 * English 7 * French 7 	Mandatory <ul style="list-style-type: none"> * Strategic Human Resource Management * Business Management Simulation * Integrated Marketing Communications * Research Paper Electives <ul style="list-style-type: none"> * English 8 * Responsible Tourism * French 8 * Spanish 8

Minimum Entry Requirements

Applicants to this programme should have successfully completed the Bachelor of Arts in Hospitality Management or equivalent, with an overall pass and a minimum overall average of 50% achieved in one sitting.

Culinary Arts

Ealaíona Cócaireachta

APPLY TO
CAO

Course	Code	Places	Level	Duration
Higher Cert in Arts in Culinary Arts	DK650	32	6	2 Years

About this Programme

This two year certificate programme is for individuals with a passion for and interest in culinary arts and food. If your aim is to become a 'top chef' either at home or abroad, this is the programme for you. The programme prepares you for employment as a professional chef in the tourism and hospitality industry.

As a chef in the skilled profession of cookery, you need to be creative with food. You also have to understand the science of food (including food safety), changing kitchen technologies and the business aspects of catering operations. The Culinary Arts programme covers the theory and practice of professional cookery including a 12 week work placement between year one and year two.

Career Options

There is always a need for qualified chefs in hotels, restaurants, and other food related business. Career promotions can be rapid from Commis Chef to Chef de Partie and ultimately Head or Executive Chef.

Progression Opportunities

Progression to further study will be through advanced entry to the Bachelor of Arts in Hospitality Management or the Bachelor of Arts in Culinary Arts.

Subjects

	Semester 1	Semester 2
Year 1	Mandatory <ul style="list-style-type: none"> * Induction/Programme Preparation * Culinary Fundamentals 1 * Introduction to the Industry * Culinary Science and Food Safety * Essential Office Applications * Communication Skills for Success 	Mandatory <ul style="list-style-type: none"> * Fundamentals of Accounting * Culinary Fundamentals 2 * Restaurant Service * Communications and Professional Development for the Service Industry * Culinary Science and Nutrition * Placement Preparation
Year 2	Mandatory <ul style="list-style-type: none"> * Foundations Gastronomy * The Art of Garde Manager * Classical Cuisine * Placement 	Mandatory <ul style="list-style-type: none"> * Culinary Event * Financially Based Decision Making * Contemporary Cuisine * Global Cuisine

Minimum Entry Requirements

Five passes in the Leaving Certificate (including either English or Irish).

Other Information

Faile Ireland currently pays= the student contribution for all students who are offered a place on this programme.

About this Programme

The BA in Culinary Arts affords exciting opportunities for creative development and enhanced employment opportunities across all sections of the food industry. The programme is designed in line with current developments in both national and international Culinary Arts education. The combination of in-depth underpinning knowledge, practical classes, business and leadership development, problem solving, critical thinking and teamwork combine to provide graduates with the competencies to forge a successful career in the Culinary Arts industry.

The programme emphasises a creative, inventive, organised and entrepreneurial approach. A key aim of the programme is to develop a well- rounded graduate with the ability to learn and develop to meet new challenges in their professional and personal development.

Subjects

	Semester 1	Semester 2
Year 1	Mandatory <ul style="list-style-type: none"> * Induction / Programme Preparation * Culinary Science and Food Safety * Communication Skills for Success * Introduction to the Industry * Culinary Fundamentals 1 * Essential Office Applications 	Mandatory <ul style="list-style-type: none"> * Fundamentals of Accounting * Culinary Fundamentals 2 * Culinary Science and Nutrition * Communication and Professional Development for the Service Industry
Year 2	Mandatory <ul style="list-style-type: none"> * Foundations of Gastronomy * Classical and Contemporary Cuisine * The Art of Garde Manager * Financially Based Decision Making * International Cuisine * Placement Preparation for Hospitality 	Mandatory <ul style="list-style-type: none"> * Placement for Hospitality Section (Degree)
Year 3	Mandatory <ul style="list-style-type: none"> * Contemporary Culinary Trends * Management Principles for the Culinary Arts Industry * Culinary Arts Creativity * Applied Law for the Hospitality Industry * Economics and Management Accounting 	Mandatory <ul style="list-style-type: none"> * Human Resource Management for the Hospitality and Events Industry * Creative Culinary Events * Culinary Leadership and Training * Systems and Kitchen Design * Sustainable Gastronomy

Career Options / Progression Routes

The course is designed to equip students with the skills necessary for a career in management in the culinary arts and by extension the catering, food and hospitality related industries. Employment prospects are wide and varied. Some graduates will specialise in areas such as food & beverage management, food production, food product development and training & education. Others may become involved in a different aspect of the industry such as sales & marketing, human resources management or financial control. Others will aspire to senior general management positions or become involved in entrepreneurial activities and starting their own businesses.

Typical position include:

- * Hotels and Restaurants
- * Food Marketing & Product Development
- * Pastry & Confectionary
- * Training & Education
- * Culinary Manager in the Industrial Sector

Minimum Entry Requirements

Six Leaving Certificate subjects, (including Mathematics, and either English or Irish)

School of Engineering

Scoil na hInnealtóireachta

Engineering is the design, analysis, and / or construction of works for practical purposes. A career in Engineering probably offers a greater range of opportunities than just about any other career choice. Engineers use their knowledge of science, mathematics, and appropriate experience to find suitable solutions to a problem.

Dundalk Institute of Technology's School of Engineering develops innovative technologies, thinking, and practice, as well as creative leaders equipped to address the world's complex problems. The School of Engineering in DkIT will teach you

to also have the best knowledge and skills required to work in this industry.

Engineering has always been about Sustainability. All of our programmes from the Engineering Trades to Master's Degree have sustainability at their core. Fundamental engineering principles do not change with fashion; however the problems that need to be addressed do change as new challenges arise.

The School of Engineering in DkIT has 3 separate departments.

These are:

- * Department of Electronic & Mechanical Engineering
- * Department of the Built Environment
- * Department of Engineering Trades

About this Programme

This Honours Degree in Building Surveying trains students to the appropriate standard for entry into building surveying practice, and for providing a professional building surveying service.

While Building Surveyors are qualified to design and oversee the construction of new buildings, they specialise in the sustainable management, maintenance and upgrade of existing buildings, work that is necessary irrespective of economic conditions.

There is a growing demand for building surveying expertise. Environmental awareness, sustainability issues, economic restraint and building legislation dictate that increasing emphasis is placed on the effective utilisation of proposed and existing buildings. In particular, property owners, developers and purchasers are encouraged to more closely assess the life cycle performance of proposed and existing buildings and the possible reuse of existing buildings as an alternative to demolition and rebuilding.

The roles of the professions associated with the development and use of buildings are continually changing in response to changes in owner / user attitudes and needs, building technologies, legislation, the economic environment,

Subjects

	Semester 1	Semester 2
Year 1	Mandatory <ul style="list-style-type: none"> * Building Technology 1 (year-long) * Materials Technology * Measured Surveys 1 * Construction Mathematics * Report Writing & Communications * Essential Office Applications 	Mandatory <ul style="list-style-type: none"> * Building Technology 1 (year-long) * Building Services 1 * Building Quantification * Measured Surveys 2 * AutoCAD 1
Year 2	Mandatory <ul style="list-style-type: none"> * Building Control (year-long) * Integrated Group Project (year-long) * Building Technology 2 * Materials Performance * AutoCAD 2 * Structures 	Mandatory <ul style="list-style-type: none"> * Building Control (year-long) * Integrated Group Project (year-long) * Building Pathology 1 * Schedules of Works * Building Surveys 1 * Building Services 2
Year 3	Mandatory <ul style="list-style-type: none"> * Building Design & Performance (year-long) * Law (year-long) * Procurement Procedures * Architectural Conservation * Research Studies * Work Preparation & Placement 	Mandatory <ul style="list-style-type: none"> * Building Design & Performance (year-long) * Law (year-long) * Building Surveys 2 * Property Economics & Valuations * Planning & Development Control * Building Information Modelling (BIM)
Year 4	Mandatory <ul style="list-style-type: none"> * Building Adaptation Project (year-long) * Dissertation (year-long) * Building Refurbishment * Building Pathology 2 * Project Management 	Mandatory <ul style="list-style-type: none"> * Building Adaptation Project (year-long) * Dissertation (year-long) * Maintenance & Facilities Management * Professional Practice & Entrepreneurship * Building Surveying Studies

work practices and information technology. In this regard, this Honours Degree programme prepares graduates for a building surveying profession which, with its broad-based education and training encompassing physical and social sciences, is well placed to provide, directly and indirectly, an ever-increasing range of services

to those seeking to develop and utilise building assets. It also benefits from a formal work preparation and placement module in stage 3, ensuring that students develop key technical and interpersonal skills and foster a commercial awareness prior to completing the programme.

This programme is unique in the Republic of Ireland in that it is the only such programme that is specifically recognised in the Building Control Act 2007. It is also currently the **ONLY** Building Surveying programme recognised by the Society of Chartered Surveyors Ireland (SCSI) as meeting the education standard leading to recognition as Chartered Building Surveyor in this jurisdiction. Graduates holding this qualification will also be recognised worldwide through the SCSI affiliation with the Royal Institution of Chartered Surveyors (RICS).

Career Options

One of the key advantages of Building Surveying is that it is a broadly based professional qualification providing graduates with a wide range of career opportunities within the public and private sectors.

Career options include: design consultancy, building refurbishment, building control, fire safety, project management,

planning consultation, building conservation, environmental and energy management, property management including landlord and tenant matters, facilities and maintenance management, building surveys and inspections, building insurance, expert witness and legal issues.

Professionals in the property and construction sector are now seeing an increase in activity driven by demand for the refurbishment of existing buildings for energy efficiency purposes, and through overseas investment in new Irish commercial property by expanding international purchasers.

The SCSI estimates that within 3 to 5 years, there will be an insufficient supply of graduates from professional Building Surveying programmes to satisfy demand.

Progression Opportunities

Graduates may, subject to fulfilling experiential requirements, progress to become a Chartered Building Surveyor with the Society

of Chartered Surveyors Ireland (SCSI) and/or a Chartered Building Engineer with the Chartered Association of Building Engineers (CABE). Programme accreditation is subject to ongoing review.

Graduates are also eligible to teach 'Construction Studies' at secondary level (Postgraduate Diploma in Education required, plus Teaching Council registration).

For further details visit:

www.teachingcouncil.ie

Work Placement

This programme includes formal work placement and a workplace preparation module in stage 3.

Minimum Entry Requirements

A minimum of six passes in the Leaving Certificate (including Mathematics and either English or Irish), with at least Grade C3 in two Higher Level papers, together with at least Grade D3 in four Ordinary Level papers plus a minimum of 300 points.

About this Programme

The principal aim of this programme is to provide each student with the education and training necessary for entry into the Construction and Property industry at Construction Technologist level.

In particular, the programme aims to develop each student's building knowledge, know-how, skill, competence with the confidence to begin, in practice, to effectively take responsibility for the making of those judgments and decisions commensurate with the role of the building technologist.

In addition, it seeks to prepare each student for the ongoing learning of his or her chosen profession through experience in practice and participation in continuing career development programmes and progression to higher level studies. The Role of the Construction Technologist in the building industry is concerned with the provision, maintenance and renewal of Ireland's building assets.

Any new building or existing building for residential, industrial, commercial, educational, medical or other purposes, must be designed, constructed, maintained, operated and removed in a sustainable way.

The programme is designed to develop the students' knowledge and understanding of the principal functional, technological, economic, social and legal factors which influence the design, construction and use of buildings.

This is done to ensure that the visual appearance, structure, thermal, visual, space and aural environmental conditions of the building are in keeping with its

purpose, while ensuring the ease of movement and health and safety of its occupants.

Career opportunities for Construction Technologists exist in all areas of activity associated with the development and use of buildings.

Career Options

A graduate can work as a Construction Technologist in all areas of activity associated with the development and use of buildings.

Subjects

	Semester 1	Semester 2
Year 1	Mandatory <ul style="list-style-type: none"> ✦ Building Technology 1 (year-long) ✦ Materials Technology ✦ Measured Surveys 1 ✦ Construction Mathematics ✦ Essential Office Applications ✦ Report Writing & Communications 	Mandatory <ul style="list-style-type: none"> ✦ Building Technology 1 (year-long) ✦ Building Services 1 ✦ Building Quantification ✦ Measured Surveys 2 ✦ AutoCAD 1
Year 2	Mandatory <ul style="list-style-type: none"> ✦ Construction Technology & Detailing (year-long) ✦ AutoCAD/Building Information Modelling (BIM) (year-long) ✦ Building Structures ✦ Building Services 2 ✦ Measurement & Pricing ✦ Health and Safety 	Mandatory <ul style="list-style-type: none"> ✦ Construction Technology & Detailing (year-long) ✦ AutoCAD/Building Information Modelling (BIM) (year-long) ✦ Construction Specification ✦ Structural Detailing ✦ Infrastructure ✦ Building Pathology
Year 3	Mandatory <ul style="list-style-type: none"> ✦ Building Control (year-long) ✦ Procedures & Documentation ✦ Building Surveys ✦ Sustainable Design Project 1 ✦ Building Information Modelling (BIM) 	Mandatory <ul style="list-style-type: none"> ✦ Building Control (year-long) ✦ Planning Practice ✦ Law and Administration ✦ Sustainable Conservation ✦ Construction Management ✦ Sustainable Design Project 2

Graduates will be able to undertake responsibility and exercise independent judgement, under supervision, for much of the day-to-day technical work associated with the evaluation and optimisation of building performance in use

It would be quite typical for graduates to work in an office based professional practice environment or directly employed carrying out technical construction site activities for the main contractor.

With a growing emphasis on energy and the environment, and the continual development of new and innovative construction techniques opportunities are emerging for graduates of this programme all the time.

Progression Opportunities

Students who obtain an overall award average of 50 percent or higher are eligible to progress, with appropriate exemption, to the Bachelor of Science (Honours) in Building Surveying, Level 8 in DkIT

which is professionally accredited by the Society of Chartered Surveyors Ireland.

Minimum Entry Requirements

Six passes in the Leaving Certificate (including Mathematics and either English or Irish)

And

Either one Grade C3 in a Higher Level Paper,

Or an overall points total of 200.

Note

There is a very strong link within the department to a number of professional bodies by the staff and students. Guest speakers from the Construction & Property industry are regularly invited to speak and present with the Young Students Surveyors Society at DkIT. A number of Department staff are involved at various committee levels within the professional bodies and also hold Chartered membership of such bodies such as the Society of Chartered Surveyors Ireland, The Chartered Association of Building Engineers, The Chartered Institute of Building and the Institute of Engineers Ireland.

About this Programme

The principal aim of this programme is to provide each student with the education and training necessary for entry into the civil engineering profession/industry at civil engineering technologist level. In particular, the programme aims to develop each student's civil engineering knowledge, know-how and skill and competence and the confidence to begin, in practice, to effectively take responsibility for the making of those judgments and decisions commensurate with the role of the civil engineering technologist.

Civil Engineers are involved in the assessment, planning, design, construction, operation and maintenance of physical resources such as road and rail systems, bridges and tunnels, docks, harbours, sea defences, airports, dams and reservoirs, water supply systems, pollution control systems, mines, and structures associated with energy supply. In addition, they are involved in ensuring the strength, stability and serviceability of building structures. This programme is designed to develop your ability to apply engineering principles and technologies to the solution of problems arising in the investigation, planning, design, construction, operation and maintenance of civil engineering works.

Subjects

	Semester 1	Semester 2
Year 1	Mandatory <ul style="list-style-type: none"> * Applied Mathematics * Civil Engineering Skills * Materials Technology 1 * Engineering Communications * Surveying 1 (year-long) * Civil Engineering Construction 1 (year-long) 	Mandatory <ul style="list-style-type: none"> * CAD 1 * Structural Mechanics 1 * Civil Engineering Science * Mathematics 1 * Surveying 1 (year-long) * Civil Engineering Construction 1 (year-long)
Year 2	Mandatory <ul style="list-style-type: none"> * Materials Technology 2 * Structural Mechanics 2 * Structural Design & Detailing (year-long) * CAD and Computer Applications (year-long) * Civil Engineering Construction 2 * Mathematics 2 	Mandatory <ul style="list-style-type: none"> * Soil Mechanics * Surveying 2 * Procedures and Documentation * Fluid Mechanics * Structural Design & Detailing * CAD and Computer Applications
Year 3	Mandatory <ul style="list-style-type: none"> * Geotechnical Engineering * Surveying 3 * Environmental Engineering (year-long) * Structural Analysis and Design (year-long) * Project 1 * Highway Engineering 	Mandatory <ul style="list-style-type: none"> * Hydrology and Hydrogeology * Civil Engineering Management * Mathematics 3 * Project 2 * Environmental Engineering (year-long) * Structural Analysis and Design (year-long)

The programme considers

- * The analysis, design, construction and maintenance of road and other transportation systems;
- * The occurrence and regulation of water and water flow;
- * The provision and maintenance of water supplies and sanitary services including environmental pollution control;
- * The analysis, design, construction and maintenance of civil engineering and building structures, including bridges and their foundations;
- * The financial and managerial topics common to all civil engineering programmes.

As a student on this programme you will acquire skills in the following areas:

- * Civil engineering drawing and detailing (manual- and computer-aided)
- * Materials specification and testing
- * Surveying and setting out
- * Measurement and costing of civil engineering work
- * Civil engineering work organization
- * Document preparation and interpretation
- * Computer-aided analysis, design and draughting.

Career Options

Career opportunities for civil engineering technologists exist in all areas of activity associated with civil engineering project development and use.

Recognition by Professional Bodies

The Institute of Engineers of Ireland (EI) accredits this programme as satisfying the academic requirements for Associate grade of membership of the IEI.

Progression Opportunities

Progression to B.Sc in Civil Engineering in DkIT as well as other Civil Engineering Honours Degree Courses in other Institutes of Technology or Universities in Ireland and abroad.

Minimum Entry Requirements

Six passes in the Leaving Certificate including a minimum grade of C3 in Ordinary Level Mathematics (or a minimum D3 in Higher) and a minimum grade of D3 in Ordinary Level English or Irish

And

Either one Grade C3 in a Higher Level Paper,

Or an overall points total of 200.

Holders of cognate National Craft Certificates can avail of advanced entry.

APPLY TO
DKIT

Course	Code	Places	Level	Duration
BSc (Hons) in Civil Engineering	DKA42	30	8	1 Year (add-on)

About this Programme

Civil Engineers are involved in a vast range of projects from simple housing construction to major infrastructure developments with global impact. Civil Engineering is focused on achieving the most efficient and effective design possible from the resources available by applying their knowledge of nature, materials, forces and technology to the solution of problems and the creation of reality from the concepts of others. The scope of engineering projects and the range of technologies is changing rapidly with the evolution of renewable energy industries, waste management processes and infrastructure changes. This programme offers students the opportunity to enhance their level of technical knowledge, understanding and skill and will develop the graduate's skill in core civil engineering areas as well as more specialist areas such as new software and information systems and renewable energy technologies.

Subjects

	Semester 1	Semester 2
Year 1	Mandatory <ul style="list-style-type: none"> * Geotechnical Engineering * Renewable Energy for Civil Engineers (year-long) * Individual Research Project (year-long) * Advanced Mathematics * Group Design Project * Structural Design 2014 	Mandatory <ul style="list-style-type: none"> * Transportation Engineering * Environmental Engineering * Infrastructure Planning and Management * Structural Analysis * Renewable Energy for Civil Engineers (year-long) * Individual Research Project (year-long)

Progression Routes

- * M.Sc in Civil Engineering
- * M. Eng in Civil Engineering
- * M.Sc in Renewable Energy Systems (with bridging studies)
- * Professional Engineering qualifications

Minimum Entry Requirements

Applicants to this programme should have successfully completed a Level 7, Bachelor of Engineering (ordinary) in Civil Engineering, Building, Structural Engineering, or equivalent with an overall pass and a minimum overall average of 50% achieved in one sitting.

Applicants holding a different award titles are invited to apply to the Institute in order to determine the suitability of their award for admission to the programme.

Career Opportunities

Graduates may work in structural, water, public health and geotechnical branches of the civil engineering industry. As well as developing knowledge in structural, geotechnical, and environmental engineering, it will improve management and employability skills. Compared

to the more mathematical BEng Civil Engineering, this course places more emphasis on civil engineering design and practice. The extensive final year project, supervised by design lecturers with industry experience, prepares students for work in a design office.

About this Programme

Design Engineers require knowledge, understanding and competencies in a range of areas relating to the needs and future requirements of products sympathetic to conservation of energy, as well as an ability to quantify energy usage of existing products and make recommendations/proposals for more efficient energy usage. There is an ever increasing requirement to design and re-engineer products in an energy conscious manner which comply with legislative and technical issues (including ecological considerations, finite material resources and most particularly the consequences of excessive energy consumption) and adopt a holistic view of design to incorporate product life cycle management.

Learn how to successfully design, implement, manage and develop products conforming to the new sustainability directives. Sustainability involves many disciplines; hence there is a need to broaden the horizons of conventional engineering education.

The programme is designed with seven mandatory modules, based on a central theme of professional engineering development and sustainable design practices. You can then select five technology specific modules (electives) to further develop your core competence in a specific discipline of either Mechanical or Electronic Engineering.

Subjects

Semester 1	Semester 2
Mandatory <ul style="list-style-type: none"> * Sustainable Design Management * Engineering for Sustainability * Mathematics 1 * Sustainable Design Practice (year-long) Electives <ul style="list-style-type: none"> * Integrated Energy Systems (year-long) And Mechanical Design Or <ul style="list-style-type: none"> * Embedded Systems Design 1 And Control Systems Engineering	Mandatory <ul style="list-style-type: none"> * Enterprise Management * Mathematics 2 * Sustainable Design Practice 2 Electives <ul style="list-style-type: none"> * Computer Aided Engineering And Materials and Resources And Integrated Energy Systems (year-long) Or <ul style="list-style-type: none"> * Embedded Systems Design 2 And Control Systems Engineering (year-long) And Power Electronics

Career Options

In a rapidly developing industry, new job titles will inevitably emerge. The list below indicates potential career positions:

- * Design Engineer
- * Mechanical Engineer
- * Electronic Engineer
- * Energy Management/Consultant
- * Energy Component & Systems Design
- * Conformance Engineer
- * Patent Examiner

Some of our past graduates are employed in the following companies:

- * Intel Corporation
- * Multihog
- * Project Engineering
- * Suretank Ltd.
- * Valeo Vision Systems
- * Cameron Ireland

- * Hilti (Gt. Britain) Ltd
- * ASML Eindhoven
- * Tarpon Energy Services
- * Xtratherm

Progressions Opportunities

Graduates can progress to Master's Degree both Nationally and Internationally. Past graduates have completed such Masters in Queen's University Belfast, DCU, DIT as well as the Masters in Renewable Energy at DkIT.

Minimum Entry Requirements

Applicants to this programme should have successfully completed a Bachelor of Engineering (Ord.) in Mechanical or Electronic Engineering, or equivalent, with an overall Pass and a minimum overall average of 50% achieved in one sitting. Applicants holding different award titles are invited to apply to the Institute in order to determine the suitability of their award for admission onto this programme.

About this Programme

Graduates in Mechanical engineering combine the basic knowledge of physical sciences and engineering education with experience and expertise to invent, design and manufacture, run and maintain mechanical systems equipment and tools in all branches of industry including in:

- * Product Design
- * Machine Design
- * Agriculture & Food Industry
- * Energy Generation
- * General Manufacturing
- * Planning & Management
- * Medical Devices & Pharmaceuticals

Engineering ingenuity to create innovative products that combine different technologies is one of the prominent strengths of Mechanical Engineering. Mechanical Engineers are adaptable, through knowledge of fundamental principles of science and engineering reinforced with transferable problem solving skills. The graduate's ability to integrate quickly within the workplace is key to their career development. This programme will equip graduates to show initiative, participate actively in teams, manage, organise and communicate effectively. In addition graduates will have a strong sense of ethics and awareness of the social impact of their actions.

Note
ERASMUS English is available **ONLY** to ERASMUS Exchange students

Dundalk Institute of Technology aims to provide a stimulating environment in which the students' interest in mechanical engineering is fostered by a modern and flexible teaching and learning strategy.

The External placement module in Year 2 – Semester Two aims to allow students to develop professional skills through an applied experience in various phases of engineering.

Career Options

Demand for our graduates in a wide range of engineering industries has been strong with many having job offers from both local and national companies shortly after sitting their final exams including:

- * Combilift Ltd
- * Intel
- * Hiab MOFFETT truck-mounted forklifts
- * OpenHydro Suretank Ltd.
- * Glen Dimplex
- * Kingspan Group
- * Xtratherm
- * MultiHog

Recognition by Professional Bodies:

Graduates are eligible for Engineer's Ireland Associate Member grade.

Progression Opportunities

- * BEng (Honours) in Sustainable Design
- * BSc (Hons.) in Engineering Entrepreneurship
- * Masters in Renewable Energy Systems (with Bridging Studies)

This programme also provides the foundation for transfer routes to honours degree programmes in other Institutes of Technology and Universities in Ireland and abroad.

Minimum Entry Requirements

Six passes in the Leaving Certificate including a minimum grade of C3 in Ordinary Level Mathematics (or a minimum D3 in Higher) and a minimum grade of D3 in Ordinary Level English or Irish

And

Either one Grade C3 in a Higher Level Paper,

Or an overall points total of 200.

Holders of cognate National Craft Certificates can avail of advanced entry.

Note

Students who have successfully completed the first two years of this programme and who wish to leave after two years, may be awarded a Level 6 Higher Certificate in Engineering.

My DkIT

James Redmond
Co. Louth

Bachelor of Engineering in Mechanical Engineering from DkIT (2013)

Honours Degree Mechanical & Manufacturing Engineering from Trinity College Dublin (2014)

Master's Degree Engineering from Trinity College Dublin (2015)

Currently Working at BMW Oxford

"As a mature student I had some very mixed emotions about returning to the education system being quite disillusioned with my previous experiences at secondary level. Once I met with the Engineering staff of Dundalk Institute of Technology however; seeing their passion for Engineering and teaching, and as I got stuck into my course of study, I became fully reassured and more importantly felt right at home in DkIT. The encouragement, advice and guidance I received was second to none.

I felt that the Lecturing staff on the programme helped shaped me to become a well refined Mechanical Engineer and had equipped me with the essential knowledge, skills, confidence and self-belief, needed to then pursue both an Honours Degree; which I completed in 2014 and then a Masters Degree (2015), both at Trinity College Dublin. I am due to commence employment as a Graduate Engineer with BMW in Oxford in September.

From both an academic and social standing, I highly, recommend DkIT to you as they go that extra step, and can offer all you could hope for from a third level institution. DkIT is the first step in achieving your dreams."

About this Programme

This Honours Degree in Engineering Entrepreneurship is multidisciplinary programme, combining Engineering with Business.

The aim of the programme is to produce graduates who are not only competent in the core engineering skills, but who also have a mind-set capable of recognising and pursuing business opportunities. The programme is ideal for Level 7 graduates, with a broad engineering background who want to develop entrepreneurial, problem-solving and analytical abilities.

Central to the Programme is the New Venture Development Module where Students are required to develop an idea in terms of its Technical and Business aspects.

Career Options

- * Design Engineer
- * Engineer – within specific disciplines
- * Technical Sales and Marketing
- * Business Development
- * Project Management Systems Engineer
- * New Product Development Engineer
- * Technical Writer

Semester 1

Mandatory

- * New Venture Development (year-long)
- * Project Engineering (year-long)
- * Creativity & Innovation
- * Enterprise and Operations
- * Sales & Marketing

Electives

- * Infrastructure Development
- * Planning & Development Control
- * Control Systems
- * Energy Systems in Buildings

Semester 2

Mandatory

- * New Venture Development (year-long)
- * Project Engineering (year-long)
- * Entrepreneurship and Innovation for Sustainability
- * New Venture Finance
- * Legal, Intellectual Property & Commercialisation

Electives

- * Project Management
- * Power Electronics
- * Materials and Resource Evaluation

The flexible learning initiatives utilised in the programme may see a small number of graduates setting up and developing their own business interests, with the resources available in the Regional Development Centre at Dundalk Institute of Technology.

Progression Opportunities

Masters in Entrepreneurship and Marketing in Dundalk Institute of Technology.

Minimum Entry Requirements

The programme is open to applicants who have successfully completed a Level 7, Bachelor of Engineering degree or equivalent Technological Programme with an overall pass and a minimum overall average of 50% achieved in one sitting.

Applicants holding different award titles are invited to apply to the Institute in order to determine the suitability of their award for admission to the programme.

My DkIT

Jamie Culleton
Dundalk, Co. Louth

Master's Degree in Advanced Mechanical Engineering in Queen's University Belfast
Bachelor of Engineering (Hons.) in Sustainable Design (Graduating 2013)
Bachelor of Engineering in Mechanical Engineering (Graduated 2012)
Awarded: Best third year mechanical engineering project (2012), accredited by Engineers Ireland (for project in the design of an energy recovery exercise machine)

Currently Works at XtraTherm

“

The atmosphere at Dundalk Institute of Technology was brilliant. I found Lecturers to be extremely helpful and approachable, and there was always great support from fellow students. Facilities in the Institute were very good and constantly improving with state of the art software and equipment.

The Sustainable Design add-on was a brilliant addition to the level 7 degree as it increased my mechanical engineering skills in a sustainable fashion regarding design which is sought after by many employers. It also focused heavily on design with the use of software and also in a practical manner relating to real life applications. After I finished my studies at DkIT (Bachelor of Engineering in Mechanical Engineering 2012 & Bachelor of Engineering (Hons.) in Sustainable Design 2013) I completed a Master's Degree in Advanced Mechanical Engineering in Queen's University Belfast. I am currently employed as a graduate engineer working on projects in factories in Ireland, England and Belgium.

About this Programme

Electrical/Electronic Engineers design, specify, supervise and operate complex systems and products based on electrical principles, used in Energy, Communications, Measurement and Control. Electronic products encompass a range from consumer durable goods, environmental control, ICT installations, Automation & Robotic systems, Transportation systems as well as in Medical Diagnostic & Therapeutic, Scientific and Engineering measurement.

All these have to be carefully designed, manufactured, installed and maintained in an unobtrusive, ergonomic and aesthetically pleasing manner. These products and services must operate in an effective and efficient manner to international standards within a global marketplace. They must satisfy safety and product liability requirements in a manner, which meet client expectations of quality and cost.

Graduates of this programme must be in a position to engage in any of these activities. These are long term functional attributes and not subject to local or short duration economic perturbation.

The aim of this programme is therefore:

- ✦ Employ an engineering approach to the solution of engineering technology problems.

	Semester 1	Semester 2
Year 1	Mandatory <ul style="list-style-type: none"> ✦ Mathematics 1 ✦ Electrical Fundamentals ✦ Professional Practice ✦ Electronic Devices ✦ Embedded Systems 1 (year-long) ✦ Engineering Practice 1 (year-long) Electives <ul style="list-style-type: none"> ✦ Engineering Practice 1A ✦ Erasmus English 1 	Mandatory <ul style="list-style-type: none"> ✦ Electronic Circuits ✦ Electrical Principles ✦ Engineering Principles ✦ Mathematics - Calculus ✦ Embedded Systems 1 (year-long) ✦ Engineering Practice 1 (year-long) Electives <ul style="list-style-type: none"> ✦ Embedded Systems 2 ✦ Engineering Practice 1B ✦ Erasmus English 1

Innealtóireacht Córas Leictreach agus Leictreonach

- * Identify, formulate, analyse and contribute to the solution of engineering technology problems
- * Select and apply solutions from knowledge of engineering sciences and mathematics
- * Contribute to the design of a component, a system or process to meet specified needs
- * Design and conduct experiments to analyse and interpret data
- * Integrate innovation and enterprise in their practice of engineering
- * Work effectively as an individual, in teams, and in multidisciplinary settings
- * Undertake lifelong learning.
- * Communicate effectively with the engineering community and with society at large
- * Employ high ethical standards in the practice of engineering
- * Identify the environmental impact in the practice of engineering. These aims are in conformance with the Institute's stated policy regarding Sustainability, Entrepreneurship and Internationality

Graduates of this programme will be capable of undertaking at Associate Engineer level the following general functions: -

- * Contributing to the specification, design, manufacture and commissioning of electrical/electronic systems, products and devices
- * Undertaking further and continual professional development
- * Working and contributing as part of an interdisciplinary team.
- * Gaining professional recognition as Associate or Incorporated Engineers within the International community

Career Options

There are over 60,000 people involved in the Electronic/Electrical area in Ireland, designing, testing, manufacturing, selling, installing and maintaining equipment. Practically every major electronic and IT Company in the world has a presence in Ireland including Apple, Hewlett Packard, Ericsson, Intel, IBM, Microsoft, Analog Devices, Xilinx, etc. You may work for one of these major companies. Alternatively you may find yourself in Eircom, the ESB or BT.

You may become an installation/maintenance engineer in a Biotech, Chemical or other manufacturing facility or even in the Army, Garda Síochána, Local Authority or government department. The

world is becoming more technology-oriented by the day but fewer people understand its underlining principles. All employers in the electronic /IT area are greatly concerned that we are not producing enough engineers at the present time. Graduates of this programme currently meet the education standard for the title of Associate Engineer with Engineers Ireland.

Progression Opportunities

- * BEng (Honours) in Sustainable Design
- * BEng (Honours) in Engineering Entrepreneurship
- * Masters in Renewable Energies Technology (with Bridging Studies)

About this Programme

The aim of this programme is to create graduates who have the capability to carry out skilled craft activities under supervision and have the technical skills to assist a variety of engineering and construction activities. They shall also be able to communicate design, specification and production requirements between both clients and other professionals within industry.

Students on the programme will cover a broad spectrum of Engineering Technology including, but not limited to, elements of carpentry and joinery, plumbing and electrical trades giving them a broad range of skills whilst not being specialised in any one area. The programme will enable advanced access for learners who demonstrate an interest and capacity to more advanced Engineering programmes within DkIT and elsewhere. Please note that Graduates will not be qualified as tradespersons.

Subjects Include

	Semester 1	Semester 2
Year 1	Mandatory <ul style="list-style-type: none"> * Construction Technology * Graphic Communication * Mathematics and Computer Applications * Engineering Skills and Technology 1 	Mandatory <ul style="list-style-type: none"> * Engineering Trade Science * Cad Fundamentals * Applied Mathematics * Engineering Skills and Technology 2
Year 2	Mandatory <ul style="list-style-type: none"> * Applied Surveying * Building Regulations and Control * Sustainable & Renewable Technology * Engineering Skills and Technology 3 	Mandatory <ul style="list-style-type: none"> * Introduction to Business * Technology Project * Engineering Skills and Technology 4

Career Opportunities

Graduates of this programme will have the skills and competences to enter directly into employment in the manufacturing, maintenance and general engineering and construction industries.

Minimum Entry Requirements

Five passes in the Leaving Certificate including Mathematics and either Irish, or English.

Progression Routes

On completion of the programme graduates may apply for advanced access to existing and proposed Level 7 programmes in the School of Engineering such as Civil, Mechanical or Electronic Engineering and Construction Technology.

Standards Based Apprenticeships

Printíseachtaí Caighdeánbhunaithe

About this Programme

Apprenticeship is the recognised means by which people are trained to become craftspeople in Ireland. The main craft trades have been designated by SOLAS and come within the scope of the Statutory Apprenticeship system, which is organised in Ireland by SOLAS in co-operation with the Department of Education and Skills, employers and unions. Apprenticeship is a demand-driven, workplace and classroom, educational and training programme for employed people aimed at developing the skills of the apprentice to meet the needs of industry and the labour market.

The apprenticeship system is a modular standards-based system generally comprising of 7 alternating phases of on-the-job and off-the-job training and development. These alternating phases of training consist of 3 off-the-job and 4 on-the-job phases. The duration of the 3 off-the-job training phases does not normally exceed 40 weeks.

The off-the-job phases are delivered by a Training Centre, an Institute of Technology or another approved training provider. The key factor in delivery of an off-the-job training phase is that it is delivered in a single training environment to ensure the integration of practical training with the necessary theoretical and personal skills.

What Apprenticeships can I do in Dundalk Institute of Technology?

Dundalk Institute of Technology provides the educational service for Phase 4 and Phase 6 of the Standards Based Apprenticeship system in the following Trade/Crafts:

- * Electrical
- * Carpentry & Joinery
- * Motor Mechanics
- * Plumbing

When do I study at Dundalk Institute of Technology?

You will attend Dundalk Institute of Technology for Phase 4 and Phase 6 of the Standards Based Apprenticeship. Both phases last between 10 and 11 weeks.

How do I obtain an Apprenticeship?

Apprentices must be at least 16 years of age and have a minimum of grade D in any five subjects in the Junior Certificate or equivalent. However, employers may require additional minimum qualifications.

Where individuals do not meet the minimum requirements they may be registered as an apprentice by an employer if:

- * They satisfactorily complete an approved preparatory training course and assessment interview. For information on these courses please contact your local Employment Services Office;

Or

- * Over 16 years of age with a minimum of three years relevant work experience. This work experience must be in a relevant designated industrial activity as SOLAS shall deem acceptable

Apprentices must be employed in their chosen occupation by an employer who has been approved by SOLAS. The employer must register the apprentice with SOLAS within 2 weeks of recruitment.

In certain occupations, a vision test is required.

In certain occupations, a vision test is required.

On-the-Job / Off-the-Job

PHASE 1

On-the-Job with the Employer (Minimum 3 months)

PHASE 2

Off-the-Job with Training Centre (Up to 20 Weeks)

PHASE 3

On-the-Job with the Employer (Minimum 6 months)

PHASE 4

Off-the-Job Institute of Technology (10 - 11 Weeks)

PHASE 5

On-the-Job with the Employer (Minimum 6 months)

PHASE 6

Off-the-Job Institute of Technology (10 or 11 Weeks)

PHASE 7

On-the-Job with the Employer (Minimum 3 months)

Standards Based Apprenticeships

Printíseachtaí Caighdeánbhunaithe

Do I get paid as an Apprentice?

Apprentices are paid the agreed Industrial Apprentice Wage Rate by the employer (the actual rate paid may vary depending on the occupation and employer). Generally, rates are based on the year and increase during the apprenticeship; details should be checked with the prospective employer.

During off-the-job training, all apprentices are paid an Apprentice Allowance and, where appropriate, a contribution towards travel or accommodation costs. There are also grants to encourage employers to recruit and register Female Apprentices.

What award do I get?

Apprentices who successfully complete all 7 phases are conferred with a FETAC Level 6 National Advanced Craft Certificate. Only holders of a National Craft Certificate can be registered as qualified craftspeople. This award is recognised Nationally and Internationally.

What are my career prospects?

You will be qualified to work within your chosen apprenticeship field; you may decide to further develop your career i.e. company-based, cross-skilling, up-skilling, management or self-employment.

Further Study – Progression?

On successful completion of your apprenticeship you are eligible for consideration for entry into related degree programmes provided by various Institutes of Technologies including DkIT, provided you also meet other special entry requirements. Further information on progression from FETAC Advanced Certificate - Craft to levels 7 and 8 are available on the FETAC website:

www.fetac.ie

Apprentice Student Contribution

The Annual Student Contribution is levied on students attending Higher Education

Institutions including Institutes of Technology. As part of changes included in Budget 2014, apprentices now pay the same contribution as full-time students, but their contribution will be based on the time they spend in the Institutes.

This is typically one third of the Annual Student Contribution paid by students attending for the full academic year but it can be greater for certain trades where longer periods are spent in Institutes of Technology. The amount due for full-time students for the academic year 2015/2016 which ends in June 2016 is €3,000.

The Student Contribution is payable on the date of registration for the training phase.

About this Programme

The electrician is involved in the installation, commissioning, testing and maintenance of various wiring systems and services in domestic, commercial and industrial applications.

Work ranges from wiring of domestic houses, offices and retail units to more complex systems involving instrumentation, process control and maintenance in industrial plants, hospitals and power stations.

Electricians also service, maintain and repair electrical equipment, both domestic and industrial.

Subjects

Phase 4 consists of **4 Modules** (10/11 Weeks in total):

Module 1 Electricity 2
Module 2 Power Distribution 1
Module 3 Electronics 1
Module 4 Related Studies
(Mathematics and Computing)

Assessment at **Phase 4** is carried out at the end-of-term.

T1	Electrical Science
T2	Electrical Craft Theory
P1	Panel Wiring
P2	Electronic Circuit Construction

Phase 6 consists of **6 Modules** (10/11 Weeks in total):

Module 1	PLC
Module 2	Access control and Alarm systems
Module 3	Electricity 3
Module 4	Power Distribution 2
Module 5	Electronics 2
Module 6	Related Studies (Mathematics and Computing)

Assessment at **Phase 6** is carried out at the end-of-term.

T1	Electrical Science
T2	Electrical Craft Theory
T3	PLC Programming
P1	Panel Wiring

Carpentry / Joinery

Cearpantóireachta / Siúinéir

About this Programme

The craft of carpentry and joinery is varied and wide. The occupation includes the setting out, production and assembly of joinery, which includes stairs, doors, windows, floors and built-in furniture. Site work includes the construction of buildings and houses which require first and second fixing, including roofing. The place of work may vary, depending on the type of work done. It could be on site, in a workshop or in a private dwelling.

Subjects

Phase 4 consists of 3 Modules

(10/11 Weeks in total):

Module 1	Site Works
Module 2	Roofs
Module 3	Joinery

Assessment for **Phases 4** is conducted in 2 parts - mid-term and end-of term as follows:

Modules 1 and 2 at mid-term

Written 1
Drawing 1
Practical 1

Module 3 at end-of-term

Written 2
Drawing 2
Practical 2

Phase 6 consists of 3 Modules

(10/11 Weeks in total):

Module 1	Roofs
Module 2	Joinery
Module 3	Basic Site setting-out and levelling

Assessment at **Phase 6** is carried out at the end-of-term.

T1	Written Test
P1	Practical Test
D1	Drawing Test

About this Programme

Motor mechanics are involved with the servicing, maintenance and repair of cars, sports utility vehicles (SUVs) and light vehicles. The work is wide-ranging and includes routine servicing in accordance with manufacturers' recommended procedures and the testing and approval of the structural, mechanical and electrical systems of the vehicle for the National Car Test (NCT) or Department of Transport test.

Motor mechanics also use electronic equipment for fault diagnosis to interrogate the fault memory that exists in the Electronic Control Units (ECU) that now control and monitor the mechanical, safety and comfort systems of the vehicle. Hybrid-powered (i.e. petrol and electrical) vehicles require a high level of technical expertise from the motor mechanic. Some motor mechanics may specialise in different automotive technical systems or vehicle makes.

Subjects

Phase 4 consists of **7 Modules** (10/11 Weeks in total):

- Module 1 Welding
- Module 2 Engines
- Module 3 Auto Electricity / Ignition systems
- Module 4 Brake systems
- Module 5 Transmission systems
- Module 6 Petrol / Fuel Tests
- Module 7 Compression Ignition Tests

Assessment at **Phase 4** is carried out at the end-of-term.

- P1 to P7 and TI Theory Test
- T2 Theory Test

Phase 6 consists of **5 Modules** (10/11 Weeks):

- Module 1 Programmed Ignition / Engine Management
- Module 2 Steering / Suspension
- Module 3 Brakes
- Module 4 Transmission Systems
- Module 5 Auxiliary Electrical Equipment

Assessment at **Phase 6** is carried out at the end-of-term.

- P1 to P7 and TI Theory Test
- T2 Theory Test

Plumbing Pluiméireacht

About this Programme

Plumbers install, maintain and repair the water supply, drainage and central heating in houses and other locations. Installation work includes central heating systems and their controls, pipe-work, sanitary systems, drainage systems, guttering and rainwater systems and large refrigeration systems for industry. Maintenance and repair work includes routine servicing and emergency repairs, which involves finding faults, replacing or repairing damaged parts, carrying out tests and ensuring that the system works properly.

Subjects

Phase 4 consists of **4 Modules** (10/11 Weeks in total):

- Module 1 Advanced Pipework
- Module 2 Thermal Processes and Industrial Pipework
- Module 3 Oil fired heating systems
- Module 4 Pipework Systems

Assessment at **Phase 4** is carried out at the end-of-term.

- P1 to P4 and TI Theory Test
- T2 Theory Test
- T3 Theory Test
- T4 Drawing Test

Phase 6 consists of **5 Modules** (10/11 Weeks):

- Module 1 Thermal Processes
- Module 2 Advanced Pipework / Water and Waste Water Systems
- Module 3 Heating and Air conditioning
- Module 4 Gas Installations
- Module 5 Plant and Process Systems

Assessment at **Phase 6** is carried out at the end-of-term.

- P1 to P6 and TI Theory Test
- T2 Theory Test

My DkIT

Gary McConville

I found the Sustainable Design course in Dundalk Institute of Technology very beneficial. All the people involved with this course I found very helpful and interested not only in what they are doing but in the student as well.

It gave me the insight into the design process for a product that benefit's me in my day to day work, as well as the professional and personal skills that helped me get my career off the ground after leaving DkIT. I found the subjects taught in this course to cover all what a graduate needs to succeed in the work place.

After graduating from this course I got hired as an IC design engineer at Intel Ireland, I found all that I learnt in DkIT coming back in some shape or form, be it either a technical subject or a soft skills subject.

School of Informatics & Creative Arts Scoil na Faisnéisíochta & na nEalaíon Cruthaitheach

The School of Informatics & Creative Arts has a diverse range of courses on offer in the areas of computing, creative media and music. If you are technically oriented and/or have a strong creative or artistic streak then we most likely have a course to interest and suit you. The school aims to blend together the technical and the creative with a view to producing graduates with skills appropriate to the needs of tomorrow and in tune with the emerging global creative economy.

The school is housed in the iconic PJ Carroll Building with students on the various courses being able to avail of a wide range of purpose built facilities. These include numerous computing and multimedia teaching laboratories (PC, Apple Mac and specialist) with up to date hardware and appropriate professional software. There are also many

performance spaces and practice rooms and a state of the art sound and recording studio suite. Additionally, the building contains a recital room, a dance movement room, a radio studio, a dark room, an art studio, a TV studio, a screening room and a number of editing and animation suites.

The courses in the school are organised and managed within the following departments:

- * Department of Computing & Mathematics
- * Department of Creative Arts, Media and Music

Duration

4 Years

About this Programme

The breadth of the IT sector is huge and graduates are required with expertise in areas from computer networking to mobile technologies, from the Internet to Big Data, and from games to software development. To deal with the vast scope within this sector, we have developed a programme that allows students to choose their own unique path through a computing programme specialising in Web & Mobile Development, Computer Science, Computer Security or Data Science.

The programme will ensure that students have knowledge of the fundamental principles of computing, yet will also allow students select their own area of expertise. All computer software development oriented Level 8 programmes share a common core of 20 credits per semester.

Career Options

The programme caters for the personal choice and specialisation preferences of students. As a graduate of this programme you will have a skillset that will enable you to gain employment in industries in which there is a constant demand for software developers, particularly in the ever expanding Internet sector.

My DkIT

Nicola Disley

Swords, Co. Dublin

BSc (Hons) Computing in Games Development (2011 -2015)

What initially drew me to DkIT was the atmosphere around the college. I visited the computing department and got to sit in on a few lectures while visiting a friend attending the college. I was blown away by how approachable and down to earth the lecturing staff were and how giving they were of their time. I've always been the creative sort but I also knew that I was very practically minded so I hoped that programming would be something I could take to, and it was!

The games course gives you the practicality and reliability of a Computing Degree but everything has a creative twist, something to keep you thinking and interested. The course also presents you with so many amazing opportunities to get involved with national and international competitions, meaning that as well as a degree you can leave DkIT with a very competitive graduate CV. For this course, the more of yourself you put into it, the more you will get out.

I would absolutely recommend studying in DkIT and studying the Games Development course; it will give you a skill set highly in demand, many exciting opportunities and a set of connections that will stay with you into your professional life.

Course	Code	Places	Level	Duration
BSc (Hons) in Computing with French	DK822	10	8	4 Years

“ He who does not know foreign languages does not know anything about his own ”

About this Programme

The four year BSc (Honours) in Computing with French has been developed to offer students a strong mix of both computing and the French language.

The programme is, in the core, identical to the BSc (Hons) in Computing but offers a specialisation in French language and culture instead of an elective stream.

This course aims to develop graduates who:

- * Are capable of designing, building and maintaining software;
- * Have an awareness and appreciation of the culture and society of modern French speaking countries;
- * Have the capacity for critical thinking, independent learning and self-correction in the French language.

Is this course right for me?

This programme has been developed to offer students a strong mix of both Computing and French. This programme will probably suit you if you answer yes to all of the following questions.

Do you like solving logical problems?

This degree involves programming. If you like solving logical puzzles and problems, you should enjoy this degree.

Do you like new technologies?

If you think you are a bit of a gadget lover, then you have the right personality to take this degree.

Are you curious about French speaking societies?

If you would like to understand the modern cultural and business usages of the French language, you should be happy doing this degree.

Do you want to work in an international or multinational environment?

If you want to work in an international environment you must be able to communicate with native speakers on their own level. Our intensive French language education will have hard working students speaking at native or near native levels. This will open the door to an international career in computing.

Johann Wolfgang von Goethe

Career Options

Graduates of the programme will have a detailed knowledge of software design and development and will be equipped to follow career paths in the various Irish and global software development industries. Additionally, graduates will have a high level of proficiency in French.

Career prospects are greatly enhanced with increased fluency in a language, as language graduates have a skill that is highly relevant to the world's increasingly mobile and multicultural workforce.

Typical Career Opportunities

- * Software Engineer
- * Systems Architect
- * Web Developer
- * Database Developer
- * Mobile App Developer
- * Cloud Developer

Minimum Entry Requirements

Course

BSc (Hons)
in Computing with
English Language

Places

10

Level

8

Duration

4 Years

About this Programme

The BSc (Honours) in Computing with English Language has been developed to offer students a strong mix of both Computing and the English language. This exciting degree is aimed at international students who wish to study Computing in an English speaking country. The BSc (Honours) in Computing with English Language is a four-year programme. The programme is, in the core, identical to the BSc (Hons) in Computing, but offers a specialisation in the English language instead of an elective stream.

This course aims to develop graduates who:

- * Are capable of designing, building and maintaining software;
- * Have an awareness and appreciation of the culture and society of modern English speaking countries;
- * Have the capacity for critical thinking, independent learning and self-correction in the English language.

Is this course right for me?

This programme has been developed to offer students a strong mix of both Computing and English language. This programme will probably suit you if you answer yes to all of the following questions...

- * Do you like solving logical problems?

- * Do you like new technologies?
- * Are you curious about English speaking societies?
- * Do you want to work in an international or multinational environment?

Why Study in Ireland?

Ireland is one of the world's most important centres for high-tech businesses. We are the world's 2nd largest exporter of software, with over 30% of total Irish exports being software related. Our education system produces world class graduates to cater for this market. As a result of our high quality education system:

- * All of the top five global software companies have a significant presence in Ireland.
- * Over 90% of all major global software companies maintain a presence in Ireland.
- * Ireland, as a global contributor to world literature and the arts, offers a unique venue to study the English language. In Ireland, culture, creativity, business and technology converge.

Why study at Dundalk Institute of Technology?

Dundalk Institute of Technology produces top class graduates. Our programmes are designed around the requirements of the world's leading technology companies. Over 95% of our Computing graduates who achieve high grades are employed within three months of graduating.

Career Options

Graduates of the programme will have a detailed knowledge of software design and development and will be equipped to follow career paths in the various Irish and global software development industries. Additionally, graduates will have a high level of proficiency in English. We live in an increasingly mobile and multicultural global workforce and English is the internationally accepted language of the computing industry. Therefore, your career prospects are greatly enhanced with an increased fluency in the English language.

Typical Career Opportunities

- * Software Engineer
- * Systems Architect
- * Web Developer
- * Database Developer
- * Mobile App Developer
- * Cloud Developer

Minimum Entry Requirements

This programme is only available to:

- * Students who have been resident in a non-English speaking country while at primary and secondary school.
- * Students who have attended only non-English speaking schools at primary and secondary level.
- * Students who have not lived for a total period of more than 12 months in the EU.
- * Students who have passed the equivalent of the IELTS (International English Language Testing System) Level 6.0 English

language examination. (Acceptable equivalent qualifications include successful completion of the DkIT Foundation Certificate in English Language and Western Culture or the DkIT English Language entrance examination that is used by DkIT examiners in China).

Exit Awards

- * Students may exit this programme after completing two or three years of the programme:
- * Students who leave after completing year 2 will be awarded a Certificate in Computing.
- * Students who leave after completing year 3 will be awarded a BSc in Computing.

Progression Opportunities

Graduates with a satisfactory level of achievement may be able to undertake postgraduate (HDip/ Masters/PhD) studies.

Other Information

A feature of the programme is that students will spend approximately 1/3 of their time studying English. In particular, during the second semester of third year, students will undertake an intensive English programme.

Subjects

	Semester 1	Semester 2
Year 1	Mandatory <ul style="list-style-type: none"> * Introduction to Programming * Introduction to Web Development * Digital Systems * English 1 * English for Computing Students 1 	Mandatory <ul style="list-style-type: none"> * Mathematics 1 * Programming Principles * Applied Software Development Principles * English 2 * English for Computing Students 2

Duration

3 Years

About this Programme

Discover the power of computers and the knowledge required to work in the vibrant Information Technology industry through this uniquely structured programme. Gain knowledge in Programming, Web, Networking and IT Systems Environments. Acquire Analysis, Design, Implementation, Testing and lifelong learning skills. Become a confident and in-demand IT professional by developing your problem-solving skills in an overwhelmingly hands-on learning environment.

Study selected combinations of the following areas:

- * Databases
- * Hardware
- * Maths
- * Networking
- * Professional Development
- * Software Development
- * Software Engineering
- * System Administration
- * Technical Problem Solving
- * Web & Mobile

Structure

This course allows you to tailor your learning towards where your interests and aptitudes are. Students enter a common first Semester which is designed to enable them to choose between the following three Elective Streams:

- * Networking
- * Software Development
- * System Administration

Minimum Entry Requirements

Six passes in the Leaving Certificate (including Mathematics and either English or Irish)

And

Either one Grade C3 in a Higher Level paper

Or an overall points total of 200.

Note

At the end of Semester 1, students select either Procedural Programming (the opening module of the Software Development elective stream) or Systems and Networking (the common opening module for both the Systems Administration and Networking elective streams). Students decide between Systems Administration and Networking elective streams at the end of Semester 2.

Progression Opportunities

On achieving an average mark of at least 50% in the award year of the BSc in Computing, students become eligible for the Level 8 one-year add-on programmes (BSc (Honours) in Computing in Commercial Computing or BSc (Honours) in Computing in Information Technology Management) depending on their Level 7 elective stream. Entry to the honours degree programmes is subject to the number of places available in any given year. Graduates of the BSc in Computing with the specialisation in Software Development may transfer to year 3 of either of the Level 8 ab-initio degrees (BSc (Honours) in Computing - with the specialisation in Web/Mobile development - or the BSc (Honours) in Computing in Games Development).

Software Development Elective Stream

About this Elective Stream

The Software Development elective stream focuses on Web Development. Students will have repeated exposure to the principles and practices of web development using various technologies. On completion of the course they will be capable of integrating a range of techniques and technologies to create and deploy a quality web application working independently and also as part of a multidisciplinary team.

You will learn to:

- * Build applications
- * Develop websites
- * Test applications
- * Apply appropriate software

engineering processes to develop quality software solutions

- * Apply problem-solving techniques
- * Design and implement database systems
- * Work as part of a multi-disciplinary development team

Career Options

As a graduate of this stream you will be capable of filling a range of positions in the software industry.

Typical job titles include:

- * Programmer/Analyst
- * Programmer
- * Web Developer
- * Database Developer
- * Software Tester

System Administration Elective Stream

About this Elective Stream

Learn fundamental principles across a broad range of computing, and specialise in the analysis, design, development, deployment, management and administration of computer systems and services using both virtualization and cloud platforms.

The computing industry experiences enormous growth. Today, products from the industry are everywhere in our homes, in our daily lives, and in every sector of the economy. This has resulted in the growth of a large service and support industry whose main task is to design, deploy and manage the server and network infrastructure, and provide technical support to both customers

and users in the effective use of computing resources. In addition, there is a continual need for the development and support of Web Applications and Database Systems for small to medium-sized working environments.

You will learn to:

- * Design, develop, implement, administer, manage and secure websites, database systems and other network infrastructure services (such as file, directory, and mail) in virtualised and cloud environments.
- * Gain specialised knowledge of computer hardware, software and networking.
- * Design and Implement an IT Service Desk.

- * Provide and deliver effective technical support to customers.
- * Develop advanced problem-solving skills.
- * Develop as a team player, capable of working as part of a multidisciplinary team.

Career Options

As a graduate of this stream you will be capable of filling a range of positions in the IT support industry as well as in website development and database administration.

Typical job titles include:

- * System Administrator
- * IT Technical Support Analyst
- * IT Service Desk Manager
- * Database Developer
- * Website Developer
- * Webmaster/Web Editor

Networking Elective Stream

About this Elective Stream

Learn fundamental principles of computing and go on to specialise in the design, implementation and maintenance of computer network systems, data communications systems and in the support of Internet-based systems.

This programme was created in response to the continued growth in communications using computing devices and the resulting demand for graduates. Broadband technology and wireless networks are the fabric of the new economy. Underpinning this growth are computer network technologies and systems. A large service and support industry to manage and administer these systems has evolved.

You will learn to:

- * Develop advanced problem-solving skills;
- * Acquire skills in defining, analysing and choosing methods for solving problems across a variety of areas relating to IT support;
- * Provide effective IT support to customers;
- * Specialise in local and wide area

network technologies and data communications;

- * Develop as a team player, capable of working as part of a multidisciplinary development.

In addition, students completing this course will have sufficient knowledge and skill to undertake CISCO CCNA (Cisco Certified Network Associate) certification. DkIT is a certified Cisco Academy.

Career Options

As a graduate of this programme you will be capable of filling a range of positions in the network and IT support industry.

Typical job titles include:

- * Network Administrator
- * Network Technician
- * Systems Technologist
- * Systems Administrator
- * IT Support Technician/Specialist

Course

Higher Diploma
in Science in Computing

Code

DKA22

Level

8

Duration

1 Year (add-on) (full time) or
2 Years (part time)

About this Programme

This programme is a conversion course targeting Level 8 graduates from non-computing disciplines and giving them a general foundation in Software Development with a particular emphasis on Web development, User Experience (UX) and Software Testing, which allows graduates to build on their life and work experience. The programme offers a work portfolio element.

Graduates of this course will be able to:

- * Demonstrate knowledge and understanding of advanced concepts in the following areas:
 - Computer Systems - Software Engineering - Information Systems - Mathematical Foundations and Techniques
 - Computing Techniques - Computer Networks - Social and Professional Issues
- * Identify the different roles and responsibilities that exist through the software development lifecycle and IT projects in particular;
- * Work as part of a team to perform the following roles within a software development organisation;
- * Software quality assurance and testing;
- * Software project management;
- * Evaluate the applicability and strategic impact of emerging technologies in the corporate environment.

Career Options

It would be expected that graduates will follow one of the following career paths:

- * Quality Assurance
- * Software Testing
- * Web Development
- * User Experience
- * Software Development

Due to the nature of these roles it is expected that most graduates will initially gain employment at entry level in the software industry. However, they will be equipped with specialist skills that will enable them to progress quickly in their chosen career path.

Subjects

	Semester 1	Semester 2
Year 1	Mandatory <ul style="list-style-type: none"> * Core Computing 1 * Software Engineering and Design (year-long) * Database Web Development * User Experience 	Mandatory <ul style="list-style-type: none"> * Core Computing 2 * Software Project Management * Software Testing * Work Portfolio

Ríomhaireacht (Ard-Diplóma) (1 Bliain Foirliántach)

At present there is a serious shortage of software test and quality assurance personnel within the Irish software industry. To date, this programme has an excellent record in placing graduates in software testing positions in Irish industry. In addition, graduates with relevant experience have also secured positions as Business Analysts and Project Managers.

Minimum Entry Requirements

Applicants must hold a Level 8 qualification (Honours Degree) or demonstrate an equivalent capacity to succeed, based on experiential learning acquired through extensive industrial experience.

Other Information

Fees apply to this programme. Please contact the Admissions Office for details.

Duration

The programme will run on a full time basis for 12 month or in part time mode for 24 months.

Code

DKA21

Level

8

Duration

1 Year (add-on)

About this Programme

IT services are a key function in any medium or large organisation. You will learn to analyse, evaluate, design and manage information technology systems and services.

As a graduate of this programme you will be able to:

- * Plan and deliver quality IT systems and IT services;
- * Manage the transition to new technologies;
- * Ensure the integrity of computer and network systems;
- * Manage the human and budgetary resources in an IT facility;
- * Be conversant with recent developments in ICT and in a number of specialised computing topics.

Career Options

Successful graduates can pursue a career in any organisation in the business, manufacturing, or services sector that relies on IT services.

Typical Job Titles

- * IT Manager
- * Computer Services Manager
- * Network Analyst
- * Database Administrator

Progression Opportunities

Graduates with a satisfactory level of achievement will be able to undertake postgraduate (HDip/ Masters/PhD) studies. See the Postgraduate Handbook for further details.

Minimum Entry Requirements

Applicants to this programme should have successfully completed the BSc in Computing, specialising in System Administration or Networking, or an equivalent degree, with a minimum overall average of 50%.

About this Programme

This four-year honours degree programme aims to produce graduates who have strong creative and technical design skills in Multimedia Web Applications Development. This interdisciplinary degree includes an integrated work placement semester that has been developed to offer students a strong mix of both creative multimedia and computing.

The aim of this course is to produce interactive media professionals who have the cross-disciplinary capabilities of designing and programming in a variety of digital media, for a variety of industries.

Graduates will be multi-disciplinary. Graduates will be able to generate creative content for interactive media. They will be able to design and develop sophisticated, database driven, interactive applications for the web and other media. However, they will specialize in web-domain knowledge: in web design, in web programming and in web-domain data base design.

The programme is laid out in six module streams, ensuring that the student is subjected to an ongoing balanced exposure to technical and creative learning.

The six module streams are:

- * Software
- * Database for the Web
- * Web Technologies
- * Interface Design
- * Authoring and Content Creation
- * Professional Development

Career Options

This honours degree will provide the skilled people that will be needed to grow the multimedia and other software industries within the North East region and the Dublin - Belfast corridor in the coming years.

Did you know that:

- * Ireland is the second largest exporter of software in the world?
- * Software generates 30% of Ireland's exports?
- * Eight of the world's top ten software companies have a significant presence in Ireland?
- * Almost all graduates in this area get employment within a short period after graduation?

Graduates will have a detailed knowledge and understanding of both the creative and developmental strands within the multimedia discipline and will be skilled in the use of a range of digital media. Graduates will be equipped to follow career paths in the following areas:

- * Web Developer / Web Designer / Web Master / Web Domain Database Designer
- * Creative Technologist

- * Multimedia Developer / Multimedia Designer / Multimedia content creator
- * Computer Analyst
- * Applications Programmer
- * In addition, graduates from this programme will be in a position to establish their own multimedia software company.

The underpinning philosophy which motivated the design of Multimedia Web Development was to merge disciplines, and by doing so, to cultivate entrepreneurial skills that are interdisciplinary. This positions the course at a strategic level in the shifting and dynamic new media area, in comparison to creative or technical courses that focus solely on one skill set. Programming skills are combined with design skills in all areas of digital media, including web, audio and video design. Students also learn core design skills, such as visual communication, photography and creative writing.

Minimum Entry Requirements

A minimum of six passes in the Leaving Certificate (including Mathematics and either English or Irish), with at least Grade C3 in two Higher Level papers, together with at least Grade D3 in four Ordinary Level papers plus a minimum of 300 points.

Or

A Level of qualification equivalent to the above

The Creative Multimedia section welcomes applicants with Recognised Prior Learning (RPL). See Page 50

* IADD Intearactive Application Design and Development

Course	Code	Places	Level	Duration
BA in Media Arts & Technologies	DK769	20	7	3 Years

About this Programme

The aim of this programme is to equip graduates with the necessary knowledge, core skills and competencies to work in a variety of roles within the media arts & technology sectors, particularly in the areas of these sectors where the merging of creative practices and skills utilising media and information technologies are developed.

In the multi-platform world of today, new evolving digital skills are being sought to produce high end content for simultaneous delivery on not only traditional print and broadcast media, but on the web, on mobile devices, and using the many existing and developing social media tools. The overall aim is to provide students with these core hard and soft skills. These skills are highly transferable between the various creative industries.

Progression Routes

On successful completion of this programme, students who obtain a GPA of 50 or above as per Institute guidelines are eligible to be considered for entry to a number of add-on Level 8 programmes within the Section:

- * Bachelor of Arts (Honours) in Communications in Creative Multimedia
- * Bachelor of Arts (Honours) in Video & Film Production

Career Options

Graduates of the programme will have a detailed knowledge and understanding of both the creative and developmental strands within the Media Arts & Technologies disciplines and will be skilled in the use of a range of digital media. Graduates choosing a career path on one of the strands will have an understanding of the all aspects of a multidisciplinary team.

They will be equipped to follow career paths in the following broad categories:

- * Web Developer / Web Designer / Web Master
- * Multimedia Developer / Multimedia Designer
- * Graphic designer
- * Animator
- * Audio designer and editor
- * Video content creator and editor.

Minimum Entry Requirements

Six passes in the Leaving Certificate, including Mathematics and either Irish or English

And

Either one Higher Level Grade C3, or a minimum of 200 points.

Or

A-Level of qualification equivalent to the above

The Institute actively encourages applications from mature students.

(The Creative Multimedia section welcomes applicants with Recognised Prior Learning (RPL). See Page 50

Note:

The programme merges practical experience in existing and emergent creative media and digital platforms with a user-centered and industry aware approach to design and this balance will offer students the opportunity to develop a combination of professional and creative skills and equips them for the rapidly changing industrial environment.

By balancing media production knowledge alongside teamwork and entrepreneurial skills, the BA in Media Arts and Technologies ideally equips students to pursue graduate level positions across divergent sectors in the creative media industry. The programme's unique selling point is that it is an undergraduate degree with industry-driven modules, which will produce graduates with core skills & competencies in the growing media arts & technology sectors.

Based in the iconic Carroll's Building on the DkIT campus and equipped with a full HD TV Studio, a screening room, multiple edit suites, a video editing lab, multimedia labs, a radio studio, a dark room, an art studio & equipment borrowing office, students are trained on key software packages used in the Creative Media Arts & Technologies sectors, including Pro-Tools, Avid Media Composer, and the Adobe Master Collection suite of programs. In addition, DkIT is an Avid Educational partner & students can choose to also sit the Avid & Pro-Tools user certification exams while undertaking their programme.

Note

You do not need to have any prior knowledge in any subject other than the entry requirements that are listed. In particular, you do not need previous experience in programming or art/design.

* Students may undertake a one-semester placement with one of our currently approved partners via the Erasmus Programme. Students can partake in the scheme during stage two of their studies. Partner institutes include Satakunta University of Applied Sciences (Pori, Finland) and San Pablo/UEM (Madrid, Spain).

Throughout their studies, students also have the option of completing an additional 5ECTS Service Learning - Creative Media module, aimed to encourage students

to participate in activities that will enhance their personal and professional development. This could include volunteering activities with a voluntary/charitable body or

work experience with a Creative Media company and/or lecturer working on an Industry project that are taken on above and beyond the student's timetabled class hours.

in Communications in
Creative Multimedia

Code

DKA61

Places

40

Level

8

Duration

1 Year (add-on)

About this Programme

This one year, add-on honours degree builds on the practical and theoretical knowledge gained in the Level 7 Communications in Creative Multimedia degree in DkIT (or similar degree from other 3rd Level Institutes).

The programme prepares graduates to be innovators and creative entrepreneurs, with a focus on the core competencies and skills necessary for careers in this expanding field. Focus on public exhibition is a key characteristic of this final year degree with a large proportion of student effort converging for the end-of-year show (Fis Creative Media Degree Show). This focus helps simulate the work environment, while also ensuring that students graduate with a substantial portfolio of high-quality work.

Applicants may have to demonstrate experience in core competencies before selecting electives - not all elective modules may be offered each year. Students choose one elective each semester.

in Communications in Creative Media

About this Programme

The aim of this programme is to produce Creative Media professionals with the necessary knowledge, skills and competencies to work within the varied Creative Media Industries in Ireland and abroad. This programme will allow students to develop key skills in conventional and new media, by combining traditional communication and media production skills such as photography and video production, with high-level training in multimedia production and design. There is a strong emphasis on creativity, collaboration, design and innovation, and students' practical skills will become highly developed.

Students are also encouraged to develop the theoretical skills necessary to analyse critically the media and the information society, both in terms of its technological manifestation and its social impact. Key to this development is a six week work placement in 3rd year, allowing students to gain experience in the workplace before completing their final year on the programme.

In the final year students are offered the opportunity to realise, develop and showcase their creative ideas and skills to the public and prospective employers in the form of a final year project exhibited at the annual end of year Creative Media Degree Show.

Progression Routes

On successful completion of this programme, students who obtain Second Class Honours or higher are eligible to be considered for entry to the MA/MSc by Research within the School

Career Options

- * Design: Design, Multimedia Design, Web Design, Interaction/UI Design, Motion Design
- * Planning & Strategy: Information Architect/User-experience Architect, Digital Media Strategist
- * Authoring: Web Developer, App Design/Developer
- * Management: Web/Multimedia Project Manager, Social Media Strategist, Communications Officer, Media Planner, Media Buyer, Digital Marketing
- * Content Creation: Copywriter, Content editor, Digital Image Producer, Creative Video Producer, Digital Marketing, Sound Designer

Minimum Entry Requirements

The standard minimum entry requirement for first year admission to this Honours Degree programme is six passes in the Leaving Certificate including Mathematics, with a grade of B3 or above in Ordinary level English or D3 or above in Higher level English. Applicants are required to have at least a Grade C3 in two Higher Level papers, together with at

least a Grade D3 in four Ordinary Level papers, plus a minimum of 300 points.

Or

A level of qualification equivalent to the above.

Admissions to programmes in the Section of Creative Media that wish to recognise prior learning are referred to the Institute's RPL policy while taking into consideration discipline specific criteria, appropriate to this programme. (see Page 54)

Graduates from similar programmes have thus far gone on to work in the Creative Media industry in Ireland and abroad, in a range of roles such as:

- * Graphic Designer – Self Help Africa, GameStop, Boylesports, PML
- * Web designer – MOR Solutions, Lucidity Digital, Horseware, Lionbridge (London)
- * UI Designer – Roadhouse Interactive (Canada)
- * Assistant Director – HBO (Game of Thrones)
- * Content Developer – Boyle Sports
- * Digital Project Manager – Four23 (London)
- * Production Assistant – Blonde and Co (New York)
- * Content Manager – Boyle Sports
- * Creative Designer – CKSK, Grabone, ie, Local Government Management Agency
- * Programme Co-ordinator MSc Multimedia- Griffith College Dublin
- * College Lecturer - Cavan ETB, LMETB

About this Programme

The aim of this programme is to produce Film & Television Production professionals with the necessary knowledge, skills and competencies to work within the Film and Television industry in Ireland and abroad.

The nature of such an industry is that technologies & terminologies are ever-changing. This programme aims to update and modernise the current Level 7 and Level 8 BA and BA (Hons) in Video and Film Production programmes with an ab-initio 4-year Level 8 degree programme in the Section of Creative Media to ensure that we continue to meet with changing industry requirements for our graduates. This new programme aims to build on the nationwide reputation that the Section of Creative Media has gained due to the successes of these current programmes since their commencement in 2005 and 2008 respectively.

Subjects

* Students may undertake a one-semester placement under the Erasmus Programme to our current approved partners for one semester during stage two of their studies, including the Baltic Film School (Tallinn, Estonia) and San Pablo/UEM (Madrid, Spain).

Throughout their studies, students also have the option of completing an additional 5ECTS Service Learning - Creative Media module, aimed to encourage students to participate in activities that will enhance their personal and professional development.

This could include volunteering activities with a voluntary/charitable body or work experience with a Creative Media company and/or lecturer working on an Industry project that are taken on above and beyond the student's timetabled class hours.

Career Options

The BA (Hons) in Film and Television Production aims to produce film and television professionals with the necessary skills and competencies to work within the competitive audio-visual, film and television industry in Ireland and abroad.

Our graduates will be equipped with the core competencies to engage in further professional training for any of the following careers, amongst others:

- * Assistant Director
- * Camera Operator
- * Director
- * Editor (on/off-line)
- * Focus-Puller
- * Lighting Cameraman/Director of Photography
- * Location Manager
- * Producer
- * Production Co-Ordinator
- * Production Assistant
- * Scriptwriter
- * Sound recordist/mixer

Progression Routes

On successful completion of this programme, students who obtain Second Class Honours or higher are eligible to be considered for entry to the MA/MSc by Research within the School.

Students who have successfully completed the first two years of this programme and who wish to leave after two years, may be awarded a Level 6 Higher Certificate in Arts in Film & Television Production. Students who have successfully completed the first three years of this programme and who wish to leave after three years, may be awarded a Level 7 BA in Film & Television Production.

Minimum Entry Requirements

Six passes in the Leaving Certificate including Mathematics, with a grade of B3 or above in Ordinary level English or D3 or above in Higher level English. Applicants are required to have at least a Grade C3 in two Higher Level papers, together with at least a Grade D3 in four Ordinary Level papers, plus a minimum of 300 points.

Or

A Level of qualification equivalent to the above.

The Creative Multimedia section welcomes applicants with Recognised Prior Learning (RPL). See Page 50.

Graduates from these earlier programmes have thus far gone on to work in the film and television industry in Ireland and abroad, in a range of roles such as:

- * Production Manager, Big Mountain Productions
- * Head of Audio Visual, One Productions;
- * Editor, Vision Independent Productions;
- * Online Video Producer, Click Media;
- * Co-founder, Election Training Ireland;
- * Camera Operator, aerialfilming.ie;
- * Transmission Controller, Setanta Sports;
- * Editor, Tailored Films;
- * Production Co-Ordinator, Exposure Films Ltd.;
- * Freelance Assistant Editor/ Writer/ Camera Operator

Course

BA

in Theatre and Film
Practice

Code

DK770

Places

20

Level

7

Duration

3 Years

About this Programme

This programme will provide you with a solid grounding in the practical application of both theatre and film production skills, a mix of which are currently unavailable to prospective students on the island of Ireland at this level, along with key acting skills and a theoretical foundation.

It will diversify the skills of potential performing arts students by allowing them to develop skills not only in voice, acting and movement, but also in film studies and film production & post-production. Uniquely, this programme will also allow students the opportunity to gain core skills in technical theatre practice, including set design and construction, sound and lighting design, costume design and stage management. They will also practice promotion, administration and management skills in their third year projects.

Career Options

The BA in Theatre & Film Practice aims to produce theatre and film professionals with the necessary knowledge, skills and competencies to work as performers or producers within the diverse areas of cultural production both in live, recorded and digital theatrical and film/media formats in Ireland and abroad.

Our graduates will be equipped with the core competencies to engage in any of the following careers, amongst others:

- * Entry level in film and theatre as technicians
- * Self-starting entrepreneurial performance or creative artist
- * Independent actor or creative artist who can work across multiple platforms – film/TV/On-line/ installation/Site-specific
- * Script-Writing
- * Playwriting
- * Radio or voice-over performance
- * Arts Administration
- * Facilitator
- * Speech and drama teaching
- * Community artist
- * Events/festival management

Progression Opportunities

On successful completion of this programme, students who obtain a GPA of 50 or above as per institute guidelines are eligible to be considered for entry to a number of add-on Level 8 programmes within the Section of Creative Media:

- * Bachelor of Arts (Honours) in Communications in Creative Multimedia
- * Bachelor of Arts (Honours) in Video & Film Production

These programmes would be particularly suited to students who wish to develop a Film/Media specialism following their Level 7 degree.

For those students who would prefer to focus on theatre and drama there are currently options external to DkIT.

Minimum Entry Requirements:

Six Leaving Certificate subjects, (including Mathematics, and either English or Irish)

And

Either one Higher Level Grade C3, or a minimum of 200 points.

Or A-Level of qualification equivalent to the above.

The Institute actively encourages applications from mature students.

(The Creative Multimedia section welcomes applicants with Recognised Prior Learning (RPL). See **Page 54**.

My DkIT

Adam Mc Elligott

BA (Hons) Video & Film (2010 – 2014)

Student Enterprise Intern for the Creative Media section at DkIT (2014 – 2016)
Currently carrying out a Masters in Research in Creative Media at DkIT

I chose DkIT as I was interested in studying Video and Film. I read about the course and went to the college open day to get a feel for the place. I felt this was the place for me to study and the course in Video and Film was right for me.

I liked DkIT as I found the lecturers were very helpful, easy to talk to, and they want the students to learn and succeed. The PJ Carroll's Building is an amazing place for students to study in as there are a lot of facilities for students studying Film and Creative Media such as editing suites, Mac labs, TV studio, radio station and photography studio.

Video and Film – The course was three years (Level 7) with a one year add on (Level 8). Students got the chance to work on film projects in both a practical sense such as producing short films, music videos, studio shows and documentaries plus in a theoretical sense as we studied film theory and eventually write a thesis and produce a piece of practice in 4th year. Multimedia is another aspect to the video and film course as students get the chance to make their own websites and work on a vast range of projects such as image processing and flash animation.

I was involved in the media society at DkIT which involved working on a radio show and a college magazine for the students called The Techno. I would recommend studying at DkIT; the lecturers are very friendly and extremely helpful to students. The facilities are amazing and I count myself to be very lucky to have these available to me. There are a vast range of guest speakers at the college who are industry professionals that are able to give students advice and make contacts.

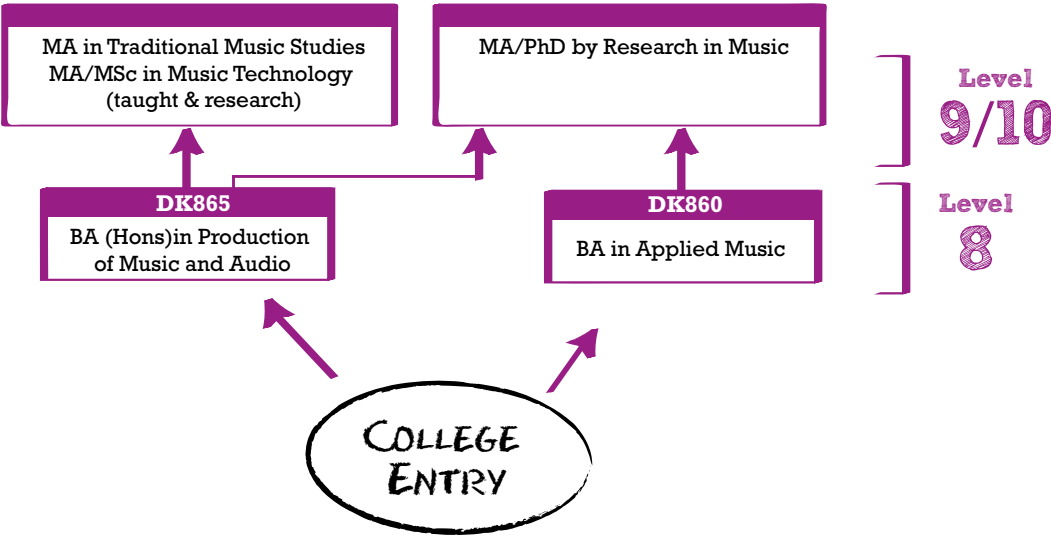

The college has an extensive range of filming equipment for students to borrow for projects. And finally the Section of Creative Media at DkIT encourages students to be themselves and work in a creative and dynamic environment.

About this Programme

Interested in a music degree with a difference? Are you dedicated to developing your music skills and knowledge to a high standard as part of a committed team? Our BA (Honours) in Applied Music encompasses a blend of musicology, music technology, composition, Irish traditional music, ethnomusicology and performance, and balances practical and theoretical approaches to learning.

Housed in the Carroll Building at DkIT, the Ceol Oirghialla Section of Music is a proactive centre of teaching and learning, research and performance where we provide a distinctive and pioneering environment for study while recognising and engaging with a wide range of musics and technologies.

We welcome students from different music backgrounds and with a diversity of interests to our challenging and enriching programme. Performance is an important part of our degree programme, and students take part in various music ensembles including music theatre/opera group, choir, orchestra, guitar ensemble, jazz ensemble, rock/pop and Irish traditional groups.

Our students perform regularly at a number of performances throughout the academic year, both

Applied Music

Ceol Feidhmeach

Career Options

A degree in music can give access to many other careers and music graduates are sought after in professions which demand a high level of personal confidence, communication skills and expressive ability.

Careers may include:

- * Music teaching in schools (on completion of a PGDip.);
- * Music teaching privately and in private schools;
- * Music technology & music software development;
- * Composing, arranging, publishing, realization and editing;
- * Production and management
- * Broadcasting employment opportunities;
- * Music performance: solo or ensemble;
- * Library, archival work;
- * Community arts employment;
- * Arts administration;
- * Performance sound applications.

Progression Opportunities

Research and postgraduate study at DkIT and elsewhere.

Minimum Entry Requirements

Leaving Cert Music (or an equivalent qualification, or demonstrative performance ability) is also desirable.

Applications are invited from students with diverse music backgrounds including Traditional/ Folk, Classical, Popular, Contemporary and Jazz.

Applicants will be required to undertake an interview and aural test after making application through the CAO. Instrumental, vocal or other performance will be a key part of this, and points will be awarded for the audition. Applicants with an interest in composition may submit a portfolio of their works. The criteria for assessment will be aural aptitude, performance ability and general music knowledge and further details on the audition is available at

<http://music.dkit.ie>.

Additional Information

The *Ceol Oirghialla* Section of Music has built up a number of international links creating opportunities for students to engage in as part of their studies abroad. Recent projects have taken place in Norway, Belgium, Brazil and the USA with plans in place to develop further links in Europe and the Far East.

Students on this programme also have the opportunity to collaborate on projects with students on BA (Honours) in the Production of Music and Audio (DK865).

About this Programme

This programme is aimed at producing professionals for the recording industry capable of assuming key creative and architectural roles in the process of analysing, developing and realizing the creative intentions of the recording artist to a commercial conclusion.

The course is designed to continually strengthen the student's understanding and awareness of a wide range of aspects of Music Production. This is achieved through the delivery of a suite of carefully developed modules covering Production, Technology, Theory, Craft, Musicianship, Research and Personal Development. The artistry of modern Music Production assumes a diverse range of interrelated disciplines. Creativity, science, recording technologies and techniques, musical appreciation and awareness, business, interpersonal skills and more, combine to form the rich diversity of strands that is the BA (Honours) in Production of Music and Audio.

Currently working as a Strength and Condition Coach with London Senior Gaelic Football team.

Strength and Condition intern at Harlequins Rugby Club

The reason why I choose to do the BSc (Hons) in Health and Physical Activity in Dundalk Institute of Technology was due to practical element off the course. Being involved in sport and training teams I felt this course suited me best due to the variety of modules and the add on qualifications one gets as part of the course.

While in DkIT I personally enjoyed the practical modules and getting to carry out modules. We got to work with teams from outside the college also which was a great experience.

Outside of the course I was involved with the Gaelic Football team in the College, both playing and coaching. This was one of the most enjoyable areas because I got to a chance to represent the college and got to learn from some great coaches.

I would recommend the BSc in Health and Physical Activity course to anyone who is looking to pursue a career in Sport as it give me a great foundation to go and pursue a career in Strength and Conditioning.

School of Health & Science

An Scoil Sláinte & Eolaíochta

The School of Health & Science here in Dundalk Institute of Technology was formed in 2004 and consists of almost 1300 students. We offer an exciting range of programmes ranging from Level 6 to Level 10 in a friendly and supportive environment.

The school comprises the following academic Departments, Section and affiliated Research Centres:

- * Department of Nursing, Midwifery and Health Studies
- * Department of Applied Sciences
- * Midwifery Section
- * Part Time Programme Section
- * Smooth Muscle Research Centre
- * Centre for Freshwater & Environmental Studies
- * Netwell/CASALA Research Centre
- * Electrochemistry Research Group

The Department of Nursing, Midwifery and Health Studies at DkIT offers a range of undergraduate and postgraduate programmes. The Department has strong links with a range of clinical partner sites and students have the opportunity to study in a state of the art facility. In addition to its nursing and midwifery programmes the Department offers programmes in Early

Childhood Studies and Health and Physical Activity as well as a taught Masters Programme in Ageing, Health and Environment.

The Department of Applied Sciences offers a range of diverse programmes aiming to meet the demands of local and national industry with programmes in Pharmaceutical Science, Applied Biosciences, Biopharmaceutical Science, Agriculture, Food & Agri-business, Environmental Biology, Environmental Bioscience, and Veterinary Nursing. A taught Masters Programme in Agricultural Biotechnology shall commence in September 2015.

The School has in recent years greatly expanded its range of part time programmes and offers a number of part time programmes delivered in blended learning format in the nursing, early years and Science fields.

Research is a key activity within the School and the research centres affiliated to the School have all been identified as priority groups within the DkIT research strategy. Active links exist between our undergraduate students and the research community within the School.

About this Programme

The overall aim of the BSc (Honours) in Health and Physical Activity degree programme is to educate a category of professional in the areas of health, physical activity and well-being. Graduates will have the skills necessary to assess, plan, promote and evaluate lifestyle interventions and physical activity programmes that will enhance the quality of life of individuals that they work with. In doing so, risk factors associated with certain illnesses will be reduced.

There are four subject streams within the programme: health science, exercise science, health research and communicating the health message. In addition, students have the opportunity to acquire qualifications in gym instruction, circuit training, personal training, exercise referral, exercise and nutritional interventions for obesity and diabetes and the management of lower back pain. In Stage 4 of the programme students have an opportunity to choose one of three elective modules.

Supervised work placement is part of this programme in Stages 3 and 4. The Stage 3 placement involves a full-time, thirteen-week placement in a general setting (Physical Activity Co-ordinator offices within the Health Service Executive, Sports Council, Leisure facilities etc). The Stage 4 placement involves part-time work and exposure to a specific, special population setting

(for example: The Irish Wheelchair Association, Special Olympics Ireland, Irish Heart Foundation etc) for 1 day per week over a period of 10 weeks.

Subjects

	Semester 1	Semester 2
Year 1	Mandatory <ul style="list-style-type: none"> * Anatomy and Physiology 1 * Engaging with Scholarship * The Professional Practitioner 1 * Biochemistry * Exercise and Health Studies (year-long) 	Mandatory <ul style="list-style-type: none"> * Anatomy and Physiology 2 * Health, the Individual and Society * Communication Skills * Nutrition * Exercise and Health Studies (year-long)

Note

Some modules within the Health and Physical Activity Course have a physical activity component and require active engagement from the student in order to fulfil the requirements of the programme.

Sláinte agus Gníomhaíocht Choirp

Career Options

This programme provides students with the skills required to pursue employment in the following areas:

- * Sports Development within Local Sports Partnerships / Sporting Organisations e.g. GAA, FAI
- * Physical Activity Coordinator within HSE / Community e.g. older adult settings, disability services, children's' settings
- * Fitness consultation / Personal training
- * Leisure / Sports Management
- * Health Promotion
- * GP Exercise Referral

Progression Opportunities

Graduates are eligible to apply for Postgraduate research / studies in related areas e.g. Physiotherapy, Strength and Conditioning, Nutrition, Obesity Management, Sports Management, Health Promotion, Exercise Physiology etc.

Minimum Entry Requirements

A minimum of six passes in the Leaving Certificate (including Mathematics, a laboratory Science subject and either English or Irish), with at least Grade C3 in two Higher Level papers, together with at least Grade D3 in four Ordinary Level papers plus a minimum of 300 points.

Note

Offers of places on this programme are subject to applicant's successfully passing Garda/Police vetting.

About this Programme

This programme will nurture student's personal, social and professional development with a view to developing a highly competent professional educator committed to providing high quality services to babies, young children and their families based on the contemporary principles of best practice as determined by Aistear and Siolta. The programme will provide students with a professional qualification in Early Childhood Studies which will enable them to work in a variety of early childhood settings including sessional pre-school services, crèches/full day care nurseries, special needs services, community early childhood services and family centres in the state, private, voluntary and community sectors.

The programme will educate students in the specific areas of education, creative play, psychology, interactions, research and health and welfare in children aged 0-6 years. As a graduate of this programme you will have the skills to write early childhood programmes, care for children and enhance the education and health of children with regular development, as well as those with physical and intellectual disabilities. You will also learn to evaluate the contribution of research to the areas of early years' education, health and management.

Subjects

	Semester 1	Semester 2
Year 1	Mandatory <ul style="list-style-type: none"> ✦ Early Childhood Education 1: The Theory ✦ Learning to Learn in Early Childhood Studies ✦ Promoting Physical Wellbeing ✦ Child Development ✦ Music and Movement for Babies and Young Children 	Mandatory <ul style="list-style-type: none"> ✦ Early Communication and Language Development ✦ Professional Practice 1 ✦ Observation and the Assessment Process in Early Childhood ✦ Early Childhood Education 2: Pedagogy & Practice
Year 2	Mandatory <ul style="list-style-type: none"> ✦ Professional Practice 2 ✦ Speech, Language and Communication Difficulties ✦ Social Policy and the Voice of the Child ✦ The Young Child with Special Needs 	Mandatory <ul style="list-style-type: none"> ✦ Business Knowledge and Skills for the Early Childhood Sector ✦ Consultation and Evaluation ✦ Sociological Aspects of Working with Children and Families ✦ Exploring and Thinking in Early Childhood ✦ Exploring Numeracy and Literacy in Early Childhood ✦ Pretend play, Storytelling and Children's Literature
Year 3	Mandatory <ul style="list-style-type: none"> ✦ Programme Design ✦ The Visual Arts in Early Childhood Education ✦ Interactions - Hanen Certificate ✦ Applied Law and Regulation in Early Childhood ✦ The Reflective Early Childhood Practitioner 	Mandatory <ul style="list-style-type: none"> ✦ Introducing Evidence-Based Practice ✦ Professional Practice 3 ✦ Physical Activity in Early Childhood ✦ Managing Young Children's Behaviour ✦ Environment Design
Year 4	Mandatory <ul style="list-style-type: none"> ✦ Curriculum in the Irish Context ✦ Supervision, Leadership and Teamwork ✦ Professional Pedagogical Practice ✦ Professional Practice 4 	Mandatory <ul style="list-style-type: none"> ✦ The Arts in the Integrated Developmental Curriculum ✦ Research ✦ Identity & Psychological Wellbeing in Early Childhood ✦ Contemporary Issues in Early Childhood

Career Options

- * Childcare Practitioner (e.g. in a crèche or preschool)
- * Childcare Manager
- * Early Years Specialist
- * Siolta Coordinator
- * Learning and Childcare Support Officer
- * County Childcare Committee Co-ordinator
- * Support and Development Officer

Note

Offers of places on this programme are subject to applicant's successfully passing Garda/Police vetting.

Minimum Entry Requirements

A minimum of six passes in the Leaving Certificate (including Mathematics and either English or Irish), with at least Grade C3 in two Higher Level papers, together with at least Grade D3 in four Ordinary Level papers plus a minimum of 300 points.

Note

Students are required to attend work placements in each stage of the programme. In Stage 3 students have an opportunity to undertake a specialised work placement abroad.

About this Programme

The term midwifery means with woman. The focus of midwifery is to provide woman-centered care from pre-conception through to the postpartum period. Fundamental to this is the concept of partnership between the woman and the midwife. This partnership is based on mutual trust, support and collaboration.

Midwives provide care in a range of settings including maternity hospitals /units, and midwife-led units and services both in the hospital and community. Midwives also work in partnership with other members of the healthcare team in particular when women experience complications in pregnancy and birth.

As a student on this programme you will develop the professional knowledge, skills and understanding needed to fulfil the role of a midwife. The role involves providing individualised care to women and their family. Learning takes place in the classroom, specialised skills laboratory and in our affiliated partner hospitals: Our Lady of Lourdes Hospital, Drogheda, Cavan General Hospital (maternity services) and Letterkenny General Hospital (maternity services).

Career Options

Apply to practice as a Registered Midwife in Ireland and throughout the UK and EU. Graduates can apply for positions as Staff Midwives in the Irish health care sector.

Course

BSc (Hons)
in Psychiatric Nursing

Code

DK874
DK875*

Places

20

Level

8

Duration

4 Years

About this Programme

The underpinning philosophy of the BSc (Honours) in Psychiatric Nursing programme encompasses a humanistic, biopsychosocial approach to the holistic care of the person with a mental health problem while adhering to the aspirations of A Vision for Change and the Mental Health Act.

Over the course of this four-year programme, you will develop the professional knowledge, skills and attitude needed to communicate with people experiencing mental distress and to form a therapeutic relationship with them and their families. Student's theoretical knowledge and practical skills will be developed through the use of innovative and traditional teaching and learning approaches in modern teaching spaces and simulated learning environments.

As an undergraduate student psychiatric nurse you will learn the importance of multidisciplinary team-working with Psychiatrists, Psychologists, Occupational Therapists, Social Workers and others. You will learn how to use various therapies and interventions to restore and maintain patients' mental health and have an educational role in the prevention of mental distress. The work is very challenging and can be most rewarding.

Course	Code	Places	Level	Duration
BSc (Hons) in Intellectual Disability Nursing	DK872 DK873*	20	8	4 Years

About this Programme

Intellectual Disability Nursing is ideally placed to facilitate the needs of people with an intellectual disability in a variety of settings in partnership with the person and their family/carers. They may require support of their well-being by improving or maintaining their physical and mental health.

In addition, Intellectual Disability Nurses can promote social inclusion by reducing barriers and supporting the person to live their lives as fully and independently as possible while respecting their rights and dignity.

Over the course of this four-year programme, students will develop the professional knowledge, skills and attitude necessary to meet the specific needs of persons with intellectual disabilities. Student's theoretical knowledge and practical skills will be developed through the use of innovative and traditional teaching and learning approaches in modern teaching spaces and simulated learning environments.

Career Options

About this Programme

The aim of the BSc (Hons) in General Nursing Programme is to prepare general nursing students to become competent, knowledgeable and accountable nurses who can provide holistic, evidence-based care for service users in a variety of health care settings. Learning takes place in the classroom, Clinical Skills Laboratory and in a variety of clinical practice settings throughout the Dublin North East region.

Throughout the curriculum innovative learning experiences and teaching strategies are used to promote the attainment of graduate skills such as critical analysis, problem-solving, team work, decision making and interpersonal skills. The curriculum is responsive to the changing needs of service users and to changes in knowledge and evidence for practice and health care delivery.

My DkIT

Natalie Ferguson

Fermanagh

Current 3rd year Midwifery Science student.

Biomedical Science BSc 2011, Queens University Belfast.

“

Having heard about the highly regarded reputation Dundalk Institute of Technology (DkIT) held, particularly with regard to its Midwifery and Nursing programmes, it was an immediate option on my CAO application. Subsequently I was awarded a place and have never looked back.

DkIT is a modern and well equipped facility, with new and comfortable class rooms and a fantastic clinical skills laboratory to practice midwifery skills before entering the clinical environment. The class numbers are small with approximately 20 in my year group, this meant that we could immediately develop a friendship and rapport as a group and I can personally say I have made some great friends for life, who help and support each other throughout the degree programme.

The midwifery degree itself is challenging but hugely rewarding. As a student I encountered women, their babies and families from first semester in first year and it provided a great insight into the profession. Academically the course is exciting and testing. With a fantastic group of warm and friendly lecturers I have felt supported and guided throughout my three years, they are approachable and always willing to help.

Through the college I undertook a training day in media skills, this greatly improved my confidence and public speaking skills and has aided me in representing DkIT, midwifery and myself at public level, having recently participated in a radio interview promoting Midwives week.

DkIT provides a warm, friendly and supportive environment to learn in, with fantastic facilities and some of the best lecturers available. Midwifery is a truly satisfying and moving profession to be a part of and my training at DkIT has been first class!

About this Programme

This programme will provide the theoretical knowledge and practical skills needed to work as a professional Veterinary Nurse in Irish and European veterinary practices. Graduates will have knowledge of and skills in animal biology, veterinary nursing, laboratory analysis, office management and customer care. All relevant practical competencies will be covered in relation to dogs, cats, horses, farm animals and exotic species. Students participate in a total of 28 weeks full-time placement in veterinary practices during the course of the 3-year programme.

Career Options

Graduates from this programme will mainly find employment in large animal, companion animal, equine and mixed veterinary clinics and hospitals. Opportunities will also exist in animal welfare facilities, kennel premises and veterinary product businesses.

Accreditation

DkIT has received Full Accreditation from the Veterinary Council of Ireland (VCI) for this programme. Graduates are eligible to register as Veterinary Nurses with the VCI.

Subjects

	Semester 1	Semester 2
Year 1	Mandatory <ul style="list-style-type: none"> * Anatomy and Physiology 1 * Cellular Biology * Introduction to Veterinary Nursing * Mathematics and Computer Applications (year-long) * Work Placement 1 (year-long) 	Mandatory <ul style="list-style-type: none"> * Anatomy and Physiology 2 * Microbiology and Biochemistry * Animal Husbandry * Client Care and Relationship Marketing * Mathematics and Computer Applications (year-long) * Work Placement 1 (year-long)
Year 2	Mandatory <ul style="list-style-type: none"> * Clinical Pathology * Small Animal Medical Nursing * Veterinary Nursing for Exotic Species * Parasitology * Office Practice and Teamworking 	Mandatory <ul style="list-style-type: none"> * Applied Writing and Research Skills * Pharmacology * Large Animal Medical Nursing * Animal Welfare & Husbandry * Work Placement 2
Year 3	Mandatory <ul style="list-style-type: none"> * Anaesthesia and Analgesia * Diagnostic Imaging * Pharmacy, Law and Ethics * Surgical Nursing 1 * Personal Effectiveness & Team Support 	Mandatory <ul style="list-style-type: none"> * Animal Reproduction and Applied Microbiology * Surgical Nursing 2 * Small Animal Clinical Nutrition * Equine Nursing * Veterinary Nursing Internship

Minimum Entry Requirements

Six passes in the Leaving Certificate (including Mathematics and either English or Irish)

And

A minimum Grade C3 in Higher Level Biology or Agricultural Science.

About this Programme

This programme will provide you with the skills and knowledge to work in the rapidly expanding Pharmaceutical Industry in Ireland and worldwide. Years one and two focus on the fundamental sciences. In year three there is an emphasis on relevant applied modules including Pharmaceutical Biotechnology, Pharmacology, Pharmaceutical Manufacturing, Regulatory Affairs and Quality Management.

As well as getting a good grounding in all science subjects, you will learn how drugs and other medical products are manufactured and about drug regulatory issues.

Career Options

There are excellent career opportunities for graduates as:

- * Lab Technician
- * Chemist
- * Process Development Technician
- * Project Assistant
- * Quality Control Chemist/Technician
- * Research Assistant
- * Validation/Manufacturing Technician.

Subjects

	Semester 1	Semester 2
Year 1	Mandatory <ul style="list-style-type: none"> * Physics through Problem-Based Learning 1 * Mathematics 1 * Fundamental Chemistry * Health & Safety and Academic Skills (year-long) * Biology (year-long) 	Mandatory <ul style="list-style-type: none"> * Physics through Problem-Based Learning 2 * Mathematics 2 * Chemistry * Health and Safety and Academic Skills (year-long) * Biology (year-long)
Year 2	Mandatory <ul style="list-style-type: none"> * Introduction to Organic Chemistry * Pharmaceutical Microbiology * Analytical Science * Molecular Bioscience 	Mandatory <ul style="list-style-type: none"> * Pharmaceutical Processing * Molecular Bioscience * Pharmaceutical Chemistry * Statistics & Data Analysis
Year 3	Mandatory <ul style="list-style-type: none"> * Preformulation of Pharmaceuticals * Pharmaceutical Manufacturing * Pharmaceutical Biotechnology * Immunology * GMP & Regulatory Affairs 	Mandatory <ul style="list-style-type: none"> * Project * Quality Management * Advanced Analytical Science * Physiology and Pharmacology * Preformulation of Pharmaceuticals Electives <ul style="list-style-type: none"> * Biotherapeutics * Pharmaceutical Drug Design

Progression Opportunities

Graduates may progress to the one-year, add-on honours degree in Biopharmaceutical Science (subject to entry requirements).

Minimum Entry Requirements

Six passes in the Leaving Certificate (including Mathematics and either English or Irish)

And

Either one Grade C3 in a Higher Level paper,

Or

An overall points total of 200.

A Leaving Certificate science subject is desirable.

My DkIT

Audrey Wallace

BSc Hons in Biopharmaceutical Science (Graduated 2014)

BSc in Pharmaceutical Science (Graduated 2013)

I graduated from both the BSc in Pharmaceutical Science and the BSc Hons in Biopharmaceutical Science in 2013 and 2014, respectively. I had always been interested in science and when I returned to education in 2010 I felt the courses available in DkIT would provide me with the opportunity to explore this discipline, both for personal interest and hopefully for entry into a new career within this industry. Both courses were informative, enjoyable and well delivered. Subjects covered all areas of science; Physics, Chemistry and Biology.

As the course progressed throughout the years a good combination of practical work and lectures were provided on subjects very relevant to the pharmaceutical industry today.

I am currently working within this industry in Clinical Services in a business related role and believe my choice of degree has led me into this interesting and challenging role. I liaise with pharmaceutical companies worldwide to create packaging, labelling and distribution strategies for their clinical trials. I would recommend both courses if you are looking for an up to date degree which allows for diversity into many different roles within this industry.

About this Programme

If you have a keen interest in Biology and enjoy studying subjects like Biochemistry, Microbiology, Molecular Biology, Cell Biology and Ecology, then this programme is for you. You will learn about the aspects of modern Biology that underpin the production of drugs and other medical products and the control of pollution. You will also learn how to integrate this knowledge into a range of applied Bioscience Subjects such as Biotechnology, Industrial Microbiology, Biotherapeutics and Applied Ecology.

There is an option for graduates of this programme to specialise further through an add-on, honours degree programme at DkIT in Biopharmaceutical Science.

Alternatively students interested in the Environmental Science area may have an opportunity to transfer into the 3rd year of the BSc (Hons) in Environmental Bioscience after 2nd year (subject to achieving grade requirement).

Subjects

About this Programme

The aim of this programme is to produce graduates with knowledge, skills and competencies in the key areas of ecology, environmental biotechnology, environmental monitoring, analysis and risk assessment.

Graduates of this programme will be able to make a significant contribution to the resolution of environmental problems and the implementation of sustainable solutions. It is particularly suitable for students who enjoy Biology and have an interest in environmental matters.

Career Options

Graduates from this programme will have advanced skills and knowledge in environmental assessment and control, particularly in techniques and technologies which have an ecological or biotechnological basis. Graduates will find careers in environmental monitoring and assessment (lab and field based), licensing and regulation roles, consultancy services and environmental management within Industry. They will also find employment in other sectors which require good analytical and scientific skills.

Progression Opportunities

Graduates will be able to progress to Level 9 taught postgraduate programmes and Level 9 and 10 research programmes, either within DkIT or other HEIs.

Minimum Entry Requirements

Entrants must have a pass or higher in at least six Leaving Certificate subjects (including Maths and Irish or English) including a grade C3 or higher in two Higher Level subjects and at least 300 points. Entrants from Northern Ireland must have at least two academic A levels at grade C or higher and four other subjects at GCSE, AS or Applied A Levels, to include Mathematics and English (or Irish). Equivalences to the Leaving Certificate and GCEs are also accepted.

BSc (Hons) in Agriculture	DK882	30	8	4 Years

About this Programme

The aim of this programme is to produce graduates with knowledge, skills and competencies to respond effectively to current and future developments in Agriculture and the Agri-Food Industry.

The programme will provide graduates with a strong foundation in science, business and agriculture and will specifically develop skills and knowledge in the areas of animal and crop production, animal husbandry and biosecurity, health and safety, agricultural mechanisation, financial and business management, entrepreneurship and innovation, environmental protection and the production and processing of safe, quality-assured food.

Graduates will have knowledge and appreciation of national and international policy and legislation and will have excellent communication skills, research competence and the ability to respond to the challenges of larger scale, market-led production, alternative rural enterprise and environmental sustainability.

Progression Opportunities

Graduates can progress to the M.Sc. in Biotechnology in DkIT or to research postgraduate positions in DkIT or other Institutions.

Career Options

- * Commercial farmer or Farm Manager
- * Researcher
- * Agricultural Advisor with consultancy or state body, e.g. Teagasc
- * Technical Sales Role
- * Analytical or Research Scientist in the Waste Management Sector
- * Quality Manager or Production Supervisor in the Food Industry
- * Rural Entrepreneur

Minimum Entry Requirements

A minimum of six passes in Leaving Certificate (including Mathematics and either English or Irish), with at least Grade C3 in two Higher Level papers, together with at least Grade D3 in four Ordinary Level papers plus a minimum of 300 points.

Entrants from Northern Ireland must have at least two A Levels at grade C or higher and four other subjects at GCSE, AS or A Levels, to include Mathematics and English (or Irish). BTEC Level 3 Nationals in Applied Science are also accepted.

Note

This is a collaborative programme delivered jointly with Teagasc at Ballyhaise Agricultural College and leads to a DkIT award at Level 8 on the National Framework of Qualification.

About this Programme

Farm management has become more demanding in recent times and farmers increasingly need to be aware of such issues as environmental protection, food safety, animal welfare, operation of machinery and financial and business management. This programme combines science, business and animal husbandry to train students to become effective farmers or farm managers.

The programme is based in Ballyhaise Agricultural College in Co. Cavan (Monday - Wednesday) and Dundalk Institute of Technology (Thursday - Friday).

Students can avail of facilities in both institutions.

Career Options

Graduates from this programme are prepared for a successful full-time or part time career in farming or farm management.

Progression Opportunities

Graduates from this programme may have an opportunity to progress to the one-year, add-on, BSc in Agriculture at DkIT. (DKA80).

About this Programme

This programme builds on the skills and knowledge developed through the Higher Certificate programme, reflecting the importance of business skills and good agricultural practices that are environmentally sustainable. The programme also covers the processing of consumer foods, allowing graduates the option of part-time or full-time employment in the Agri-Food sector.

The programme includes a 3-month work placement on a farm, agri-services, agri-consultancy or in the Food and Beverage industry.

The programme is based at DkIT with one day per week in Ballyhaise Agricultural College, Cavan.

Subjects

	Semester 1	Semester 2
Year 1	Mandatory <ul style="list-style-type: none"> * Soil Science and Land Management * Quality Management in the Food Industry * Food Processing, Analysis and Production Management * Marketing for the Agri-Business Sector * Financial Management Systems * Research Methods 	Mandatory <ul style="list-style-type: none"> * Business Management Systems * Agricultural Entrepreneurship * Agriculture in the Environment * Quality Management on the Farm * Agricultural Production and Management Systems * Internship¹ <ul style="list-style-type: none"> 1 Internships available in New Zealand, Europe or US.

Career Options

As a graduate of this programme you will have a solid grounding in agricultural science, business and financial management, environmental protection, quality assurance and food safety.

Skills acquired in marketing and entrepreneurship, as well as food production and analysis will enable you to diversify into land-based businesses, or have a career as a production, or quality manager in the agri-food sector.

Progression Opportunities

Graduates of this programme have the option to progress to the BSc (Hons) in Sustainable Agriculture in DkIT (subject to entry requirements).

Minimum Entry Requirements

A Level 6 qualification in Agriculture or a closely related area is required for entry to this programme.

Note

This is a collaborative programme delivered jointly with Teagasc at Ballyhaise Agricultural College and leads to a DkIT award at Level 7 on the National Framework of Qualification.

Rachel Coyle *BCc (Hons) Midwifery*

Currently carrying out an Internship in Our Lady of Lourdes Hospital, Drogheda

I have always been interested in the health of a woman and the incredible abilities women uphold, one being the strength and courage of being pregnant and transitioning into motherhood. I wanted to be part of that transition, ensuring women and their babies, alongside their families would have the best start in an exciting yet vulnerable time in their lives.

The decision to train to be a Midwife has been the most challenging and rewarding part of my life thus far. It offers endless opportunities such as travelling around the world, experiencing the culture of Midwifery.

I chose Dundalk Institute of Technology for their excellent facilities and tutor's in training Midwives and the close links they have with some of Ireland's best hospitals. I have been fortunate to train in the Midwifery Led Unit (MLU) as DkIT provides access for student midwives. Midwifery in DkIT is both a practical and theory based course throughout the 4 years which provides student midwives with a good balance in between college and work in the hospitals.
