L^AT_EX, quésaco ?

It is not like Microsoft Word: it is not WYSIWYG.
Separation of form and substance.

L^AT_EX, quésaco ?

It is not like Microsoft Word: it is not WYSIWYG.
Separation of form and substance.

A source file `.tex` (*substance*) is compiled, to produce an output (*form*), which can be a `.dvi`, `.ps` or simply a `.pdf` file.

L^AT_EX, quésaco ?

It is not like Microsoft Word: it is not WYSIWYG.
Separation of form and substance.

A source file `.tex` (*substance*) is compiled, to produce an output (*form*), which can be a `.dvi`, `.ps` or simply a `.pdf` file.

Edit

With a text editor

Examples

TeXnicCenter

TeXShop

Kile

L^AT_EX, quésaco ?

It is not like Microsoft Word: it is not WYSIWYG.
Separation of form and substance.

A source file .tex (*substance*) is **compiled**, to produce an output (*form*), which can be a .dvi, .ps or simply a .pdf file.

Edit

With a text editor

Examples

TeXnicCenter

TeXShop

Kile

Compile

MiK_TeX

Mac_TeX

included!

Downsides

- ▶ Markup language (and its learning curve)

Downsides

- ▶ Markup language (and its learning curve)
- ▶ Not so easy to change the formatting

Downsides

- ▶ Markup language (and its learning curve)
- ▶ Not so easy to change the formatting
- ▶ Hard without outline

Downsides

- ▶ Markup language (and its learning curve)
- ▶ Not so easy to change the formatting
- ▶ Hard without outline
- ▶ (Collaborations)

Advantages

- ▶ Text file (.tex)

Advantages

- ▶ Text file (.tex)
 - ▶ Perennial

Advantages

- ▶ Text file (`.tex`)
 - ▶ Perennial
 - ▶ Accepted by most journals

Advantages

- ▶ Text file (.tex)
 - ▶ Perennial
 - ▶ Accepted by most journals
- ▶ Elegant and optimized formatting

Advantages

- ▶ Text file (.tex)
 - ▶ Perennial
 - ▶ Accepted by most journals
- ▶ Elegant and optimized formatting
- ▶ Bibliography, tables of contents, index, etc. are easy

Advantages

- ▶ Text file (.tex)
 - ▶ Perennial
 - ▶ Accepted by most journals
- ▶ Elegant and optimized formatting
- ▶ Bibliography, tables of contents, index, etc. are easy
- ▶ Clean and clear equations (and compatible)

Advantages

- ▶ Text file (.tex)

4 Help?

Preamble

It contains the file's description, its type, packages to be loaded, options, etc.

```
\documentclass[11pt]{article}

\usepackage{amsmath}

\author{Florence}
\title{A document in \LaTeX}

\begin{document}
\maketitle
% This is a comment
\end{document}
```

A document in L^AT_EX
Florence
April 2, 2012

Structuring your document

```
\documentclass[11pt]{article}

\author{Florence}
\title{A document in \LaTeX}

\begin{document}
\maketitle

\section{A first section}
With some text in it. I love Vancouver.
\subsection{And a subsection}
Blah blah blah.

\subsection{And a second subsection}
Choobeedoowah.

\section{A second section}
Look! Automatic numbering!

\end{document}
```

A document in \LaTeX

Florence
April 2, 2012

1 A first section
With some text in it. I love Vancouver.

1.1 And a subsection
Blah blah blah.

1.2 And a second subsection
Choobeedoowah.

2 A second section
Look! Automatic numbering!

Paragraphs & lists

Paragraphs and line breaks

Line break: \\

Paragraph break: double line break

Paragraphs & lists

Paragraphs and line breaks

Line break: \\

Paragraph break: double line break

Lists

```
\begin{itemize}
\item First item
\item Second item
\item Third item
\end{itemize}
```

- ▶ First item
- ▶ Second item
- ▶ Third item

Paragraphs & lists

Paragraphs and line breaks

Line break: \\

Paragraph break: double line break

Lists and enumerations

```
\begin{enumerate}  
  \item First item  
  \item Second item  
  \item Third item  
\end{enumerate}
```

1. First item
2. Second item
3. Third item

Insert a figure

It is quite simple (but positioning it can be tricky)

```
\section{Adding figures}
This is what we will see on figure~\ref{fig:logo}, %
showing us a gorgious logo.
\begin{figure}[h]
\centering
\includegraphics[height=0.75in]{Pics/logobrc.jpg}
\caption{Such a nice logo!}
\label{fig:logo}
\end{figure}
```

1 Adding figures

This is what we will see on figure 1, showing us a gorgious logo.

Figure 1: Such a nice logo!

Tables

table: the environment (with caption, and label for references)
tabular: the actual table

```
\section{Creating tables}
This is what we will see on %
\begin{table}[h]
\centering
\begin{tabular}{lc|c}
This & is & a table \\ \hline
\$1.23\$ & wow & \$\sqrt{\pi}\$ \\
\$123\$ & \multicolumn{2}{c}{Merged!}
\end{tabular}
\label{tab:mytab}
\caption{This is a table.}
\end{table}
```

1 Creating tables

This is what we will see on table 1, showing us a quite stupid table.

This	is	a table
1.23	wow	$\sqrt{\pi}$
123	Merged!	

Table 1: This is a table.

Writing an equation

Super easy!

As can be seen on equation^{~\eqref{eq:myeq}}:

```
\begin{equation}
\Psi = \int_{-\infty}^{\infty} \exp \left( \sqrt{\alpha} x^2 \right) dx
\label{eq:myeq}

\end{equation}
```

As can be seen on equation (1):

$$\Psi = \int_{-\infty}^{\infty} \exp \left(\sqrt{\alpha} x^2 \right) dx \quad (1)$$

Languages

Using babel

```
\documentclass[11pt]{article}
\usepackage[francais, english]{babel}
\usepackage[latin1]{inputenc}
\begin{document}

\section{Let's play with languages}
You can have parts of your document in another language.

\selectlanguage{francais}
\noindent Par exemple maintenant, ça va s'afficher en français, %
et on peut écrire avec des accents.
\end{document}
```

1 Let's play with languages

You can have parts of your document in another language.

Par exemple maintenant, ça va s'afficher en français, et on peut écrire avec des accents.

Customization

Define new commands and new environments.

```
\documentclass[11pt]{article}
\usepackage{color}
\newcommand{\suppinfo}{supplementary information}
\newcommand{\comm}[1]{%
    \textit{\scriptsize{\textcolor{blue}{\textsf{#1}}}}}

\begin{document}
\noindent See the \suppinfo{} for more details. \comm{This is %
a comment.} And we see that...
\end{document}
```

See the supplementary information for more details. *This is a comment.* And we see that...

③ Bibliography

Create a bibliography file

Managing your database

Bibliography in your manuscript

④ Help?

Bibliographic database

It is a BIB_TE_X file: .bib

A reference in your file will look like this:

```
@article{debarre2010,
    title={{Evolution of specialization in a %
              spatially continuous environment}},
    author={D{\'e}barre, Florence and Gandon, Sylvain},
    journal={Journal of Evolutionary Biology},
    volume={23},
    number={5},
    pages={1090--1099},
    issn={1420-9101},
    year={2010},
    publisher={Wiley Online Library}
}
```

References within the text

Use the `\cite` command, with the BIB_TE_X key

```
\documentclass[11pt]{article}
\begin{document}

A finer environmental grain favours generalists \cite{debarre2010}.
\bibliography{mybib}
\bibliographystyle{plain}

\end{document}
```

A finer environmental grain favours generalists [1].

References

- [1] F. Débarre and S. Gandon. Evolution of specialization in a spatially continuous environment. *Journal of Evolutionary Biology*, 23(5):1090–1099, 2010.

Styling of the references

Example with cbe

- ▶ Use the `natbib` package
- ▶ Download the `cbe bst` style
- ▶ or: download style files on the journals' websites.

Styling of the references

Example with cbe

```
\documentclass[11pt]{article}
\usepackage{natbib}
\begin{document}
A finer environmental grain favours generalists \citep{debarre2010}.
As wrote \citet{Ronce2001}...
\bibliography{mybib}
\bibliographystyle{cbe}
\end{document}
```

A finer environmental grain favours generalists (Débarre and Gandon, 2010).
As wrote Ronce and Kirkpatrick (2001)...
