travelbasys
Your Operating System for Success

A system for success – over 1,200 travel companies rely on travelbasys

travelbasys
Your Operating System for Success

travelbasys company profile

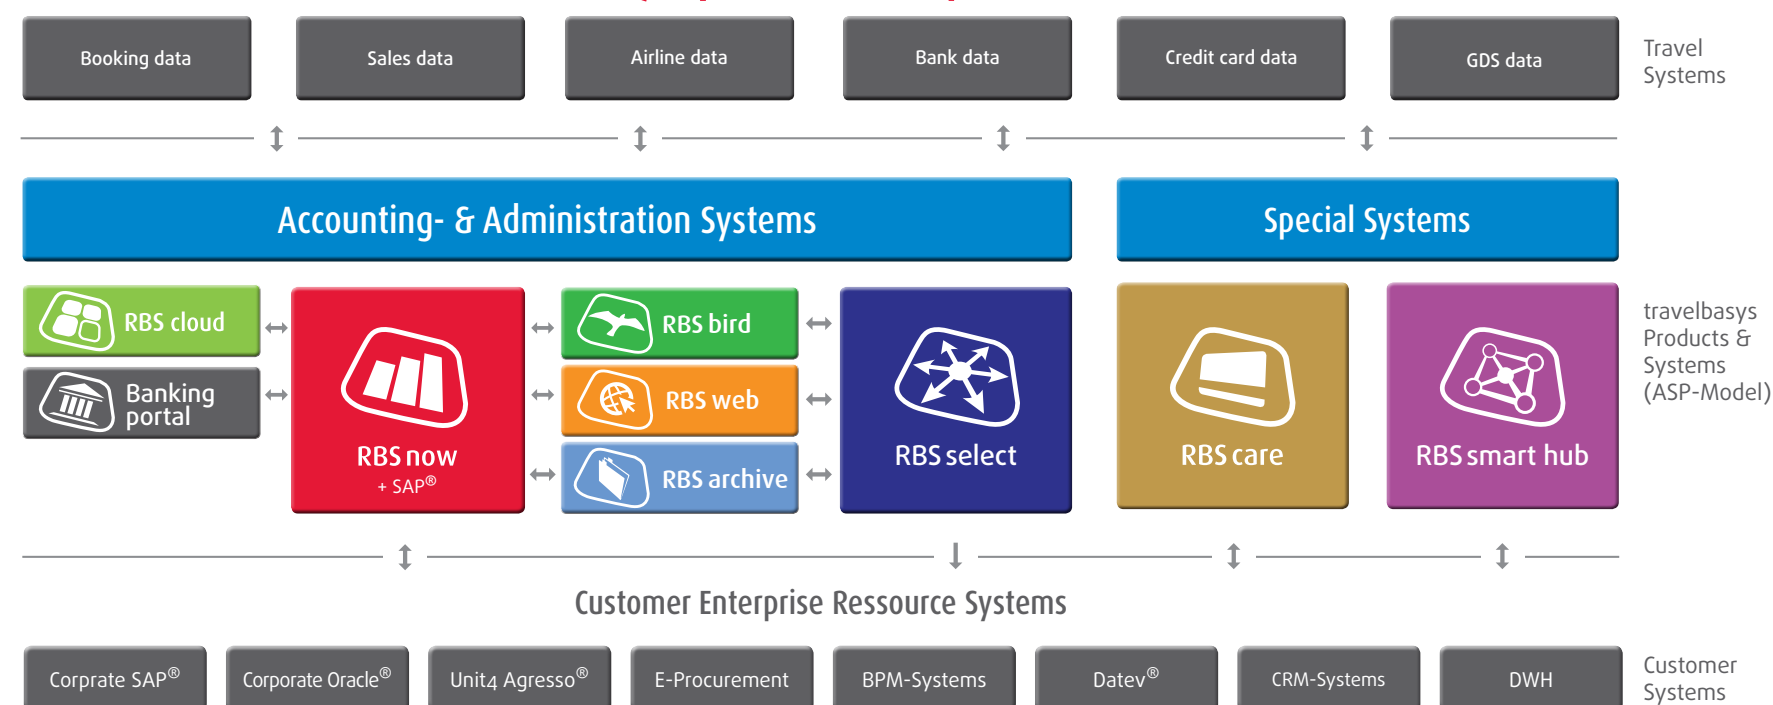

travelbasys develops sector-specific IT system solutions for the travel and finance industry. For over 40 years, we have been supporting customers from all over Europe with accounting, archiving, CRM and business intelligence solutions based on Software as a Service (SaaS). The core product is the RBS accounting platform for tour operators and travel agencies. More than 1,200 travel providers use our IT-based integration and automation services for their tourism processes and financial transactions. In this context, our audited systems manage a sales volume of over 8 billion Euros, more than 12 million tourism processes, and some 22 million trip profiles a year, making travelbasys' RBS solutions the market-leading back-office and administration systems for travel companies in Germany and Europe.

One system, many advantages

With RBS, travelbasys offers an integrated accounting platform which uses high-performance applications to fulfil all industry requirements from an IT and business perspective (see illustration).

- **One database for all data:** Faster access to relevant travel and accounting data at the company headquarters and at the counter; easier data exchange and data reconciliation with service providers; comprehensive statistical analyses – greater overview, ideal company management.
- **Accounting via SAP®:** Automatic data transfer, greater control of financial accounting.
- **Modular application possibilities, integrated workflow.** Full transparency right down to individual records and transaction records.

IT / System – Perspectives

Business – Perspectives

Your partner for more business success

Business success requires a good foundation: solid, with room for your strategy. Efficient, to support your processes. This allows you to concentrate fully on business development and easily achieve all your goals. We are a strong partner for your IT and process solutions.

- **Reliability & innovation:** Our technologies help collect, analyse and reorganise customer data, as well as use this information to establish customer relationships. We integrate all relevant functions into one system to achieve this. Quality, individual scalability, performance and security are our benchmarks. For you, this means: less complexity and greater productivity and efficiency in your work.
- **Business sector expertise:** Our team consists of experienced specialists. Programmers that know their trade. And account managers with experience in the travel industry. Being ready to provide assistance and trust are qualities you can expect of us. As a result, we speak one language in regard to expertise and technology – the customer's language.
- **Sustainability:** We attach great importance to long-term partnerships. Customers, suppliers, shareholders and staff form a reliable network, which enables innovation and helps all parties involved to be even more productive. The basis for long-term success.
