Contents

Preface xxi

1 Catalysts for Change 1

1.1 Introduction 1

1.2 Milestones in Computing 5

1.2.1 Aids to Manual Calculating 5

1.2.2 Mechanical Calculators 6

1.2.3 Cash Register 8

1.2.4 Punched-Card Tabulation 8

1.2.5 Precursors of Commercial Computers 10

1.2.6 First Commercial Computers 12

1.2.7 Programming Languages and Time-Sharing 13

1.2.8 Transistor and Integrated Circuit 15

1.2.9 IBM System/360 15

1.2.10 Microprocessor 16

1.2.11 Personal Computer 17

1.3 Milestones in Networking 20

1.3.1 Electricity and Electromagnetism 20

1.3.2 Telegraph 22

1.3.3 Telephone 23

1.3.4 Typewriter and Teletype 24

1.3.5 Radio 25

1.3.6 Television 26

1.3.7 Remote Computing 27

1.3.8 ARPANET 27

1.3.9 Email 29

1.3.10 Internet 29

1.3.11 NSFNET 29

1.3.12 Broadband 30

1.3.13 Wireless Networks 30

1.3.14 Cloud Computing 31

1.4	Milestones in Information Storage and Retrieval	31
1.4.1	Greek Alphabet	31
1.4.2	Codex and Paper	32
1.4.3	Gutenberg's Printing Press	32
1.4.4	Newspapers	32
1.4.5	Hypertext	33
1.4.6	Graphical User Interface	33
1.4.7	Single-Computer Hypertext Systems	35
1.4.8	Networked Hypertext: World Wide Web	36
1.4.9	Search Engines	36
1.4.10	Cloud Storage	37
1.5	Contemporary Information Technology Issues	37
	Summary	39
	Further Reading and Viewing	40
	Review Questions	41
	Discussion Questions	41
	In-Class Exercises	42
	References	43

	An Interview with Dalton Conley	47

2 Introduction to Ethics 49

2.1	Introduction	49
2.1.1	Defining Terms	50
2.1.2	Four Scenarios	51
2.1.3	Overview of Ethical Theories	54
2.2	Subjective Relativism	55
2.2.1	The Case For Subjective Relativism	55
2.2.2	The Case Against Subjective Relativism	56
2.3	Cultural Relativism	57
2.3.1	The Case For Cultural Relativism	58
2.3.2	The Case Against Cultural Relativism	58
2.4	Divine Command Theory	60
2.4.1	The Case For the Divine Command Theory	61
2.4.2	The Case Against the Divine Command Theory	62
2.5	Ethical Egoism	63
2.5.1	The Case For Ethical Egoism	63
2.5.2	The Case Against Ethical Egoism	64
2.6	Kantianism	65
2.6.1	Good Will and the Categorical Imperative	66

2.6.2	Evaluating a Scenario Using Kantianism	68
2.6.3	The Case For Kantianism	69
2.6.4	The Case Against Kantianism	70
2.7	Act Utilitarianism	71
2.7.1	Principle of Utility	71
2.7.2	Evaluating a Scenario Using Act Utilitarianism	73
2.7.3	The Case For Act Utilitarianism	74
2.7.4	The Case Against Act Utilitarianism	75
2.8	Rule Utilitarianism	76
2.8.1	Basis of Rule Utilitarianism	76
2.8.2	Evaluating a Scenario Using Rule Utilitarianism	77
2.8.3	The Case For Rule Utilitarianism	78
2.8.4	The Case Against Utilitarianism in General	79
2.9	Social Contract Theory	80
2.9.1	The Social Contract	80
2.9.2	Rawls's Theory of Justice	82
2.9.3	Evaluating a Scenario Using Social Contract Theory	84
2.9.4	The Case For Social Contract Theory	85
2.9.5	The Case Against Social Contract Theory	86
2.10	Virtue Ethics	87
2.10.1	Virtues and Vices	87
2.10.2	Making a Decision Using Virtue Ethics	89
2.10.3	The Case For Virtue Ethics	91
2.10.4	The Case Against Virtue Ethics	92
2.11	Comparing Workable Ethical Theories	92
2.12	Morality of Breaking the Law	94
2.12.1	Social Contract Theory Perspective	94
2.12.2	Kantian Perspective	94
2.12.3	Rule-Utilitarian Perspective	95
2.12.4	Act-Utilitarian Perspective	96
2.12.5	Conclusion	97
	Summary	97
	Further Reading and Viewing	98
	Review Questions	98
	Discussion Questions	100
	In-Class Exercises	101
	References	102
	An Interview with James Moor	105

3	Networked Communications	109
3.1	Introduction	109
3.2	Spam	110
3.2.1	The Spam Tsunami	111
3.2.2	Need for Social-Technical Solutions	113
3.2.3	Case Study: Ann the Acme Accountant	113
3.3	Internet Interactions	116
3.3.1	The World Wide Web	116
3.3.2	Mobile Apps	116
3.3.3	How We Use the Internet	117
3.4	Text Messaging	120
3.4.1	Transforming Lives in Developing Countries	120
3.4.2	Twitter	120
3.4.3	Business Promotion	120
3.5	Political Impact of Social Media and Online Advertising	121
3.5.1	Political Activism	121
3.5.2	Macedonian Entrepreneurs	122
3.5.3	Internet Research Agency	122
3.5.4	Is Democracy Being Threatened?	123
3.5.5	Troubling Times for Traditional Newspapers	123
3.6	Censorship	125
3.6.1	Direct Censorship	125
3.6.2	Self-Censorship	125
3.6.3	Challenges Posed by the Internet	126
3.6.4	Government Filtering and Surveillance of Internet Content	127
3.6.5	Ethical Perspectives on Censorship	128
3.7	Freedom of Expression	129
3.7.1	History	129
3.7.2	Freedom of Expression Not an Absolute Right	130
3.7.3	<i>FCC v. Pacifica Foundation</i>	132
3.7.4	Case Study: Kate's Blog	132
3.8	Children and Inappropriate Content	135
3.8.1	Web Filters	135
3.8.2	Child Internet Protection Act	135
3.8.3	Ethical Evaluations of CIPA	136
3.8.4	Sexting	138
3.9	Breaking Trust	139
3.9.1	Identity Theft	139
3.9.2	Fake Reviews	140
3.9.3	Online Predators	141

3.9.4	Ethical Evaluations of Police Sting Operations	142
3.9.5	False Information	143
3.9.6	Cyberbullying	144
3.9.7	Revenge Porn	146
3.10	Internet Addiction	147
3.10.1	Is Internet Addiction Real?	147
3.10.2	Contributing Factors to Addiction	148
3.10.3	Ethical Evaluation of Internet Addiction	149
	Summary	149
	Further Reading and Viewing	151
	Review Questions	151
	Discussion Questions	152
	In-Class Exercises	155
	References	156

An Interview with **Cal Newport** 163

4 Intellectual Property 165

4.1	Introduction	165
4.2	Intellectual Property Rights	167
4.2.1	Property Rights	167
4.2.2	Extending the Argument to Intellectual Property	169
4.2.3	Benefits of Intellectual Property Protection	171
4.2.4	Limits to Intellectual Property Protection	171
4.3	Protecting Intellectual Property	173
4.3.1	Trade Secrets	173
4.3.2	Trademarks and Service Marks	174
4.3.3	Patents	175
4.3.4	Copyrights	176
4.3.5	Case Study: The Database Guru	180
4.4	Fair Use	184
4.4.1	<i>Sony v. Universal City Studios</i>	186
4.4.2	Audio Home Recording Act of 1992	187
4.4.3	<i>RIAA v. Diamond Multimedia</i>	188
4.4.4	<i>Kelly v. Arriba Soft</i>	188
4.4.5	<i>Authors Guild v. Google</i>	189
4.4.6	Mashups	190
4.5	Digital Media	191
4.5.1	Digital Rights Management	191
4.5.2	Digital Millennium Copyright Act	192
4.5.3	Secure Digital Music Initiative	192

4.5.4	Sony BMG Music Entertainment Rootkit	193
4.5.5	Criticisms of Digital Rights Management	193
4.5.6	Online Music Stores Drop Digital Rights Management	194
4.5.7	Microsoft Xbox One	194
4.6	Peer-to-Peer Networks and Cyberlockers	195
4.6.1	RIAA Lawsuits Against Napster, Grokster, and Kazaa	195
4.6.2	<i>MGM v. Grokster</i>	197
4.6.3	BitTorrent	198
4.6.4	Legal Action Against the Pirate Bay	199
4.6.5	PRO-IP Act	200
4.6.6	Megaupload Shutdown	200
4.6.7	Legal Online Access to Entertainment	201
4.7	Protections for Software	202
4.7.1	Software Copyrights	202
4.7.2	Violations of Software Copyrights	202
4.7.3	Safe Software Development	203
4.7.4	Software Patents	204
4.8	Legitimacy of Intellectual Property Protection for Software	208
4.8.1	Rights-Based Analysis	208
4.8.2	Utilitarian Analysis	209
4.8.3	Conclusion	210
4.9	Open-Source Software	211
4.9.1	Consequences of Proprietary Software	211
4.9.2	“Open Source” Definition	212
4.9.3	Beneficial Consequences of Open-Source Software	213
4.9.4	Examples of Open-Source Software	213
4.9.5	The GNU Project and Linux	214
4.9.6	Impact of Open-Source Software	214
4.10	Creative Commons	215
	Summary	218
	Further Reading and Viewing	219
	Review Questions	220
	Discussion Questions	220
	In-Class Exercises	221
	References	222
	An Interview with June Besek	229

5	Information Privacy	233
5.1	Introduction	233
5.2	Perspectives on Privacy	234
5.2.1	Defining Privacy	234
5.2.2	Harms and Benefits of Privacy	235
5.2.3	Is There a Natural Right to Privacy?	238
5.2.4	Privacy and Trust	241
5.2.5	Case Study: The New Parents	242
5.3	Information Disclosures	244
5.3.1	Public Records	244
5.3.2	Information Held by Private Organizations	245
5.3.3	Facebook Tags	246
5.3.4	Enhanced 911 Services	246
5.3.5	Rewards or Loyalty Programs	247
5.3.6	Body Scanners	247
5.3.7	RFID Tags	248
5.3.8	Implanted Chips	249
5.3.9	Mobile Apps	249
5.3.10	Facebook Login	250
5.3.11	OnStar	250
5.3.12	Automobile “Black Boxes”	251
5.3.13	Medical Records	251
5.3.14	Digital Video Recorders	251
5.3.15	Cookies	252
5.4	Data Mining	252
5.4.1	Data Mining Defined	252
5.4.2	Opt-In versus Opt-Out Policies	254
5.4.3	Examples of Data Mining	255
5.4.4	Social Network Analysis	258
5.4.5	Release of “Anonymized” Datasets	259
5.5	Examples of Consumer or Political Backlash	261
5.5.1	Marketplace: Households	261
5.5.2	Facebook Beacon	261
5.5.3	Malls Track Shoppers’ Cell Phones	262
5.5.4	iPhone Apps Uploading Address Books	262
5.5.5	Instagram’s Proposed Change to Terms of Service	263
5.5.6	Cambridge Analytica	263
	Summary	265
	Further Reading and Viewing	266
	Review Questions	266
	Discussion Questions	267
	In-Class Exercises	269

6 Privacy and the Government 281

6.1 Introduction 281

6.2 US Legislation Restricting Information Collection 283

6.2.1 Employee Polygraph Protection Act 283

6.2.2 Children's Online Privacy Protection Act 283

6.2.3 Genetic Information Nondiscrimination Act 283

6.3 Information Collection by the Government 284

6.3.1 Census Records 284

6.3.2 Internal Revenue Service Records 285

6.3.3 FBI National Crime Information Center 2000 285

6.3.4 OneDOJ Database 287

6.3.5 Closed-Circuit Television Cameras 287

6.3.6 License-Plate Scanners 289

6.3.7 Police Drones 289

6.4 Covert Government Surveillance 290

6.4.1 Wiretaps and Bugs 291

6.4.2 Operation Shamrock 293

6.4.3 Carnivore Surveillance System 294

6.4.4 Covert Activities After 9/11 294

6.5 US Legislation Authorizing Wiretapping 295

6.5.1 Title III 295

6.5.2 Foreign Intelligence Surveillance Act 296

6.5.3 Electronic Communications Privacy Act 296

6.5.4 Stored Communications Act 297

6.5.5 Communications Assistance for Law Enforcement Act 297

6.6 USA PATRIOT Act 298

6.6.1 Provisions of the Patriot Act 298

6.6.2 National Security Letters 299

6.6.3 Responses to the Patriot Act 300

6.6.4 Successes and Failures 301

6.6.5 Long-Standing NSA Access to Telephone Records 302

6.7 Regulation of Public and Private Databases 303

6.7.1 Code of Fair Information Practices 303

6.7.2 Privacy Act of 1974 305

6.7.3 Fair Credit Reporting Act 305

6.7.4 Fair and Accurate Credit Transactions Act 306

6.7.5 Financial Services Modernization Act 306

6.8	Data Mining by the Government	306
6.8.1	Internal Revenue Service Audits	307
6.8.2	Syndromic Surveillance Systems	307
6.8.3	Telecommunications Records Database	307
6.8.4	Predictive Policing	308
6.8.5	Potential Harms of Profiling	308
6.9	National Identification Card	309
6.9.1	History and Role of the Social Security Number	309
6.9.2	Debate over a National ID Card	310
6.9.3	The REAL ID Act	311
6.10	Information Dissemination	312
6.10.1	Family Education Rights and Privacy Act	313
6.10.2	Video Privacy Protection Act	313
6.10.3	Health Insurance Portability and Accountability Act	313
6.10.4	Freedom of Information Act	313
6.10.5	Tollbooth Records Used in Court	314
6.10.6	<i>Carpenter v. United States</i>	315
6.11	Invasion	316
6.11.1	Telemarketing	316
6.11.2	Loud Television Commercials	316
6.11.3	Requiring Identification for Pseudoephedrine Purchases	317
6.11.4	Advanced Imaging Technology Scanners	317
	Summary	318

7 Computer and Network Security 333

7.1	Introduction	333
7.2	Hacking	334
7.2.1	Hackers, Past and Present	334
7.2.2	Penalties for Hacking	336
7.2.3	Selected Hacking Incidents	337
7.2.4	FBI and the Locked iPhone	337
7.2.5	Case Study: Firesheep	338
7.3	Malware	341
7.3.1	Viruses	341

7.3.2	The Internet Worm	343
7.3.3	Sasser	348
7.3.4	Instant Messaging Worms	348
7.3.5	Conficker	348
7.3.6	Cross-Site Scripting	349
7.3.7	Drive-By Downloads	349
7.3.8	Trojan Horses and Backdoor Trojans	349
7.3.9	Ransomware	349
7.3.10	Rootkits	350
7.3.11	Spyware and Adware	350
7.3.12	Bots and Botnets	350
7.3.13	Security Risks Associated with “Bring Your Own Device”	352
7.4	Cyber Crime and Cyber Attacks	352
7.4.1	Phishing and Spear Phishing	353
7.4.2	SQL Injection	353
7.4.3	Denial-of-Service and Distributed Denial-of-Service Attacks	354
7.4.4	Internet-of-Things Devices Co-opted for DDoS Attack	354
7.4.5	Cyber Crime	354
7.4.6	Politically Motivated Cyber Attacks	356
7.5	Online Voting	361
7.5.1	Motivation for Online Voting	361
7.5.2	Proposals	362
7.5.3	Ethical Evaluation	363
	Summary	366
	Further Reading and Viewing	367

8 Computer Reliability 381

8.1	Introduction	381
8.2	Data-Entry or Data-Retrieval Errors	382
8.2.1	Disenfranchised Voters	382
8.2.2	False Arrests	383
8.2.3	Utilitarian Analysis: Accuracy of NCIC Records	383
8.3	Software and Billing Errors	384
8.3.1	Errors Leading to System Malfunctions	385
8.3.2	Errors Leading to System Failures	385

8.3.3	Analysis: E-retailer Posts Wrong Price, Refuses to Deliver	386
8.4	Notable Software System Failures	387
8.4.1	Patriot Missile	388
8.4.2	Ariane 5	389
8.4.3	AT&T Long-Distance Network	390
8.4.4	Robot Missions to Mars	390
8.4.5	Denver International Airport	392
8.4.6	Tokyo Stock Exchange	393
8.4.7	Direct-Recording Electronic Voting Machines	394
8.5	Therac-25	397
8.5.1	Genesis of the Therac-25	397
8.5.2	Chronology of Accidents and AECL Responses	398
8.5.3	Software Errors	401
8.5.4	Postmortem	402
8.5.5	Moral Responsibility of the Therac-25 Team	403
8.5.6	Postscript	404
8.6	Tesla Version 7.0 (Autopilot)	404
8.6.1	Introduction	404
8.6.2	May 2016 Fatal Accident	405
8.6.3	The Hand-off Problem	406
8.6.4	Assigning Moral Responsibility	406
8.7	Uber Test-Vehicle Accident	408
8.7.1	Introduction	408
8.7.2	Shift to One Human Safety Operator	408
8.7.3	Effort to Eliminate “Bad Experiences”	409
8.7.4	March 18, 2018, Accident	410
8.8	Computer Simulations	411
8.8.1	Uses of Simulation	411
8.8.2	Validating Simulations	412
8.9	Software Engineering	414
8.9.1	Specification	414
8.9.2	Development	415
8.9.3	Validation	416
8.9.4	Evolution	417
8.9.5	Improvement in Software Quality	417
8.9.6	Gender Bias	418
8.9.7	Bias in Training Data Sets for Artificial-Intelligence Systems	419
8.10	Software Warranties and Vendor Liability	419
8.10.1	Shrink-Wrap Warranties	419
8.10.2	Are Software Warranties Enforceable?	421
8.10.3	Should Software Be Considered a Product?	423

8.10.4 Case Study: <i>Incredible Bulk</i>	423

Preface

Computers and high-speed communication networks are transforming our world. These technologies have brought us many benefits, but they have also raised many social and ethical concerns. My view is that we ought to approach every new technology in a thoughtful manner, considering not just its short-term benefits, but also how its long-term use will affect our lives. A thoughtful response to information technology requires a basic understanding of its history, an awareness of current information-technology-related issues, and a familiarity with ethics. I have written *Ethics for the Information Age* with these ends in mind.

Ethics for the Information Age is suitable for college students at all levels. The only prerequisite is some experience using computers and the Internet. The book is appropriate for a stand-alone “computers and society” or “computer ethics” course offered by a computer science, business, or philosophy department. It can also be used as a supplemental textbook in a technical course that devotes some time to social and ethical issues related to computing.

As students discuss controversial issues related to information technology, they have the opportunity to learn from one another and improve their critical thinking skills. The provocative questions raised at the end of every chapter, together with dozens of in-class exercises, provide many opportunities for students to express their views, learn from their classmates, and refine their positions on important issues. My hope is that through these discussions students will get better at evaluating complex issues and defending their conclusions with facts, sound values, and rational arguments.

WHAT’S NEW IN THE EIGHTH EDITION

The most significant change in the eighth edition is the addition of Appendix B that focuses on the structure of logical arguments and some common logical fallacies. The eighth edition also contains four sidebars with practical advice about how to enhance privacy and security. The sidebars explain

- how to limit the amount of information Google saves about your searches
- how to limit the amount of personal information Facebook releases to others
- how to create a secure password
- how to protect your computer and other Internet-connected devices

The eighth edition covers many new developments and controversies related to the introduction, use, and abuse of information technology in modern society, including:

- safety concerns arising from accidents involving self-driving vehicles
- Cambridge Analytica gaining access to personal information from as many as 87 million Facebook users
- foreign interference in the 2016 US Presidential election using social media platforms
- police obtaining cell phone location records without a search warrant
- the US Supreme Court decision that has led to the invalidation of hundreds of software patents
- whether copying declaring code in APIs should be considered fair use of copyrighted material
- the dispute between the FBI and Apple about unlocking the encrypted iPhone of a terrorist
- how unrepresentative test-data sets can lead to biased artificial-intelligence software
- security risks associated with the “Bring Your Own Device” movement
- distributed denial-of-service attacks carried out by botnets of Internet-of-Things devices, such as baby monitors and security cameras
- the debate whether gig workers should be considered employees or independent contractors
- the new stance of the FCC regarding net neutrality
- the rise of Craigslist and the decline of print newspapers
- final court resolution of the Google Books controversy
- the shift in credit card fraud from point-of-sale fraud to “card not present” fraud
- cloud computing and cloud storage

Finally, I have updated a significant number of facts and figures throughout the book.

ORGANIZATION OF THE BOOK

The book is divided into 10 chapters. Chapter 1 has several objectives: to get the reader thinking about how social conditions can lead to the development of new technologies and how the adoption of new technologies can lead to social change; to provide the reader with an introduction to the history of computing, networking, and information storage and retrieval; and to help the reader understand how the introduction of information technology has raised some new ethical issues.

Chapter 2 is an introduction to ethics. It presents nine different theories of ethical decision making, weighing the pros and cons of each one. Five of these theories—Kantianism, act utilitarianism, rule utilitarianism, social contract theory, and virtue ethics—are deemed the most appropriate “tools” for analyzing moral problems in the remaining chapters.

Chapters 3–10 discuss a wide variety of issues related to the introduction of information technology into society. I think of these chapters as forming concentric rings around a particular computer user.

Chapter 3 is the innermost ring, focusing on communications over cellular networks and the Internet. Issues such as the increase in spam, political activism over social media, government censorship, identity theft, sexting, revenge porn, and Internet addiction raise important questions related to trust, quality of life, free speech, and whether new media are strengthening or weakening democracies.

The next ring, Chapter 4, deals with the creation and exchange of intellectual property. It discusses intellectual property rights; legal safeguards for intellectual property; the definition of fair use; the impact of digital media, peer-to-peer networks, and cyberlockers; software copyrights and software patents; the legitimacy of intellectual property protection for software; and the rise of the open-source movement.

Chapter 5 focuses on information privacy. What is privacy exactly? Is there a natural right to privacy? How do others learn so much about us? The chapter examines the electronic trail that people leave behind when they use a cell phone, drive a car, search the Web, use social media, make credit card purchases, open a bank account, go to a physician, or apply for a loan, and it explains how mining data to predict consumer behavior has become an important industry. It also provides several examples where companies have gone too far with their collection of personal information, and the consumer or political backlash that has resulted.

Chapter 6 focuses on privacy and the US government. Using Daniel Solove's taxonomy of privacy as our organizing principle, we look at how the government has steered between the competing interests of personal privacy and public safety. We consider US legislation to restrict information collection and government surveillance; government regulation of private databases and abuses of large government databases; legislation to reduce the dissemination of information and legislation that has had the opposite effect; and finally government actions to prevent the invasion of privacy as well as invasive government actions. Along the way, we discuss the implications of the USA PATRIOT Act and the debate over the REAL ID Act to establish a de facto national identification card.

Chapter 7 focuses on the vulnerabilities of networked computers. A case study focuses on the release of the Firesheep extension to the Firefox Web browser. A section on malware discusses viruses, worms, cross-site scripting, drive-by downloads, Trojan horses, ransomware, rootkits, spyware, botnets, and more. The chapter covers phishing, spear phishing, SQL injection, denial-of-service attacks, and distributed denial-of-service attacks, and how these tools are employed by criminal organizations and even nation states. We conclude with a discussion of the risks associated with online voting.

Computerized system failures have led to inconvenienced consumers, lost income for businesses, the destruction of property, human suffering, and even death. Chapter 8 describes some notable software system failures, including the story of the Therac-25 radiation therapy system. It also covers an important contemporary problem: the safety of self-driving automobiles. New sections focus on two fatal accidents: the Florida accident involving a Tesla Model S and the Arizona accident in which an Uber test vehicle struck and killed a pedestrian. The chapter also discusses the reliability of computer simulations, the emergence of software engineering as a distinct discipline, and the validity of software warranties.

Chapter 9 is particularly relevant for those readers who plan to take jobs in the computer industry. The chapter presents a professional code related to computing, the Software Engineering Code of Ethics and Professional Practice, followed by an analysis of the code. Several case studies illustrate how to use the code to evaluate moral problems related to the use of computers. The chapter concludes with an ethical evaluation of whistle-blowing, an extreme example of organizational dissent.

Chapter 10 raises a wide variety of issues related to how information technology has impacted the world of work and the distribution of wealth. Topics include automation, the rise of computerized systems relying on artificial intelligence, telework, workplace monitoring, the gig economy, and globalization. Does automation increase unemployment? Will improvements in artificial intelligence lead to most jobs being taken over by machines? Is there a “digital divide” separating society into “haves” and “have-nots”? Is information technology widening the gap between rich and poor? These are just a few of the important questions the chapter addresses.

NOTE TO INSTRUCTORS

In December 2013, a joint task force of the Association for Computing Machinery and the IEEE Computer Society released the final draft of *Computer Science Curricula 2013* (www.acm.org/binaries/content/assets/education/cs2013_web_final.pdf). The report recommends that every undergraduate computer science degree program incorporate instruction related to Social Issues and Professional Practice through “a combination of one required course along with short modules in other courses” (*Computer Science Curricula 2013*, p. 193). *Ethics for the Information Age* covers nearly all of the core and elective material described in the report, with the notable exception of Professional Communications. Table 1 shows the mapping between the other topics within Social Issues and Professional Practice and the chapters of this book.

The organization of the book makes it easy to adapt to your particular needs. If your syllabus does not include the history of information technology, you can skip the

<i>Topic</i>	<i>Chapter(s) or Appendix</i>
SP/Social Context	3, 10
SP/Analytical Tools	2, B
SP/Professional Ethics	9
SP/Intellectual Property	4, A
SP/Privacy and Civil Liberties	5, 6
SP/Sustainability	8, 10
SP/History	1
SP/Economies of Computing	10
SP/Security Policies, Laws, and Computer Crimes	7

TABLE 1 The topics of the Social Issues and Professional Practice Knowledge Area in *Computer Science Curricula 2013* mapped to the chapters and appendices of this book.

middle three sections of Chapter 1 and still expose your students to examples motivating the formal study of ethics in Chapter 2. After Chapter 2, you may cover the remaining chapters in any order you choose, because Chapters 3–10 do not depend on one other.

Many departments choose to incorporate discussions of social and ethical issues throughout the undergraduate curriculum. The independence of Chapters 3–10 makes it convenient to use *Ethics for the Information Age* as a supplementary textbook. You can simply assign readings from the chapters most closely related to the course topic.

SUPPLEMENTS

The following supplements are available to qualified instructors on Pearson's Instructor Resource Center. Please contact your local Pearson sales representative or visit www.pearsonhighered.com/educator to access this material.

- An instructor's manual provides tips for teaching a course in computer ethics. It also contains answers to all of the review questions.
- A test bank contains nearly 500 multiple-choice, fill-in-the-blank, and essay questions that you can use for quizzes, midterms, and final examinations.
- A set of PowerPoint lecture slides outlines the material covered in every chapter.

FEEDBACK

Ethics for the Information Age cites nearly a thousand sources and includes dozens of ethical analyses. Despite my best efforts and those of many reviewers, the book is bound to contain errors. I appreciate getting comments (both positive and negative), corrections, and suggestions from readers. You can reach me through my Web site: www.michaeljquinn.net.

ACKNOWLEDGMENTS

I appreciate the continuing support of a great publications team: portfolio manager Matt Goldstein, portfolio management assistant Meghan Jacoby, managing producer Scott Disanno, senior content producer Erin Ault, project manager Paul Anagnostopoulos, copyeditor Katrina Avery, and proofreader MaryEllen Oliver.

A superb group of reviewers provided me with many helpful suggestions regarding new material to incorporate into the eighth edition. My thanks to Rhonda Ficek, Minnesota State University Moorhead; Tom Gallagher, University of Montana; Fred Geldon, George Mason University; Richard Gordon, University of Delaware; Micha Hofri, Worcester Polytechnic Institute; and Tamara Maddox, George Mason University.

Matthew Rellihan of Seattle University reviewed the new appendix on logical argumentation, corrected several errors, and provided me with many helpful suggestions for reorganizing the material and improving its presentation. Thank you, Matt, for your valuable contribution to the new edition!

I want to recognize all who participated in the creation of the first seven editions or provided useful suggestions for the eighth edition: Paul Anagnostopoulos, Valerie Ancil, Beth Anderson, Bob Baddeley, George Beekman, Brian Breck, Maria Carl, Sherry

Clark, Thomas Dietterich, Roger Eastman, Beverly Fusfield, Robert Greene, Jose Guerrero, Peter Harris, Susan Hartman, Michael Hirsch, Michael Johnson, Paulette Kidder, Marilyn Lloyd, Pat McCutcheon, Joshua Noyce, Beth Paquin, Konrad Puczynski, Brandon Quinn, Courtney Quinn, Stuart Quinn, Victoria Quinn, Charley Renn, Gregory Silverman, Lindsey Triebel, Charles Volzka, Shauna Weaver, and Todd Will.

Reviewers of previous editions include Ramprasad Bala, University of Massachusetts at Dartmouth; Phillip Barry, University of Minnesota; Bo Brinkman, Miami University; Diane Cassidy, University of North Carolina at Charlotte; Madhavi M. Chakrabarty, New Jersey Institute of Technology; John Clark, University of Colorado at Denver; Timothy Colburn, University of Minnesota Duluth; Lee D. Cornell, Minnesota State University, Mankato; Lorrie Faith Cranor, Carnegie Mellon University; Donna Maria D'Ambrosio, University of South Florida; Dawit Demissie, The Sage Colleges; J.C. Diaz, University of Tulsa; Richard W. Egan, New Jersey Institute of Technology; Fred Geldon, George Mason University; David Goodall, State University of New York at Albany; Richard E. Gordon, University of Delaware; Mike Gourley, University of Central Oklahoma; D.C. Grant, Columbia Basin College; Robert Greene, University of Wisconsin-Eau Claire; Fritz H. Grupe, University of Nevada, Reno; Ric Heishman, George Mason University; Gurdeep Hura, University of Maryland Eastern Shore; Musconda Kapatamoyo, Southern Illinois University, Edwardsville; Christopher Kauggman, George Mason University; Evelyn Lulis, DePaul University; Tamara A. Maddox, George Mason University; Aparna Mahadev, Worcester State University; Eric Manley, Drake University; Richard D. Manning, Nova Southeastern University; James Markulic, New Jersey Institute of Technology; John G. Messerly, University of Texas at Austin; Linda O'Hara, Oregon State University; Joe Oldham, Centre College; Mimi Opkins, California State University, Long Beach; Daniel Palmer, Kent State University; Holly Patterson-McNeill, Lewis-Clark State College; Colin Potts, Georgia Tech; Jason Rogers, George Mason University; Medha S. Sarkar, Middle Tennessee State University; Michael Scanlan, Oregon State University; Robert Sloan, University of Illinois at Chicago; Matthew Stockton, Portland Community College; Dorothy Sunio, Leeward Community College; Leon Tabak, Cornell College; Renée Turban, Arizona State University; Scott Vitz, Indiana University–Purdue University Fort Wayne; Todd Will, New Jersey Institute of Technology; David Womack, University of Texas at San Antonio; John Wright, Juniata College; and Matthew Zullo, Wake Technical Community College.

Finally, I am indebted to my wife, Victoria, for her support and encouragement. You are a wonderful helpmate. Thanks for everything.

Michael J. Quinn
