## Introduction (Please read to patient)

Hi, I'm \_\_\_\_\_, nice to meet you. If it's okay with you, I'd like to ask you a few questions that will help me give you better medical care. The questions relate to your experience with alcohol, cigarettes, and other drugs. Some of the substances we'll talk about are prescribed by a doctor (like pain medications). But I will only record those if you have taken them for reasons or in doses other than prescribed. I'll also ask you about illicit or illegal drug use—but only to better diagnose and treat you.

**Instructions:** For each substance, mark in the appropriate column. For example, if the patient has used cocaine monthly in the past year, put a mark in the “Monthly” column in the “illegal drug” row.

NIDA Quick Screen Question:	Never	Once or Twice	Monthly	Weekly	Daily or Almost Daily
<b><u>In the past year, how often have you used the following?</u></b>					
<b>Alcohol</b>					
<ul style="list-style-type: none"> <li>• For men, 5 or more drinks a day</li> <li>• For women, 4 or more drinks a day</li> </ul>					
<b>Tobacco Products</b>					
<b>Prescription Drugs for Non-Medical Reasons</b>					
<b>Illegal Drugs</b>					

- If the patient says “**NO**” for all drugs in the Quick Screen, reinforce abstinence. **Screening is complete.**
- If the patient says “**Yes**” to **one or more days of heavy drinking**, *patient is an at-risk drinker*. Please see NIAAA website “How to Help Patients Who Drink Too Much: A Clinical Approach” [http://pubs.niaaa.nih.gov/publications/Practitioner/CliniciansGuide2005/clinicians\\_guide.htm](http://pubs.niaaa.nih.gov/publications/Practitioner/CliniciansGuide2005/clinicians_guide.htm), for information to **Assess, Advise, Assist, and Arrange** help for at risk drinkers or patients with alcohol use disorders
- If patient says “**Yes**” to **use of tobacco**: Any current tobacco use places a patient at risk. Advise *all tobacco users to quit*. For more information on smoking cessation, please see “Helping Smokers Quit: A Guide for Clinicians” <http://www.ahrq.gov/clinic/tobacco/clinhlpsmksqt.htm>
- If the patient says “**Yes**” to **use of illegal drugs or prescription drugs for non-medical reasons**, proceed to **Question 1** of the NIDA-Modified ASSIST.

<sup>1</sup> This guide is designed to assist clinicians serving adult patients in screening for drug use. The NIDA Quick Screen was adapted from the single-question screen for drug use in primary care by Saitz et al. (available at <http://archinte.ama-assn.org/cgi/reprint/170/13/1155>) and the National Institute on Alcohol Abuse and Alcoholism’s screening question on heavy drinking days (available at [http://pubs.niaaa.nih.gov/publications/Practitioner/CliniciansGuide2005/clinicians\\_guide.htm](http://pubs.niaaa.nih.gov/publications/Practitioner/CliniciansGuide2005/clinicians_guide.htm)). The NIDA-modified ASSIST was adapted from the World Health Organization (WHO) Alcohol, Smoking and Substance Involvement Screening Test (ASSIST), Version 3.0, developed and published by WHO (available at [http://www.who.int/substance\\_abuse/activities/assist\\_v3\\_english.pdf](http://www.who.int/substance_abuse/activities/assist_v3_english.pdf)).

## Questions 1-8 of the NIDA-Modified ASSIST V2.0

**Instructions:** Patients may fill in the following form themselves but screening personnel should offer to read the questions aloud in a private setting and complete the form for the patient. To preserve confidentiality, a protective sheet should be placed on top of the questionnaire so it will not be seen by other patients after it is completed but before it is filed in the medical record.

Question 1 of 8, NIDA-Modified ASSIST	Yes	No
<p><b>In your <i>LIFETIME</i>, which of the following substances have you ever used?</b></p> <p><i>*Note for Physicians: For prescription medications, please report nonmedical use only.</i></p>		
a. <b>Cannabis</b> (marijuana, pot, grass, hash, etc.)		
b. <b>Cocaine</b> (coke, crack, etc.)		
c. <b>Prescription stimulants</b> (Ritalin, Concerta, Dexedrine, Adderall, diet pills, etc.)		
d. <b>Methamphetamine</b> (speed, crystal meth, ice, etc.)		
e. <b>Inhalants</b> (nitrous oxide, glue, gas, paint thinner, etc.)		
f. <b>Sedatives or sleeping pills</b> (Valium, Serepax, Ativan, Xanax, Librium, Rohypnol, GHB, etc.)		
g. <b>Hallucinogens</b> (LSD, acid, mushrooms, PCP, Special K, ecstasy, etc.)		
h. <b>Street opioids</b> (heroin, opium, etc.)		
i. <b>Prescription opioids</b> (fentanyl, oxycodone [OxyContin, Percocet], hydrocodone [Vicodin], methadone, buprenorphine, etc.)		
j. <b>Other – specify:</b>		

- Given the patient's response to the Quick Screen, the patient *should not indicate "NO"* for all drugs in Question 1. If they do, remind them that their answers to the Quick Screen indicated they used an illegal or prescription drug for nonmedical reasons within the past year and then **repeat Question 1**. If the patient indicates that the drug used is not listed, please mark 'Yes' next to 'Other' and continue to **Question 2** of the NIDA-Modified ASSIST.
- If the patient says "Yes" to any of the drugs, proceed to **Question 2** of the NIDA-Modified ASSIST.

- If patient reports using a drug by injection in the past three months, ask about their pattern of injecting during this period to determine their risk levels and the best course of intervention.
  - If patient responds that they inject once weekly or less OR fewer than 3 days in a row, provide a brief intervention including a discussions of the risks associated with injecting.
  - If patient responds that they inject more than once per week OR 3 or more days in a row, refer for further assessment.

**Note:** Recommend to patients reporting any current use of alcohol or illicit drugs that they get tested for HIV and other sexually transmitted diseases.

**Tally Sheet for scoring the full NIDA-Modified ASSIST:**

**Use the resultant Substance Involvement (SI) Score to identify patient’s risk level.**

To determine patient’s risk level based on his or her SI score, see the table below:

Level of risk associated with different Substance Involvement Score ranges for Illicit or nonmedical prescription drug use	
0-3	Lower Risk
4-26	Moderate Risk
27+	High Risk
