NANOTECHNOLOGY REVIEWS

**Editor/Herausgeber**

Challa Kumar

Profile/Kurzcharakteristik

Nanotechnology Reviews is to provide a platform for scientists and engineers of all involved disciplines to exchange important recent research in fundamental as well as applied aspects. The contributions will be cutting-edge, exhaustive on any given topic, authoritative, and provide both pros and cons of potential technologies. There are two types of technical articles: expert reviews and research highlight contributions. While expert reviews provide a state of the art assessment on a specific topic, research highlight contributions present most recent and novel research findings. In addition to technical contributions, the journal also publishes articles on implications of nanotechnology for society, environment, education, intellectual property, industry, and politics.

Publication Frequency/Erscheinungsweise

6 issues per year

Readership/Leserschaft

Mathematicians and physicists in the relevant sector
