### **NOTICE**

Users of this Manual are advised that valuable, up-to-date information is available to them in the "How to File Securities with the SVO" class presented by the NAIC Education & Training Department. For more information, please call 816-783-8200 or visit <a href="http://education.naic.org">http://education.naic.org</a>.

■ Transfer of Valuation Instructions for SCA Investments – The instructions for valuation of subsidiary, controlled or affiliated (SCA) investments were deleted from <a href="Part Five">Part Five</a>, Section 2 of the <a href="Purposes and Procedures Manual">Purposes and Procedures Manual</a> and moved to Exhibit A of Statement of <a href="Statutory Accounting Principles">Statutory Accounting Principles No. 97—Investments in Subsidiary, Controlled and Affiliated Entities</a>. The deletion of the valuation instructions for SCA investments was accompanied by a decision of the Valuation of Securities Task Force to transfer oversight of this activity from the Task Force and the SVO to the Statutory Accounting Principles Working Group and the Financial Regulatory Services Division.

The Valuation of Securities (E) Task Force adopted this amendment on February 22, 2017.

References to the Integrated Securities Information System (ISIS) Removed – The NAIC has implemented a new computer platform for the SVO called VISION. The Tail Force adopted an amendment to delete references and information related to ISIS from Part The Section 2 (g) and Part Two, Sections 1, 6, 7 and 9 of the Purposes and Procedures Manual. In View of adding information to the Purposes and Procedures Manual about VISION, a link has been ad led to guide users to information about VISION which is now stored on the VISION patiforms.

The Valuation of Securities (E) Task Force adopted this amendment on February 22, 2 17

Description of NRSRO Status of Credit Rating Providers (CRP ) on the NAIC CRP List
 The Task Force adopted a revised format to identify the CRPs that provide credit rating services to the NAIC and new text to describe the credit rating to regories for which each CRP has registered as an NRSRO under the federal Securities Explange Act of 1934.

The Valuation of Securities (E) Task Force adopted this amendment on February 22, 2017.

Replacement of the Bank List – The Reinstrance Lisk Force and the Valuation of Securities Task Force agreed to reformulate the Bank est concept to an expanded List of Qualified U.S. Financial Institutions ((Issuers of Letters of Chalit as Chilateral in Reinsurance Arrangements). The reformulation reflects a desire to bring the List in compliance with the NAIC Credit for Reinsurance Model Law (#785). Anyone interested in this activity should read the new Part Six, Sections 1 through 6 in their entirety.

The Valuation of Securities (\*) Talk Force adopted the proposed amendment describing the reformulated procedure on June 8, 2016 effect. Jan. sv. 1, 2017. The effective date was subsequently postponed to July 1, 2017 to permit the SVO to finalize proparations on systems and procedures for the new activity. The Task Force adopted an amendment that contained eurorial changes to the initially adopted text on May 18, 2017 and on June 15, 2017 adopted an activity. Opposed amendment to the text describing the SVO's monitoring function. As amended the procedure of siber and Manual was implemented on July 1, 2017.

 Transfer f th Spec al Reporting Instruction from SVO auspices to a General Interrogatory The special Instruction in Part Two, Section 5 of the Purposes and Procedures Manual permitting the use of **NAIC 5\*** and **NAIC** Designation **6\*** in certain certification procedures has been removed from the auspices of the SVO, at its request, and transferred to a General Interrogatory. The Special Instruction is commonly referred to as the "five star/six star rule." Certification procedures permitted an insurer to obtain the regulatory treatment associated with **NAIC 5** or **NAIC 6** Designations for a security if the insurer certified that it could not provide an Audited Financial Statement to the SVO to permit the production of an analytically determined NAIC Designation in situations requiring an SVO determined Designation or that it could not obtain a credit rating for a filing exempt security. Part Two, Section 5 has been amended to reflect the change described above.

The Valuation of Securities (E) Task Force adopted this amendment on August 1, 2017.

Amendment Adds Filing, Documentation and Analytical Metho ology instructions for Power Generation and Renewable Energy Projects – The Task Force adopted a new methodology and related instructions to provide greater transparency and to modernize analytical approaches to power generation and renewable energy projec. The methodology is located in a new Part Three, Section 7. Documentation instructions in contained in a new Part Two, Section 10 (c) (i) (H).

The Valuation of Securities (E) Task Force adopted this amendment. Au 1st 7, 2017.

■ Production of NAIC Designations for Filing 1 empt and Securities Subject to Private Letter Ratings Transferred to the Securities Valuation Office – Text was deleted and other text modified and consolidated into a single procedure to govern the assignment of NAIC Designations to filling exempt securities by the SVO. The procedure includes a new process to verify that credit ratings have been assigned to ccurities subject to private letter rating. The amendment retains and extends the consting in the exempt rule and process to securities subject to private ratings, modifies the definition of the administrative symbol FE and adds a new PL symbol and definition for securities subject to private rating letters.

The Valuation of Securiti (E) Tas. Force adopted this amendment on November 13, 2017.

■ Text Giving the SVC Author y to Ignore the Credit Rating of NAIC Credit Rating Providers When Producin. LAIC Designations is Deleted – Part One, Section 4 (c) (iv) of the Purposes and F predures Manual was amended to delete a clause that gave the SVO discretion to ignore the ratings of any NAIC CRP when translating credit ratings into NAIC Designations.

The Valuation of S. vrities (E) Task Force adopted this amendment on November 13, 2017.

■ Text fiving \*\* SVO Authority to Require an Insurer to File a Security Rated by an NAIC C. P for Evaluation is Deleted – Part Two, Section 4 (d) (i) of the Purposes and Procedures Manual was deleted. The clause provided that the SVO had authority to require the urers to file any filing exempt security with the SVO.

The Valuation of Securities (E) Task Force adopted this amendment on November 13, 2017.

■ Z Rule is Modernized and a New Carryover Procedure is Adopted – The Z Rule has been revised to permit insurers to identify all securities transitioning from one filing status to another. For example, a filing exempt (FE) security may transition to a security eligible to be filed with the SVO if NAIC credit rating providers (CRPs) withdraw assigned credit ratings. Under the previous rule an insurer could also self-designate a security properly filed with the SVO but not designated by the SVO by year-end. A new procedure was developed to address this situation. Under the procedure SVO would assign the symbol "YE" to all annual updates and extend their designation for the new-year. All properly filed initial filings would be assigned the symbol "IF" and the insurers would self-designate IF securities. The SVO would then prioritize the analysis of this carryover population of "YE" and "IF" securities and remove the symbols when a designation is assigned and published in AVS+. The SVO would also report the carryover list to the Task Force to determine if additional resources, if any, are needed.

The Valuation of Securities (E) Task Force adopted this amendment on November 13, 2017.

Amendment Clarifying SVO Authority to Assign NAIC Designations to Schedu. BA Private Funds is Adopted – New text was added to Part Three, Section 5 (b) of the Purposes and Procedures Manual to provide a definition for fixed income and preferred stock like Schedule BA assets. The definition clarifies that: a Schedule BA fixed or variable assistants the underlying characteristics of a bond or other fixed income instrument in as a stried maturity and a fixed or floating coupon rate; a joint venture, partnership or limited liability company has the underlying characteristics of a fixed income instrument if it protomic notify holds debt (or loans) and receives a public rating with annual surveillance from an NAIC CRP, or is designated by the NAIC through the application of a Weighted Average Rate g Factor ("WARF") methodology that takes into account the NAIC designation and/or the CRP assigned to the underlying investments.

The Valuation of Securities (E) Task Force adopted this amendment on Exember 13, 2017.

### **DISCLOSURE STATEMENT**

An NAIC designation for quality (NAIC Designation), the Unit Price of a security or a classification of a security is produced solely for NAIC members who should interpret the designation for quality, the Unit Price or the classification decision in the context of the NAIC Financial Conditions Framework, a member's state insurance laws and regulations, and the regulatory or financial solvency profile of a specific insurance company.

While NAIC members are the officials responsible for state insurance regulation, and while the NAIC as an association works to express regulatory consensus on issues pertaining to insurance regulation, the NAIC SVO staff has no statutory or regulatory authority.

Because an NAIC Designation, Unit Price or a classification are not produced and the investment decision-making process, they are not deemed to be suitable for use a sanyor but NAIC members.

NAIC Designations are not intended to be and should not be used as inchey were the functional equivalent of the ratings of nationally recognized statistical rating organizations or other rating organizations whose ratings are intended to be used by its store. Predictive opinions of default risk.

Similarly, the Unit Price of a security is not intenced be and should not be used as an indication of the price at which a security could be bought sold in the marketplace.

The use or adoption of NAIC Designations of Unit Prices by anyone other than NAIC members is improper and is not authorized by the MAIC.

### SECTION 1. ABOUT THE NAIC

### a) The NAIC

The National Association of Insurance Commissioners ("NAIC" or "Association") traces its origin to 1871. The NAIC is a not-for-profit corporation whose members are the commissioners, directors, superintendents and other state officials who regulate the insurance business within the 50 states, the District of Columbia and the four U.S. territories. The purpose that the members of the Association seek to advance is the promotion of uniformity in their regulatory efforts. The NAIC is not itself a regulatory entity.

The 56 members of the Association are supported by the Executive Headquarter which maintains offices in Washington, D.C., Kansas City, Mo., and New York N.Y. Committees composed of NAIC members conduct the work of Association.

Prior to regularly scheduled tri-annual meetings, regulatory and administrative issues are assigned to expert groups of NAIC members for consideration and recommendation. Progress on assigned work is reported to the action of the committee system at the tri-annual meetings until the action is disposed of without action or sent to the plenary session for consideration by the entire membership. If adopted by the Plenary, the accommendation becomes Association policy, reflecting national regulatory consensus and serving as guidance to state insurance departments and state ac islature.

The NAIC is the U.S. standard-setting and regulatory support organization created and governed by the chiral prants regulators from the 50 states, the District of Columbia and five US to itories. Through the NAIC, NAIC Members, in their capacity as a to insurance regulators, establish standards and best practices, conduct peer review and coordinate their regulatory oversight. NAIC staff supports these efforts and represents the collective views of state regulators domestically and internationally. NAIC members, together with the central resources of the NAIC form the national system of state-based insurance regulation in the U.S.

### b) The VOS F and the SVO Staff Function

The NAIC has determined that credit quality of insurance company investments and the Unit Price for a security provide a sound empirical anchor for certain regulatory, enctions related to financial solvency regulation.

The VOS, TF formulates and implements NAIC's credit assessment, classification and securities valuation policy.

The SVO is the professional staff of the VOS/TF responsible for day-to-day credit quality assessment and valuation of securities owned by state-regulated insurance companies. The SVO also performs such other duties as are specified by VOS/TF.

### SECTION 2. POLICIES DEFINING THE SVO STAFF FUNCTION

### a) Directive to Conduct Ongoing SVO Operations

The SVO shall conduct the following ongoing operations:

- (i) Analysis of credit risk for purposes of assigning an NAIC Designation.
- (ii) Valuation analysis to determine a Unit Price.
- (iii) Identification and analysis of securities that contain other non-payment risk and communication of this information by assignment of the NAIC Designation subscript to such securities.
- (iv) Other analytical assignments requested by the VOS/TF or members of the regulatory community; in accordance with the directives, procedures are general methodologies described in this Manual.
- (v) Compile and publish the AVS+ products in accordance with instructions in this Manual.

### b) SVO Regulatory Products

### (i) NAIC Designations

The result of SVO's credit analysis, as it pertains to redit sk (hereafter defined), shall be expressed as an opinion of credit quality by a signment of an NAIC Designation, notched to reflect the polition of the specific liability in the issuer's capital structure. Coll's tively, AIC Designation categories, defined in Part One, Section 3 (i) on his Manual, describes a credit quality-risk gradation range from highes, surality (least risk) to lowest quality (greatest risk). Subject to the applied on of Part One, Section 2(f) of this Part, NAIC Designations express opinions about credit risk except when accompanied by the MAIC Designation subscript, described in paragraph (iii) below.

Credit risk is defined as the relative financial capability of an obligor to make the payments contracte the promised to a lender. Credit analysis is performed solely or the purpose of designating the quality of an investment made by an insurance company to enable the NAIC member's department of the rank to determine regulatory treatment.

Credit isk is determined by analyzing the information and documentation provides to the to by the reporting insurance company and its advisors. The SVO does not audit the information submitted and assumes the armation to be timely, accurate and reliable.

The a illy of an insurance company to realize payment on a financial obligation can be affected by factors not related to credit risk or by the manner in which the repayment promise has been structured.

NAIC Designations do not measure other risks or factors that may affect repayment, such as volatility/interest rate, prepayment, extension or liquidity risk.

An NAIC Designation must be interpreted by the NAIC member in context of the NAIC Financial Conditions Framework, other characteristics of the investment, and the specific regulatory status of the insurance company.

### (ii) Valuation of Securities

The result of SVO's valuation analysis shall be expressed is a Unit Price. The SVO does not intend, and its methodology may not be appropriate, to yield an opinion of the price at which a secreity could or should be bought or sold in the marketplace.

### (iii) Other Non-Payment Risk in Securities

The result of SVO's analysis of securities or other non-payment risk shall be expressed by assignment of an <u>NAIC Designation subscript S</u> and the application of the notching procedures, described in <u>Part One, Section 3</u> (b) (ii) and (iii) respectively exit is Man al.

### (iv) Authority to Direct Insurer on Recording

The SVO has respons pility and authority to assess securities that are reportable on Schedule and Schedule BA of the Annual Statement Blank. It is, therefore part of the role of the SVO to determine when financial instruments or scarities are not eligible for reporting on Schedule D and hed A. he SVO may, therefore, be required to inform an insurer filer to redirect a financial instrument or security reported to the S' to othe schedule. Similarly, the SVO may also be required to form an in urer filer that an instrument filed with the SVO pursuant to Par Two, Sction 2 (a) of this Manual does not meet the definition of an Invest, and Security and cannot be assessed as such or that a financial transaction or security filed with the SVO meets the definition of a Regulatory Transaction eligible for assessment by the SVO under Part hree, Section 2 (e) of this Manual. In all cases in which a situation described in this subparagraph is presented, final determination as to what statutory accounting and reporting applies to the instrument or security is made in consultation between NAIC statutory accounting staff and the SVO.

### c) Special Instructions to the SVO

### (i) <u>Authorization to Use Public Information Sources</u>

The staff may consider any publicly available credit, pricing, statistical, economic or other information relevant to the matter under consideration and may use such information for the purpose of forming its own conclusions if the staff has determined that the information has an appropriate level of reliability.

### (ii) Circular Transaction

For purposes of this paragraph a circular transaction shall be deemed to exist whenever the SVO shall find that the essential financial characteristic of a reported security is that the obligor depends on funds advanced by a insurance company to make debt service payments to the same insurance company and that the interdependency of the entities involved at this or related transactions and the lack of any arm's-length economic dear or renders the application of the credit assessment or valuation techniques provided for in this Manual analytically meaningless and therefore misleading to NAIC members.

The SVO is instructed to assign a Unit Price or 0 (zer ) and the NAIC 6 Designation to circular transactions and to provide written confirmation of this action to the department of insurance 5 the reporting insurance company's state of domicile. The department of insurance may appeal the SVO decision to an appropriate working roup of the VOS/TF.

### (iii) Special Instruction for Mandato ily C Securities

Mandatorily convertible securities at definer as a type of convertible bond or convertible preferred stock, that has a required conversion or redemption feature. Either on or bilione a contractual conversion date, the holder must convert the landator convertible bond or preferred stock into the underlying common act. Mandatorily convertible securities are not assigned NAIC Designations or Unit Prices by the SVO. Prior to conversion, insured shall report mandatory convertible securities in accordance with the SSAR No. 2 R—Bb Is or SSAR No. 32—Preferred Stock). Insurers should also report an ICAL Designation in Schedule D which they can self-assign or determine in accordance with the filing exempt rule discussed in Part No. Section 4 (d) (i) (A) and (B) of this Manual. Please refer to paragraphs 2. Conditions of the stock of the securities at the securities are not assigned to the

### (i Cla 'fying Instruction for Unrated Hybrid Securities

An inrated hybrid security is filed with the SVO for an NAIC Designation but the insurance company reports the hybrid security as a bond pursuant

to <u>NAIC Annual Statement Instructions</u> using the NAIC Designation assigned by the SVO. Please refer to the <u>Annual Statement Instruction</u>, <u>Investment Schedules</u>, <u>General Instructions</u> for guidance on the securities that fall within the definition of hybrid securities.

### d) Application of Analytical Instructions

### (i) Relationship to Policy

The directives in <u>Section 2(a)</u> and <u>(e) of this Part One</u> evince a policy determination to ensure analytical resources to support mans. I solvency objectives of state insurance regulators as expressed in the <u>NAIC Financial Regulation Standards and Accreditation Program and or ther NAIC developed regulatory guidance embodied in state law.</u>

### (ii) Parameters for Use of Instructions and Nathodologies

The description of methodologies and the astructions pertaining to the application of those methodologies in this canual are general and mandatory instructions from the VOS/TF the SVO. The SVO shall have reasonable professional latitude to interpret how the instructions and methodologies contained this is usual apply to specific securities, financial products or differing that allytical situations. Factors that may affect how the SVO interpretations and methodologies include, but are not limited to, the teams of individual securities, unique features or characteristics of curities legal or regulatory issues associated with structured transactions, the issuer's industry, the introduction of a new security type of assect less and NAIC regulatory objectives.

### (iii) Use of Generally Accepted Techniques or Methodologies

The sveis expressly authorized to employ any analytical technique that is aught in sundard undergraduate and graduate business school financial and issis curriculum and any analytical technique otherwise widely or commonly used by lending officers, securities professionals, credit rating analysts, valuation professionals, statisticians or members of other similar professions, despite the lack of an express authorization to use the chnique in this Manual.

### v Updating Instructions and Methodologies

The SVO shall have ongoing professional responsibility to advise the VOS/TF of developments that may suggest the need for the NAIC to develop regulatory policy for new or existing investments or the need for the NAIC to amend or provide for additional instructions and or methodologies.

## e) SVO Responsibility for Investment Risk Analysis of New Financial Products

The SVO has responsibility for assisting NAIC members and individual states to assess investment risk in new securities and financial products. The SVO exercises this responsibility:

- (i) When requested to do by the VOS/TF, any of its working groups, any other NAIC task force or working group or any individual state insurance department.
- (ii) Through the RTAS Emerging Investment Vehicle Service process discussed in Part Four, Section 3 of this Manual.
- (iii) Through ongoing research and analysis activity aimed at identifying bobroad developments in the capital markets and the introduction of specific new classes of securities that insurance companies may purchase.
- (iv) By providing biannual or more frequent reports to the VOS/1, on innovative structures filed by insurance companies and the news they contain.
- (v) By sharing information obtained through interaction with market participants with the VOS/TF.

# f) Process for Placing Securities Under Regulator Reliew; Vhen Analytical Instructions Are Insufficient or Inal quate

### (i) Notice

The Director shall promptly inform the Chair of the VOS/TF of his or her conclusion that market or other decelorate is; the aspects of a new or existing security, financial instruction or an sytical situation, requires the NAIC to formulate new annumial silvency policy or develop new or additional instructions and or men odologies for the SVO. The Director shall prepare a written prort for the VOS/TF explaining the reasoning that led to the conclusion.

### (ii) <u>Deliberation</u>

The Chair shall cally meeting of the VOS/TF to consider and discuss the SVO report and it issues it presents and to consider how to proceed. If the VOS/TF determ hes that the nature of the security and/or the issues raised the SVO requires formulation of new policy or regulatory instructions is the development of new or additional instructions and/or chodologies, the VOS/TF shall consider whether to declare the security of it ancial product to be under regulatory review.

On its own initiative or at the direction of the NAIC Executive Cor mittee, the Financial Conditions (E) Committee may instruct the VOS/TF to place a security under regulatory review. The VOS/TF may,

on its own initiative place a security under regulatory review as discussed in this section.

### (iii) <u>Hearing and Declaration</u>

If the VOS/TF is instructed or if it determines that a security should be formally declared to be under regulatory review, it shall hold a public hearing to discuss the issue and make a formal declaration of this decision. The staff shall cause notice of the determination to be published to interested persons and to other NAIC groups that have jurns liction over reporting issues, have relevant expertise or would be affected by the activities of the VOS/TF.

### (iv) Reporting Framework for Securities under Regula ry Rev w

Upon a public declaration that a security is unconsegulatory review, insurance companies that own the security shall port it on the  $\frac{NAIC}{Financial}$  Statement Blank with the accinish tipe symbol  $NR^*$  if the security is under review for an assessment of regulatory policy for the investment or regulatory reporting in tructions to implement applicable policy or with the administrative simbol  $Z^*$  if the security is under regulatory review for development by the VOS/TF of the instructions or methodologies for application by the SVO in its risk assessment.

In September of each yor, the vOSTF will publicly identify which classes of securities, if any are under regulatory review and therefore eligible to take the regulatory treatment prescribed for NR\*/Z\* in the Annual Statement Instruction for that year's year-end NAIC Financial Statement Blank.

### (v) F' ag or curr, s under Regulatory Review

Inless the VOS/TF shall provide other instructions to insurance companies recurities under regulatory review that are otherwise reportable to the South shall continue to be filed with the SVO during the period of regulatory review.

### a) Nyiew of SVO Credit, Classification or Valuation Decisions

### (i) Requests for Clarification of SVO Decisions

Any insurer that owns a security for which the SVO has provided an NAIC Designation, a classification or a valuation, may request a clarification of the decision from the SVO. The SVO analyst responsible for the decision may respond informally to informal requests for clarification and, in response to written requests, shall provide as much clarification as possible in writing within 10 days after receipt of the written request. Any reply

from the SVO shall be a confidential communication between the SVO and the insurer.

### (ii) Appeals of SVO Analytical Decisions

### (A) Condition to Filing of an Appeal

Any insurer that owns a security for which the SVO has performed a credit assessment, a classification analysis or a valuation, may appeal the SVO credit assessment, classification or valuation decision, provided that the appeal must be filed within 120 days of the SVO decision. Any insurer can ascertain the date of the original SVO decision by accessing <u>VISION</u> and noting the Review Date show therein. The Review Date is the date of the original decision.

An appeal is initiated by filing a completed Appeal A. With a written correspondence specifically and clearly identifying the activition basis of the appeal, supported by such documents or financial or other information or data as in the insurer's opinion supports the claim that the original decision of the SVO should be review.

### (B) Procedure for Filing an Appeal

Filing an appeal with the SVO is accomplished the grada computer linkup with the VISION computer system of the SVO. See <u>Part Two, Section 6 of this Manual</u> for a sorre complete description of the filing process.

This appeal procedure applies filly to tuations where the SVO has expressed an analytical conclusion in the exercise of its quality assessment, credit assessment, classification or, valuation functions. The streed proce are encompasses initial filings, annual updates and security's not rate by an NAIC CRP.

Securities rated by an IN V CRP may be appealed only if the SVO designates securities differently than the NAIC CRP and the SVO retains respond billity for review of NAIC CRP rated transactions.

### (iii) SVO Review of the Appeal

The S (O are lyst to) whom the Appeal ATF is directed will alert the SVO credit co. mittee that an appeal of an SVO decision has been made and provide it was copies of the correspondence, documents and information a sented by the insurer as well as copies of the original analysis that lead to the conclusion appealed from.

The credit committee chair will then set a date, not to exceed 45 days from the date the insurer submits a complete file to the SVO, for the credit

committee to meet to deliberate the issues presented. Prior to the meeting, the members of the credit committee will review the original decision and the correspondence, documents and information presented by the insurance company. The insurer shall be notified of the date of the meeting, and shall be given the opportunity to present its appeal in person to the credit committee.

The credit committee is composed of those senior staff members whose expertise may be necessary or desirable to the discuss on a the issues presented, including, whenever possible, persons who all not previously participate in the formulation of the original decision. The original analyst is present during all deliberations of the credit committee and participates in its deliberations by providing information and in poneing to questions. However, the original analyst does not not decide the issues presented in the appeal.

After evaluation of the correspondence, locuments and information presented by the insurance company, the cledit committee will render a decision within 10 days of its need, a to consider the appeal. Once the credit committee renders a elecision, a representative of the credit committee, which may be the one valuation analyst, is chosen to communicate the decision to the insurance company or companies that filed the appeal. After it has communicated its decision to the insurer, the SVO will entertain such further reasonable discussions with the insurer as it shall deem reasonably processary to ensure that the credit committee has considered and responded to all of the issues deemed relevant by the insurer.

Lot later to n 10 days after the verbal communication of its decision, the S O will provide the insurer with a letter specifying whether the SVO has determined to modify or affirm its previous decision and addressing the issues posed by the insurer. The letter shall be issued directly to the insurer that filed the appeal as a confidential communication between the SVO and that insurer. At the request of any other insurer holding the same security, the SVO shall provide a copy of the letter to such other insurer.

### Status of NAIC Designation during Appeal

Until such time as the SVO credit committee determines that a previous credit assessment, classification analysis or valuation should be amended and the NAIC Designation, classification decision or price is changed, the previous decision of the SVO remains in full force and effect.

# (v) Review of SVO Decisions by the VOS/TF

#### (A) Task Force Review for Alleged Violations of Procedures

#### (1) Request for Review

Any insurer that has filed a security for an NAIC Designation, a classification or a valuation, and is concerned that a decision relative to the security was not made in accordance with the procedures in this Manual, may request consideration of this concern by the VOS/TF.

# (2) Condition to Request; Exhaust SVO Remedies

Before making a request to the VOS/TF, the insurance company must submit a written statement to the Director of the SVO, or to the person then exercising the executive function of a SV whatever the title then used, with a copy to the Chair of the VOS/TF. The written statement must identify the specific pacedure or procedures in this Manual that the insurance contains beineves have been ignored or improperly applied.

Upon receipt of the written statemen, the Direct will fully investigate the assertions and communicate in factor rindings back to the insurance company with a copy for varded to the Chair of the VOS/TF within 30 days. Should the esuit of the SVO investigation not resolve the factual issues expressed by the insurance company, a request for further consideration can be made to the Chair of the VOS/TF. The Chair of the VOS/TF m y then choose to review the matter.

# (3) Basis of Review by the Talk Force

If the VOS/TF chooses to review the matter further, its focus is on determining whether the SVO decision was made in a manner that is inconsistent with the applicable provisions of this Manual. If the VOS/TF fine that the SVO decision was made in a manner that is inconsistent with the applicable provisions of this Manual, it will ovide the SVO with interpretive guidance respecting the meaning once applies the language or procedures in the Manual and instruct the SVO to reformulate a decision.

#### (vi) iew Timeline

The VO's goal is to complete all work on an appeal and communicate a decision to the insurer within 90 days of receipt of a complete file for the appeal. The time periods for action by the SVO identified in this section and not be deemed to restrict the exercise of management discretion by

the Director of the SVO as to the proper disposition of SVO resources in the fulfillment of SVO priorities and commitments. Any of the time periods in this section may be extended by mutual agreement of the insurer and the SVO or Task Force, respective to the stage of the appeal.

#### SECTION 3. INTERNAL ADMINISTRATION

#### a) General

The staff of the SVO shall be organized in a manner that the NAIC Executive Vice President shall deem to be the most appropriate and efficient for the conduct of day-to-day credit assessment and valuation operations, consistent with the resources provided to the office by the NAIC. The staff shall promulgate such internal administrative procedures, protocols, policies and guidelines, as it shall deem necessary for the proper execution of its delegated functions. Such procedures, protocols, policies and guidelines as are promulgated by the staff shall be open to review and oversight by the VOS/TF.

# b) Definitions of NAIC Designation Categories, Valuation Indicators Administrative Symbols and Conventions

#### (i) <u>Definition of NAIC Designation Categories</u>

NAIC Designations are proprietary symbols that the NAIC SV uses to denote a category or band of credit risk.

NAIC Designations are adjusted in accordance out the notching procedures described in <u>subparagraph (iii) (A) (B) at (C)</u> b low, so that an NAIC Designation for a given security reflects the position of that specific security in the issuer's capital structure

NAIC Designations may also be adjust by atching to reflect the existence of other non-payment risk in the specific security in accordance with the procedures described in subgratage the (ii) and (iii) (C) below.

When applied to preferred stock, the valuation indicator **P** is placed in front of the NAIC Designation, a inc. ate that the SVO has classified the security as a perpetual preferred tock. The valuation indicator **RP** is placed in front of the NIC Designation to indicate that the SVO has classified the security as a recognition preferred stock for the purposes of valuation under SAIC.

NAIC 1 is assigned a obligations exhibiting the highest quality. Credit risk is at its low at an the issuer's credit profile is stable. This means that interest printipal or both will be paid in accordance with the contractual agreems, and accordance repayment of principal is well protected. An NAIC 1 obligation soluble be eligible for the most favorable treatment provided alor the NAIC Financial Conditions Framework.

MAIC 2 is assigned to obligations of high quality. Credit risk is low but may increase in the intermediate future and the issuer's credit profile is reasonably stable. This means that for the present, the obligation's protective elements suggest a high likelihood that interest, principal or both

will be paid in accordance with the contractual agreement, but there are suggestions that an adverse change in circumstances or economic, financial or business conditions will affect the degree of protection and lead to a weakened capacity to pay. An **NAIC 2** obligation should be eligible for relatively favorable treatment under the <u>NAIC Financial Conditions Framework</u>.

**NAIC 3** is assigned to obligations of medium quality. Credit risk is intermediate and the issuer's credit profile has elements of installity. These obligations exhibit speculative elements. This means that the incellihood that interest, principal or both will be paid in a process with the contractual agreement is reasonable for the present, but an exposure to an adverse change in circumstances or economic, financial or business conditions would create an uncertainty as at the sauer's capacity to make timely payments. An **NAIC 3** obligation bould be eligible for less favorable treatment under the <u>NAIC Financial Conditions Framework</u>.

NAIC 4 is assigned to obligations of the equality. Credit risk is high and the issuer's credit profile is velatile. The electronic obligations are highly speculative, but currently the issuer has the apacitate meet its obligations. This means that the likelihood that interest, propal or both will be paid in accordance with the contractual or eemens is low and that an adverse change in circumstances or dusinest financial or economic conditions would accelerate credit risk, enading to a significant impairment in the issuer's capacity to make timely payments. An NAIC 4 obligation should be accorded stringant treatment under the NAIC Financial Conditions Framework.

AIC 5 is ssigned to obligations of the lowest credit quality, which are not in or not default. Credit risk is at its highest and the issuer's credit proton is highly volatile, but currently the issuer has the capacity to meet its obligations. This means that the likelihood that interest, principal or both will be paid in accordance with the contractual agreement is significantly impaired given any adverse business, financial or economic conditions. An NAIC 5 Designation suggests a very high probability of default. An NAIC 5 obligation should incur more stringent treatment under the NAIC Financial Conditions Framework.

NAIC 6 is assigned to obligations that are in or near default. This means that payment of interest, principal or both is not being made, or will not be made, in accordance with the contractual agreement. An NAIC 6 obligation should incur the most severe treatment under the NAIC Financial Conditions Framework.

#### (ii) NAIC Designation subscript S

#### (A) Regulatory Objectives

Regulators attach certain economic expectations to certain of the terms used to describe securities or financial instruments owned by insurers and reported as invested assets. This reflects that the regulatory objective is to assess the financial ability of an insurer to pay claims. For purposes of this provision, the regulatory assumption is that any fixed income instrument denominated debt by its originator or issuer requires the issuer to make scheduled payments of interest and requires the full repayment of the principal amount or a date certain. The regulatory assumption for any fixed income instrument denominated preferred stock by its originator or issuer is that the issuer will make scheduled payments of dividends a return principal subject to a grant of financial flexibility to the issuer to not pay that is circumscribed by economic events quantifiable in the context of the issuer's credit risk profile.

Any contractual modification of these regulary as umptions is deemed to create a rebuttable inference that the security or instrument contains an additional or other non-payment risk; albeit one that is sanctioned by the contract - that may usualt in the insurer not being paid in accordance with the underlying regulatory assumption. The purpose of the presedure described in this subparagraph is to authorize and quire the SVO to identify securities that contain such contractual hodifications and to quantify the possibility that such contracts will result in a diminution in payment to the insurer so this can be reflected in the NAIC Designation assigned to the sicurity through the application of the notching process described it paragraph (iii) below.

# (B) Description of Coner Non-Payment Risk

It may not a practical, desirable or possible to specifically define other not promote trisk given the assumption that it originates as a result of a contractual agreement or the presence of a structural expense of a transaction that is agreed upon between the issuer and the incurer. Accordingly, what follows is intended as general guidance to insurers and others.

Most typically, other non-payment risk has been associated with contractual agreements between the insurer and the issuer in which the issuer is given some measure of financial flexibility not to make payments that otherwise would be assumed to be scheduled, given how the instrument has been denominated, or the insurer agrees to be exposed to a participatory risk.

Other non-payment risk differs from the type of issues encountered in credit risk. This is because typically, credit assessment is concerned with securities in which the parties create subordination by modifying the lender's priority of payment (for example, senior unsecured versus junior subordinated) but in a context where the contract otherwise specifies that the failure to make payments on a schedules basis (defined in the contract) is an event of defaut (in the case of a bond) or triggers some other specific and idea. Table ander remedy (in the case of other fixed income securities)

Using the broad concepts identified above non-present risk may be present when:

 A reporting insurance company tax on a participatory risk in the transaction;

**Illustration** — The Controct processed payment of a dollar denominated obligation in non-US currency but does not require an exchange rate that would yield foreign currency symment to say a defined principal amount of US dollars. The other non-payment risk in this illustration consists of the reporting insurance company's acceptance or scrency risk which may diminish the principal amount of the investment. Conserve risk here is not related to the issuer's ability or willingnes to pay and therefore is not appropriately reflected in the NAIC Designation of the suer or captured by notching for credit risk.

in the porrower's capital structure that is incompatible with notions of a lon that is expected to be repaid;

**In stration** — A loan stated to be perpetual and giving the issuer the right to miss interest or dividend payments otherwise said to be scheduled where the missed payments are not required to be paid on a subsequent date.

**Illustration** – An instrument denominated as a bond but lacking a maturity date, a mechanism to determine a maturity dates (for example a mandatory redemption) or that states a maturity equal to or exceeding 40 years.

 Agrees to an exposure that has the potential to result in a significant delay in payment of contractually promised interest and or a return of principal in an amount less than the original investment.

#### (C) Meaning of the Subscript Symbol

An SVO determination that a specific security contains other non-payment risk is communicated by assigning the NAIC Designation subscript S to the specific CUSIP and applying the notching procedure described in <u>subparagraph (iii) (2) below</u>. The subscript follows the NAIC Designation as follows: **NAIC 2 S**.

- (D) Directive to Conduct Analysis for Other Non-Payment Risk

  The SVO shall assess securities for other non-payment risk:
  - Routinely, for any security or financial product filed with the office;
  - As part of the analysis of a security or financial product submitted the SVO under the RTAS Emerging Investment Vehicle proceduscussed in <u>Part Four, Section 3 of this Manual</u>;
  - When requested to do so by any state insurance regulator acting pursuant to <u>Part Two, Section 2(b) of this Manual</u>; and
  - When requested by the Task Force, including in poport the IAWG; or
  - In support of any other NAIC group engage in the analysis of investment risks in new securities.

# (iii) SVO Notching Guidelines

(A) Definition and Purpose

Notching is defined as the process used to make distinctions between different liabilities in an issuer apital actuation to reflect differences in credit or other non-payment risk maller than a whole grade. Notching expresses of a paces in expected loss (i.e., severity) of an issuer's liabilities by their relative priority of claim in bankruptcy.

- (B) Notching NAIC Designations (to Reflect Credit Risk)
  - (1) Illustration

The distinctions in credit risk made in the notching process involve (conceptually) be issuer's actual capital structure. The hypothetical capital gructers below is shown to illustrate and explain notching:

Senior ensecured
Senior ensecured
Senior subordinated
Junior subordinated
Freferred stock

Notch up from the benchmark

The benchmark designation

Notch down from the benchmark

Notch down from benchmark

Notch down from benchmark

# (2) Methodology

The SVO determines the benchmark designation for the senior unsecured obligation of the issuer or its equivalent.

The SVO adjusts the benchmark designation up or down to reflect the difference in risk between the benchmark security and the specific liability under review by the SVO.

#### (3) Definition of SVO Notches

The NAIC has not adopted pluses (+) and min's (-) symbols to express incremental gradations of credit risk of this a full NAIC category. However, the SVO uses plus and minus a mbols internally to enable more accurate monitoring of issues and transactions and facilitate upgrades and downgle is a NAIC Designations. Accordingly, for purposes of this paray who a notch is defined as a movement in the NAIC Designation of less than a full grade. The following table shows all possible motching possibilities:

NAIC 1;	Nac Y	
NAIC 2 (+);	AIC 2;	NAIC 2 (-);
NAIC 3 (+);	N> C 3	NAIC 3 (-);
NAIC 4 (+);	'AIC :	NAIC 4 (-);
NAIC 5 (+):	NAL E 5;	NAIC 5 -;
NAIC 6.		

In the tible tive, a movement from NAIC 1 to NAIC 2 is a movement of a full grade while a movement from NAIC 1 to NAIC 1 is a movement of two notches.

# (4) SVD Guidelines for Notching

The SOO shall notch an NAIC Designation for an issuer up or down to deflect the position of a specific liability in the issuer's capital structure.

Notching upward from a benchmark NAIC Designation is almost exclusively associated with transactions in which the SVO determines that covenants or collateral act to further reduce the probability of default from that implied by the issuer's senior unsecured NAIC Designation.

In determining the number of notches that should be applied to a security, the SVO shall apply the following guidelines:

#### (A) Notching Investment Grade Issuers:

The capital structure of an issuer whose current senior unsecured NAIC Designation is **NAIC 1** or **NAIC 2** is not considered indicative of what the issuer's capital structure is likely to be at default. Notching for issuer's whose senior unsecured NAIC Designation is **NAIC 1** and **NAIC 2** is therefore based on the following general guidelines:

Secured debt is generally rated one notch above the senior unsecured issuer designation.

Subordinated debt (including junior and senior subordinated) a generally designated one notch below the senior unsecured rating

Preferred will generally be designated one notch below sub-dinate debt (two below senior unsecured or senior implied).

Holding company debt is generally designated at or below the west rated debt security that would be assigned at the principal or rating company.

#### (B) Notching for Non-Investment Grade Issuers

The capital structure of an issuer whose current senior unsecured NAIC Designation is **NAIC 3**, **NAIC 4** or **NAIC 5** is considered to be more indicative of what the issuer's poital structure is likely to be at default.

A greater presumption that the curren capital structure is the one with which the issue will account attaches as the issuer's senior unsecured NAIC F esignation decreases.

Notching for issue, whose enior unsecured NAIC Designation is NAIC 3, NAIC 4 and 2. 2.5 therefore requires grater professional judgment and discretion.

Notching diffe, optials for issuers with NAIC 3, NAIC 4 and NAIC 5. Designation are wider than for issuer's whose senior unsecured AIC Designation on is NAIC 1 or NAIC 2.

- (C) Now in the NAIC Designation Subscript (to Reflect Non-Payment Risk Unrelated to Credit Risk)
  - (i) Grant of Significant Discretion

SVO is granted significant discretion to determine the number of notches it will assign to a security to reflect other non-payment risk. This discretion is to be exercised in the context of the regulatory objective and purpose of this procedure. SVO determinations made under this subparagraph are subject to review in accordance with the procedures described of this Part, above.

#### (ii) Relevant Considerations

The name given to the security is not relevant to a determination whether this subparagraph should be applied. The relevant criterion is whether the risks in the security are clearly credit risks or whether they are not clearly credit risks.

Factors the SVO may deem relevant to the question of notching for other non-payment risk may include:

- Any security or financial instrument denominated with a term associated with fixed income inversional contain a clearly stated obligation to pay a return and a repay the amount of the principal repayment. Otherwise it is not rational or possible to assign an NAIC Designation.
- Any security or financial and time, denominated as fixed income
  that does not contain a gally by ding obligation to pay shall not be
  assigned an NAIC Engine income and instead will be reported to the
  Task Force and the Chief examiner of the State of Domicile.
- Any security or mancial instrument that is denominated as fixed income and text contains a promise to pay that is otherwise condition may be sortched either under this subparagraph to reflect other non-comment risks or under the notching procedure for credit risk to reflect one expected loss of that obligation in the issuer's specific contail structure, depending on which approach seems more appropriate to the SVO.
  - The widest degree of notching for a security or financial instrument is to be for a security that is denominated as fixed income but which is deemed to be a perpetual investment and to not require payment of dividends.
- In contracts that permit the issuer flexibility to not make payments, the SVO would focus on the degree of financial discretion afforded the issuer to not make payments and the circumstances under which that financial flexibility will be exercised;
- In contracts where the insurer agrees to accept a risk or participate in an activity that may reduce either the interest or dividend otherwise agreed on or the amount to be repaid to less than the original principal investment, the SVO would consider whether the risk of a loss is structurally or otherwise mitigated;

- Notching differentials are expected to be wider for NAIC 3, NAIC 4
  and NAIC 5 issuers because the issuer's credit risk is deemed to
  increase the likelihood that the issuer will avail itself of contractually
  provided flexibility to not pay or increase the likelihood of a loss as a
  result of the insurer's participatory activity.
- Deferral of dividends in a security denominated preferred stock is presumed to be subject to notching for credit risk subject to an SVO determination that the denomination is not truly reflective of the terms of the agreement in which case it may be more appropriately notched for other than credit risk.
- In a given capital structure, the priority of payment due to an invest
  may be so subordinated as to require treatment under thes
  guidelines for other non-payment risk. This is especially with
  deep subordination is combined with a right to defer interest.

#### (iv) Valuation Indicators

Pursuant to <u>Part Three, Section 1(b) of this Manual</u>, SVO is required to classify preferred stock as either perpetual or ser eema. e. Valuation Indicators show the classification decision of the SVs, and at to be used by insurers to determine a SAP valuation method for preferred stock.

P means perpetual and is a valuation in scator used to classify a preferred stock as perpetual, pursuant to the Third Section 1(b) of this Manual. The valuation indicator P means that the issuer of the preferred stock is not obligated to redeem the insue and holder of the preferred stock does not have a right to put the preferred stock to the issuer or that there is no other equivalent right time 2 variation indicator is assigned for the purposes outlined in SS AP No. 32= Preferred Stock.

**RP** means redeemable preferred old is a valuation indicator that classifies a preferred stock as a redeemable preferred stock pursuant to <u>Part Three</u>, <u>Section 1(b) of this Manual</u>. This means that the issuer of the preferred stock is obligated to addeem the issue, the holder of the preferred stock has a right to pur the preferred stock to the issuer or that there is some other equivalent in the thick that the purposes outline as SS 25 to 32—Preferred Stock.

#### (v) SVO Administrative Symbols

administrative symbols convey information about a security or an edministrative procedure instead of an opinion of credit quality or Unit Price. The administrative symbols in use by the SVO and their meanings are escribed below.

- (A) SVO analytical department symbols
  - All SVO analytical departments use the following administrative symbols:
  - **A** means that the Unit Price of the share of common or preferred stock has been analytically determined by the SVO.
  - **V** when used to report a Unit Price for common or preferred stock means the Unit Price reported was not provided by the SVO or any market or exchange but was derived by the insurar te contain itself or from some other source, pending a valuation analysis by the SVO.
  - L indicates that the Unit Price given for a shall of common or preferred stock is the price listed on the New York stock Exchange, the American Stock Exchange or c. the N. SDAQ National Market System.
  - **U** indicates that the price given for a share of common or preferred stock is the price leted on any market or exchange, including a foreign exchange other than the New York Stock Exchange, the American stock Exchange or the NASDAQ National Market System.
  - **NOTE:** The Add inistration Symbols **A**, **L**, **U** and **V** which identify the manner source of a Unit Price assigned by the SVO, are collectively referred to as Market Indicators in the <u>NAIC Annual Statemer Linest stions</u>.
  - **UP** ceans upgale to price. This symbol is used with common or prescreed tock and indicates that a current market quotation was not obtain ble or was not deemed reliable by the SVO.
  - F reans that the NAIC Designation, Unit Price or both shown we determined by the reporting insurance company and not by the SVO. Unlike the administrative symbol **Z**, the **F** symbol is used by insurers that meet the definitional criteria for a "Sub-paragraph D Company" as defined in Part Three, Section 1(a)(ii)(D)(4) of this Manual, to report ownership of a foreign security for which the company did not have the information necessary to permit the SVO to conduct an assessment or a valuation.
  - **FE** means exempt from filing with the SVO and is used by an insurance company to report an exempt security. NAIC Designations for **FE** securities are assigned by the SVO pursuant to the instructions and procedures in <u>Part Three, Section 1 (b)</u> of this Manual. The NAIC Designation determined by the SVO is

disseminated in the SVO List of Securities compiled and published pursuant to the SVO's compilation function as described in <u>Section 3</u> (k) of this Part One. The administrative symbol **FE** is used with an **NAIC 1** through **6** Designation, and in the case of preferred stock, in combination with the **P** and **RP** Valuation Indicators.

**NR** means Not Rated. The symbol is used in the AVS+ Products for bonds and communicates that the information required to arrive at an NAIC Designation is not available to the SVO or that such information was received too late to be processed and reflected in the most current AVS+ Products. Bonds assigned an **NR** symbol will be deleted from the VOS Process if any information deficiency is not rectified by the end of the first quarter following the previous parend.

PL stands for a private letter rating and refers to an insuar-own security that has been assigned a private rating by an NAIL CRP which rating is not publicly disseminated but is instead published in a letter or report provided by the CRP to the nate of the security and to the insurer as an investor and has been sus nitted to the SVO under the procedures specified in <a href="Part Three.Security">Part Three.Security</a> (b) of this Manual or provided to the SVO electronically so the NAIC CRP specifically identifying the issue being privately rated. The administrative symbol PL is used we an NAIC 1 through 6 Designation, and in the case of preferred stock, in combination with the P and RP Valuation Indicates, and must adhere to the eligibility and reporting requirements on an tyAIC Designation with an FE symbol.

**Z** means that the NAIC f esignation reported by the insurance company was not denied by or obtained from the SVO, but has been determined analytically by a reporting insurance company. A security designated with a **Z** must be submitted to the SVO for valuation whin 20 days of the date the security was acquired. The symbol shold not be used for securities that are exempt from the **g** with the SVO pursuant to Part Two, Section 4(d) of this Many 1.

The **Z** symbol is used to identify an insurer owned security that is in transition in reporting or filing status because:

1) it is newly purchased and has not yet been submitted to the SVO;

- 2) has been properly submitted to the SVO for assignment of an NAIC Designation which is still pending, whether at year-end or otherwise:
- 3) is in transition from one reporting or filing status to another (for example, a previously filing exempt security is no longer rated by any NAIC CRP making it eligible for filing with the SVO but has not yet been filed) and
- 4) an SVO assigned NAIC Designation for the ecurity has been dropped from AVS Plus+ and the insurer has other rise followed all other filing requirements.

(This text shall be amended as additional ansition situations are identified.)

YE means that the security is a properly filed annual update that the SVO has determined will not be assigned an NAIC Designation by the close of the year-end reporting cycl). The symbol YE is assigned by the SVO pursuant to the administrative procedure described in Part One, Section 2 (f) of this Manual. When the SVO assigns the symbol YE it also as igns the AAIC Designation in effect for the previous reporting year.

IF means to the scurity is an initial filing that has been properly filed with the Sv. 2 but which the SVO has determined will not be assigned an NCTC Designation by the close of the year-end reporting cycle. The symbol IF is assigned by the SVO and communicates that the insurer smould self-designate the security for year end and identify it want the symbol IF. IF therefore also communicates to the regular r that the NAIC Designation reported by the insurance commonly was not derived by or obtained from the SVO, but has been determined analytically by a reporting insurance company.

**NR\*** indicates that the security so designated belongs to a class of securities currently under policy review by the NAIC.

**Z\*** follows an NAIC Designation and means that the class of securities cannot be rated by the SVO because the valuation procedure is under regulatory review.

#### (vi) Price Field Conventions

- (A) Unit Price For Bonds and Common and Preferred Stocks

  Expressed in decimal form with a maximum of seven significant digits before the decimal point and three digits after the decimal point. For example, 32.375.
- (B) (Dash) Indicates any Bond for which a Unit Price is not readily available or cannot be established pursuant to <u>Part Five</u>, <u>Section 1 of this Manual</u>.

#### c) Credit Committee

The SVO shall establish a credit committee composed of its senior staff, no senior analytical staff or both, possessing expertise relevant to the issues entrested to the credit committee. The credit committee shall provide SVO's profession staff with such direction or guidance necessary on analytical or policy issues as may be assigned to it pursuant to procedures promulgated under Section 2 (a) of this Part above.

#### d) SVO Departments

The SVO shall establish such procedures or guiddines are eccessary to delineate analytical and administrative responsibility for specific courities among departmental groups. The SVO also shall establish procedures for sharing administrative and analytical oversight for security deepend to require application of methodologies from more than one department.

#### e) VOS Process

Upon determination of either component of an Ass ciation Value, (i.e., the NAIC Designation or Unit Price), and or a classification, as the case may be for an Investment Security, as defined in Part wo, Section 2 (a) of this Manual, the SVO shall enter such NAIC absignation. Unit Price and classification in the NAIC's VOS Process.

The SVO shall not add a Regulatory Transaction, as defined in <u>Part Three, Section 2 (e) of this Manual to the VOS Process.</u>

# f) Monitoring of /OSF pcess

#### (i) Monite (i)

(A) General Pirective

The SVO shall monitor improvements and deterioration of credit quality of securities which are not filing exempt, defined in <u>Part Two</u>, <u>Section 4 (d) of this Manual</u>, in the VOS Process on an ongoing basis. Whenever reports in the financial press, other reliable media, Subsequent Reports or Material Credit Event Filings submitted by a

reporting insurance company indicate that the issuer of a security has experienced a material credit event or a change in financial condition, the SVO shall analyze whether the credit event or other change is of sufficient materiality to require a change in the NAIC Designation, Unit Price or both then assigned to a reported security.

(B) Directive Applicable to Filing Exempt Securities

Any security entered into the VOS Process pursuant to Section 3 (e) of this Part above shall be assigned a NAIC Designation and monitored on the basis of information provided by the various NAIC CRPs and updated electronically by VOON without the intervention of an SVO analyst. It shall be the responsibility of the insurer to report the security to the SYO with cases to be filing exempt as required by Part Two, Sec. in 4(c. 4) of this Manual.

# (ii) Annual Review

On at least an annual basis, the SVO shall view all NAIC Designations and Unit Prices assigned by the SVO or sec rities in the VOS Process in light of the information presented of each issuer's most recent Audited Financial Statements, a other pertinent information, to verify that the assigned NAIC Designation and a Unit Price is accurate. As necessary, the SVO shall modify on the Composition and/or Unit Price for the previously reported security as changed circumstances may require or delete any security that has matured or as to which there is a lack of sufficient or tiglely information.

Bonds assigned the a ministrative symbol **NR** shall be deleted from the VC . Less's any information deficiency is not rectified by the end of the first quoter following the previous year-end: provided, however, the S O will not delete any Bond assigned the administrative symbol **NR** from the VOS Process if an ATF annual update filing for the Bond appears in VISION and the SVO has received the necessary information required to assign an NAIC Designation to the Bond. If a Bond is not deleted in accordance with the foregoing process in reliance on an annual update ATF that does not contain the necessary information to permit the assignment of an NAIC Designation, the SVO shall subsequently delete that security from the database.

Preferred stock assigned the administrative symbol **UP** shall be deleted from the VOS Process if any information deficiency is not rectified by the end of the first quarter following the previous year-end: provided, however, the SVO will not delete any preferred stock assigned the administrative symbol **UP** from the VOS Process if an ATF annual update

filing for the Bond appears in VISION and the SVO has received the necessary information required to assign an NAIC Designation to the preferred stock. If a preferred stock is not deleted in accordance with the foregoing process in reliance on an annual update ATF that does not contain the necessary information to permit the assignment of a valuation and/or NAIC Designation, the SVO shall subsequently delete that security from the database.

Common stock assigned the administrative symbol **UP** shall be deleted from the VOS Process if any information deficiency is not rectified by the end of the first quarter following the previous year-end: provided however, the SVO will not delete any common stock assigned the administrative symbol **UP** from the VOS Process if an ATF annual update filling for the common stock appears in VISION and the SVO has received the necessary information required to assign an NAIC Designation to the common stock. If a common stock is not deleted in accordance with the foregoing process in reliance on an annual update ATF that do is not contain the necessary information to permit the assignment of a calculation, the SVO shall subsequently delete that security from the database.

# (iii) Administrative Procedure for Carryover Population

# (A) Acceptable Carryover Population Rate

Effective with the adoption of this procedure, it. SVO Director shall prepare a report for the VOS/TF, to be present at the Spring National Meeting, identifying an acceptable around attend the carryover population for the year-end reporting period. Thereafth, at the beginning with the subsequent year of analytical operations, the SVO Director shall prepare a report for the VOS/TF to be presented at the Spring National Meeting, identifying whether the a septable innual carryover rate was significantly exceeded and if so, whether we cause is traceable to resource constraints. If so, the Task Force shall consult with NAIC senior staff and the NAIC Internal Administration (EX1) Subcommittee to determine whether and how to evaluate a present for additional SVO staff or other resources.

#### (B) lefini on

When use in this sub-section, the term carryover population means, collectively, as insurer owned securities filed with the SVO for an NAIC signation and not yet assigned NAIC Designation by the SVO at the sonce ico of the year-end reporting process.

#### (C) Procedures

Fire following procedures apply to the carryover population.

- The SVO shall identify the carryover population by assigning each security the administrative symbol YE or IF.
- A security in the carryover population that is an <u>annual update</u> filing, defined in <u>Part Two</u>, <u>Section 11 of this Manual</u> as a Subsequent Report, shall be assigned the NAIC Designation then in effect for the just concluded reporting period, for example: 2YE, if the security was designated 2 in the just concluded vear.
- A security in the carryover population that is a <u>inite</u> filling, as defined in <u>Part Two, Section 10 of this Manue</u> shall be self-designated by the insurer and reported with the insurer assigned NAIC Designation and the administrative vmbol F and shown by the SVO on its systems as **IF** but without an insure Designation.
- The SVO shall remove the **YE** syms I when it assigns an NAIC Designation to an annual update security in the carryover population for the current year and publishes the NAIC Designation in AVS+. The SVO above remove the **IF** symbol when it assigns an NAIC Designation to an initial filling security in the carryover population for the current year and publishes the NAIC Designation in AVA+. The insurer maintains the NAIC Designation assigned by the SVO under **YE** or self-assigned under **IF** until the AVO has published an NAIC Designation in AVS+.
- The SYO shall assign top priority to the assessment of the carryo population and the assignment of NAIC Designations to that population in the subsequent year of operation.

# g) Filing Exem, Securities Process

A filing sempt (F) security is an Investment Security, as defined in <u>Part Three, Section 1</u> to of this <u>Manual</u>, that is exempt from filing with the SVO, as otherwise required by <u>Part Two, Section 2 (a) of this Manual</u>, pursuant to the file g exemption in <u>Part Three, Section 1 (b) of this Manual</u>.

n yrange companies derive NAIC Designations for FE securities by applying the confersion instructions in <u>Part Three, Section 1 (b)</u> and the equivalency collaionships disclosed in Part Three, Section 1 (b) (vii) of this Manual.

NAIC Designations assigned to FE securities are reported by the insurance company to the NAIC and subsequently added by NAIC staff to the Filing Exempt Securities Process.

Insurance companies shall not report a Regulatory Transaction, defined in <u>Part Three, Section 2 (e) of this Manual</u>, as FE securities, and the NAIC staff shall not add a Regulatory Transaction to the Filing Exempt Securities Process.

#### h) RMBS/CMBS Modeled Securities Process

Residential mortgage-backed securities (RMBS) or commercial mortgage-backed securities (CMBS) are an Investment Security, as defined in Part Two, Section 2 (a) of this Manual. RMBS and CMBS are reported by an insurance company to the NAIC and subsequently added by NAIC staff to the RMBS/CMBS Modeled Securities Process, where on an annual basis and for purposes of the annual surveillance discussed in Part Seven, Section 5 (a) of this Manual, they are evaluated for eligibility to be financially modeled. RMBS and CMBS that are deemed to be subject to financial modeling are retained in the RMBS/C 1BS. Modeled Process. RMBS and CMBS that are deemed ineligible for mancial modeling but that have been assigned credit ratings by NAIC condit is incorproviders (CRPs) migrate to the Filing Exempt Securities Process. Rivers and CMBS that are deemed ineligible for financial modeling and that have all 6 not been assigned credit ratings by NAIC CRPs are filed with the Cook and are entered into the VOS Process.

Insurance companies shall not report Regulatory Transactions, refined in Part Three, Section 2 (e) of this Manual, as eligible for the RMB / CMBS Modeled Securities Process, and the NAIC staff shall not the RMBS/CMBS Modeled Securities Process.

# i) U.S. Treasury Securities Proces

A U.S. Treasury Securities are an Investment Society, as defined in <u>Part Two</u>, <u>Section 2 (a) of this Manual</u>, that a execute from filing with the SVO, as otherwise required by <u>Part Two</u>, <u>Section 2 (a) of this Manual</u>, pursuant to the filing exemption in <u>Part Three</u>, <u>Section</u>, (b) of this Manual.

U.S. Treasury Securities are added to the U.S. Treasury Securities Process automatically by electronic processes administered by the SVO and are assigned an **NAIC 1** Designation by a solicy-based convention.

Insurance compan's shall not report Regulatory Transactions, defined in <u>Part Three, Section</u> (e. of the Manual, as U.S. Treasury Securities, and the NAIC staff shall not and a Regulatory Transaction to the U.S. Treasury Securities Process

#### j) Exem, 'U.S. Government Securities Process

Example S. Government Securities are an Investment Security, as defined in Pat Two, Jection 2 (a) of this Manual, that is exempt from filing with the SVO,

as otherwise required by <u>Part Two, Section 2 (a) of this Manual</u>, pursuant to the filing exemption in <u>Part Three, Section 1 (b) of this Manual</u>.

An exempt U.S. Government security is reported by the insurance company to the NAIC and subsequently added by NAIC staff to the Exempt U.S. Government Securities Process and by policy convention is assigned **NAIC 1** Designation pursuant to a policy based convention.

Insurance companies shall not report Regulatory Transactions, defined in <u>Part Three, Section 2 (e) of this Manual</u>, as exempt U.S. Government Secrities, and the NAIC staff shall not add a Regulatory Transaction to be Exempt U.S. Government Securities Process.

# k) Compilation and Publication of the SVO List of Socurities

On a quarterly basis, the SVO shall:

- 1) Compile, or cause to be compiled, a list of Evesticant Securities from each of the VOS Process, Filing Exempt Securities Process, RMBS/CMBS Modeled Securities Process, U.S. Treasury Process and the Exempt U.S. Government Securities Process (each an SVO Sub-List Learing the name of the corresponding Process).
- 2) Aggregate the content of acr. SVC Sub-List into a single SVO List of Investment Securities (hereas r, the VO List of Securities) identifying each Investment Security by r de and other pertinent information and showing the NAIC Designation and for but Price assigned to them by the SVO or pursuant to such other methor place approcedure specified in this Manual.
- 3) Compile, or cause to be compiled, sub-lists from the informational content of the Derivative Source sparties Process, Exchange Rates Process, Ex-Dividend Process Letter on Credit Process, Money Market and Exchange Traded Fund Process and Surphy Notes Processes (each an SVO Sub-List bearing the name of the corresponding Process and collectively the "Other Information").
- 4) Jublish, or cause the SVO List of Securities and the Other Information to be published, by being incorporated into the NAIC's AVS + Product.

#### I) Reference to SVO List of Securities

The NAIC, acting by and through its VOS/TF and its Reinsurance (E) Task Force, acknowledges that the phrase "Securities Listed by the SVO," used in Section 3 B. of the NAIC *Credit for Reinsurance Model Law* (#785) and Section 10 A. (2) of the *Credit for Reinsurance Model Regulation* (#786) refers to the SVO List of Securities as defined in this Part One, Section 3 (k) provided that for purposes of the Model Law, the phrase Securities Listed by the SVO also includes:

- 1) All US Treasury Securities whether or not on the US Treasury Securities Process Sub-List of the SVO List of Securities as owned by an insurance company;
- 2) Any security that meets the criteria specified in <u>Part Two, Section 4 (c) (i)</u> or <u>(ii)</u> of this Manual (pertaining to US Government Exempt securities), not owned by an insurance company and therefore not on the SVO Exempt US Government Securities Process Sub-List of the SVO List of Securities; and
- 3) Such other or additional type or class of securities as the Reinsurance (E) Task Force shall from time to time determine are suitable for use as collateral in reinsurance transactions and are added to this definition by the VOS/TF at it request.

To avoid confusion, and for purposes of this acknowledgment, the Filing exempt Securities Process included in the definition of SVO List of Securities includes the SVO listed securities referred to as those "deemed exempt from filing in the cited sections of the Model Law and Model Regulation.

#### SECTION 4. NAIC POLICY ON THE USE OF CREDIT RATINGS OF NRSROS

#### a) Providing Credit Rating Services to the NAIC

The NAIC uses credit ratings for a number of regulatory purposes, including, but not limited to, those associated with the filing exempt rule, discussed in <u>Part Two</u>, <u>Section 4 (d) of this Manual</u>.

Any rating organization that has been designated a Nationally Recognized Statistical Rating Organization (NRSRO) by the Securities of Exchange Commission of the United States of America (SEC) and which continues to be subject to federal regulation, may apply to provide Credit Rating Services to the NAIC.

# b) Procedure to Become an NAIC Credit Rating Pro ider

An NRSRO that wishes to provide Credit Ra, a Services to the NAIC may indicate its interest by sending a letter to the Chair on the VOS/TF with a copy to the Director of the SVO, in which it:

- Indicates an interest in providing `redi' Rating Services to the NAIC;
- Confirms that it is cover by an NRSRO subject to regulation by the SEC:
- Provides a chart, in the former snown in <u>Section 7 (d) (ii) of this Part</u> relating its credit or ting synchols to NAIC Designations; and
- Indicates the the RSRO agrees to enter into a legally binding agreement under which the NRSRO will:
  - o Provide Set t Rating Services to the NAIC at no cost;
  - R imburse the NAIC for all costs associated with: integration of it day feed into NAIC systems, subsequent changes to NAIC sy ems to accommodate changes in the NRSRO's systems and changes to NAIC systems as a result of the termination of Credit fating Services by the NRSRO;
  - o Give written notice 6 month prior to terminating Credit Rating Services; and
  - Agree not to claim in marketing literature that the provision of Credit Rating Services indicates NAIC approval or endorsement of the NRSRO, its products or services.

# c) Adding the NRSRO to the NAIC Credit Rating Provider List

When directed to do so by the VOS/TF, the SVO shall add the name of the NRSRO (hereafter described as a Credit Rating Provider (CRP)) to the NAIC Credit Rating Provider List in the publication of this Manual that follows the execution of an agreement between the NAIC and the NRSRO.

#### (i) Regulatory Significance – Filing Exempt Rule

Adding the name of an NRSRO to the <u>Credit Rating Provider List</u> indicates that insurance companies must use the credit ratings assigned by that NRSRO, if any, when determining the NAIC Designation equivalent for a security to be reported under the filing exempt rule, and <u>Part Three Section 1 (b) of this Manual</u>.

Only those NAIC CRP ratings that meet the definition in <u>Section 4(c) (ii)</u> <u>below</u> may be translated into NAIC Designations under the filing exempt rule discussed in <u>Part Two</u>, <u>Section 4(d) of this Manual</u>.

Securities assigned ratings by NAIC CRPs that do not meet the definition of Section 4(c) (ii) below, shall be filed with the SVO.

The translation of a NAIC CRP rating into an NAIC Designation conducted in accordance with the procedures described in <u>Section 31</u> and <u>Section 7 (d) (i) of this Part</u>.

(ii) <u>Definition - Credit Ratings Eligible for Translation to NAIC Ensignations</u>
The credit rating of the CRP to which this Section are the <u>NAIC Credit Rating Provider List</u> refers, is the 1) credit rating as uned to the NAIC CRP, 2) by application of its long term obliquion a lings scale and methodology to 3) securities.

Credit ratings of a NAIC CRP that meet his descrition are entitled to a presumption of convertibility to the equivalent NAIC Designation published in the NAIC Credit Rating Provide List, in Section 7 (d) of this Part, except that the presumption or cor ertibility is subject to the following limitations:

- (A) Those rating activates or man ets in which the entity has NAIC CRP status:
- (B) Securities with monitore AIC CRP ratings that:
  - 1) Are monitored at least annually by the CRP that issued the rating,
  - 2) Are assigned to a specific issue that must be specifically identified,
  - 3) Apply to equities where the issuer promises to repay principal in rest or lividends;
  - 4 (x) cover an opinion as to the likelihood of payment of both principal and interest/dividends due from the issuer to the holders of the security, or
  - (Y) those structured to pay only principal or only interest/dividends, in the monitored NAIC CRP rating addresses the likelihood of payment of either the principal, in the case of a security structured to pay only principal or the interest/dividends, in the case of security

- structured to pay only interest/dividends, (an "Eligible NAIC CRP Rating"); and
- (C) The NAIC may determine that the rated security or investment is of a type that is not eligible to be reported on <a href="Schedule D">Schedule D</a> of the <a href="NAIC Financial Statement Blank">NAIC Financial Statement Blank</a> or that the NAIC determines is not appropriate for NRSRO credit ratings to be used to determine the regulatory treatment of a specific asset class.

#### (iii) Special Rating Systems

Unless otherwise specifically approved by the VOS/TF and published in Section 7 (d) of this Part, special rating systems of any RP, rating agency or rating organization shall not be entitled to a resumption of convertibility. Nevertheless, an SVO analyst a session security that has been assigned such a rating by any rating organization, including a CRP, may consider the information imparted by that sating or a related research report under the authority provided in Section 2 (c) (i) of this Part, as one factor in determining an NAIC Designation.

(iv) <u>Disclosures and Consider in its Related to the Translation of Credit</u>
Ratings into NAIC Designation.

The presumption of core exhibity, accorded to a credit rating of a NAIC CRP should not be in spreted to indicate that NAIC Designations and NAIC CRP credit stings be produced using identical methodologies or that they are intended a communicate the same information. SVO credit assessment is londy and for regulatory purposes and may therefore include considerations or address concerns unique to the regulatory community.

# d) Policy and egal Disclosure Pertaining to the NAIC Credit Rating Provider List

The N/C uses publicly available credit ratings, when available, as one component the services it provides to state insurance regulators concerned with financial solvency monitoring of insurance company investments.

In a lopting or in implementing the procedure described in this Section, the IN IC acts solely as a private consumer of publicly available credit ratings. The sole NAIC objective in obtaining and using publicly available credit ratings is to enserve limited regulatory resources, for example, the resources of the SVO. The VOS/TF has established the procedure specified in this section solely to ensure that the NAIC can avail itself of publicly available credit rating opinions.

The NAIC is not selecting, approving or certifying NRSROs or other rating organizations or distinguishing among them for any public or policy purpose whatsoever. Nor is the NAIC endorsing the credit rating or analytical product of

any CRP or rating organization or distinguishing between CRPs or rating organizations for any specific public purpose. The NAIC disclaims any authority to regulate CRPs or rating organizations.

# e) No Waiver/Express Reservation of Authority

Nothing in this <u>Section 4</u> should be interpreted or construed as a waiver of the authority of the VOS/TF, in its sole and absolute discretion, to modify or change, in any manner whatsoever, the <u>NAIC Policy on the Use of Credit Ratings of NRSROs</u>, including but not limited to: directing the removal of one or more NRSROs from the <u>NAIC Credit Rating Provider List</u> (subject only to the adjustment of any existing contractual obligations); directing the SVO to study any issue related to NRSRO operations in furtherance of state insurance regulatory policy; eliminating the <u>NAIC Credit Rating Provider List</u> or directing any other action or activity the VOS/TF may deem to be useful or new sary to the creation, maintenance or discharge of state based regulatory policy.

#### SECTION 5. NAIC POLICIES PERTAINING TO SVO WORK PRODUCT

#### a) For NAIC Members Only - Official Source

NAIC Association Values serve as the starting point for a variety of policies detailed in the <u>NAIC Financial Conditions Framework</u>, including accounting policy. The rules that detail the application of these accounting standards are found in the *NAIC Accounting Practices and Procedures Manual* and the <u>Annual Statement Instructions</u>.

Association Values are produced solely for the benefit of NAIA members. NAIC members, acting in their capacity as state officials, may incorporate the research produced by the staff of their Association as official regulatory, solley. However, state regulators have statutory duties that may require them be incorporate a variety of factors in addition to or in lieu of the research produced by the staff of their voluntary Association.

The AVS+ Products is designated as the offician IAIC source for publication of Association Values assigned by the SVO to the securities reported by insurance companies. To the extent that an NAIC semicolacting in its capacity as a state official, instructs an insurance company to the state insurance department, the NAIC member is advised that only NAIC Designations and Unit Prices obtained from the most recently published at VS+ Products should be used by an insurance company to report an NAIC Designation and/or a Unit Price on an NAIC Financial Statement Black preparation in accordance with SAP.

#### b) This Manual

This Manual is the official expression of NAIC's credit assessment methodologies and valuation policies and takes precedence over other SVO publications. The policies procedure methodologies or language of this Manual shall be changed only through a regulation adopted by the VOS/TF in accordance with the NAIC Constitution at Bylaws.

N IC Designations and Unit Prices are produced solely to provide NAIC mem. is with a reliable, independent and uniform source for credit risk and pricing information. Accordingly, the NAIC member must interpret the sign ficance of an Association Value in a specific context by reference to the NAIC Financial Conditions Framework and applicable state insurance laws, rules and regulations.

NAIC Association Values are not intended or designed to function as an aid to an investment decision.

#### c) Prohibition on Use of NAIC Designation in a Covenant

An insurance company shall not use:

- (i) An NAIC Designation assigned by the SVO, or
- (ii) An upgrade or downgrade of an NAIC Designation previously assigned by the SVO, or
- (iii) A change in any aspect of how a security is regulated that is the direct or indirect result of an upgrade or downgrade of an NAIC Designation assigned by the SVO, as the basis for an agreement to modify the terms of a transaction (the "Prohibition").

The Prohibition shall apply only to transactions issued on or after September 1, 2010 and to transactions to which the prohibited clause is added after September 1, 2010.

Effective September 1, 2010, insurance companies shall certify to the SVQ that the submitted transaction does not contain a prohibited clause or agree and a condition to filing with the SVO. The SVO is prohibited from processing any transaction it knows or has reason to believe contains a prohibited agree ment of clause.

#### The Prohibition reflects:

The conclusion of the VOS/TF, as the initial and primary Nz C regiliatory group responsible for implementing NAIC policy on risk assess, ant a insurer-owned securities, that the use of NAIC Designations as into ated in the Prohibition to modify the terms of a security or any other consact in is inconsistent with regulatory objectives; and

The decision of the NAIC Executive (EX) (or an e, as the body charged with directing NAIC corporate activities, that the use of NAIC Designations as indicated in the Prohibition to many be teachs of a security is inconsistent with the corporate objectives of the NAIC.

Insurance companies are, therefo. advis d that the NAIC disclaims any and all responsibility whatsoever for surveillable of insurance company investments for purposes of identifying when a deterioration of the borrower's credit quality or other risk attribute suggests that the insurance company should adjust the financial terms of the one half hansaction to obtain a different overall investment return or continents in for the risks involved.

It is the sense on the INAIC that these decisions are private and the proper and exclusive concern on insurance company management. NAIC Designations are not put shed as investment advice to insurance companies and might lack necessary attributes that would make them suitable for use as investment advice.

TI NAIC therefore, rejects the view that insurance company representatives may pass rably rely on SVO credit assessments or on any other NAIC analytical

process as a guide to adjusting the terms of their private investment arrangements with borrowers.

#### d) Statement of Practice

The SVO routinely receives financial information, legal documents and other data from reporting insurance companies so that it may assess the reported investment for the NAIC. While the NAIC is not a guarantor of the confidentiality of information submitted to the SVO, the SVO does not redistribute documents obtained in the course of its work for other than regulatory purposes was may be required by law. The NAIC does, however, respect copying ht and will not reproduce or externally distribute copyrighted documents and ut promission.

#### SECTION 6. AMENDMENTS AND UPDATES TO THIS MANUAL

#### a) Substantive Amendments to this Manual

#### (i) <u>Step 1</u>

Any proposals for substantive amendments to this Manual must be distributed to members of any appropriate working group, NAIC staff and interested parties at least three weeks prior to the next national meeting at which it is intended they be discussed. Proposed amendments must also be distributed to the VOS/TF if it is anticipated that the amendment will be considered for adoption by the VOS/TF at that national meeting. Proposals received in a timely manner will be put on the appropriat agenda and should address the issues covered in <u>subsection</u> (b), of th. <u>Section</u>.

# (ii) Step 2

At the meeting, proposals are discussed by the appropriate work, a group or VOS/TF and should result in (A) a decision to table the matter for a later date, (B) instructions to NAIC staff or interested a sties and duct further work and report back to the appropriate group or (C), vote by the working group or VOS/TF approving or rejecting the requard in question to be followed by a vote of its parent regulator, body if necessary. Proposed language that is to be included in the Manual should be reviewed prior to a final vote of approval to make sure that it reflects the style, format and existing defined terms of the language and that a specific location in the Manual be indicated or reach nent of the language. If the working group or VOS/TF determines that the proposed change may affect another NAIC forms a publication, the working group or Task Force should issue a charge to make sure appropriate persons are notified.

#### (iii) Step 3

Language that is approved the VOS/TF is included in the next scheduled publication of the Manual. The Manual is currently published once a year with an effective date of December 31.

# (iv) Step 4

As included a <u>subsection (ii) above</u>, certain NAIC staff and/or interested parties may be charged with additional work with respect to a proposed amendment to the Manual. Any subsequent or revised proposals should be a tributed to members of the working group or VOS/TF, NAIC staff and interested parties at least three weeks prior to the next national or interimmenting at which they are to be considered.

# b) Format for Substantive Amendments to this Manual

Suggested changes and amendments to the Manual, and reasons therefore, shall be stated in a concise and complete manner. Proposed amendments to the Manual should address the following issues:

- (i) Identification of the party suggesting the change as well as any other interested persons represented by such party.
- (ii) A concise statement of the issue to be addressed by the change.
- (iii) The suggested resolution of the issue in the form of precise language to be incorporated in the Manual and the suggested section or the Manual where the language should be placed.
- (iv) An explanation of why the proposed languag will r solve the issue identified, any background information helpful or understanding the change and how this change might affect or er sections of the Manual.
- (v) Identification of any other NAIC forums a publications that may be affected by the change.

# c) Semi-Annual Updates to this Manual

#### (i) Step 1

Once a year, the staff shall planar a printer's proof of the Manual incorporating all change adopted by the VOS/TF for inclusion in the next publication of the Manual For the sake of clarity, the staff shall identify all changes to the Manual adopted by the VOS/TF by reference to the official minutes of meetings of the VOS/TF as reflected in the NAIC Proceedings. The printer's are a containing all adopted changes shall be marked (by underline/s sikeout) to clearly show all changes to be made to the Manual.

#### (ii) S' 02

fter the stiff has prepared a printer's proof that incorporates changes ado, ted by the VOS/TF, the staff shall review the printer's proof to ensure at the changes are properly formatted, spelling and grammar is accurate, section references agree and that all similar and appropriate procedures are followed to ensure an accurate publication.

#### (in Step 3

Once the staff has finalized the printer's proof in accordance with the instructions above, it shall coordinate with the NAIC Publications Department to publish the newly revised Manual.

#### Section 1. General Definitions Used in This Manual

The following definitions are intended to have relevance only for this Manual. No suggestion is intended that these definitions have any relevance to any other NAIC publication.

**Association Value** means, collectively, an NAIC Designation and the Unit Price published in the AVS+ Products for a security.

**Audited Financial Statement** means, collectively, for any given year, the auditor's Opinion, the issuer's income statement, balance sheet, the statement of cash flows, all notes to the financial statements, and any supplementary information thereto typically created, generated or otherwise provided to investors, in English, and prepared by a certified public accountant or the international equivalent thereto, showing financial results for the reported year together with the prior ye prepared and presented in accordance with a <u>Global Financial Presentation Standard</u>, a <u>Reconcile Financial Presentation Standard</u> or a <u>National Financial Presentation Standard</u>. For purpoles of this definition:

# Global Financial Presentation Standard means:

- U.S. Generally Accepted Accounting Principles (US GAAP); or
- International Financial Reporting Standards (IFRS) as published to the International Accounting Standards Board (IASB).

#### **Reconciled Financial Presentation Standard** means:

- A standard other than Global Financial Presentation of National Financial Presentation Standard with a reconciliation to US GAAP or IA. SIFRs; or
- National IFRS with such additional information as r quired by rASB standards to make National IFRS comparable to IASB IFRS.

# National Financial Presentation Standard pleans:

- National GAAP or National IFRS, with jut a reconciliation to US GAAP or IASB IFRS, authorized to be used for filing a transact in with the SVO pursuant to the procedure specified in Section 10(c)(i)(D) of this Part below.
- In this definition, National GAAP efers to the generally accepted accounting policies as required by a country's national accounting standards board and National IFRS refers to the international financial reporting standards required by the country's national accounting standards board.
- Please refer to Section of this Part below for the List of Countries and Associated National Financial resentation Standard.
- Foreign issuers no using the accounting standards of a country on the List of Countries and Associated National in pancial Presentation Standard must provide the SVO with an Audited Financial Statement, repared in accordance with a Global Financial Presentation Standard or a Reconsiled Financial Presentation Standard.

For insurance companies, an Audited Financial Statement will be prepared in accordance with SAP.

For municipal and U.S. Government securities, an Audited Financial Statement will be prepared in accordance with generally accepted auditing standards and government auditing standards issued by the Comptroller General of the United States. For municipal securities only, the statements will be accepted if they have been submitted to, reviewed and certified by a state comptroller's office.

**Authorization to File (ATF)** means the component of VISION that permits reporting insurance companies to file a security with the SVO.

**Automated Valuation Service (AVS)** means a subscription service offer by the NAIC permitting access to portions of the VOS Process and showing updated Association Values prior to publication in the <u>AVS+ Products</u>.

**AVS+ Products** refers to the quarterly compilation of the SVO List a Securities and the Other Information as those terms are defined in <u>Part One</u>, <u>Section 3 (b) of a is Manual</u>.

**Bond** means any Obligation with a stated maturity at the time of issuance longer than one year.

CINS stands for CUSIP International Numbering System and efers to a numbering system used to identify foreign securities administered by S& (USIP.

**Credit Rating Services** is used in connection with an NA Credit Rating Provider List discussed in Part One, Section 4 and Part One, Section 7 (a) (i) of a is Manual and means:

- Electronic data feed transmissions of cred tratings assigned by the NRSRO with their corresponding CUSIP number and other pertinent security specific information in English, updated as frequently as provided to the customers;
- Other analytical services or products, in English, provided to other customers; and
- Access to the NRSRC ting alysis by SVO staff.

**CRP** stands for **Credit ating Pro der** and refers to the NRSROs on the <u>NAIC Credit Rating</u> <u>Provider List</u> discussed in <u>Pa. Three Section 1 (b) (vii) of this Manual.</u>

**CUSIP** stands for the **Committee for Uniform Securities Identification Procedures** and, as used herein, refers a numbering system owned by the American Bankers Association and administered by Co-VP that is used to identify publicly traded U.S. securities.

**CUSIP** dont ier me ins a security identification number assigned to publicly traded U.S. securities by S&P CO IP.

**L** vative Counterparties Process means a file in NAIC electronic systems used to store the name, of counterparties on the List of Counterparties for <u>Schedule DB – Part D – Section 1</u> for pur, sees of netting of derivative exposures that is used in connection with the publication of the AVS; products.

**Exchange Rates Process** means a file in NAIC electronic systems used to store currency exchange rates used by insurance companies to convert the value of foreign investments into U.S. dollars for reporting purposes and used in connection with the publication of the AVS+ products.

**Exempt U.S. Government Securities Process** refers to a process within NAIC electronic computer systems used to store the names and descriptions of U.S. Government Securities that are exempt from filing with the SVO and that is used in connection with the publication of the AVS+ products.

**Ex-Dividend Process** means a file created in NAIC electronic systems used to store information about stock dividends and that is used in connection with the publication of the AVS+ products.

**Executive Headquarters** means the NAIC staff function responsible for day-to-day conduct activity in support of the NAIC members and includes the SVO.

Filing Exempt Securities Process refers to an electronic file within NAIC electronic to pouter systems used to store the names and descriptions of securities owned by state-regulated insurations companies that are exempt from filing with the SVO because they are assigned credit rations by NAIC CRPs and that insurers: 1) have reported in quarterly or annual statements (NA. 3 Filancial Statement Blank) filed with the NAIC; or 2) requested to be included in the Filing Exempt Securities Process through the VISION System (VISION) and in both cases, for which a NAIC CRP rating has been confirmed by the NAIC and that is used in connection with the publication of the AVS+ Products.

**Guaranteed or insured** means that a guarantor or insurer has pade in unconditional and irrevocable promise to perform, insure or purchase the obligation of an obligor upon the default of such obligor.

**Initial Report** means the report and documentation in d who the SVO by a reporting insurance company as discussed in <u>Section 10(a) of this Part below</u>.

**InfoReq** means an information request sent by the 5. O to reporting insurance company detailing informational deficiencies associated with an Initial or a absequent Report, as discussed in <u>Section 10 (b) of this Part</u> below.

**Letter of Credit Process** means a file and Conctronic systems used to store the names of banks that issue letters of credit in support of credit for reinsurance arrangements and that meet eligibility criteria to be placed on the NAT Bank Lie that is used in connection with the publication of the AVS+ products.

Money Market and Expange Traded Fund Process refers to the component of NAIC electronic systems used to stor the names of Money Market Funds and Exchange Traded Funds eligible for reporting as bone used in connection with the publication of the AVS+ Products.

**NAIC Designation** means any one of the symbols defined in <u>Part One, Section 3(b)(i) of this Manual</u> and may reflect notching pursuant to one or both of the notching procedures discussed in <u>Part One, Section 3 (b) (iii) of this Manual</u>.

**NAIC Financial Conditions Framework** means the instructions, formulas, regulatory treatment, devices or mechanisms set forth in the *NAIC Accounting Practices & Procedures Manual*, <u>Annual Statement Instructions</u> and <u>Financial Condition Examiners Handbook</u> as adopted by the states.

**NAIC Financial Statement Blank** means the Quarterly and the Annual Statement Blank, as the context may require, in the form then in use by the NAIC that is used by state-regulate Linsurance companies to report investments to a state insurance department.

**NAIC Member** means the chief insurance regulatory official from any the of the 50 states, the District of Columbia or the four U.S. territories, or their duly authorized repulsentarily.

**Obligation** means bonds, notes, debentures, certificates, including equipment trust certificates, production payments, bank certificates of deposit, bankers' acceptances, credit tenant loans, loans secured by financing net leases and other evidences of indebtodness in the payment of money (or a participation, certificates or other evidences of an interest in any of the foregoing), whether constituting general obligations of the issuer or payable only of certain revenues or certain funds pledged or otherwise dedicated for payment.

**Person** means an individual, a business entity, a nultila ral development bank or a government or quasi-governmental body, such as a political subdivision or a government-sponsored enterprise.

**Subsequent Report** means the report and documentation filed with the SVO by a reporting insurance company as discussed in <u>Section 11 of this Part</u> below.

**SVO** stands for the **Securities Valuation Office** of the NAIC and refers to the portion of the Executive Headquarters that serves as the professional staff of the VOS/TF.

**Unit Price** means the value determined for a security by the SVO pursuant to <u>Part Five</u>, <u>Section 1</u> of this Manual for purposes of valuation under SAP.

**U.S. Treasury Securities Process** refers to a process within NAIC electronic computer systems used to store the names and descriptions of U.S. Treasury Securities and that is used in contraction with the publication of the AVS+ products.

VISION refers to the SVO's electronic computer system for reporting and tracking securities

**VOS Process** means the **Valuation of Securities Process** and refers to an occasion in NAIC electronic computer systems used to store the names and descriptions of securities ow led by state-regulated insurance companies, and the NAIC Designation categories and for initialized assigned to them by the SVO and that is used in connection with the publication of a 2 AVS+ products.

**VOS/TF** stands for the **Valuation of Securities (E) Task Force** on the NAIC and refers to the NAIC member group responsible for formulating and implementing NAIC's credit assessment and securities valuation policy.

# a) Obligation to Report

Insurance companies domiciled in any state of the United States, or any of its territories or possessions, and required by the law of their domiciliary state or territory to report NAIC Association Values for their Investment Securities in the NAIC Financial Statement Blank, shall report purchases of Investment Securities to the SVO or, in the case of Investment Securities exempt from filing with the SVO, for example, pursuant to Section 4 (d) of this Part below, to the NAIC, as required by this Manual.

For purposes of this <u>Part Two, Section 2 (a)</u>, an Investment Sec sity means an instrument evidencing a lending transaction between a insurance company as lender and a non-affiliated borrower, where the borrowe is sole motivation is to borrow money and the insurance company's sole motivation is to make a profit on the loan that the state of domicile regulates by reserence to the NAIC Financial Conditions Framework.

The SVO shall have no authority to issue No. 'C De ignations or any other NAIC analytical product to an insurance company for a Regulatory Transaction under this <u>Section 2 (a)</u>.

See <u>Part Three, Section 2 (e) of this Manual below for the definition of Regulatory Transaction and a description of the processes governing their assessment.</u>

# b) Authority to Require a Filing with the SVO

The existence of a filing exemption for a transaction, security, financial asset or investment activity it and part of this Manual is not intended to, and shall not be read as, prohibiting a state insurance regulator from requiring its domiciled insurance complay to file a transaction, security, financial asset or investment activity with the St. D for analysis.

In addition, pothic g in this Manual should be read as prohibiting a state insurance regulator from sking for SVO or SSG analytical assistance with respect to any investment related activity, or in connection with assessment of investment-related assistance of a Regulatory Transaction, as defined in <a href="Part Three, Section 2">Part Three, Section 2</a> (e) or his Manual and directing an insurance company to file relevant information with the SVO or the SSG for that purpose.

# c) Reporting

Reporting to the SVO is accomplished by filing the appropriate form or application and providing the initial and continuing information required by this Manual or such additional information as may be requested by SVO staff.

#### d) Reporting Responsibilities

Reporting is the responsibility of the insurance company that has purchased the investment. There are procedures that reduce multiple reporting on the same securities by different insurance companies. These procedures are discussed below.

As a general rule, the reporting of privately placed securities is the responsibility of the insurance company lender with the largest dollar investment in the transaction. Also, only previously unreported investments need be reported to the SVO. To ascertain whether another insurance company has previously reported a security to the SVO, the reporting insurance company should consult the most recent AVS+ Products, the AVS or VISION.

No reporting is necessary if the security (i) is listed in the AVS+ Products with recently assigned NAIC Designation/Unit Price, (ii) is listed in the AVS+ with a current year review date and a symbol that is other than an **NR** or **UP** or **V** has been logged into VISION.

# e) Use of a Filing Agent

Insurance companies may designate an agent to perform filings with the SVO by providing the SVO with written notification of the agent's appointment, on the insurance company's letterhead, identifying the agent detailing the agent's authority, expiration date of the authority and an acknowledgment that the insurance company remains legally obligated to the all accessary information and to pay all appropriate fees.

# f) Security Identification Numbers

No security may be reported to the SVC without a valid CUSIP, PPN or CINS Identifier. Only S&P CUSIP may CD. P Identifiers, PPNs and CINS.

To obtain filing and fee information and a CUSIP Identifier, PPN or CINS number, reporting insurance companies must contact S&P CUSIP at: CUSIP Service Bureau, Standard & Poor's proporation, Attention: Senior Copy Editor, 55 Water Street, 47th moor, New York, N.Y. 10041, e-mail address is cusip\_ppn@standardandp.prs.com, Facsimile (212) 438-6572.

#### SECTION 3. SHORT-TERM INVESTMENTS

A short-term investment is defined as an investment that has one year or less to maturity. Investments that have one year or less to maturity when issued are not reported to the SVO. Investments which when acquired by an insurance company have one year or less to maturity, but which when issued had greater than one year to maturity, need only be reported to the SVO if they do not have an NAIC CRP rating or an NAIC Designation for the issuer.

#### SECTION 4. REPORTING EXEMPTIONS

# a) Statement of Policy

It is the reporting company's responsibility to classify filing exempt (FE) securities in accordance with <u>Part Four, Sections 1 (a)</u>, <u>Part Three, Section 1 (b)</u>, <u>Part One, Section 2 (c) (iii)</u>, and <u>Part Three, Section 5 of this Manual</u>.

Insurance companies and their investment advisors are encouraged to consult with the VOS/TF, the SVO, individual state regulators or to use the <u>RTAS – Emerging Investment Vehicle Service</u> process discussed in <u>Part Four, Section 3 of this Manual</u> to gain an understanding of classification, including the probable regulatory treatment for new or previously existing but substantially evolved or modified securities.

# b) Certain Separate Accounts

Insurance companies need not report securities or other relevant transacions to the SVO if such assets are held in a separate account that is not subject to exher the <u>Asset Valuation Reserve or Risk-Based Capital charges</u>. All other securities and relevant transactions held in a separate account must be filed with the SVO unless they are filing exempt as set forth in <u>Section 4(d) of this Para</u> selow.

# c) U.S. Government Securities

This section defines what the NAIC deems to be U.S. Go rnment Obligations. They are not required to be filed with the SVO.

**NOTE:** Because these filing exemption provisions are let forth without any compliance mechanism, the SVO will not be up to velly whether insurers have filed all securities that are required to be its win the SVO. State insurance department regulators may wish to create their or a compliance mechanisms to protect any interests they may have related to bein domiciliary insurers.

The SVO does not have responsibility for letermining whether specific securities should be filing exempt. An insurptive who is uncertain whether a specific security qualifies for exemption should not contact the SVO for guidance, but should either file the security with the SVO or use the <a href="RTAS">RTAS</a> – Emerging Investment Vehicle Service process described in <a href="Part Four">Part Four</a>, Section 3 of this Manual and obtain an opinion of exemption for that security.

- (i) Filing a mp. on for Direct Claims on, or Backed Full Faith and Credit of, the United tates
  - **U.S. Government Obligations** means all direct claims (including see cities, loans, and leases) on, and the portions of claims that are directly disconditionally issued, guaranteed or insured by the United States Government or its agencies.

**U.S.** Government agency means an instrumentality of the U.S. Government the debt Obligations of which are fully guaranteed or insured as to the timely payment of principal and interest by the full faith and credit of the U.S. Government. This category includes in addition to direct claims on, and the portions of claims that are directly and unconditionally guaranteed by, the United States Government agencies listed below, claims collateralized by securities issued or guaranteed by the U.S. government agencies listed below for which a positive margin of collateral is maintained on a daily basis, fully taking into account any change in the insurance company's exposure to the obligor or counterparty nder a claim in relation to the market value of the collateral held in second 5that claim.

#### ing Exemption for other U.S. Government Obligations

Obligation issued and either guaranteed or insured, as to the timely payment of principal and interest, by the government agencies or government-sponsored enterprises listed below are filing exempt. They are not backed by the full faith and credit of the U.S. Government. The filing exemption here is based on an analytical judgment that the combined creditworthiness of the entity itself and U.S. government support for that entity provides confidence that the issuer will be able to pay its obligation on a full and timely basis at the level of an NAIC 1 quality designation. For the avoidance of doubt, preferred stock or similar securities of the government agencies or government-sponsored enterprises listed below are not considered guaranteed or insured and hence are not subject of this section (ii).

# Filing Exempt Other U.S. Government Obligations if issued and either fully guaranteed or insured by:

Federal Agricultural Mortgage Corporation (Farmer Mac)

Federal Farm Credit Banks (FFCB)

Federal Financing Bank (FFB)

Federal Home Loan Banks (FHLB)

Federal Home Loan Mortgage Corporation (Freddie Mac)

Federal National Mortgage Association (Fannie Mae)

Financing Corporation (FICO)

Resolution Funding Corporation (REFCorp)

Tennessee Valley Authority (TVA)

#### d) Filing Exemption for Public Common Stock

Insurers must report values for all securities on their NAIC Financial Statement Blank including for FE securities as defined in <a href="Part Three">Part Three</a>, Section 1 (b) of the Manual. Refer to <a href="Part Five">Part Five</a>, Section 1 of this Manual for valuation instructions. Documentation requirements for securities filed with the SVO are security and <a href="Part Two">Part Two</a>, Section 10 and <a href="Part Two">Part Two</a>, Section 11. These documentation requirements apply when a security must be filed with the SVO.

# e) Filing Exemption for Certificates of Deposit Reported as Box 1s voider SSAP No. 26R

- (i) A Certificate of Deposit that meets the definition of a bond of <u>SSAP No.</u> <u>26R—Bonds</u> is exempt from filing with the SVO next is usued by a bank whose deposits are fully insured by the FDIC and is for an amount:
  - (1) Equal to or less than the maxin. Im FLIC deposit insurance, provided however, that the insurance aggregate deposits with the bank are equal to or less than the maximum FLIC insurance limit or,
  - (2) Greater than the max, rum FDC deposit insurance provided the issuing bank is rived and mon, ared by an NAIC CRP,
- (ii) The NAIC Designation or Certific tes of Deposit described in (e) (i) (1) above shall be **NAIC 1**. The 'Al' Designation for Certificates of Deposit described in (e) (i) (2) above shall be derived by application of the filing exempt conversion process discussed in Section 4(d) (i)(A) of this Part above and in Part Cons. Section 3 (e) of this Manual.

**NOTE:** Please refer to the *NAIC Accounting Practices and Procedures Manual* for the text of <u>SSAP and 26R—Londs</u> as it applies to Certificates of Deposit.

# a) NAIC Designations Related to the Special Reporting Instruction

**NAIC** 5\*GI is permitted to be assigned by insurance companies to certain obligations that meet all of the following criteria: (1) documentation necessary to permit a full credit analysis of a security by the SVO does not exist or an NAIC CRP credit rating for an FE or PL security is not available; and (2) the issuer or obligor is current on all contracted interest and principal payments; and (3) the insurer has an actual expectation of ultimate payment of all contracted interest and principal.

An insurance company that self-assigns a **5\*GI** must attest that securities receiving this designation meet all required qualifications by completing the appropriate general interrogatory in the statutory mancial statements. If documentation necessary for the SVO to person a full credit analysis for a security does not exist or if an NAIC CRP credit rating for an FE or PL security is not available, but the issuer is not current on antractual interest and principal payments, and/or if the insurer does not cave an actual expectation of ultimate payment of all contracted interest and principal, the insurance company is required to self-assign this security a **VAIC** \*.

**NAIC 6\*** is assigned by an instead obligation in lieu of reporting the obligation with appropriate documentation in instances in which appropriate documentation does not wat, but the requirements for an insurance company to assign a **5\* GI** are not me...

Securities with NA 55\* Designations (including NAIC 5\*GI and other 5\* coding variations) are deemed to possess the credit characteristics of securities assigned an NAIC Designation. A security assigned an NAIC 5\* Designation incurs the regulatory treatment associated with an NAIC 5 Designation.

Securities in insurance company previously assigned as **NAIC 5\*GI** are permitted to subsequently acceive this designation if the requirements for an **NAIC 5\*GI** designation continue to be met.

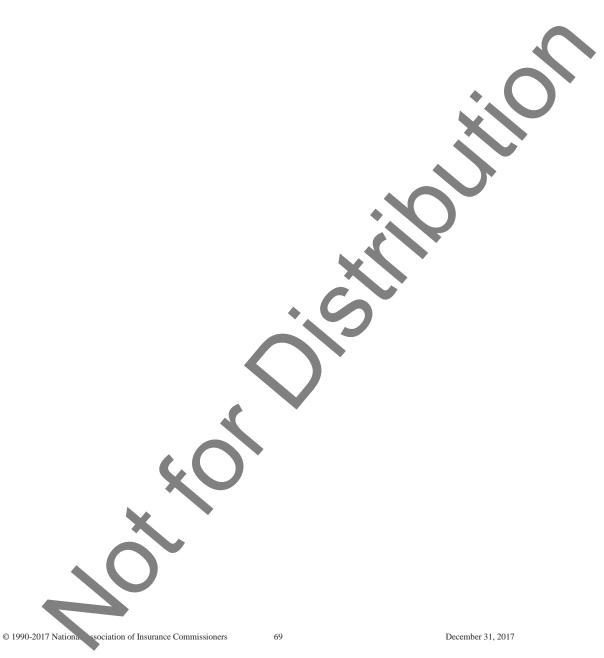

Securities with NAIC 6\* Designations are deemed to possess the credit characteristics of securities assigned an NAIC 6 Designation. Therefore, a security assigned an NAIC 6\* Designation incurs the regulatory treatment associated with NAIC 6 Designation.

The asterisk (\*) after the quality indicator 5 or 6 distinguishes the NAIC 5\* and NAIC 6\* Designation from an NAIC 5 or NAIC 6 Designation.

# SECTION 6. THE MECHANICS OF REPORTING WITH THE SVO

Information about the VISION platform, including general information, user guides and on-line demonstrations can be found at http://www.naic.org/svo\_vision.htm and the application itself can be found at https://vision.naic.org.

#### SECTION 8. INVESTMENTS IN SUBSIDIARY, CONTROLLED AND AFFILIATED ENTITIES

Section 8.

An investment in the form of common stock issued by an insurance or non-insurance subsidiary, controlled or affiliated (SCA) entity of the reporting insurance company or an investment in the form of a preferred stock issued by an insurance subsidiary, controlled or affiliated company of the reporting insurance company is required to be filed with the NAIC Financial Regulatory Services Division in the manner and form and with the documentation provided for in the Appendix to Statement of Statutory Accounting Principles (SSAP) No. 97—Investments in Subsidiary, Controlled and Affiliated Entities.

An investment in the form of a bond issued by an insurance or noninsurance. CA entry of the reporting insurance company is filed with the SVO. To file an SCA bond in company the reporting insurance company files a completed SAR, an Audited Financial Statement or the subsidiary, a copy of the corporate resolution authorizing the issuance of the debt, written endence that the transaction has been approved by the state of domicile or that no such approval is necessary and, if the subsidiary is an insurance company, the subsidiary's most recent NATC Financial Statement Blank, together with the reporting insurance company's NATC Financial statement Blank, internal investment committee memorandum for the investment and to m doc mentation appropriate to the transaction.

An investment in the form of a preferred stock issued by moni surance SCA entity of the reporting insurance company is filed with the SVO. To file an SCA, referred stock issued by a non-insurer, the reporting insurance company files an Audite. Financia. Statement for the issuer of the preferred stock, a copy of the corporate resolution as horizing the issuance of the preferred stock, written evidence that the transaction has been approved by the state of domicile or that no such approval is necessary, together with details of the ermon of the preferred stock, as well as the NAIC Financial Statement Blank for the reporting insurance company.

Part Three, Section 2(d) or this law wall ascribes the additional analytical procedures applicable to such filings.

#### a) Initial Report

An initial filing consists of a completed form(s) and information, documentation and data in quantity and quality sufficient to permit the SVO to conduct an analysis of the creditworthiness of the issuer and the terms of the security to determine an Association Value. It is the obligation of the reporting insurance company to provide the SVO with all necessary information. It is the responsibility of the SVO to determine whether the information provided is sufficient and reliable for its purposes and to communicate informational deficiencies to the reporting insurance company.

## b) Informational Deficiencies

Upon receipt of a submission by a reporting insurance company, the submission is logged by date and time received and assigned to the appropriate staff analytic for credit assessment or unit pricing. If the staff analyst determines that there is an informational deficiency, he or she will so advise the reporting a surance company.

The transaction for which a request for additional information as recuested will be held without processing for a period not to exceed 45 days. If at the completion of the 45 days, the reporting insurance company has failed to provide the information requested, the SVO will discard the filing and all documentation submitted with it in VISION will reflect that the filing was discarded due to insufficient information.

On an exception basis, the SVO may grant a prescribe extension to the reporting insurance company but not to exceed 60-days in total with the time-period to begin on the date that the information sequent was issued. If such an extension is granted, and if the reporting insurance company has failed to provide the information requested within the time provided, the SVO will discard the filing and all documentation submitted which it is the end of the 90-day period and Work Flow will reflect that the filing was discarded due to insufficient information.

Either at the expiration of the 45-day or 90-day period, the reporting insurance company shall be company of a file the security again if it wishes to obtain an NAIC Designation

If the SVO documines in requires additional information after it has received a response to its request for additional information, a new 45-day period shall begin, a less an extension is granted as indicated above, in which case a new 90-day period. If begin.

#### c) Reporting Conventions and Required Documents

Specific reporting conventions for initial reports that all reporting insurance companies should follow are described below.

#### (i) <u>Corporate Issues</u>

#### (A) Rated

In the case of a corporate issue that is rated by an NAIC CRP that must be reported to the SVO for whatever reason despite the availability of the filing exemption provided in Sec. 10. 4(d) of this Part, above, the reporting insurance company shall albmit a completed SAR with evidence of the NAIC Cr. 2 rating. The evidence can be in the form of a copy (or cripies) withe rating letter from the NAIC CRP or a copy of the page from eight NAIC CRPs rating publication showing the date of the sublication. If the issue is rated below "A" or is rated differently by two or more NAIC CRPs, a prospectus and a rating rationale is emore dum from each NAIC CRP that rated the transaction must accompany the submission. Insurance companies reporting by design not-for-profit entities shall follow the same filling conventions applicable to bonds of profitmaking entities.

#### (B) Unrated

In the case of a corporate issue not rated by an NAIC CRP, the reporting insurance company shall complete an SAR and shall attach the issues public offering statement or private placement memora deca, a the case may be, the insurance company's internal credit committee memorandum and the Audited Financial Statement or an issue is rated by a noing organization other than an NAIC CRP, submit evidence of such rating. The SVO will contact the reporting insurance company if additional information is required. If none of these documents are available, the reporting insurance company must obtain and complete the SVO's VIM form and submit it with the required documents and attachments. Insurance companies reporting bonds of not-for-profit entities shall follow the same filing conventions applicable to bonds of profit-making entities.

#### (C) Rated Medium Term Notes

In the case of Obligations defined as medium term notes in the offering prospectus or private placement memorandum, where the issuer is rated by an NAIC CRP, that must be reported to the SVO for whatever reason despite the availability of the filing exemption provided in Section 4(d) of this Part, above, the reporting insurance

company must file a completed SAR and evidence of proof of rating or ratings. The evidence can be in the form of a copy of the rating letter from the NAIC CRP or a copy of the page from each NAIC CRP rating publication showing the date of the publication.

#### (D) Foreign Issuers

(1) General Rule on Presentation of Financial Results

Any security owned or eligible for purchase by an insurance company that is issued or otherwise the obligation of a non US obligor, must be accompanied by an Audited Financial Statement prepared in accordance with a Global Financial Presentation Standard or a Reconciled Financial Presentation Standard unless the SVO has bee specifically authorized to use a National Financial Presentation Standard for issuers using the accounting standards of that country in accordance with the procedure described in this sub-Section.

(2) Procedure to Authorize SVO Use of a National inancial Presentation Standard

A national insurance association (but not individually unrecessor other persons) may, by written request, ask the SVO a study one feasibility of adding a country and the associated National AAS or National IFRS to Section 10(c)(i)(D)(5) of this Part. The SVO is authorized, but not required, to hold discuss any with representatives of the national insurance association to enduate whether the criterial specified below has been met an authorized a recommendation to the VOS/TF. The SVO day not assign an NAIC Designation to or otherwise assess a security under the proposed national standard until the VOS/TF has, by amendment of this Manual, added the proposed country and the associated lational GAAP or National IFRS to Section 10(c)(i)(D)(s. of this Part.

- (3) Pre-Conditions to the Exercise of SVO Authority to Conduct a Requester Study
- (a) Information Supporting the Request As part of its request the potional insurance association shall:

CAAP or National IFRS standard reflects that the borrower population the industry would target is not required to use a Global Financial Presentation Standard or the Reconciled Financial Presentation Standard to obtain financing in its local market and otherwise lacks the economic or market incentive to use a Global Financial Presentation Standard or

- the Reconciled Financial Presentation Standard in the absence of a requirement.
- (ii) Provide evidence of both investment opportunity and industry interest to make investments in the country;
- (iii) Explain the relationship of the proposed National GAAP or National IFRS financial presentation standard within the larger context of the country's economic, financial, regulatory and legal traditions; and
- (iv) Explain how the proposed National GAAP or National IFRS financial presentation stant rd, viewed from the perspective of an investor and from that of the SVO as a risk assessor, is of a quality and of a canspan pcy sufficient to enable the creation of NAIC Designal and a alogous to those prepared using a Global Financial Prosentation Standard.

# (4) Parameters of the SVO Study

- (a) Objectives of the SVO State
  - (i) The objection of the VO study is to assess whether the proposed not anal accounting standard result in similar or materially different presentation (i.e., consistently more conservative or aggressive presentation for significant transactions of financial results and position from that under a Global Financial Presentation Standard or a Reconciled Financial Presentation Standard. This reflects that the role of the partial information in a credit risk assessment is to provide an adequate basis to make an assessment of the issuer's in ancial profile, both by itself and compared to other issuers.
  - (ii) The SVO's primary focus will be on identifying the material differences between accounting methods for the income statement, balance sheet, and, to a lesser extent, the statement of cash flows.
  - (iii) The agreed upon expectation is that similar presentation of financial results and position generally require no change in determination of credit risk while material differences in presentation could lead to a change in determination of credit risk.
  - (iv) If local accounting standards lead to material differences, it will be necessary to determine which differences in accounting method apply to the company being analyzed and whether the differences are broadly observed (i.e., across industries).

#### (b) Process

- (i) The national insurance association will, as necessary, identify an accounting firm that is an expert in the national accounting system of the country proposed for inclusion on the List of Countries and associated National Financial Presentation Standard.
- (ii) The national insurance association will work with the SVO to create an educational session on those aspects of financial presentation relevant to the SVO for purposes of its credit risk assessment.
- (iii) The educational session will focus on the material differences between accounting methods for the incomstatement and balance sheet, and shall include such further or additional areas as the SVO shall beem necessary in view of the specific country and national accounting system proposed.
- (iv) At the conclusion of such educational cossion, the SVO shall assess whether the educational session provides a sufficient basis for it to make needed adjustments to the financial information preserved under the national accounting standard.
- (v) The SVO shall then asset wheth the application of the adjustments in one or more transcations confirms that the use of the national according standard leads to the creation of NAIC Desir lations analogous (in the information by clayey about credit risk) to those created by the use of a Global Financial Presentation Standard
- (c) Information Requirements Associated with the Use of a National Financial Preso lation Standard

Insurance companies who file securities whose issuers present financial information in accordance with a National Financial second tion Standard shall:

- Where materially different from Global Financial Presentation Standards, identify how local accounting standards treat specific issues relevant to assessment of credit risk:
- (ii) Provide written descriptions of the accounting difference the insurer considered, and of how it resolved concerns

- about the accounting differences during the investment decision making process;
- (iii) Be prepared to provide SVO with access to the issuer's management or to convey questions and retrieve information from the issuer's management.
- (iv) Include a consolidated statement of cash flows for the past three years. See the definition of Audited Financial Statement in Part Two, Section 1 and Part Three, Section 1 (a) (ii)

  (A) for additional guidance pertaining to this requirement.
- (v) For filings presented on the basis of French generally accepted auditing standards Congressive following additional documentation is required:
  - Disclosure of finance learn ob ration.
  - Disclosure of opening is se commitments in a manner similar to that required by IRFS or US GAAP;
  - Disclosure of pursion assets and liabilities as well as any other pursion assets and liabilities as well as any other pursion assets and liabilities as well as disclosure of any infunded amount;.
  - Disclosure f the amount of treasury stock, if any, and now is accounted for;
    - Seg. ent reporting of sales, assets, income and eprecation.
- presented on the basis of Italian GAAP, the noting additional documentation is required:
  - consolidated statement of cash flows for three years;
  - Disclosure of finance lease obligations;
  - Disclosure of operating lease commitments in a manner similar to that required by IRFS or U.S. GAAP;
  - Disclosure of pension assets and liabilities, as well as any other post-employment plan obligations, especially of any unfunded amounts;
  - Disclosure of the amount of Treasury stock, if any, and how it is accounted for.

(5) Countries and Associated National Financial Presentation Standards

The SVO is authorized to accept Audited Financial Statements prepared in accordance with the following National Financial Presentation Standards:

- Canadian Accounting Standards for Private Enterprises but only for non-financial institutions.
- UK Financial Reporting Standard (FRS) 102 (which encompasses Irish companies reporting under FRS 102)
- Australian GAAP
- German GAAP
- French GAAP but subject to the presentation of addition documentation as specified in this <u>Part Two, Section 10 to (1)</u>
   (D) (4) (c) above and annually thereafter per <u>Section (e)</u> (n)
   (B) of this Part below.
- Dutch (Netherlands) GAAP
- Italian GAAP but subject to the presentation of additional documentation as specified in this Pa. T vo. Section 10 (c) (i) (D) (4) (c) above and annually thereafter or Section 11 (e) (i) (B) of this Part below.
- Belgium GAAP.
- (E) Investments in Certified Capital Companies
  - (1) Definition

A certified capital company (CAL CO) is a state legislated venture capital firm that can be park ership, corporation, trust or limited liability company, rofit or ot-for-profit and which may capitalize itself in a variety coways. Involvers who acquire an equity interest or qualified debt instrument from a CAPCO receive state premium or income tax credit.

(2) Statutory . counting Guidance

Guidance on the accounting for investments in Certified Capital omponies ("CAPCO") is in "INT 06-02: Accounting and Reporting for Investors in a Certified Capital Company (CAPCO)" (INT 06-02) located in Appendix B of the Accounting Practices and Procedures Manual.

per a CAPCO security can be filed with the SVO, the reporting insurance company must apply <u>INT 06-02</u> to the facts of the specific security. It is the insurance company's responsibility to apply <u>Statutory Accounting Guidance</u> for CAPCO Transactions.

<u>INT 06-02</u> requires reporting entities to account and report for investments in CAPCOs consistent with the security or other interest they acquire except for specific guidance on the tax credits. For example, an investor who acquired a bond issued by a CAPCO would follow the accounting guidance for bonds found in <u>SSAP No. 26R—Bonds</u> and report the details about the transaction on <u>Schedule D</u> in accordance with the <u>NAIC Quarterly and Annual Statement Instructions</u>. Such securities are assessed using the procedures referenced in <u>Part Three of this Manual</u>. Reliced guidance is contained in this <u>Section 10(c)(i)(E) of this Part below</u>.

For an investor who acquired a limited liability potential interest, the interest would be valued in accordance with the guidance for limited liability partnerships contained in School 1975. No. 48—Joint Ventures. Partnerships and Limited Lia try Co. vanies and reported on School 1986. Scho

Both of the examples, it d imm, diately above would also follow the specific reporting on tax and tist found in INT 06-02.

**NOTE:** Nothing in this Man al is a tended to modify or interpret INT 06-02: Accounting and Reporting to Investments in a Certified Capital Company (CAPCO) (INT 06-02); Source Proceedings of SSAP No. 48—Joint Ventures, Partnerships and Limited Ability Inpanies.

(3) Procedure for Reporting and Filing with the SVO

CAPLOS indicated by the statutory accounting guidance. This is done y establishing the character of the investment and then high high the appropriate accounting and reporting guidance and to the extent necessary the related procedures in this Manual for Schedule D or BA assets. If the CAPCO investment is subject to the SVO filing process and does not meet the filing exempt requirements, it should be filed with the SVO. If the SVO disagrees with the insurance company characterization of the investment, it will so inform the insurance company and provide rationale why the SVO believes the company has misapplied or misinterpreted the guidance of INT 06-02 and request a re-filing if necessary.

- (4) Required Documentation
  - (a) Rated In the case of a CAPCO issue that is eligible for filing exemption by virtue of its rating by an NAIC

CRP but filed with the SVO despite the availability of the filing exemption provided for in Section 4 (d) of this Part above the reporting insurance company shall submit a completed SAR with evidence of the NAIC CRP rating. The evidence can be in the form of a copy (or copies) of the rating letter from the NAIC CRP or a copy of the page from each NAIC CRP's rating publication showing the date of publication. If the issue is rated below "A" or is rated differently by two or more NAIC CRP's, a prospectus and a rating rationale memorandum from each NAIC CRP that rated the transaction must accompany the submission.

(b) Unrated — In the case of a CAPCO issue that is not rated by an NAIC CRP, the reporting insurance, impairs shall complete an SAR and shall attach the issuer's public offering statement or private placement memoral slum, as the case may be, the insurance company's internal credit committee memorandum and the critico consecutive years. If an issue is rated by a rating great zation other than an NAIC CRP, submit orders of such rating. If none of these documents are available, the reporting insurance company must be tain and complete the SVO's VIM form and submit a with a required documents and attachments.

For CAPCO issuer that a not filing exempt follow the procedures in Section 11(e), of this Part below (Corporate Issues not Filing Exemps, to file a su sequent report with the SVO.

The informational requirements described in this sub-paragraph should be read together with <u>Part Three, Section 3(a)(ii) of this Manual</u>.

A structured security backed by a pool of NAIC CF. It is definancial assets is an investment instrument backed by the chedules payment stream from NAIC CRP rated or NAIC Posigns of underlying obligations (i) issued by NAIC CRP rate entities, or (ii) 100% unconditionally guaranteed by NAIC CRP rate entities, or (ii) 100% unconditionally guaranteed by NAIC CRP rate entities, or (ii) 100% unconditionally guaranteed by NAIC CRP rate entities, or (ii) 100% unconditionally guaranteed by NAIC CRP rate entities, or (ii) 100% unconditionally guaranteed by NAIC CRP rate entities, or (ii) 100% unconditionally guaranteed by NAIC CRP rate entities, or (ii) 100% unconditionally guaranteed by NAIC CRP rate entities, or (ii) 100% unconditionally guaranteed by NAIC CRP rate entities, or (ii) 100% unconditionally guaranteed by NAIC CRP rate entities, or (ii) 100% unconditionally guaranteed by NAIC CRP rate entities, or (ii) 100% unconditionally guaranteed by NAIC CRP rate entities, or (ii) 100% unconditionally guaranteed by NAIC CRP rate entities, or (ii) 100% unconditionally guaranteed by NAIC CRP rate entities, or (ii) 100% unconditionally guaranteed by NAIC CRP rate entities, or (ii) 100% unconditionally guaranteed by NAIC CRP rate entities, or (iii) 100% unconditionally guaranteed by NAIC CRP rate entities, or (iii) 100% unconditionally guaranteed by NAIC CRP rate entities, or (iii) 100% unconditionally guaranteed by NAIC CRP rate entities, or (iii) 100% unconditionally guaranteed by NAIC CRP rate entities, or (iii) 100% unconditionally guaranteed by NAIC CRP rate entities, or (iii) 100% unconditionally guaranteed by NAIC CRP rate entities, or (iii) 100% unconditionally guaranteed by NAIC CRP rate entities, or (iii) 100% unconditionally guaranteed by NAIC CRP rate entities, or (iii) 100% unconditionally guaranteed by NAIC CRP rate entities, or (iii) 100% unconditionally guaranteed by NAIC CRP rate entities, or (iii) 100% unconditionally guaranteed by NAIC CRP rate entities, or (iii) 100% unconditionally guaranteed by NAIC CR

A structured security files under this subsection must be filed with a completed SAP, evidence of all NAIC CRP ratings assigned to the obligors in the pool and a prospectus, private placement memoranda or other similar document (which must include a detailed list of all of the obligors in the pool), describing the asset types in the pool and the civility and a ductural components of the transaction.

(5) Suctured Securities Fully Backed by Financial Assets Insured by NATC CRP Rated Insurers

The informational requirements described in this sub-paragraph should be read together with <u>Part Three, Section 3(a)(iii) of this Manual.</u>

A structured security backed by financial assets insured by an NAIC CRP rated insurer is an investment instrument backed by underlying financial assets that are insured against individual obligor defaults by a pool insurance policy underwritten by an insurer with an NAIC CRP claims paying ability rating. Such a pool insurance policy must have coverage in an amount equal to or greater than the outstanding balance of the pool's assets.

A reporting insurance company may file such a structured security with the SVO and the SVO may assign an NAIC Designation in

reliance on the claims paying NAIC CRP rating assigned to the pool insurer per the informational requirements described in this Section and the analytical procedure described in <a href="Part Three">Part Three</a>, Section 3(a)(iii) of this Manual.

A structured security filed under this subsection must be filed with a completed SAR, evidence that the pool insurer is rated by an NAIC CRP, a prospectus, private placement memoranda or other similar document describing the pool and a copy of the pool insurance policy including the proof of loss and claim form together with a description of the claims processing procedures employed by the pool insurance issuer.

#### (6) Commercial Mortgage-Backed Securities

Please refer to <u>Part Seven, Section 5(b) of this Marial</u> instructions applicable to commercial mortgage-backed sectities (CMBS).

#### (7) Real Estate Investment Trust

In the case of debt or preferred stock of a recess ate in streent trust (REIT) not rated by an NAIC CRP, the reporting insurance company shall provide the documentation specifier in Section 10(c)(i)(B) of this Part below.

#### (8) Structured Lottery Securities

If more than one lottery prize is transferred to a trust (or similar entity), the security created the object is characterized as a structured security. Refer to Part Three, Section 3(b)(i) and 4(c)(vi)(B) of this Manual respectively for a cooring on of criteria for structured lottery securities and legislatures are criteria relevant to Structured Lottery Securities.

#### (iv) U.S. Government Securities

(A) U.S. Governme. Securities required to be filed with the SVO

U.S. Go can be not lebt that is not issued by, or guaranteed or insured by those entitle listed in <u>Section 4(c)(i)</u> and <u>(ii) of this Part</u> above are so sect to the filing exemption provided for in <u>Part Two, Section 4</u> (d) rule when rated by an NAIC CRP, otherwise, must be filed with the SVO.

- (B) SVO Publishing Conventions for Filing Exempt U.S. Government Securities
  - (1) U.S. Treasury Obligations

U.S. Treasury Obligations are added to the VOS Process automatically, and they appear in the VOS Product. The NAIC Designation is **NAIC 1**.

(2) Other Filing Exempt U.S. Government Securities

A single entry is in the AVS+ Products in its normal CUSIP sequence, followed by the description "All Issues" on the securities listed in Section 4(c)(i) and (ii) of this Part above.

Because these securities are Filing Exempt, Cos. numbers are not published in the AVS+ Products. The securities she ld, however, be reported with a CUSIP in the appropriate section of <u>Schedule D</u>. The NAIC designation is **NAIC 1**.

(C) Filing Requirements for U.S. Governmen, Security

No filing is required for the recuritie seemed exempt from filing pursuant to <u>Section 4(c)(i)</u> and <u>not his Part</u> above unless a state insurance department has specifically requested the SVO to evaluate an exempt security.

For U.S. Government's surines required to be filed with the SVO, the reporting insurance company shall submit: (a) a completed SAR, and (b) a prospectus of the security that includes a description of the U.S. government program under which it is issued, and appropriate evidence the unessecurity or other obligation is backed by the U.S. government are agency of the U.S. government or a U.S. government specific enterprise.

A varily of documents are acceptable as evidence that the issuer in question has some degree of support from the U.S. government. A council of the legislation that created the entity or the program is acceptable as evidence of government support. Additionally, a copy of the guaranty or insurance policy for the transaction is also good evidence of government support. Another acceptable form of evidence is evidence of an NAIC CRP rating with a copy of the rating rationale memorandum discussing the role of U.S. government support. Oftentimes, the prospectus for the security describes in sufficient detail the relationship of the entity to the U.S. government, its agency or its government-sponsored enterprise.

It is not enough to merely establish a relationship between the U.S. government and the entity. It is necessary to provide materials that

specifically describe all of the financial terms of the obligation and the manner in which the U.S. government will pay the obligation.

#### (v) Foreign Sovereign Government and Supranational Entities

A reporting insurance company that owns a security issued by a foreign sovereign government, an agency or political subdivision of a foreign sovereign government or a supranational entity (entities with more than one sovereign government as a member), or that is guaranteed directly or indirectly by such an entity, must file such security with the SVO accompanied by a prospectus, investment committee memorandum and proof of rating from an NAIC CRP unless it is filing exempt as defined in Section 4 (d) of this Part above.

Insurance companies shall not file issues with the SVO if the issuer does not have a sovereign rating from an NAIC CRP. If the issuer is not rand by an NAIC CRP, proof of a guarantee from an NAIC CRP-rated region sovereign government may be submitted. See <a href="Part Three, Section (a)(ii)...of this Manual">Part Three, Section (a)(ii)...of this Manual</a> for instructions for issuers with unaudited fit includes statements.

#### (vi) Mutual Funds

Any money market fund wishing to establish that it me to the conditions for listing on the <u>U.S. Direct Obligations/Ful Faith and Credit Exempt List</u>, and any bond mutual fund wishil a to e tablish that it meets the conditions for listing on the <u>Bond List</u>, must submit a completed submission package to the SVO with the rollowing documentation:

- (A) The appropriate money man at or bond mutual fund application form
- (B) Authorization letter requesting review of the fund for approved at purposes
- (C) Prospectus of the further
- (D) Statement of Ada. onal Information (SAI);
- (E) Most ecent annual report of the fund, and, if more recent, the lates semi-annual report; and
- (E) Rating letter from an NAIC CRP dated in the year of the filing.

Reporting a turance companies that invest in mutual funds on the <u>U.S.</u>

<u>Direct Obligations/Full Faith and Credit Exempt List</u>, or <u>Bond List</u> need not lie an SAR with the SVO. Mutual funds not rated by an NAIC CRP, at Volume that do not meet the above-listed documentation requirements, will not be considered for listing.

#### (vii) Exchange Traded Funds

(A) No Purchase / No Initial Report

An insurance company must make an Initial Report in connection with shares of an Exchange Traded Fund (ETF) only when it has purchased the shares of an ETF. If the insurance company has not purchased shares of the ETF when it files the application for <u>RTAS---- Regulatory Treatment Analysis Service</u>, then the insurance company is not obligated to file an Initial Report with the SVO at that time.

(B) Purchase Prior to or Contemporaneously with RTAS—Entraing Investment Vehicle Service Application

If the insurance company has purchased shares of the ETF when it files the RTAS -- Emerging Investment valide service Application, the insurance company should file an actiful by port with the SVO at the same time as it files the RTAS. Emarging Investment Vehicle Service Application.

An Initial Report of share on the End of the Corporate Pond of Form and a statement that the insurance company has submitted as PT S -- Emerging Investment Vehicle Service Application to the SVO for the shares of the ETF.

(C) Purchases Substrient to Listing of ETF on ETF List

If an insurance of appany purchases shares of the ETF after the SVO has place at the name of the ETF on Part Six, Section 2(i) or (j) of this Manual, other the insurance company should ascertain whether another insurance company has reported purchase of the ETF to the SVO. If no other insurance company has previously reported the purchase of shares to the SVO, then the insurance company should file as Initial Report as discussed above in Section 10(a) of this Part. Section 2(d) of this Part above for a description of how to determine if another insurance company has already reported the purchase of the shares of the ETF.

<u>Public Common Stock, Private Common Stock, Warrants, Foreign</u> <u>Common Stock or Preferred Stock</u>

<u>Part Five, Section 1 of this Manual</u> permits insurance companies to self-value common stock, preferred stock or warrants.

Public common stock not restricted is exempt from filing with the SVO pursuant to Part Two, Section 4 (d) (i) (C) of this Manual.

The following documentation requirements therefore apply only when these securities must be reported to the SVO for whatever reason despite

the primary instructions contained in because the insurer has elected to have the SVO provide a valuation identified as methodology "e" under Part Five, Section 1 (b) (iii) Valuation Methodologies and Corresponding Reporting Codes of this Manual. Such a filing with the SVO may be required, for example, if the insurer wants to obtain a value for the security that the SVO has not previously valued for another insurer or if the state insurance department has directed the insurer to file the security with the SVO for valuation.

#### (A) Public Common Stock

If the common stock is listed on any exchange, the reporting insurance company must submit the most recent Bloomber Description Screen or other acceptable screen, if available, the with the issuer's Audited Financial Statement.

If the public common stock is restricted as to transferable, the issuer's most recent annual report, a copy of the common stock certificate showing the limitations on transferability for any other document that details such limitations), the issuer's Audit L'Eblancial Statement for the last three years and a win tell description of the daily price trading range for the past six months in 1st be submitted.

#### (B) Private Common Stock

For either restricted or non-restricted protate common stock, the reporting insurance company shall support the issuer's annual report for the most current three years glogethe, with Audited Financial Statements for those years, if the annual report), the stock purchase agreement and the common stock certificate (front and back), so the sevidence of restrictions.

#### (C) Warrants

If the warrant is trained or the New York Stock Exchange, the American Stock Exchange or the NASDAO National Market System, the porting insurance company shall submit the issuer's Bloomberg Description Screen. For a warrant listed on any other domestic or anaulan exchange, the reporting insurance company half so mit the issuer's Bloomberg Description Screen, together with the suer's audited Financial Statement.

#### (D) Foreign Common Stock

The reporting insurance company shall submit the issuer's most annual report (together with the issuer's Audited Financial Statement if it is not a part of the annual report) and/or the most

recent equity/credit research reports by NAIC CRPs or other rating organizations, if available.

#### (E) Preferred Stock

#### (1) Rated

In the case of an NAIC CRP- rated preferred stock that must be reported to the SVO for whatever reason despite the availability of the filing exemption provided in Section 4(d) of this Part above, the reporting insurance company shall submit any sek purchase agreement and the issuer's Certificate or Articles of Inc. sporation setting forth the terms and characteristics and be rights and preferences of the preferred stock and evidence on pach NAIC CRP rating which may be in the form of a copy of the page from the NAIC CRPs rating publication showing the date of the polication. If the issue is rated below "A" or is rated differently by two more NAIC CRPs, a prospectus or private placement me orandum, the most recent issuer's annual report and a rating sationale memorandum from each NAIC CRP which that a the transaction must accompany the submission.

#### (2) Unrated

In the case of a p. ferred stock not rated by an NAIC CRP, the reporting insurance company shall submit any stock purchase agreement and the assuer's Certificate or Articles of Incorporation seeing part the terms and characteristics and the rights and preferences of the preferred stock, the issue's prospectus or private placement permorandum and the Audited Financial Statement of the issuer or the last three consecutive years.

#### SECTION 11. SUBSEQUENT REPORTING

#### a) Annual Filing Requirement

#### (i) Filing Exempt Securities

No subsequent report is required for the purposes of valuation of securities under <u>Part Five</u>, <u>Section 1 of this Manual</u> and no subsequent report is required for filing exempt securities unless they no longer qualify as filing exempt. Instructions for filing exempt securities are detailed in <u>Section 4(d)</u> of this Part.

#### (ii) All Other Securities

Any insurance company that owns a security listed in the VOS Process which is not filing exempt as set forth in Section 4(d) of this Part above can satisfy subsequent reporting requirements by filing the additional of annual information described below. For purposes of this Manual, it assumed that reporting responsibility is borne by the company that has filed the Initial Report. However, the SVO recognizes the possibility that the initial reporting insurance company may have sold in investment. Therefore, any insurance companies with an interest in solvrity, ay need to submit the information necessary to enable the 1/O to complete its annual review. Annual filings should be reported to the 2VO on the Annual ATF.

#### b) Material Credit Events Filing

It is the responsibility of the reporting insurance con pany to file all information that indicates a change in the credit chara teristics of the issuer or a material change in the terms of the agreement.

What constitutes a material change with vary accordance with the nature of the transaction. For purposes of this substition, a material credit event is any occurrence that affects or is suct antially kely to affect the issuer's ability to pay the obligation in accordance with its parts.

A determination that a bold is impaired for purposes of <u>SSAP No. 26R—Bonds</u> is a material credit event under this subsection. Accordingly, when an insurer determines that a bond impaired under <u>SSAP No. 26R</u>, it shall file relevant information (ith the SVO) inder this subsection.

Material events should be reported to the SVO on the Material Change/Additional of formation ATF. The SVO assumes that the information filed with select and will reflect all information relevant to the material event in the posses, ion of the reporting insurance company. The SVO will not audit the information submitted by the insurance company.

#### c) Post Default Credit Quality and Valuation of Defaulted Securities

#### (i) General Instructions

Issuers of defaulted securities often emerge from reorganization or private restructuring and their pre-default liabilities may have been modified but remain viable as modified. When this is the case, and the insurance company can demonstrate that it has accounted for the loss of fair value consistently with <u>SSAP No. 36—Troubled Debt Restructuring</u>, the SVO will assign a credit quality designation to the defaulted security to reflect the issuer's post-default credit risk.

## (ii) Procedure for Determining a Post-Default Fair Value 1 a Loan or a Security

Any insurance company that owns a previously a faulted security can file relevant information with the SVO to obtain a nir value for the security or loan, or in the alternative, may calculate a a value for the loan consistent with <u>SSAP No. 36—Troubled Debt Resusturing</u> d report the fair value obtained and a copy of its work papers and ther information about how the fair value was determined, to the SVO

Where the insurance company has hind information with the SVO and requested that the SVO determine a dir value, the SVO shall calculate a fair value for the security or to a and communicate its determination to the insurance company in whiting and enter the fair value in the VOS Process.

Where the insurance company has calculated or wishes to calculate the fair value, it may report its determination to the SVO with an explanation of the methodologic used to arrive at the fair value. The SVO will consider the information, sovictur and determine whether in its opinion, the fair value of med by the injurance company is reasonable or unreasonable. The SVO extermination will be entered into the VOS Process and will also be concludicated to the insurance company and the domiciliary regulator in writing.

#### Procedure for Obtaining a Post-Default Credit Assessment

Contemporaneously with the filing contemplated in Section 11(c)(ii) of this Part above, the insurance company shall file current financial and other relevant issuer information so that the SVO can determine the issuer's financial condition and a current NAIC Designation for the security. The SVO will not assign an NAIC Designation unless the fair value for the loan or security has been calculated consistently with SSAP No. 36—Troubled Debt Restructuring.

(iv) <u>Issuer Amends or Refinances an Existing Issue as a Non-Troubled</u> Restructuring

Insurance companies who determine that a restructuring or workout of a transaction is not a troubled restructuring under <u>SSAP No. 36—Troubled Debt Restructuring</u> shall file information about the transaction and its determination to enable the SVO to express an opinion on the matter. The SVO shall provide its conclusions in writing to the insurance company and the domiciliary insurance department.

(v) Required Documents for Credit Assessment and Valuation Analysis

The general informational requirements applicable to credit assessments are contained in <a href="mailto:this Part Two">this Part Two</a>. In addition, for purposes of the valuation discussed in this <a href="mailto:Section 11(c)(ii)">Section 11(c)(ii)</a>, (iii) and (iv) of this Part above, the insurance company should submit the following documentation to the SVO within 120 days of closing:

If a new issue, Sources and Uses of Funds Statement, including:

- Listing of new loan participants and allocations
- Listing of previous participants and accounted payment disbursements
- Breakdown of previous issue repayment (and exclusion of any write-off/ realized loss or waiver, by type) of:
- Principal balance
- Accrued interest
- Deferred financing fees and charges
- Unamortized premiums of disco
- Make-whole provision

#### If amended, then:

- Breakdown and explanation of any write-off, realized loss or waiver of:
- Principal bala ce
- Accrued interes
- Deferr a final sing fees and charges
- name tized p emiums or discount
- Man whole provision
- Covena. 's
  - Breakdown and description of any amendment fees received
- Cory of the original, executed Note Agreement and Schedules and all Executed Amendments (including those to Inter-Creditor and Security Agreements) to date

- Pricing rationale, including basis for current credit risk assessment & Comps
- If secured, Collateral Loan Form, including:
- Most recent Compliance Certificate and financials from the company, including calculations and comparison to covenant levels in effect at period-end.

## d) Analytical Conventions Applicable to Valuation and Credit Assessment of Loans or Securities on a Post-Default Basis

#### (i) <u>Issuer Liquidation</u>

The SVO will maintain any non-liquidated assets of an issue in liquidation at **NAIC 6** provided that the insurance company may he a request for a reassessment of credit quality of the loan where here is new underlying credit support for the obligation. As a general reason in an issuer liquidation of a bankruptcy-remote entity, the SVO sumes the liabilities to be permanently impaired, in the absence of each denote the contrary.

#### (ii) Reorganizations under Chapter 11 of e US ankruptcy Code

The SVO will maintain the NA's exignation of any issuer liability subject to compromise (i.e., any liable of the issuer that has not emerged intact from the reorganization) at NAI & Bankruptcy-remote liabilities may be other than temporarily inpaired but may be upgraded from NAIC 6 to reflect the credit lisk of the new obligor, provided the insurance company has recognized at his as equired by <u>SSAP No. 36—Troubled Debt Restructuring</u> in prior year as discussed in <u>sub-paragraph (c) above</u>. New securities issued the interval of the compromised liabilities on emergence from bankruptcy will be reevaluated in line with the credit of the post-bankrupt entry.

#### (iii) York-out of Restructurings Resulting in Modified Terms

The vida ce in this sub-paragraph applies whether new securities are issued a not. Whenever an insurance company has agreed to discuss a modification of the terms of an existing obligation, <u>SSAP No. 36—Troubled Debt Restructuring</u> is implicated and the event is a material credit event within the meaning of <u>Section 11(b) of this Part</u>. Reporting a work-out situation to the SVO as soon as practicable after the decision to restructure the transaction is taken, will enable the SVO to work with the insurer to estimate the fair value of the loan and the credit quality of the issuer.

#### e) Reporting Conventions and Required Documents

Specific reporting conventions that all reporting insurance companies should follow are described below.

#### (i) Corporate Issues not Filing Exempt

#### (A) Rated

- The a propriate money market or bond mutual fund a catic form;
- (B) Prospectus and Statement of Additional Information of the fund:
- (C) Most recent annual report of the fund and, if more recent, the last semi-annual report; and
- (D) Rating letter from an NAIC CRP dated in the year of the filing.

Failure to provide the information required may result in removal of the money market fund or bond mutual fund from the list.

#### (vi) Exchange Traded Funds

Subsequent Reporting is not required for shares of an Exchange Traded Fund (ETF), provided the ETF is then listed on the <u>ETF Bond</u> or <u>Preferred Stock List</u>. If the ETF is no longer listed on the <u>ETF Bond</u> or <u>Preferred Stock List</u>, the insurance company shall provide the SVO a copy of the most recent prospectus for the ETF.

#### SECTION 12. STANDARD INDUSTRIAL CLASSIFICATION (SIC) CODES

#### a) General

The SVO will not publish SIC Codes in the AVS+.

The general rule for applying these codes is to ascertain the business of the primary payer of interest, principal, lease or guarantee on the relevant cash flows. In those instances where more than one SIC Code has been assigned to establishments within the organizational structure of the entity issuing the investment the SIC Codes listed should be the SIC Codes which best describe the primary activity, principal product, group of products, or services rendered of the issuing entity.

If the issuer's security is guaranteed or contractually supported by another entitivith a superior rating, the code assigned should be that of the under ing guarantor or supporting creditor of the security. Insurers may complete the last two digits of the code if they have such information.

#### b) Sectors/Industries and Corresponding SVO Analysts

#### a) Methodology for Independent Credit Quality Assessments

Corporate bonds defined as the Obligations of domestic and foreign corporations, and preferred stock shall be distinguished on the basis of the categories discussed below. The creditworthiness of the issuer of any particular category of Obligation shall be assessed by reference to the general, and any special, rating methodology discussed in this Part, unless the context of the analysis requires a different approach.

Section 1.

#### (i) <u>Independent Assessment</u>

If the security under consideration is unrated on if a analyst has conducted an independent analysis of the NAIC CRP reled security, the analyst shall make an independent assessment of the issue, the security or both.

#### (ii) Financial Analysis

#### (A) Audited Financial Statement Regulary

As a first step in the independent assessment, the analyst shall conduct an independent inancial analysis of the issuer based on the financial information presented in the Audited Financial Statement, as defined in this Manual

The SVO shall be its financial analysis on at least three years of historical auditor financial information and a minimum of one year of projector financial information (if available) when the issuer has an operating belong of three years or more.

Howeve the sVO may assign an NAIC Designation based on less than three years of financial information in circumstances where the issue's perating history is less than three years or because the issuer's legal centity has been subsumed as a result of a merger into a new entry or due to other documentable business circumstances.

Where three years of financial information is not available, the analyst shall review such information as is available, and shall determine if the time period for which information is available is sufficient to produce a professionally sound opinion.

#### (B) Calculation of Ratios

Financial analysis shall culminate in the calculation of such financial ratios as the analyst feels highlight appropriate aspects of the financial performance of the issuer that bear on its ability to meet the obligation owed to the insurance company.

#### (C) Foreign Securities

- (1) Where a reporting insurance company has filed a foreign security accompanied by an Audited Financial Statement, in English, the SVO will assess the security in accordance with the applicable corporate methodology, but the NAIC Designation it may assign shall be limited by the sovereign rating of the issuer's country of origin. This section should not be read as prohibiting the presentation of transactions structured to eliminate foreign sovereign risk.
- (2) The insurance company must file all foreign securities for which the information required by this Manual is available. For those foreign securities held by a "Sub-paragraph D Company" as define below, where the required information is not available for the CO to value the security, the NAIC Designation may be determined by the reporting insurance company. This determination shall sarry a suffix. In no case shall the NAIC Designation exceed the so sreign rating of the issuer's country of origin. The company shall brow de its domestic regulator with a description of the process remused to evaluate and assign ratings to these foreign securities. In addition, the company shall retain the documentation supporting the designation assigned by it until the next domestic insurance department examination.
- "Sub-paragraph D Company" is a fired as a domestic insurer (3) which is holding foreign securities import of its foreign liabilities and where the U.S. gross gremiums of the company are no more than 20 % of its grandle premiums or the amount of the company's gross eserves and other liabilities under contracts of insurance (for life surers grass reserves and other liabilities shall be actuarial reserves and oliginolder liabilities currently reported on page 3, lines 1, 11 of the NAIC Financial Statement Blank, grossed up for reinstance ceded; for property and casualty insurers gross reserves and on a liabilities shall be loss reserves, loss adjustment pens reserves and unearned premium reserves reported on page 3, and of the NAIC Financial Statement Blank, grossed up for a insurance ceded) on lives or risks resident or located in the U.S. are no have than 20 % of its total gross reserves and other liabilities under contracts of insurance as reported on the company's last NAIC in ncial Statement Blank.

The insurer must also maintain a trust fund in a qualified U.S. financial institution for the payment of the valid claims of its U.S.

policyholders, their assigns and successors in interest. The trust shall consist of a trusteed account representing 103% of the company's gross reserves and other liabilities under contracts of insurance on lives or risks resident or located in the U.S. The assets of the trust shall maintain an NAIC Designation as assigned by the SVO and be valued at admitted values carried in the insurer's NAIC Financial Statement Blank. Such trust shall be established in a form approved by the insurer's domestic commissioner of insurance. The trust instrument shall provide that contested claims stall a valid and enforceable upon the final order of any cool of competent jurisdiction in the U.S. and shall allow the substitution without diminution. The trust shall be subject to examination as determined by the insurer's domestic commissioner and the assets of the trust shall be reported in the inser's NOC Financial Statement Blank special deposit schedule. The trust shall remain in effect for as long as the insurer shall qualify as a "Sub-paragraph D Company" and have outstanding obligation und montracts of insurance on lives or risks resident or loans in the J.S.

Section 1.

If a Company which povious qualified as a "Sub-paragraph D Company" no longer quality, any foreign securities held by such company which county as igned an NAIC Designation by the SVO shall be assumed as NAIC Designation in accordance with the procedure set for him sub-paragraph (B) above, Unaudited Financial Statements. Those securities shall be reported by the company with a "2" sub-paragraph (B) for subsequent reporting years.

#### D) Parent Subsidiary Situations

In the case of transactions involving a parent holding company with a fadited Financial Statement and an issuing subsidiary without a separate Audited Financial Statement, the SVO may use the financial statements of the parent holding company as if they were prepared for the issuing subsidiary when the consolidating work papers relating to the issuing subsidiary are provided or when the operations of the parent (i) are limited solely to owning the issuing subsidiary and (ii) the issuing subsidiary constitutes at least 97% of the parent's pre-tax income and assets on a consolidated basis.

#### (iii) Qualitative Analysis; Senior Unsecured Credit

Interpretation of the financial ratios obtained in the preceding section will be conducted in the context of the particular facts of the issuer and its industry. Issuer and industry analysis shall reflect issuer and industry

response to competitive and general economic developments, including industry and issuer growth trends, issuer market position, competitive environment, pricing flexibility, issuer's labor and supply sources, regulatory considerations, quality of management, relevance of special accounting practices applicable to the industry and any other factor that may bear on an assessment of the level of risk associated with the issuer's ability to meet its obligation to the reporting insurance company. This review shall culminate in a preliminary determination of the issuer's senior unsecured credit quality.

# (iv) Terms of the Security; Final Designation

Before determining a final NAIC Designation, the analyst shall consider: (\*) the position of the security in the issuer's capital structure (the NAI) Designation may be scaled up or down based on the security's relation hip to the issuer's senior unsecured debt in the capital structure; (ii) the sufficiency of the legal documentation; and (iii) the terms of the security such as:

- (A) Covenants:
- (B) Structure;
- (C) Collateral;
- (D) Third-party financial support, or the reducenhancements, and;
- (E) Any other credit-related fact specific to the security under review.

# b) Procedure Applicable to Filing Exemple. (FE) lecurities and to Private Letter (PL) Rating Securities

#### (i) Filing Exemption

Bonds, (excluding RML and CME) and Preferred Stock that have been assigned an Eligible NAIC SP Raing, as described in <u>Part One, Section 4</u> (c) (ii) (B) of this <u>Manual</u>, are exempt from filing with the SVO (FE securities).

# (ii) Identification Se rities

The SYO id ntifies E securities as part of its quarterly compilation of the SVO is on Securities. Please refer to Part One, Section 3 (I) of this Manual for discussion of the compilation process. SVO staff then applies the procedures discussed in sub-section (iii) below to the FE securities it is identified in the compilation process to produce the most accurate NAIC Designation equivalent. Per instructions of the VOS/TF, the SVO put ishes the NAIC Designations it produces in the AVS Plus+. The AVS Plus+ contains the official NAIC Designations for any given security.

Insurers use the information in AVS Plus+ to identify and report the SVO assigned NAIC Designation for FE securities they own to the domiciliary state in the NAIC Financial Statement Blank.

#### (iii) Direction and Procedure

The SVO shall produce NAIC Designations for FE securities by applying the following procedure in conjunction with the List of Credit Rating Providers and the Equivalent of their Credit Ratings to NAIC Designations, shown below.

- A Bond or Preferred Stock that has been as uned an Eligible NAIC CRP Rating will be assigned the equivalent NAIC Designation.
- If two Eligible NAIC CRP Ratings have be assigned, then the lowest credit rating will be used: assign the equivalent NAIC Designation.
- In case of a Bond or Prefer of Stock that has been assigned three or more Eligible NAIC CRP Patiegs, the Eligible NAIC CRP Ratings for the Bondor Prefer red Stock will be ordered according to their NAIC equivalents and the credit rating falling second lowest will be used to determine the equivalent NAIC Designation, even if that ratio is equal to that of the first lowest.

The SVO shall not in any matther whatsoever, show, display or disseminate the credit rating of NRs. Os as part of the compilation or publication of the SVC List of Securities in the AVS Plus product or in any other NAIC publication, ssociate, with the operations of the Valuation of Securities (F) rask force.

#### (iv) Securitie

(A) If the ve Date of Verification Procedure for PL Securities

Effective July 1, 2018, insurance companies shall be responsible for providing the SVO copies of private rating letters for PL securities, where applicable, until such time as industry representatives and the SVO shall have established reliable procedures for obtaining the necessary information on credit ratings directly from the NAIC CRPs. For PL Securities issued prior to January 1, 2018, if an insurance company cannot provide a copy of the rating letter to the SVO due to confidentiality concerns and the rating is not included in a CRP credit rating feed (or other form of direct delivery from the NAIC CRP), the insurer shall report such securities on such securities' General Interrogatory to be developed for this purpose

(i.e., a PL GI security). The rules for PL securities identified above do not and shall not apply to PL securities in scope of SSAP 43R for which a Modified Filing Exempt matrix is prescribed for purposes of determining capital requirements.

#### (B) Definitions

For purposes of this paragraph, the phrase "private rating letter" means a letter or report issued by an NAIC CRP on its letterhead or its controlled website to an issuer or investor, obtained by an insurer in its capacity as an investor in the issuance or by following the confidentiality process established by the NAIC CRP. The phrase "privately rated security" means a security issued by an issuer wherein the issuer has solicited a credit rating for the issuance from a NAIC CRP and the NAIC CRP has agreed to issue a credit rating for the issuance to be communicated to the issuer and a specified paup or investors only and not publicly released via the NAIC CRP's paralled data feed or website. The privately rated security is the subject of the private rating letter and is referred to herein as a prival letter (PL) security.

# (C) Conditions to Filing Exemption for PL securities issued to or a ler January 1 2018

PL securities are exempt from filing with the SVC for assignment of an analytically determined NAIC Demation of the security has been assigned an Eligible NAIC CRP Condit Rain and the insurer verifies the rated status of the PL security is SVO. If the PL security is not rated by an NAIC CRP or a credit rating is assigned that is not an Eligible NAIC CP dit Rating; or if the insurer cannot provide the SVO a private lating letter verifying that the assigned credit rating is an Eligible NA. CRP Crulit Rating; or the NAIC CRP cannot provide the Eligible N. IC RP Credit Rating on the PL security to the NAIC through an electronic data feed approved by the SVO and that specific identifies the PL securities rated by that NAIC CRP, the PL security's not filing exempt. An insurer that owns a PL scurit (that is not filing exempt shall either: 1) file the security with ne ssary documentation with the SVO for an analytically determined NAIC Designation; or 2) self-assign an NAIC 5\*GI to the security and report using the Interrogatory procedure; in either case within 120 days of purchase.

(D) Conditions to Filing Exemption for PL securities issued prior to January 1, 2018

PL securities are exempt from filing with the SVO for assignment of an analytically determined NAIC Designation if the security has been assigned an Eligible NAIC CRP Credit Rating. If the PL security CRP rating is not included in the applicable CRP credit rating feed (or other form of direct delivery from the CRP) or the insurer cannot submit the private letter rating to the SVO because of confidentiality provisions, the security shall be designated PLCL. In our ers shall report on all such securities in a General Interpolatory with an attestation that all such securities have an Eligible RP Seedit and are reflected in the financial statements and risk based a pital calculation commensurate with that rating

#### (E) Procedure

The NAIC shall create systems and devel pland staff administrative and operational procedures to be a ministered by the SVO to identify insurer-owned PL securities verify whether or not the assigned credit rating is in En ible NAIC CRP Credit Rating and either translate that credit riting into its equivalent NAIC Designation and input the NAIC Designation for the security into the appropriate PL IC systems or notify the insurer that the security is not eligible of films exemption.

(F) SVO to Administer Administer Volfication Procedures

It shall the responsibility of the NAIC to create and maintain for the CVO, electionic facilities to accept: 1) electronic data-feeds purified by NAIC CRPs containing and specifically identifying the PL securities rated by that NAIC CRP and the credit rating assigned to the L securities; or 2) PDF files of private rating letters provided to the SVO containing the NAIC CRP credit rating for the PL security.

(G) The PL Process

It shall be the responsibility of the SVO to identify PL securities in the AVS+ system for insurance companies to use when reporting PL securities to the NAIC as part of the NAIC's Financial Statement Blank reporting process. The SVO identifies PL securities when it conducts the quarterly compilation of the SVO List of Securities. Please refer to <a href="Part One">Part One</a>, <a href="Section 3">Section 3</a> (I) of this Manual for a discussion of the compilation process.

- (H) Producing NAIC Designations for PL Securities
  The SVO shall produce NAIC Designations for securities subject to private letter ratings as follows:
  - The insurance company shall file a copy of the private rating letter with the SVO if not included in the applicable NAIC CRP Rating feed(s) (or other form of direct delivery from the CRP) noted above in (C). In instances where the PL security is included in the applicable NAIC CRP Rating feed(s), the SVO shall follow the procedure in (iii) above.
  - In instances where a private letter is filed, the SVO shall evaluate the private letter to determine whether the security has been assigned an Eligible NAIC CRP Rating in accordance with Part One, Section 4(c)(ii). Similar to public securities where rating is received directly from the Co. R via electronic feeds, conditions 3 and 4 of Part One Section 4(c)(ii) are deemed to be met, as a normal part of the CRP rating process, absent evidence to the contrary in the rating letter (e.g., evidence that the rating applies only is principal or interest, in a deviation from the normal Co. Prating process).
  - If the SVO verifies that the security has been assigned an Eligible NAIC CRP Rating, it assigns an NAIC Designation in accordance with the policy and procedure specified in subparagraphs (i) and (ii) above. The assumption in the application of this step of the procedure is that PL securities are typically assigned acredit using by only one NAIC CRP. However, if this assumption is inaccurate for any PL security, the SVC applies the same procedure specified for FE securities above in (iii)
  - If the SVO verifies that the security:
    - o Has been assigned a credit rating but that the credit rating is not an Eligible NAIC CRP Credit Rating; or
    - o Has not been rated by an NAIC CRP; or
    - Is no longer subject to a private letter rating;

The SVO shall notify the insurer that the security is not eligible for filing exemption. The insurance company shall then either file that security and necessary documentation with the SVO for an independent credit assessment per Section 1 (a) of this Part or assign

an **NAIC 5\*** GI Regulatory Designation to the security in the related Interrogatory.

An NAIC 5\* designation may also be used in connection with the designation of PL securities rated by an NAIC CRP (i.e., for private letter ratings issued on or after January 1, 2018) when the documentation is not available for the SVO to assign an NAIC Designation. For purposes of this section, the documentation is not available for the SVO to assign an NAIC Designation if the NAIC CRP credit rating is not included in the applicable CRP c. dit rating feed (or other form of direct delivery from the NAIC CRP) and the insurer is unable to provide a copy of the provide a return documentation necessary for the SVO to as gn an NAIC Designation.

# (I) Policy Considerations

In connection with the implementant of the verification procedure for PL securities, the Task Price acknowledges that the practices adopted by NAIC CRPs in relation to the distribution of private rating letters for what 's (NAIC refers to as PL securities, including their confidentiality processures and agreements, are integral to the business models of private for profit entities that the NAIC does not regulate and which the NAC stands in the relation of a customer of rating service. Accordingly, the SVO, as NAIC staff, shall not be responsible for neutrating with NAIC CRPs to modify their confider talifunctions or provide data-feeds to the SVO. However, if an NAIC COP shall determine that it is willing to modify its siden ality provisions or provide such data-feed or an alternative proce, so that the SVO can obtain electronically, copies of private rating of the term for PL securities issued by that NAIC CRP instead of by grang insurers to provide PDF files, then the SVO is authorized to work with the NAIC CRP to obtain and integrate the private rating letters or the data-feeds into NAIC systems to create electronic processes that will permit electronic verification that the insurer owned PL security have been assigned an NAIC CRP Eligible Credit Rating. Individual insurers and or representatives of the insurance industry are encouraged to find ways to resolve confidentiality restrictions imposed by NAIC CRPs on the private rating letter or to influence the process as investors to encourage NAIC CRPs to provide the data-feeds to the SVO or alternative methods to permit the SVO to obtain NAIC CRP credit ratings for PL securities to be

used to administer the PL securities verification procedure specified in this section.

# (v) Application of the FE Procedure to Specific Populations

- The filing exemption procedure does not apply to investments required to be filed pursuant to Part Two, Section 8 of this Manual.
- Catastrophe-Linked Bonds are filing exempt provided the credit rating assigned to them by a CRP was derived in a specified manner. Please refer to Part Four, Section 4 of this Manual.

#### (vi) List of NAIC CRPs

The CRPs that provide Credit Rating Services to the NAIC, either pursuant to the terms of <u>Section 4 of this Part</u> or otherwise, are:

- Moody's Investor's Service, for credit ratings issued to financial institutions, brokers, or dealers; insurance companies; comporate issuers; issuers of asset-backed securities and issuers of government.
- Standard and Poor's, for credit ratings issued to manch institutions, brokers, or dealers; insurance companies; corporate issue s; issuers of asset-backed securities and issuers of g verm ant securities, municipal securities, or securities issued to a foreign government.
- <u>Fitch Ratings</u>, for credit ratings used a financial institutions, brokers, or dealers; insurance companies, proprate issuers; issuers of asset-backed securities and ssuer of government securities, municipal securities, or securities assued by a foreign government.
- <u>Dominion Bond Rationarvice (DBRS)</u>, for credit ratings issued to financial institutions, brokes, or dealers; insurance companies; corporate issuers, suers of sset-backed securities and issuers of government securities, numbrical securities, or securities issued by a foreign government.

# (viii) Securities no longer assigned an Eligible NAIC CRP Cred ( Rah.

Any Bond or Preferred Stock that at one time was assigned an Eligible NAIC CRP Credit Rating by an NAIC CRP but is no recognized must be filed with the SVO within 120 days of the loss of the credit rating, as if the security had never been filing exempt.

# (ix) Limitations on Use of NAIC CRP Ratings,

(A) NAIC Designation Is Capped To Highest VAIC CRP Rating

The SVO shall not assign an NAIC Disignation for a rated security that reflects an opinion of a cit quarry greater than that indicated by the rating assigned by an NAIC CRP, except as provided in Paragraph (B) below, and except that the SVO may assign the NAIC

(1) Mun, val be ds and:

Designation it dee as appropriate to:

- (2) Military he sing bonds or securities as defined in <u>Part Four,</u> Sestion (b) is Manual.
- (B) Solit K tings

For ling tempt securities as defined in Part Two, Section 4 (d) of this Nanual, the NAIC Designation assigned will be the NAIC Designation equivalent that results from the application of the filing exaption process described in Part Two, Section 4 (d) of this Manual. This rule will also apply to replication transactions defined in Part Four, Section 2(a) of this Manual and other instances where NAIC CRP ratings are used by the SVO.

(C) Unrated Transaction of Issuer with NAIC CRP Rated Debt

When presented with an unrated security of an issuer that has another issue rated by an NAIC CRP, the staff may consider the rated issue and its position in the capital structure of the issuer to arrive at an NAIC Designation for the unrated security, provided that the staff shall first consult with the rating agency and independently consider the terms of the unrated security and its impact on payment risk.

#### General Procedure for Credit Assessment and Classification of Preferred Stock

The following provisions apply to all preferred stock subject to notching to reflect its position in the issuer's capital structure pursuant to <u>Part One, Section 3 (b) (iii)</u> (B) of this Manual.

#### (i) Preferred Stock Not Rated By an NAIC CRP

# (A) Determining an NAIC Designation

The analyst shall first ascertain the senior unsecured debt rating of the issuer by applying the credit assessment procedure for bonds specified in <u>Section 1(a) of this Part</u>. Once the issuer's senior unsecured NAIC Designation has been established, the analyst win adjust the associated NAIC Designation to reflect:

- (1) The position of the preferred stock in the capital structure the issuer:
- (2) A determination that the debt level in the issuer capital structure would, or would not impede the ability of the issuer to pay interest or dividends to the preferred stock have and whether earnings are likely to be sufficient to pay such interest or dividends (whether or not the issuer is contractually obligated to make such payments); and
- (3) Whether all preferred divisions to been paid or sinking fund requirements have been met for be last bree years. If not, the analyst shall not assign an N/. 1, 2 3 Designation to the preferred stock.

Once these adjustments have been considered, the analyst shall then determine and assirt, the ment appropriate NAIC Designation to the preferred stock.

#### (B) Classification of Preferred

The analyst shall review the terms and underlying characteristics of the security. It is issuer is required to redeem the security or the holder became it wocable put or the terms of the security contain a tother provision to the same effect, the security shall be eligible for a **RP** valuation indicator. If the security does not contain a mane tory redemption, an irrevocable put or another provision to the same effect, the security shall be eligible for a **P** valuation indicator. The final classification decision made by the SVO shall be a filtered by the degree of synergy between different provisions or characteristics of a security, the regulatory objectives of the NAIC and the SVO's exercise of analytical discretion. The **RP** and **P** 

valuation indicators are assigned for the purposes outlined in <u>SSAP</u> <u>No. 32—Preferred Stock</u>.

#### (ii) Preferred Stock Rated by an NAIC CRP

# (A) Determining an NAIC Designation

#### (1) Rated Preferred Issue

If the preferred stock is rated by an NAIC CRP, the SVO shall note the equivalent NAIC Designation for the issue and then apply the instructions outlined in Section 1(c)(i)(A)(2) and (3) 5 this Part above. If necessary, the analyst shall adjust the NAIC Designation equivalent to the NAIC CRP rating as a port, siate. If no adjustment is deemed necessary to the NAIC Designation equivalent to the NAIC CRP rating, the analyst shall assign the NAIC Designation equivalent to the NAIC CRP rating to the preferred stock as provided for in Part One, Sectio. 4 (c) (ii) of this Manual.

#### (2) Issuer Rated, Preferred Issue Noth ated

The analyst may determine the issuer's senior unsecured designation by converting the rate assigne I by the NAIC CRP to the issuer's outstanding debt into an equivarient NAIC Designation. Once the senior unsecured designation level has been established, the analyst may adjust the NAIC Designation associated with the issuer's senior unsecured designation level by applying the instructions outlined in Section 1(2)(i)(A) and (3) of this Part above, to the unrated preferre stars. The analyst shall then determine the most appropriate NAIC Designation and apply the NAIC Designation to a preferred stock.

# (3) Is Jer Rated, With Other Preferred Stock Rated

The alyst may determine an NAIC Designation for an unrated preferred by comparing the unrated preferred stock with the outstanding rated preferred stock. The analyst will make such adjustments as are necessary to account for dissimilar features in the two securities and shall also apply the instructions discussed in Section 1(c)(i)(A)(2) and (3) of this Part above, to the unrated preferred stock. The analyst shall then determine the most appropriate NAIC Designation and apply the NAIC Designation to the preferred stock.

(B) Classification of Preferred Stock

The analyst shall apply the procedure discussed in Section 1(c)(i)(B) of this Part above to classify the preferred stock with either an  $\bf RP$  or  $\bf P$  valuation indicator.

SECTION 2. CORPORATE BONDS AND PREFERRED STOCK – SPECIAL ASSESSMENT SITUATIONS

Bonds and preferred stock that fit the description set out below shall be subject to the general procedures specified above as well as the specific or special procedures identified below.

#### a) Eleemosynary Organization Bonds

The bonds of any eleemosynary organization shall be subject to the general corporate methodology for assigning an NAIC Designation to bonds.

## b) Debtor-in-Possession (DIP)

DIP financings are post-petition loans made to a company but has filed for protection under <u>Chapter 11 of the United States Bank upter Code</u> (Code). A copy of the court order approving such financing must accominant loans made pursuant to <u>Sections 364(b)</u>, (c) or (d) of the Code that are submission should also include a complete coof accumentation pertaining to the loan and, if so requested by the SVO states a legislationion or analysis of the DIP lender's status with regard to the debtor's pre-putition creditors.

## c) Credit Enhanced Transactions

A credit enhanced transaction is one in which the application for an NAIC Designation is based on the substitution of the credit rating of another party for that of a lesser rated obligor. The credit substitution is effected through the use of contractual arrangements that bind the other party to make full and timely payment directly or inductly to noteholders, to make such payments upon obligor default or to prochase a publication. The promise of the obligor to make the required payments attain be represented by a guarantee, a revolving credit agreement, financ Linsurance policy or other credit enhancement device.

The staff shall recus of the extent to which the legal documents ensure that the credit of trength of the support entity flows through unimpeded to the security holder. The SVO hall examine the degree to which the payment obligation of the other party as the still and timely payment of all amounts due to security holders. Fators relevant to this analysis include: irrevocability of the supporting party's obligation to pay, the effect of debtor insolvency on payments made by the debtor and Yor the other party to the insurance company lender and the other party's credit rating. The analyst may review corporate resolutions of the issuer, the parantee or other agreements binding the other party to pay for the debt of the debtor, the indenture or other similar document governing the remedies, opinions of counsel regarding enforceability of the obligation of the other party, the payment stream under applicable insolvency laws or other regulatory regime, or any other documentation that may be considered necessary.

#### d) SCA Debt and Preferred Stock

This section applies to credit assessment of any SCA investment in the form of a debt instrument purchased (or otherwise acquired) from an insurance or non-insurance entity (SCA debt) and preferred stock issued by a non-insurer entity (SCA preferred stock). This procedure is used to determine whether an SCA debt or SCA preferred transaction is eligible for reporting as an Investment Security pursuant to Part Two, Section 2 (a) of this Manual.

#### (i) Procedure

Prior to applying the procedures required by <u>Part Five, Section 2 of this Manual</u>, the SVO shall:

- (A) Confirm that the SCA relationship has been reported to the NAI Financial Reporting Services Division
- (B) If the SCA common stock transaction was reported and for \$\frac{1}{2}\$ to be reasonable, the SVO shall:
  - (1) Inform the state insurance department of the resisting insurance company's state of domicile that the SCA white SCA preferred stock has been filed with the SVO.
  - (2) Evaluate whether the SCA debt of SCA referred stock is an arms-length and an economic transaction within the meaning of NAIC statutory accounting guidance on a fated party transactions.
  - (3) Evaluate whether the SCA ebt SCA preferred stock transaction is circular within the meaning of Part One, Section 2(c)(ii) of this Manual.
  - (4) In the case of SCA preferred stock, determine the SCA preferred stock issuer's paior a secured debt designation and obtain the appropriate designation well or the preferred stock by applying the methodology a ecified in action 1(b) of this Part above.

#### e) Regulatory Transactions

#### i. Defined

Regulatory Transact in means a security or other instrument in a transaction rubmit of to one or more state insurance departments for review and a proval inder the regulatory framework of the state or states.

#### ii. Intent

This Section provides guidance to the SVO and the SSG on how to the sage requests for assistance made by a state insurance department under Section 2 (b) of this Manual.

#### iii. Guidelines

The SVO or SSG is authorized to conduct an analytical assessment on behalf of any state insurance department that requests such assistance.

If an insurance company files a Regulatory Transaction with the SVO via the ATF process or under the Regulatory Treatment Analysis Service (RTAS) process, the SVO shall first contact the state insurance department of the insurance company's state of domicile to disclose that a Regulatory Transaction has been submitted and inquire whether the late insurance department wants SVO analytical assistance.

If the state insurance department of the insurer's state of de sicile requests such assistance, the SVO shall engage in the requested analytical assessments of the Regulatory Transaction SV 2 determinations may include and refer to NAIC analytical Denormarks, such as NAIC Designations, valuation or classification assessments, and such determinations may be given by the SVC or SSS to the state insurance department.

SVO or SSG determinations git en a connection with the assessment of a Regulatory Transaction may be given to and adopted by the state insurance department as part of that tates internal determination of the regulatory issues presented by the a gulatory Transaction. However, SVO assessments for a Regulatory Transaction will not be entered into NAIC computer systems reserved for Investment Securities, as defined in Part Two, Section 2 and or added to the SVO List of Securities as defined in Part One, Section 3 (4)

# f) Investrants in Sertmed Capital Companies

An involument in CAPCO can be filed with the SVO in accordance with the procedures in Par Two. Please refer to Part Two, Section 10(c)(i)(E) of this Manual for suidance about CAPCO securities and detailed instructions related to filing CAPCO securities with the SVO.

#### SECTION 3. STRUCTURED SECURITIES OR TRANSACTIONS

# a) Structured Transactions Backed by Credit Enhancement

(i) <u>Structured Securities Fully Guaranteed by an NAIC CRP-Rated Entity or U.S. Government Entity</u>

The analytical procedures in this subparagraph apply to non-NAIC CRP-rated asset-backed securities and residential mortgage-backed securities fully, unconditionally and irrevocably guaranteed by a U.S. government entity or an entity with an NAIC CRP-rated senior unsecured obligation or claims paying ability.

This procedure shall only apply when the reporting insurance company intends that the NAIC designation assigned to the security will deper a solely on the rating assigned by an NAIC CRP to the guarantor or in Niecrating of the U.S. government entity.

As used in this subparagraph, an NAIC CRP-rated guaranty means of unconditional promise to pay all amounts due to the investor on a new and timely basis, which is effective for the life of the security, make is the guarantor's direct, unsubordinated, general obligation and resisted by an entity rated and monitored by an NAIC CRP. The gueranty may be in the form of a guaranty, financial guaranty insurance policy, here of credit, or other similar credit enhancement instrument.

The SVO shall assess any reported structed securities benefiting from NAIC CRP rated financial guarantee by applying the procedure described below. The SVO shall first confirm that the quaranty meets the definition set forth above. The SVO shall then review the terms of the reported security to determine who are environments the benefit of the guaranty to the investor.

If the SVO is satisfied that guarantor is fully obligated to pay the amounts due to it estors, and that the structural characteristics of the security do not compromise the benefit of the guaranty to the investor, the SVO shall assign an JAIC Designation not higher than the NAIC Designation that co responds to the NAIC CRP rating assigned to the guarant

(ii) Structured Secrities Backed by NAIC CRP Rated Financial Assets

is sub-paragraph applies to investment instruments backed by the sched led payment stream from (i) NAIC CRP rated or NAIC Designated until rlying obligations (ii) issued by NAIC CRP rated entities, or (iii) 100 per ant unconditionally guaranteed by NAIC CRP rated entities even if mone of the assets themselves are rated by an NAIC CRP.

As used in this sub-paragraph, an underlying obligation is any obligation of an NAIC CRP rated entity that gives the holder of the security a contractual right to receive benefits in the form of cash whether disbursed at a time certain or in scheduled payments of interest and principal. To be eligible for reporting under this subsection, the sum of the total cash obligations evidenced by the financial asset pool must be equal to or greater than the outstanding balance on the reported security.

The SVO shall assess any reported structured securities be ited by NAIC CRP rated underlying obligations by applying the precedure described below. The SVO shall confirm that the pool meets the disterial identified above. The SVO shall then assess the reporter security to determine whether the credit and structural characteristics of the security compromise the expectation of predictable cash flow from the racea pool obligors. If the SVO is satisfied that the reported security meet, the conditions of this sub-paragraph, and that the structural characteristics of the security do not compromise the expectation of predictables of flow from the underlying obligations, the SVO shall assign an Natic Disignation not higher than the NAIC Designation correst onlying to the NAIC CRP rating for senior unsecured debt assigned to the lowest rated obligor in the pool, or, on a weighted-average basis, while every applicable.

# (iii) <u>Structured Securities Fally Backed by Financial Assets Insured by NAIC</u> CRP Rated Insurer

This sub-paraciph and set to investment instruments backed by underlying fit and sets that are insured against individual obligor defaults by a pool insurance policy underwritten by an insurer with an NACO CP crems paying ability rating. Such a pool insurance policy must have covering in an amount equal to or greater than the outstanding before of the pool's assets.

This puredure shall only apply when the reporting insurance company intends that the NAIC Designation assigned to the security will depend solely on the claims paying ability rating assigned to the issuer of the pool assurance policy by an NAIC CRP.

As used in this sub-paragraph, NAIC CRP rated pool insurance means an insurance policy that provides protection against individual obligor defaults, underwritten by an insurer rated and monitored by an NAIC CRP for claims paying ability. The insurance policy must: be in effect for the life of the security; provide for full and timely payment of all amounts due to the issuer; and rank as the direct, unsubordinated general obligation of the rated insurer.

The SVO will review the reported security to determine whether the reporting insurance company has provided evidence that there are no factors that might compromise the contractual or financial ability or willingness of the pool insurer to honor claims promptly. The SVO will then review the pool insurance policy to ascertain the terms of the policy and verify the information provided by the reporting insurance company.

If the SVO is satisfied that the pool insurer is fully obligated to pay amounts equal to obligor defaults and that such amounts will enable the issuer to meet its payment obligation to the investors, and that there are no factors which might compromise the contractual or financial ability or willingness of the insurer to honor claims promptly, the SVO shall assign an NAIC Designation not higher than the NAIC Designation corresponding to the NAIC CRP rating assigned to the pool insurer.

#### b) Other Transactions under Auspices of the SVO

Please refer detailed questions about the analytical or other procedures a plied these securities to the SVO Structured Transactions group.

# (i) <u>Structured Lottery Securities</u>

Section 4(c) (vi) (B) (1) of this Part below defines at the surface and describes legal issues associated with transactions bat in sale the transfer of a single lottery prize. The issues and criteria c scribe hin Section 4(c) (vi) (B) of this Part below are equally special to Structured Lottery Securities. A structured lottery security is a fined as a transaction that involves the transfer of more than one lottery puzze. Please call the SVO Structured Security Department if January a question regarding such securities.

Please is fer to <u>Part One, Section 2 (d) (ii)</u> and <u>(iii) of this Manual</u> and <u>to tals Part is ree</u> for general instructions and rules that are applied to structured to otes.

#### (vii) Residu. Franches of ABS, RMBS and CLOs and CDOs

Please refer to <u>Part One</u>, <u>Section 3 (b)(ii)</u> and <u>(iii) of this Manual</u> for instructions used to make distinctions between debt and equity reporting plicable to residual tranches of ABS, RMBS and CLOs and CDOs.

# (vi) Principal Protected Notes

#### (ix) Exchange Traded Funds

Please refer to <u>Part Six, Section 2 (d) of this Manual</u> for instructions and rules applicable to Exchange Traded Funds.

#### SECTION 4. MUNICIPAL BONDS

Municipal bonds are debt instruments of states, counties, special districts, cities, towns and school districts, whether issued as general obligations, revenue bonds, annual appropriation bonds, assessment district bonds or obligations that combine aspects of general and revenue bonds issued by United States and Canadian obligors. For purposes of this Manual, credit risk associated with municipal securities shall be assessed on the basis of the nature of the bond as a general obligation bond, revenue bond or a bond combining characteristics of both, and on whether the transaction has been rated by an NAIC CRP.

## a) Computerized Services

The SVO shall independently obtain such computerized or other informational services on municipal securities as are necessary to obtain publicly available ratin pricing, statistical or financial information on municipal issuers and their outstanding securities.

#### b) Rated Securities

In accordance with <u>Part One, Section 3(e) of this Manual</u>, the SVO may a given an NAIC CRP rating of a municipal bond into its equivalent NAIC Designation.

#### c) Unrated Securities

If the security is not rated, or if an analyst shall have excised his or her discretion to conduct an independent evaluation of the security despite an NAIC CRP rating, the analyst shall proceed to an independent redit assessment.

## (i) General Obligation Bond

In the case of a general obligation bond, the SVO shall determine whether the issuer has taxing authority and the pecise imitations on that authority, arrive at a determination of all covernt indebtedness that relies on the issuer's taxing authority and assets the taxpayer's ability to support the existing and proposed eyels of deal. In the conduct of this analysis, the SVO shall consider all factors relevant to general obligation bond analysis, such as issuer's debt obligation or unfunded pension liabilities and other similar obligations in assessing the taxpayer's ability to support the level of debt, the SVO shall coses the trend of the issuer's economy, employment distribution and composition, population growth, real estate property valuation personal if come trends and other local economic traits that are relevant in its assessment.

#### (ii) Revenue Bond

the case of a new issue revenue bond, the reporting insurance company hall periode the SVO with a feasibility study of the project in order to assess the level of demand and all probable alternatives to the services or project. In all other cases, the SVO may request the submission of the

feasibility study. The SVO shall assess sources of revenue, revenue assumptions, project costs and expenses and other relevant factors. The analyst may consider any aspect of the project that may be relevant to determining an appropriate NAIC Designation.

## (iii) Industrial Development Revenue Bonds; Pollution Control Bonds

In the case of an industrial development revenue bond or a pollution control bond, the methodology applied by the SVO to assess credit risk may derive from any appropriate corporate methodology or from a municipal methodology, whether associated with the revenue or the general obligation approach.

### (iv) Escrowed And Pre-refunded Bonds

The SVO may make its credit assessment on the basis of an executed Letter of Defeasance, an Escrow Arcement or a Pre-refunding Agreement.

# (v) <u>Credit Enhanced Municipal Transactions</u>

A credit enhanced municipal transaction is or a in which the application for an NAIC Designation is to be laste on one of the following (i) the credit rating of a nationally recognized municipal bond insurer that has issued a financial guarantee or oth swise insured the bond, (ii) on a financial guarantee issued by an issurance company, (iii) on a Letter of Credit issued by a bank, or (iv) another acceptable form of credit enhancement. In determining an NA. Designation for the transaction, the SVO shall ascertain the extent to which the legal documents ensure that the credit strength of the sure or bank flows through unimpeded to the security holder The SVO dall examine whether the payment obligation of the ip are or bank ssures full and timely payment of all amounts due to the porting in urance company. Factors relevant to this analysis include irre scability of the insurer's or bank's obligation to pay the effect of debtor olvency on payments made by the debtor and/or the third party to the insurance company lender and the third party's credit rating. The analyst may review corporate resolutions of the issuer the guarantee or ther agreements binding the third party to pay for the debt of the debtor, the indenture or other similar document governing the remedies, opinions of counsel regarding enforceability of the obligation of the third party, the payment stream under applicable insolvency laws or other regulatory regime, or any other documentation that may be considered necessary.

#### (vi) Special Situations

#### (A) Contact SVO

The reporting insurance company shall contact the SVO on a case-by-case basis in order that the SVO may determine what information is necessary to conduct an analysis of Annual Appropriation Bonds, Special Assessment Bonds and Municipal Bonds Supported by the U.S. Government.

#### (B) Lottery Securities

#### (1) Definition

Lottery Securities are financial arrangements in which an insurer purchases the right to receive lottery prize money owed by a state lottery authority to the winner of a lottery or a subsequent assignee. The transfer may be expressed as the purchase of a receivable, in execution of an assignment of rights or in some other legally entitive manner. A significant component of SVO's analysis or lottery securities focuses on the enforceability of the rights of tained by the reporting insurance company. The issue raised in the the cate law requires the observation of a special procedul pefore transfer of lottery prize money may be effected.

## (2) No Court Order Required

If the state lottery law governing the cansfer loes not require a court order, the reporting insurance company half submit an opinion of counsel acceptable to the SVO certifying that no approval, consent or authorization of a governmental of administrative authority is required in connection. The the cansier.

# (3) Court Order equired

#### (a) Direct ansfer

A direct insfer structure is a lottery security rangement in which the reporting insurance company prchases or otherwise acquires the right to the lottery rize money directly from the winner of a lottery or firm a subsequent assignee. The reporting insurance company shall submit the following documents:

- (i) A certified copy of the court order that authorizes the transfer of the lottery prize money to the insurer, and
- (ii) A written acknowledgement by the state lottery authority that it has received a copy of the court

order and that it will cause the lottery prize money to be paid (and, if applicable, that it will instruct and require the issuer of the annuity responsible for making the lottery prize money payments to pay and deliver the lottery prize money) directly to the insurer, in accordance with the court order.

# (b) Indirect Transfer

An indirect transfer structure is a lower security in which the reporting insurance company has obtained the right to the lottery prize money by acquiring the beneficial interest in a trust, or through some other similar manner. If more that one lottery prize is transferred to a trus (or so ilar entity), the security created thereby is chara terized not as a Municipal Bond but as a Struc red accurity for purposes of assigning an NAC Designation. Although the criteria set forth in this are equally relevant to Structure Security for the issues addressed herein, the reader shour refer to Section 3(b)(i) of this Part above for intructions elated to, and a fuller description of crite a for Shactured Lottery Securities. Lottery securities volving an indirect transfer raise the issue of whether the indirect trans. Pould be considered a transfer of the lottery prize money must be ordered by a court. To address this issue, the insurer submit the documents required by one of the following options.

- (i) A certified copy of the court order that authorizes the transfer of the lottery prize money from the trust to the insurer, and a written acknowledgement by the state lottery authority that it has received a copy of the court order and that it will cause the lottery prize money to be paid (and, if applicable, that it will instruct and require the issuer of the annuity responsible for making the lottery prize money payments to pay and deliver the lottery prize money) directly to the trust, in accordance with the court order; or
- (ii) An unqualified opinion of counsel to the effect that although state lottery law requires a court order to effect a transfer of the right to receive

lottery prize money, the transfer of a beneficial interest in a trust is not the transfer of the lottery prize money under state lottery law and thus no approval, consent or authorization of a governmental or administrative authority is required in connection with the transfer of the beneficial interest in the trust; or

- (iii) (a) An opinion of counsel expressing a qualified opinion that the transfer of the beneficial interest in a trust should not be construed as a transfer of lottery prize money requiring a court order which may be qualified with respect to the lack of case law or legislative history to support this view of by the observation that counsel is unable to the state lottery authority would concur who this reasoning; and
  - (b) A written acknowledgement by the state lottery authority to the effect that is undirect transfer (for example, v. a transfer of the beneficial interest in a trust) is not the transfer of the lottery prize and abes not require a court order; or
- (iv) A copy of the sate lowery authority's policy statement that will in locably cause the lottery prize money to be paid (and, if applicable, that it will instruct and require the issuer of the annuity repondible as making the lottery prize money payments to pay and deliver the lottery prize caney) to the trust despite the lack of court orde.
- imited Discretion for Certain Indirect Transfers
  At insurer reporting an indirect transfer lottery security a rangement that cannot obtain the documents set firth in (b)(i), (ii), (iii) or (iv), may submit the transaction to the SVO with a qualified opinion of counsel, as set forth in (b)(iii)(a) above. In that case, the SVO may process the transaction but it shall be limited in its discretion to assigning an NAIC Designation one category lower than the Designation the transaction would have received based on the credit strength of the state or of the lottery authority.

# (d) Quantitative Analysis

The analyst shall make an independent financial analysis of the issuer. Wherever possible, the analysis shall be based on historical and projected tax or revenue data. It shall be the responsibility of the insurance company investor reporting the investment to obtain and provide this information to the SVO. The analysis shall incorporate the Audited Financial Statement, as well as additional information the analyst may dee. necessary. Upon receipt of this information, an analyst shall perform financial analysis necessary or a propriate for the transaction under consideration. Interpretation of the financial information and lata obtained will be conducted in the control of a particular facts of the issuer and the project to be financed. The analysis shall reflect the issuer's political and economic circumstances and other criteria lique to municipal bond issuance.

## (i) Us o Unau ted Financial Statements

For general bligation bonds not rated by an NA.S. CR., the SVO will assess the transaction one grace lower than would otherwise be justified by the issuer's credit rating, if the reporting incurance company cannot provide the SVO with a copy of the Audited Financial Statement. However, the SVO shall accept the unaudited financial statement of an issuer without grade reduction, if such unaudited financial statement has been submitted to and is certified by the appropriate state controller's office. Revenue Bonds will be subject to the same rules applicable to corporate debt.

#### (e) Terms of the Security; Final Designation

Before determining a final NAIC Designation, the analyst shall consider (i) the sufficiency of the legal documentation and (ii) the terms of the security such as:

- (1) Collateral.
- (2) Legality of the exercise of taxing authority in general bond obligations, or legal validity and enforceability of the pledge of cash flow.

- (3) Economic feasibility, including demand for the services for which the issuance is made or project is being built.
- (4) Project risks and risk mitigation.
- (5) Priority and legal position of the lender's right to payment of the issuer's general fund (for general obligations bonds) or reserve or trust fund accounts (for revenue bonds).

SECTION 5.

REPORTING CERTAIN SCHEDULE BA ASSETS WITH UNDERLYING CHARACTERISTICS OF BONDS OR PREFERRED STOCK

#### a) Application of Reporting Instruction

This <u>Section 5</u> applies to any life insurance company, fraternal benefit society or other entity, domiciled in any state of the United States, its territories or possessions and required by applicable law to use an NAIC Designation to calculate an asset valuation reserve (AVR) and a risk-based capital (RBC) charge for a <u>Schedule BA</u> asset (hereafter a "reporting entity.")

#### b) Fixed Income and Preferred Stock like Schedule BA A ets De ned

The NAIC Financial Statement Blank provides that long-term invested assets that are not clearly or normally includable in any other invested associated are to be reported on Schedule BA of the NAIC Financial State rent B ank. Pursuant to applicable Annual Statement Instructions, a porting entity determines if a Schedule BA fixed or variable interest rate asset not the underlying characteristic of a bond or other fixed income instrument or to take a joint venture, partnership or limited liability company interest has the underlying characteristic of a fixed income instrument. A Schedule BA fixed or validable rate asset has the underlying characteristics of a bond or other xed in ome instrument if it has a stated maturity and a fixed or floating cou, on rele. A joint venture, partnership or limited liability company has be a deriving characteristics of a fixed income instrument if it predominantly holds deat (or loans) and receives a public rating with annual surveillance them a C.P., or is designated by the NAIC through the application of a Weighted Average Rating Factor ("WARF") methodology that takes into account the CRP assigned to the underlying investments. Stran assets are defined as having the underlying characteries fanced income instrument. The Annual Statement Instructions provide that a Scholule BA asset with the underlying characteristics of a bond or other fix. I income instrument not filed with the SVO, must be designated as class six for purples, calculating an AVR and RBC. In furtherance of the regulatory objectives embodied in the Annual Statement Instructions, this Part provides a predure through which a reporting entity shall file a Schedule BA asset with the Obtain an NAIC Designation other than **NAIC 6** in order to obtain a mon favorable AVR. The SVO is hereby charged with responsibility for assigning an JAIC Designation in the circumstances described above, in accordance with sub-paragraph (e) of this Section.

#### c) Schedule BA Assets to be filed with the SVO

(i) <u>Assets with Underlying Fixed Income Characteristics</u> Whenever a reporting entity shall determine that a long-term investment properly reported in <u>Schedule BA</u> has the underlying characteristic of a bond or other fixed income instrument and wishes to obtain a more

favorable NAIC Designation for the investment for AVR purposes, it shall, file relevant documents describing the investment with the SVO for the purpose of obtaining an NAIC Designation. For purposes of this subsection, relevant documents shall mean the reporting entity's investment committee memorandum, the obligor's Audited Financial Statement, the loan agreement, a description of the investment, its structure, the economic activity that will generate the cash flow to repay the obligation, and such other documents as are necessary for the SVO to conduct a credit analysis. In the cover letter transmitting the documents, the reporting entity shall state its opinion and explain and delineate the rationale that supports the reporting entity's opinion that the asset has the underlying characteristic of a bond or of another fixed income instrument

# (ii) Special Instruction – Capital and Surplus Debentures

Capital and surplus debentures, whether or not rated by an NAIC 3P, and subject to valuation as specified in paragraphs 10 and 11 of SAA 41R—Surplus Notes.

Capital and surplus debentures that are rated by an NAIC CR are filing exempt pursuant to Part Two, Section 4 (d) of this 44 jual and reported in the same way as other filing exempt securities.

Capital and surplus debentures that are not reled by an NAIC CRP are reported to the NAIC.

All capital and surplus debentures are reported on the surplus notes line of Schedule BA, not on Schedule D.

## d) Reporting Exemptions for Certain Separate accounts

Reporting entities need not report <u>solvedur</u> <u>BA</u> assets to the SVO otherwise reportable under this section, such asset are held in a separate account that is not subject to either the AVR or isk-baser capital (RBC) charges.

#### e) Directive to the SVO

Upon receipt of the reps ting entity's submission of a <u>Schedule BA</u> asset with underlying characteristic of a bond or other fixed income instrument, the SVO is hereby directed to and a credit assessment, assess the reporting entity's asset classification decis on and conduct a valuation analysis of the asset. Upon conclusion of a analysis, the SVO shall provide the reporting entity with a written letter, in a form to be developed by the SVO, setting forth its determ, dion as to the NAIC Designation, asset classification and the Unit Price assigned to the asset. Upon receipt of the aforementioned letter, the reporting entity shall report the aforementioned analytical values obtained from the SVO for the asset, on the <u>NAIC Financial Statement Blank</u>.

#### f) Reporting on Schedule BA Assets

Notwithstanding the ability for life insurance companies to obtain NAIC Designations from the SVO for asset classification decisions and valuations for <u>Schedule BA</u> assets with the underlying characteristic of a bond or other fixed income instrument, the reporting entity shall report the investment on <u>Schedule BA</u> and not on <u>Schedule D</u> of the <u>NAIC Financial Statement Blank</u>.

# g) Maintenance and Monitoring of SVO Determinations for Schedule BA Assets

#### (i) <u>Maintaining and Publishing SVO Determinations</u>

SVO determinations relative to Schedule BA assets but have the underlying characteristic of a bond or other fixed income instrument shall be compiled in a separate database within the NAIC VOS Process. Subsequently, the SVO determinations for Schedule BA assets shall be published as a part of the compilation of securities and investments in the AVS+ Products under a separate heading to callitate the work of the members of the NAIC and their regulatory sufficiency.

# (ii) Monitoring of Credit Quality

The SVO shall monitor imply tement or deterioration of credit quality for Schedule BA assets entered that the VOS Process. Whenever newly disclosed information stages, that the likelihood of payment associated with a Schedule FA associated with a SVO shall analyze whether the NAIC Designation of Unit is ice then assigned to the investment should be adjusted. The reporting carty is responsible for providing the SVO with information or latificate a change in the financial capability of the obligor. By way of Sustration of the type of events that should be reported, and not by any or limitation, the reporting entity should report any of the ollowing or similar events: a reorganization of the issuer or the obligation; any amendment of the payment terms in the contract; any request for an extension of time for payment beyond contractual grace periods, or any other event which indicates that the financial performance of the issuer or the investment has materially changed.

# Annual Review Requirement

On at least an annual basis, reporting entities that have made an Initial Filing of a <u>Schedule BA</u> asset shall file a Subsequent Report with the SVO (Initial Filing and Subsequent Filing is defined in <u>Part Two, Section 10</u> and <u>11 of this Manual.</u>)

On at least an annual basis, the SVO shall conduct a review of the credit quality and value of the <u>Schedule BA</u> assets in the VOS Process to determine whether the NAIC Designation and Unit Price assigned to the

<u>Schedule BA</u> asset should be adjusted to reflect the most recent information about the issuer's performance. Upon the conclusion of its annual review, the SVO shall make any necessary adjustment to the NAIC Designation and/or the Unit Price then assigned to <u>Schedule BA</u> assets.

#### (iv) Deletion of Schedule BA Assets from the VOS Process

#### (A) Maintenance of Database

The SVO will delete any <u>Schedule BA</u> asset from the VOS Process on evidence that the investment has matured or that it is no longer owned by an insurance company.

#### (B) Failure to File Annual Review Information

The SVO will delete a <u>Schedule BA</u> asset from the VOS Process if a reporting entity has failed to provide sufficient or timely information that would permit the SVO to conduct the annual review as a semi-required by <u>subparagraph (g)(iii) above</u>. <u>Schedule BA</u> assets that ave the underlying characteristic of a bond or other fixed income instrument assigned the administrative symbol **NR** solution by the end of the first quarter following to previous year-end. However, the SVO will not delete a <u>Schedule BA</u> asset that has the underlying characteristic of a bond or other fixed income instrument that has been assigned the administrative symbol **NR** if an ATF annual update filling has been filled and the VO has received the information required to assign are VAIC Designation to the <u>Schedule BA</u> asset.

# h) NAIC Designation Categories Valuation indicators and Administrative Symbols

## (i) NAIC Designations

NAIC Designations assign d to <u>Schedule BA</u> assets that have the underlying characteristics of a Lond are assigned without a prefix. NAIC Designations assigned to fixed income instruments deemed to most resemble a preferred lock are assigned with the Valuation Indicator **P** or **RP** as prefix, as for their discussed in <u>Section h (ii) below</u>.

## (ii) Valuation Inc. stor

Valuation in sticators are fully applicable to those fixed income instruments that most resemble a preferred stock. If the Valuation Indicator **P** is placed in ront of the NAIC Designation, the SVO has concluded that the shear BA fixed income instrument is like a perpetual preferred stock for the purposes of valuation under SAP. If the valuation indicator **RP** is placed in front of the NAIC Designation, the SVO has concluded that the

<u>Schedule BA</u> fixed income instrument is like a redeemable preferred stock for the purposes of valuation under SAP.

#### (iii) Administrative Symbols

Administrative symbols applicable to bonds and preferred stock are also applicable to <u>Schedule BA</u> assets with the underlying characteristic of a bond or other fixed income instrument, respectively.

### i) Administrative Procedures; Reporting Conventions; Pricing; Credit Assessment

# (i) Administrative Procedure and Reporting Conventions

The general administrative and reporting instruction police ble to bonds and preferred stock that are contained in <u>Part Too of this Manual</u> apply, respectively, to <u>Schedule BA</u> assets that have the underlying characteristic of a bond or other fixed income instrument. He vever, because <u>Schedule BA</u> assets with the underlying characteristic of a bond or other fixed income instrument may be unique transactions, and because their structure may differ from that of bonds or preferred sick, it is not possible for the SVO to provide lists of require about a delay in assessing the credit quality, asset classification or valuation of the <u>Schedule BA</u> asset submission, the reporting entity in all instances. To avoid a delay in assessing the credit quality, asset classification or valuation of the <u>Schedule BA</u> asset submission, the reporting entity is should take care to provide financial and other information for the investment that would enable the SVO to assess the financial strength of the obligation is to be generated.

# (ii) Pricing Nietho gies

The pricing teth Corogies contained in Part Five, Section 1 of this Manual are applicable to the valuation of Schedule BA assets that have the inderlying paracteristic of a bond or other fixed income instrument. New thelest, the SVO has discretion to use whatever other methodology would puduce a reasonable valuation for a Schedule BA asset reported to the SVO if the methodologies in Part Five, Section 1 of this Manual are not appropriate to value a given Schedule BA asset.

Credit Assessment Procedures Applicable to Schedule BA Assets
Subject to the directive contained in Part One, Section 2(f) of this Manual, the SVO shall have discretion to apply any credit assessment methodology or any combination of credit assessment methodologies detailed in this Part Three to assess the credit quality or asset classification of a Schedule BA asset that has the underlying characteristic of a bond or other fixed income instrument.

#### SECTION 6. WORKING CAPITAL FINANCE INVESTMENTS

# a) Definitions in SSAP No. 105—Working Capital Finance Investments

Please refer to <u>SSAP No. 105—Working Capital Finance Investments</u>, for the definitions and associated definitional guidance insurance companies must understand and comply with before applying for an NAIC Designation for Working Capital Finance Programs that would permit them to purchase Working Capital Finance Investments.

With the exception of the definitions for Dilution Risk and Operational Risk below, the definitions shown below are summaries of those contained in <u>SSAP No. 105</u>—Working Capital Finance Investments intended only to facilitate a discussion and in all cases subordinate to the definitions in <u>SSAP No. 105</u>.

## b) Summary of Key Definitions

# (i) <u>Confirmed Supplier Receivable</u>

A receivable sold by a Supplier to a Finance Agent or Investor (or a Finance Agent to an Investor) under a Working Capital Finance Program designated by the SVO that requires the Obligor to confirm to the Finance Agent or Investor, prior to the sale of the receivable of on the Supplier to the Finance Agent or Investor, that it has no defense to parment of the monetary obligation represented by the receivable against a Supplier and, therefore, no defenses to payment of the same monetary obligation to the Finance Agent and/or Investor after such sale. The confirmation by the Obligor that it has no defenses to payment in Judes confirmation that the Obligor does not have a right to refuse payment that it may have acquired with respect to underlying commercial andle ansaction and that, if it has such a right, it will not assert such a fenses against the Finance Agent or Investor.

#### (ii) Dilution Risk

With respect to any Working Sa val Finance Program, dilution risk refers to disputes or contactual provisions that may reduce the amount of the obligation owed at the Obligor to the Supplier under the original receivable or the obligor to the Finance Agent and/or linve for unjer the Confirmed Supplier Receivable. Examples of dilution sk as credit for returns of defective goods or an allegation of fraud, such as that the invoice is not legitimate or is a duplicate invoice.

# (iii) ance Agent

A b. k, financial institution, financial intermediary or service provider that tallitates the Working Capital Finance Program that arranges the sale, assimment or transfer of the Confirmed Supplier Receivable to the thestor and administers payment.

#### (iv) Investor

The insurance company that files the RTAS Application with the SVO in order to obtain an NAIC Designation for a proposed Working Capital Finance Program.

# (v) Obligor

An entity that purchases the goods or services from the Supplier and thereby generates the original supplier receivable — and which Obligor has, or can be designated, **NAIC 1** or **NAIC 2** by the Sympor or has been assigned an equivalent credit rating by a NAIC CRP.

#### (vi) Operational Risk

With respect to any Working Capital Finance F ogram, operational risk refer to the combined effect of the procedures and parties employed to implement the program and their responsibility order the documents and to the determination by the SVO of whether these procedures and parties will ensure full and timely performance with abligor of the payment obligation to the Investor. An example of an operational risk is the confirmation process employed to verify that the Obligor has no defenses to payment.

# (vii) Supplier

The entity that sells the goods or services to the Obligor, obtains a receivable from the Obligor in exchange and subsequently chooses to sell the right to receive be payment associated with the receivable to the Finance Agent or Investor under the terms of a Working Capital Finance Program design of a **N IC 1** or **NAIC 2** by the SVO.

# (viii) World Cap. I Finance Program

The program created for the Obligor and its Suppliers by a Finance Agent to terms of which permits Suppliers to the Obligor to negotiate the sale of a right to decive payment from the Obligor (which is associated with and evidenced by a receivable) to the Finance Agent or an Investor.

# Working Capital Finance Investment

The right to receive the payment associated with a Confirmed Supplier Receivable purchased by an Investor under a Working Capital Finance Program designated **NAIC 1** or **NAIC 2** by the SVO and is the subject of SSAP No. 105—Working Capital Finance Investments.

**Note:** <u>SSAP No. 105—Working Capital Finance Investments</u> imposes reporting and statutory accounting requirements on insurance company investments in Working Capital Finance Investments and specifies analytical procedures to be applied or analytical controls to be verified by the SVO that are <u>not</u> detailed above. Insurance companies are strongly

advised to become familiar with  $\underline{SSAP\ No.\ 105}$  before filing an RTAS Application with the SVO.

# c) Direction and Program Parameters

# (i) <u>Direction</u>

The SVO may assign an NAIC Designation to a Working Capital Finance Program that would generate Working Capital Finance Investment that meet the criterion and standards identified in this Section 6.

# (ii) <u>Program Parameters</u>

# (A) RTAS Submission Required

A request that the SVO assign an NAIC Designation to a Workin Capital Finance Program is made by filing an RTAS Application. Please refer to Part Four, Section 3 of this Manual for referent instructions about the RTAS – Emerging Investment Vehic Service process. The RTAS Application is available at:

# http://www.naic.org/documents/svo\_rtas\_app.pdf.

Upon completion of its risk assessment, the SVC was squared RTAS Letter indicating a preliminary NAIC Designs on; i.e. the NAIC Designation that would be assigned if the Investor enters into a Working Capital Finance Program with a Finance Agent and sought to report it to the SVO. Note: A preliminary NAIC Designation cannot be used for statutory reporting purposes. The SVO shall issue a final NAIC Designation to the investor of the Working Capital Finance Program and the Working Capital Finance Program and the Working Capital Finance Investments generated thereunder upon a seipt of fully executed final copies of the documentation equired by Part Two, Section 10 (c) (i) (G) (2) of this Manual. Place refer to Part Two, Section 2 and Part Two, Section 6 of this Manual for instructions on how to file an ATF with the SVO.

# (B) Variations in ructure

Working Capita. Finance Programs may differ in structure and in the protect on an index the Investor. Structural strength and weaknesses Every is structures in such programs will be reflected in the NAIC Bas mation assigned by the SVO.

# (C) Program Quality

The SVO shall only assign an NAIC Designation to Working Capital nace Programs that can be designated **NAIC 1** or **NAIC 2**. Credit quality is measured by reference to a NAIC CRP credit rating or an NAIC Designation assigned by the SVO.

The SVO shall withdraw the NAIC Designation assigned to a Working Capital Finance Program on the date the Obligor's NAIC CRP credit rating or NAIC Designation is downgraded to NAIC 3 or its NAIC CRP equivalent.

**Note:** <u>SSAP No. 105—Working Capital Finance Investments</u> provides that Working Capital Finance Investments generated under a Working Capital Finance Program of an Obligor that falls below the equivalent of **NAIC 1** or **NAIC 2** becomes non-admitted.

# (D) Process and Methodology

An NAIC Designation shall be assigned to a Working Capital Finance Program on the basis of a thorough assemble of credit, dilution, operational and other risks, an assessment of protections provided by operative documents to be in restor and the quality of transaction participants.

# d) Risk-Assessment Process

# (i) Credit Risk

The NAIC Designation for a Vorking Capital Finance Program shall be linked to the credit quality on the Obligor, which may be determined by reference to a credit rating assign a by a NAIC CRP or by an NAIC Designation assigned to the S O. Credit risk is assessed by the SVO analyst in accordance with any permitted methodology set forth in this Manual for corporate a ligors.

# (ii) Dilution Risk

To achiev an NAL 1 or NAIC 2 Designation, the Working Capital Finance Program must eliminate dilution risk in the Working Capital anance In stment proposed to be eligible for purchase by the Investor. It terms overning the Investor's Working Capital Finance Investment must implicate Obligor recourse to its Supplier as a condition to payment of the obligation to the Investor so as to result in an unconditional right to receive payment on a full and timely basis.

# operational Risk

To achieve an **NAIC 1** or **NAIC 2** Designation, all operational risks shall be identified and assessed. Key participants shall have a NAIC CRP credit rating or an NAIC Designation assigned by the SVO at a level at least that of the Obligor.

# (iv) <u>Legal, Structural and Regulatory Considerations</u>

Events of default remedies should provide the Investor at least those rights and privileges, unimpaired, of a trade creditor upon default with no Obligor defenses that could cause dilution of principal.

The Finance Agent must be an entity regulated or supervised by a financial regulator in one of the countries in the List of Foreign (non-US) Jurisdictions Eligible for Netting for Purposes of Determining Exposures to Counterparties for Schedule DB, Part D, Section 1 in Part Six, Section 3 (d) of this Manual and that the regulator is the functional equivalent of the Board of Governors of the Federal Reserve System, the Office of the Comptroller of the Currency (OCC) or the Federal Deposit Insurance Corporation (FDIC). In the alternative, the SVO shall verify that payments due the Investor are made directly by the Obligor with no commingling of funds or assets with those of the Obligor, Supplier, Servicer or Trust Administrator or other Investors.

The SVO will verify that the Certification from the insurance company Chief Investment Office confirms that the Investor is not affiliated with Obligor and that Working Capital Finance Investment excludes a urance or insurance-related assets.

The SVO will verify that the Certification from the insurance company's Legal Counsel confirms the existence of a commercially reasonably belief that the documents establishing and governing the Working Capital Finance Program establishes the rights and UCC ode landard for preserving first priority perfected interest in Confirmed Supplier Receivables as more fully discussed in Part To Section 10 (c) (i) (G) (2) of this Manual.

The remedies available to the particip ats in the working Capital Finance Program should be expressly ident in the documentation for the Working Capital Finance Investment

Characteristics that shall be presen in a proposed Working Capital Finance Investment include, but are not lin ted to, the following, or a substantial equivalent:

- The Obligor takes payments directly to (i) the Investor; (ii) Finance Agent; or (iii) he servicer for the Working Capital Finance Program.
- The Involve most have the option, and not an obligation, to rurchage subsequent Working Capital Finance Investment so as to express a largestor can exit the Working Capital Finance Investment by per mitting existing investments to mature.
- <u>SSAP Nv. 105—Working Capital Finance Investments</u> provides that the documentation governing Working Capital Finance Programs must particle that disputes arising under the agreements shall be submitted to a court of competent jurisdiction in the U.S. or be subject to an alternative dispute resolution process sanctioned by state law. Given

the nature of Working Capital Finance Programs, the SVO anticipates that documentation governing Working Capital Finance Investments will be subject to the laws and jurisdiction of the courts of California, Delaware or New York, or a similar legal jurisdiction with significant exposure to sophisticated institutional financial transactions.

• Events of default must be clearly defined, and provide a mechanism that gives the Investor the ability to pursue collection unfettered by actions taken or not taken by participants such a the Servicer or Trustee, or other named persons performing similar functions.

# a) Definitions

Cash Flow Available for Debt Service (CFADS) is defined as cash flow from operations in any given period (cash revenue minus cash operating expenses) less major maintenance capital expenditures. Major maintenance expenditures are those the Project needs to make to operate the plant in good order for the life of the transaction, including expenditures related to a Forced Outage. Excluded from major maintenance capital expenditures are any extraordinary or discretionary capital expenditures that are not required to keep the plant in good working order. Cash Sweep refers to principal amortization that occurs at specified intervals based on excess cash (or a portion thereof) after completing certain steps in the Project's Depositary Agreement Waterfall.

**Cash Sweep** mechanisms are often utilized in order to reduce leverage with excess cash available and can be utilized to reduce refinancing risk in certain Financing Structures. Failure to make a Sash Sweep payment does not typically trigger a payment default, but might result in a prohibition of distributions to the parent or sponsor.

**Depositary Agreement** refers to the contractual agreement between the Project sompany the lenders, and a third-party trustee, which governs the collection and application on any flow proceeds from the Project. The Depositary Agreement includes provisions in esserve accounts that support specific Project liquidity needs, certain future Project liabilities and for backstop debt service.

**DSCR** stands for debt service coverage ratio and is defined as Cash flow a valiable for Debt Service (CFADS), divided by the scheduled interest and principal payments at measured during any given period (measured on a twelve month rolling basis) and seeks to snow the cash flow cushion available to meet the Project's ongoing debt amortization obligations give the trinsic cash flow generation ability of the Project. The scheduled interest and principal symbols are defined in the project's bond indenture or loan agreement during a specifical period.

**EPC** means Engineering, Procurement and Cons action and refers to a contract under which a contractor agrees to design and construct a project on a pecified timeline and in accordance with specified performance requirements.

**Financing Structure** means the specific form of the financing plan describing the type(s) of debt used to capitalize the Project entity the  $\mu$  sition of the debt relative to the asset and other participants in the capital structure,  $\mu$  as guarantees, security, pledges, reserve accounts, restrictive covenants, etc).

**Fully Amortizing** means that the Project's debt is fully repaid during the term of such debt through cash flow from operations.

**Fully Contracted** means that the Project (as Seller) has entered into an agreement with a utility or other purchaser of electricity (as Buyer) to sell all of the electricity it will produce in an Off-Take Arrangement or PPA pursuant to which the Buyer agrees to buy the capacity, electricity, ancillary services, tax credits, and or environmental attributes/credits generated by the Project.

**Forced Outage** means the net capability of the Project's main electricity generating units that are unavailable for load for emergency reasons.

**Generation** means the process of producing electric energy by transforming other forms of energy; also, the amount of electric energy produced, expressed in kilowatt hours.

Heat Content means the amount of heat energy available to be released by the transformation or use of a specified physical unit of an energy form (e.g., a ton of coals a barrel of on a kilowatt-hour of electricity, a cubic foot of natural gas, or a pound of steam). The annual of heat energy is commonly expressed in British thermal units (Btu). Note: Heat condition of embustible energy forms can be expressed in terms of either gross heat content (higher or upper heating value) or net heat content (lower heating value), depending upon whether or not the emilable heat energy includes or excludes the energy used to vaporize water (contained in the emiginal energy form or created during the combustion process). The Energy Information Admirate ation of pically uses gross heat content values.

Hedging Contracts - Contracts where a count part agrees to purchase a specified quantity of future electric generation (or ancillary services) to fixed prices independent of the real-time spot market prices. These contracts are typically finantially settled with the power plant selling its generation into the spot market and paying/recliving the difference between the hedged price and the actual spot market price to/from the contemparty. In the electric power market, these hedges are typically structured as a heat rate call option or revenue put. Interest rate hedges provide for the conversion of floating interest likes to be real rates. Derivatives may be used for this purpose.

Implied Heat Rate - A alculation of the day-ahead electric price divided by the day-ahead natural gas price. Implied heat rate also known as the 'break-even natural gas market heat rate,' because only a natural gas generator which an operating heat rate (measure of unit efficiency) below the implied heat rate value can make money by burning natural gas to generate power. Natural gas plants with a higher operation heat rate cannot make money at the prevailing electricity and natural gas prices.

**Mercha.** Price of means the price of electricity agreed to between a buyer and seller set in an open market on the basis of supply and demand.

O Taker means the purchaser of the Project company's electricity under an Off-Take Arrang ment or a PPA.

**Off-Take Arrangement** means an agreement under which the Project company enters into an ment with the Off-Taker to provide a specified quantity of electric generation, available

capacity, ancillary services and or environmental attributes and the Off-Taker is typically obligated to pay for that product whether or not it accepts the product; provided the Project company has the current capacity to produce it.

**O&M** means operation and maintenance expenses and refers to the costs related to the normal operating, maintenance and administrative activities of the Project.

**Partially Amortizing** – A debt amortization profile that includes a balloon payment at the end of the debt term. This structure typically relies on refinancing or an equity contribution to repay the balloon amount.

**Partially Contracted** – A Project that has entered into a PPA or Off-Take Arrangement for less than the plant's full generating capacity.

**Power Generation Project** (Project) refers to a power plant that generates and sells electred within a special purpose entity, using a specified Technology and Fuel Source.

**Power Purchaser** means the buyer of electric generation, capacity, ancillary services, and/or environmental attributes from the Project company.

**Power Purchase Agreement** (PPA) means an agreement in which the Power Purchaser agrees to purchase all or up to a specified quantity of electric generation, capacity, ancillary services, and/or environmental attributes produced by the Project company.

**Project Financing** means the issuance of debt by a special purpose litity of a non-recourse basis – whereby the debt incurred to construct or acquire the Project is report from the cash flow from operations of the Project company, typically pursuant to an orif Take Arrangement or in a PPA, rather than relying on the equity Sponsor.

**Renewable Energy Power Generation Project** mea. a toject Generation Project whose Technology is based on the capture of energy form on-gold ginatural processes, such as sunshine, wind, wave power, flowing water, biological processes such as anaerobic digestion and geothermal heat flow.

**Resource Risk** refers to the inherent variable flity and uncertainty in projected solar irradiation and wind speeds using data gathered from the project site that is then correlated to a longer historical meteorological data set to produce a long-term resource projection for the Project.

**Scheduled Outage** refers to put ned downtime during which a plant is unavailable to operate. Scheduled Outages are typically plant of in advance and communicated with the RTO/ISO and/or the Off Taker.

**Scheduled Principal** payment are the principal amortization amounts required to be paid, pursuant to a schedule included either in the Note Purchase Agreement, Credit Agreement, or the form of Note. Scheduled Principal is distinguished from Targeted Principal payments and Cash

Sweep principal payments by the fact that failure to make a Scheduled Principal payment would result in a payment default.

**Solar Power Generation Project** is a Renewable Energy Power Generation Project based on a technology that converts heat energy into electricity using mechanical processes (solar thermal) for example, by concentrating solar radiation to create steam or that converts sun light directly into electricity based on semiconductor technology (photovoltaic or PV solar).

**Targeted Principal** payments are principal amortization amounts that are paid if and to the extent that cash is available at that point of the Waterfall according to the priority of payments in the Depositary Agreement. Failure to make a Targeted Principal payment does not result in a payment default. Satisfaction of Targeted Principal payments may be a condition to permetting distributions to the parent or sponsor. Financing Structures with debt tranches that bilize Tigeted Principal payments are often intended to address the inherent period to pen at validating in renewable resources (such as solar or wind) by allowing the Project to amount principal during periods of strong resource without penalizing or straining Project cash flow thring periods of weaker resource.

**Waterfall** describes the order and priority of payments that me (or m set) be made according to the Depositary Agreement or other Project document.

Wind Power Generation Project is a Renewable End by Power Generation Project that utilizes one or more wind turbine generators (WTGs) that barne is the energy generated by wind and convert it to electricity.

**Technology and Fuel Sources** refers to the schnology on which a power plant will be based and the mechanical process or fuel to be used to generate electricity – which may involve any one of the following: gas-fired, coal, hydroetectric, mean, bio-mass, renewable or other.

# b) Economic vna. ic of Power Generation Projects

The manodology iscussed in Section 7 and more particularly in sub-section (c) below, applies to non-recourse power generation projects. A typical non-recourse power generation project relies on one or a small number of assets to generate all of the project's revenue and operating margin over the life of the asset(s). In some instances, the project's collateral may consist of only a single asset and an action, and of rights under an offtake agreement. In order to properly assess the creat quality of these Project Financings, a number of factors must be considered, with the strengths and relative weaknesses weighed against one another in an organized and holistic manner.

# General Methodology for Power Generation Project Finance Transactions

Assessment of a project incorporates an evaluation of the analytical constructs described in this sub-section (c). The conclusions drawn from each analytical constructs are then organized by reference to the factors shown in the Credit

Factor Chart in sub-section (d) below applied in conjunction with the Principles Guiding the Use of the Credit Factor Chart to reflect the unique structural elements in each transaction.

- 1) <u>Cash Flows</u> Analysis of the Project's cash flow during the debt term (and beyond, as applicable) to assess its composition and predictability.
- 2) Competitive Position of the Project Asset and its PPA/Off-take Arrangement
   An assessment of the Project asset within the context of the marketplace
  and regulatory environment and an analysis of the PPA or Off-take
  Arrangement relative to the power market in its region and regulatory
  considerations.
- Operating and Technical Risks –Assessment of the Project's technology an operating risks.
- 4) <u>Financial Metrics</u> Analysis of the Project's key financial metrics. The pricary metric for a Project Financing Structure that is fully contracted at fully amortizing is DSCR. Financial metrics are evaluated against peers with similar characteristics, debt service obligations and leverage. The NPV of projected cash flow compared to total debt is another key metric used in this aralysis. Additional considerations that could strengthen or weaten as above core analysis include:
  - Liquidity/Reserve Accounts
  - Structure
  - Refinancing Risk
  - Structural Subordination
  - Construction Exposure

# d) Tools and Concepts Used in the Application of the General Methodology for Power Concration Project

# (i) <u>Credit Factor Chart</u>

The following Credit Factor Chark is intended as a tool to organize the primary analytical considerations derived from the application of the methodology disco sed in sub-section (c) above to the most important factors in determining the credit quality of a transaction. Given the highly specialized return turns asset class, the baseline assumption is that there will be unique structural elements in each transaction that reflect the specific racts and circumstances of that credit. Accordingly, judgment is required in the application of the Credit Factor Chart to specific transactions. For each Credit Factor there is a recommended range for weight factor reflect that risk can vary significantly among projects.

		10/-1	Project Risk Score Descriptions		
Credit Factor	Subcategory	Weight Range	Weak	Average	Strong
Construction	Construction	0%-40%	Contractor with little relevant experience or weak reputation; floating contract; aggressive budget and schedule; difficult construction process and/or complexity	Contractor with some relevant experience; fixed rate contract; reasonable budget and schedule; reasonable construction complexity	Contractor with significant experience and strong financial position; fixed rate contract with financial incentives and penalties; reasonable budget and schedule; simple construction
	Operator	5%-10%	Operator with little relevant experience; irreplaceable operator; compensation is not performance based	Operator with some relevant experience; operator can be replaced; compensation is based on performance	Or ator we significant extence; open or can be replaced impensation is based on result with LDs for inderpurformance
	Technology	10%- 20%	Unproven technology with limited performance history	Proven technology with some performance history, or newer technology with appropriate equation that warranties backs on performance charantee.	echnology with significant performance history
Operations & Technology	Operations & Maintenance (O&M)	10%- 15%	O&M is managed by the project and funded from cash flow from operations	O&M is manage, by the project or third part, and excess are smoothed/bb. Itopps by for source depression of equipment warranties.  Adequate ensitivity in telling for nigher than project.	O&M is managed by a reputable third party through a long-term service agreement with fixed pricing
	Resource/Fuel Assessment	5%-20%	Fuel is pure ased on the oper in ket; resource assessing lack on-site historical eferomony	Firm fuel transportation and supply; resource assessment is acceptable and based on some on-site historical data, correlated to a reference station with a longer data set	Fuel is purchased through a long- term agreement with fixed pricing and firm transportation or is subject to a tolling agreement with the power purchaser: resource assessment is high-quality and based on significant historical data or meaningful historical operating data is present in lieu of a new resource assessment
Counterparty Credit Profile & Competitive	Creditworthines of Counterparty	10 - 25%	Wear cunterparties; agressive contractual ms, high probability of default or termination	Creditworthy counterparties; reasonable contractual terms, and achievable performance standards	Counterparties whose creditworthiness is rated above the project's; favorable contractual terms
Position	Competit e Positio	5%-15%	All of the Project's generation will be sold into merchant market	Partial merchant exposure with some hedging or some PPA offtake to mitigate price fluctuations	Generation is sold under a long term power purchase agreement or hedge arrangement
Transactic Structure	ransacti i	10% - 20%	Acceptable legal structure/separation provisions; no distribution tests; refinancing risk; cross-default provisions with other debt; weak depositary terms/cash control/liquidity	Strong bankruptcy remoteness and legal separation provisions; limited refinancing risk; historical look-back distribution tests; appropriate depositary arrangement and average reserve account/liquidity protection	Strong bankruptcy remoteness and legal separation provisions; strong look-back and look-forward distribution tests; no refinancing risk; strong depositary terms, excellent liquidity protection with appropriate reserve accounts

# ii. Principles Guiding the Use of the Credit Factor Chart

# A. Credit Factors:

Construction: Projects are often financed for a long-term period, with the private placement debt coming in before, during, or after construction. Accordingly, if the debt is funding before or during construction, an analysis of the construction exposure and its potential impact on the financing must be completed. assessment of construction risk is intended to facilitate the assignment of a long-term rating for the project from the first date of the financing, assuming steady state operations, that is unaffected by the presence of a typical construction scenario with a properly structured Engineering, Procurement and Construction (EPC arrangement. Accordingly, the analysis of construction risk exposure is meant to capture outsized risk exposures that have a high probability of causing a meaningful delay in achie men. increasing commercial operations, materially COSI delaying/impairing the project's ability to service debt.

This analysis should address the likeling e project's construction being completed on time, on udget (or within contingency), and within the expecte of rating performance parameters. In addition to the likelihood of a smooth construction process, the contractual structure of a EPC rrangement should be assessed to determine the adequate of rescales and mechanisms in the EPC Agreement to addr ss antial delays, disputes, cost overruns, and operational deficiencies. A fixed-price EPC Contract with a reputable commany that includes mechanisms (such as bonuse and liquilated damages) to align the parties' incentives to con lete the Project on time, within operational specifications, and while budget would be expected to score as a Strong in the risk factor scoring for this category. Unqualified contractors, inrealistic construction budgets, or unachievable timelines (if not addressed by structural enhancements to the EPC Contract) could merit a Weak score. Escrow accounts and letters of and the used to help ensure performance under the EPC Connect where a guarantee from the construction company's parent is deen a insufficient/lacking creditworthiness to backstop the contractor's obligations. An independent engineer would typically s the quality of the contract, the pricing, adequacy of contingency, and the ability of the contractor to complete the scope of work in the timeline expected.

Special considerations unique to renewable projects: Wind and solar projects are generally considered to have lower risk construction processes than conventional power plants due to the modular nature of the equipment involved and the shorter timeline required to complete construction and commissioning activities. Both solar and wind projects are typically commissioned in stages, allowing the project to begin earning revenue prior to Commercial Operation Date (COD), which can help to offset exposure to construction delays if they arise in the final stages of commissioning. The level of complexity in the construction activities for a phote toltaic (LV) solar project is typically considered to be low due to make moving parts and the modular nature of the plant assemble

Operational & Technology: Assessment of a project's Operational & Technology profile is intended to determine the level of exposure to these challenges that could impact both refer use and expenses. These risks are assessed through four printing sub-categories: operator, technology, O&M expense profile, and resource/fuel assessment. Typical investment goad projects will utilize commercially proven technology, a sopuristical dioperator, a carefully planned operating and capital expense profiles and an appropriate fuel arrangement that avoids first cial possibles for fuel supply/transportation constraints as expensive to fuel costs that aren't passed through to the Off-taker. Comprehensive property damage and liability insurance is expected to be in place, with business interruption coverage that comprehensives that project for force majeure disruptions in operations.

Specis considerations unique to renewable projects: For renewable projects, a professional resource assessment by an experienced third engineering firm will typically be completed prior to construction of a Project, with appropriate sensitivities and adjustments for the particular geography, climate, and details of the project site and equipment being used. Wind speeds or solar insolation data gathered on site for a meaningful period of time in advance of the start of construction is preferable. The debt sizing should account for downside resource scenarios as well as the mean projected resource. Operational projects that have meaningful resource and generation data from historical operations may rely on actual historical data points in base and stress cases if the actual operating history is determined to be a better predictor for future performance than the original resource assessment.

# B. Counterparty Exposure and Competitive Position:

Counterparty Exposure - In instances where the project's cash flow stream is dependent upon payment or other performance by a counterparty, the credit quality of that entity should be assessed. The primary counterparty of concern in a typical power project financing is the Off-taker or hedge counterparty for the sale of the project's generated power. The credit rating of the Off-taker/hedge counterparty typically serves as the ceiling for the project's credit quality due to reliance on the counterparty for cash flow to service the debt financing. The power purchase agreement or hedge does not need to cover all of a power project's generation in order for the project to qualify for an investment grade quality conclusion or strong assessment in this category, but the debt sizing should be appropriate for the level of contracted cash flows under the office of the level of contracted cash flows under the office of the level of contracted cash flows under the office of the level of contracted cash flows under the office of the level of contracted cash flows under the office of the level of arrangement, with limited or no reliance on the merchant cash flow to service debt. Please refer to Part Three, Section 1 (a) Manual for Audited Financial Statement standards as licable to an off-taker not rated by an NAIC CRP.

Letters of credit, guarantees, and other security is sted in support of a lower credit quality counterparty's obligation, should be taken into account, as the security could be sufficient to assure performance throughout the contract. If the project must provide a pari passulien to the hedge provider to secure the project's obligations under the hedge, the potential detriment to the senior renders caused by sharing this security interest should be a categories relative to the debt amount and value of the project's long arm can flows under scenarios where the hedge is out of the makey. A speed liens in such situations are typically preferred

Off-take agreements out be assessed to identify risks to the project's cash flow due to the project failing to meet specified performance tandards, uncompensated curtailment, and any clauses that could allow the Off-taker to reduce payments or terminate the agreement due to future regulatory/market changes. In some as the carket alternatives to a counterparty, and the ease with while such counterparty could be replaced, should be evaluated.

<u>Competitive Position</u>: Fully contracted projects with power purchase agreements or hedge arrangements under market terms should generally be considered to have a strong competitive position. In situations where the contractual price of the power being sold under the offtake agreement materially exceeds prevailing spot and forward

market prices in the region, the Off-taker's motivation for entering into the agreement (and ability to pass the cost of such agreement on to its ratepayers/customers) should be considered. State renewable portfolio standards, federal environmental legislation, the current political climate, federal/state energy policy and regulations, and regional supply/demand fundamentals may support the viability/defensibility of above market offtake agreements. If the viability of an off-take arrangement is in question it might be appropriate to consider the project's ability to service out if it were to sell power (and any applicable ancillary services), ander current and forward market rates.

Projects that are fully exposed to me chan oricing are likely to be considered to have a weak competitive position unless a particular heat rate or cost advantage that rest, in support cash flow relative to other market participants can be sover.

Structure: A typical power project final sing is structured as a non-recourse, standalone entity that is retiner reliant on its parent, nor impacted by its parent, redit profile. While the ultimate structure of the transaction can take "ifferent forms (including leases), several components are medec in order for the project to be considered separate from its prent(s):

 The project entity is a limited or special-purpose entity (solely engage in the generation, distribution, voltage regulation, and/or mansh...on o electricity).

he as t investors have a security interest in the assets, accounts, and quity of the project. The debt investors have an assignment of key ontracts/agreements.

• project is contractually entitled to the cash flow stream that services the debt.

Additionally, a typical project structure includes the following:

- The Project's funds are segregated from the parent/sponsor, and a third-party trustee administers the movement of cash flow, in accordance with a Waterfall.
- Distributions to the parent/sponsor are allowed only when certain criteria and DSCRs are met.
- Standard affirmative and negative covenants requiring regular operational and financial reporting, restricting the sale of assets,

prohibiting/restricting the incurrence of additional liens/indebtedness, limiting modifications to and cancellation of material project agreements, restricting acquisitions or changes in line of business, and other standard project finance covenants.

The assessment of strong, average, or weak for the Project's structure is dependent upon the strength of the above terms, and how they have been crafted to address the Project's specific attributes/risk profile.

Financial structures that should be evaluated further to determine whether their structure merits a designation of average or weak include:

- Refinancing Risk Projects with partial or a back-e decamortization during the debt term should present awnsic scenarios to show the most likely level of debt out tanding at maturity that will be refinanced, and the likelihood that a refinancing would be accepted by the marketplace used in the cash flow post-maturity, contract structure post-maturity, and the expected asset value at the time of refinancing. The lift of the asset (compared to its expected useful life), de t/kw of capacity, and current mergers & acquisitions (M&A) values as similar assets on a transaction price per kW basis bould be used to evaluate the viability of a refinancing. A Project with a funy amortizing structure (with otherwise strong structure and elements) will be considered stronger than a partially importating structure.
- <u>Structural Subordian</u> Projects where the debt is at a holding company and the is a significant degree of project or subsidiary level as bt (or tax equity) that needs to be serviced prior to cash being available to savice the debt of the rated issuer.

The ability of the Project to withstand revenue disruptions due to unscheduled forced Outages and other events is assessed. The assessment stors include the existence and amounts of debt service serve, majo maintenance reserves, operating reserves, property or age and business interruption insurance, and committed working capital facilities. A debt service reserve of six-month is standard. The need for a major maintenance reserve may be mitigated by a long-term service agreement.

C. Overall Financial Risk Profile

After evaluating the Project's credit factors, the average debt service coverage ratio (DSCR) profile necessary to support a quality

conclusion will be determined. DSCR is not the only metric used to determine the appropriate quality conclusion—in structures with multiple tranches, Cash Sweeps, Targeted Amortization, and refinancing risk, the net present value (NPV) of the remaining projected cash flow divided by the total debt amount ("NPV Ratio") is an appropriate measure of the Project's ability to service debt over the term of the financing (or post-financing, when evaluating refinancing risk). The calculation of the NPV Ratio typically uses the coupon (or weighted average interest rate) as the discount rate for the calculation. In evaluating a refinancing scenario per tematurely of the current financing, market rates (accounting for the calculation of the appropriate coupon/discount rate.

Projects exhibiting an overall credit at tor assessment of "weak" are not expected to fall within the highest on it'n quality categories due to their inherent weaknesses. Projects with unique situations that give rise to higher variability or une stainty in cash flow, may require higher debt service so trage ratios to achieve the same quality conclusion as a comparable project without such volatility. The following table provide quite see for what ranges of DSCRs or NPV Ratios would a nerally indicate higher versus lower quality conclusions at en or ferent overall risk assessments from the Credit Factor Chart.

Average Deb. Service erag or NPV of Cash Flow to Total Debt						
Overall Credit Factor Chart Risk	Quality Conclusion					
Assessment	investment rade		Speculative Grade			
	Hig. vt	High	Medium	Low	Lowest	
Weak	N/A	N/A	1.30-2.00x	1.20-1.50x	1.10-1.35x	
Average	1.75-3.25x	1.30-2.00x	1.20-1.50x	1.10-1.35x	1.00-1.25x	
Strong	1 50-3.00x	1.20-1.75x	1.10-1.35x	1.00-1.25x	1.00-1.15x	

# e) Additional Methodological Considerations for Renewable Energy Fullects

Additional Considerations Applicable to Solar Power Generation Projects

Assessment of Solar Power Generation Projects is conducted on the basis of the general methodology described Section 7 (b) of this Part, above but is subject to the additional considerations that follow.

Regulatory Incentives – The electrical output of Solar Power Generation utilizing photovoltaic technology can be expensive relative to the cost of the output of thermal combined cycle gas turbines or coal-fired plants depending on the regional market that the project is operating in and time

of day that the power is being delivered. This often means the viability of individual projects depends on regulatory incentive, subsidy or support. When such support exists, the form of the support; its predictability; the general level of political support for renewable energy and the fit with the energy policy and framework are evaluated.

<u>Structural Risk</u> – If the form of incentive, subsidy or support imposes time lines for project completion as a condition, the ability to meet the timelines and the potential loss of the incentive, subsidy or support on the viability of the Project should be considered.

Technology Risk - Technology risk is defined by reference to the potential for serial defects that can cause panel yields to be below specification make yields degrade more quickly than originally assumed. The presence consumers and insurance products supporting the Projects panel technology, as well as decreasing future panel replacement costs since Id be considered as potential risk mitigants.

Resource Risk - The volume of electricity produced by a Prisolar power plant depends on the period to period variability of source radiation. The expected volume of irradiation over a given time is antained in forecasts provided by reputable and experienced concultant more to the commencement of commercial operations, express of as a probability distribution function. The project's orthogonality to service debt is assessed by using both the P50 and the P50 forecast to calculate base case and downside financial ratio scenarios. Operational projects that have meaningful insolation and generation document in base and stress cases if the actual operating history is determined to be a better predictor for future performance than the original resource assessment.

2. Additional Considerations Ap. Vicably to Wind Power Generation Projects

Assessment of Wind Power Generation Projects is conducted on the basis of the general methodology described in Section 7 (b) of this Part above, but is subject to the a Mitional considerations that follow.

Regula bry icentive — The cost of electrical output from Wind Power General in is woice by competitive with the cost of the output of thermal combined cole gas turbines or coal-fired plants depending on the regional market that the project is operating in and time of day that the power is local delivered. Some projects, however, rely on a regulatory incentive, while, support. When such support exists, the form of the support; its predictability; the general level of political support for renewable energy and the fit with the energy policy and framework are evaluated.

<u>Structural Risk</u> – If the form of incentive, subsidy or support imposes time lines for project completion as a condition, the ability to meet the timelines and the potential loss of the incentive, subsidy or support on the viability of the Project should be considered.

<u>Technology Risk</u> - Technology risk is defined by reference to the potential for serial defects that can cause lower than projected availability and/or higher than projected operating expenses. The presence of warranties and insurance products supporting the Project's turbine technology, carefully considered O&M projections, as well as the level of a ployin at of the turbine model/similar technology, and availability of space parts (OEM and/or aftermarket) are factors that can balance this risk.

Resource Risk - The volume of electricity produce by a find power plant is impacted by the period to period vanishity of the wind resource. The wind resource forecast is provided by eputable and experienced consultants prior to the commencement of commercial operations, expressed as in a probability distribution function. The project's ongoing ability to service debt is typically assessed by using both the P75 and the P90 forecast to calculate base case and downside financial ratio scenarios. (Different base or downside scenarios may be used in certain instances if the circumstances of a project or two presence of a unique risk exposure merits a different project on scenario.) Projects that have meaningful wind speed and generate data from historical operations may rely on actual historical data points in a sand stress cases if the actual operating history is determined to be better predictor for future performance than the original resource assessment.

ii. <u>Prinaples Juidnes the Use of the Credit Factor Chart - Special considerations unique to renewable projects:</u>

Cr It Factors:

construction: Wind and solar projects are considered to have lower risk construction processes than conventional power plants due to the modular nature of the equipment involved and the shorter timeline required to complete construction and commissioning activities. Both solar and wind projects are typically commissioned in stages, allowing the project to begin earning revenue prior to Commercial Operation Date (COD), which can help to offset exposure to construction delays if they arise in the final stages of commissioning. The level of complexity in the construction activities for a photovoltaic (PV) solar project is typically considered to be low due to minimal moving parts and the modular nature of the plant assembly.

Operational & Technology: Assessment - For renewable projects, a professional resource assessment by an experienced third party engineering firm will typically be completed prior to construction of a Project, with appropriate sensitivities and adjustments for the particular geography, climate, and details of the project site and equipment being used. Wind speeds or solar insolation data gathered on site for a meaningful period of time in advance of the start of construction is preferable. The debt sizing should account for downside resource scenarios as well as the mean projected resource. Projects that have meaningful resource and operational data from historical operations may rely on actual historical data points in projection scenarios if the actual operating history is determined to be a better predictor for future performance than the original resource assessment.

Special Considerations for Renewable Projects: Projects should be evaluated using both the financing case (typically P75 for window P50 for solar, unless pre-financing actual results differ in terial / and necessitate the usage of a different probability of exceptance as the baseline projection) and a stress case (typically P90 unless unique circumstances of a Project's risk profile or its historial performance merit the use of a different scenario) to different, which designation is most appropriate.

# SECTION 1. CREDIT TENANT LOANS

# a) Credit Tenant Loans

# (i) General

# (A) CTL Categories

Mortgage loans that are made primarily in reliance on the credit standing of a major tenant, structured with an assignment of the rental payments to the lender with real property planger as collateral in the form of a first lien, are referred to as a Chalit Tenant Loan. Four categories of CTLs are recognized as eligible in reporting on Schedule D: Bond Lease Based CTLs, Credit Leve Based CTLs, Acceptable CTL Variants (ACVs) and Multip. Property Transactions (MPTs).

# (B) Intent

The categories segregate CTL transactions in accordance with two principles: (i) the degree to which the coedit tenant is obligated to the lender for payments and rear earlier earlier risks and (ii) the degree of complexity in the legal struct ral components of the transaction. The Bond Lease Bas of Ch. Lategory is intended to capture those transactions that a flect is criteria discussed below and contains no legal or structural oriation from one transaction to another. The Credit Lease bised of L category is intended to capture those transactions that direct from Bond Lease Based transactions primarily because less or is to perform specified obligations, requiring analysis of he lessor risk is mitigated. The ACV category is intended to Sect obstantially all of the standards described for the Bond Lease ased or Credit Lease Based CTL categories. Transactions in the A V category are those that do not perfectly reflect all of such ared characteristics, but which contain the deviations highlighted in the ACV list; provided such deviations do not in number or otherwise alter the character of the transaction as a Bond Lease Based or Credit Lease Based CTL. The ACV category will be interpreted so as to maintain the regulatory expectation that all submitted transactions meet the criteria set out for the Bond Leased Based or Credit Lease Based CTL, with only slight deviations from criteria permitted. The MPT category is intended to facilitate the SVO's analysis of Bond Lease Based or Credit Lease Based CTL Transactions where more than one site or property exists in the transaction structure. The MPT category provides an economy and efficiency of transaction cost and resources. It allows for the use of

essentially uniform documentation for the transaction for one credit tenant or one credit tenant group.

# (C) Presumption of Eligibility

Transactions that meet the definition and legal and structural characteristics for one of the four CTL categories shall be submitted to the SVO for evaluation on the appropriate CTL Evaluation Form. From the perspective of an insurance company lender, a transaction that on its face meets the criteria of a particular CTL category is entitled to a presumption of <u>Schedule D</u> eligibility, subject to a determination by the SVO that the transaction is not appropriate for <u>Schedule D</u> reporting.

# (D) SVO Procedure

Upon receipt of an Evaluation Form, the SVO analyst and first review the Evaluation Form and other documents submitted by or insurer to verify that the transaction reflects appropriate CTLs iteria. If the information provided on the Evaluation Form anges is that the transaction is likely to reflect all appropriate CTL criteria, the analyst shall proceed to determine either that (i) the transaction reflects risk consistent with the definition and other criteria for the category or (ii) that the transaction contains risks a fferent from those normally associated with Schedule La transactions.

Where, in the opinion of the analyst and where otherwise appropriate, the risk presented by the consaction is inconsistent with the definition and other sitema for the CTL category but is consistent with School D reporting, the analyst may reflect the additional risk by adjusting the Designation for the transaction downward and away from the credit rating category assigned to the lessee. If the analyst work des that the transaction contains risks different from those normally associated with Schedule D, the transaction so II be rejected as ineligible for Schedule D reporting.

# (E) General TL sues

ne fo owing re the types of general issues that may be relevant to S 1's C 1 alysis. The list is not intended to be all-inclusive and not an statements may be relevant to each CTL category. Where appropriate, analysts shall consider:

- 1. The extent to which the transaction appears well insulated from the credit risk of the lessor.
- If a Phase I report, or the nature and prior use of the land, indicates a substantial likelihood of preexisting environmental contamination,

- the extent to which the risk is mitigated may be evidenced by a Phase I or II report, an assumption of that cost by the lessee or other acceptable solution.
- 3. If the lessee's NAIC Designation is less than **NAIC 2**, insolvency risks associated with the lessee may be increased, and all other aspects of the transaction may play an important role in the SVO's analysis.
- 4. A previously unrated lessee or guarantor is eligible for CTL consideration if it presents the information required in the Evaluation Form.
- 5. While the number of lenders is not limited, there must be equivalency in protection for all lenders.
- 6. While lessor's ownership structure is not lime additional information to assess whether the risks associated with the lessor's ownership structure are mitigated.
- 7. While the transaction may involve a leachold interest created by an agreement between the owner of hence interest, the ground lessee, the ground lessor and the remainder man, if any (specifically whether or not the ground lease on state or years is terminated pursuant to a foreclosure of the near(s) or whether all of the ground lease obligations materially material of the lessee's obligations under the lease).
- 8. Where cascalty in urance for full replacement value is required, it shall be rovice by an insurer having a claims paying rating ability at least equivalent of an NAIC 2 Designation, or if the lessee shall be and at least the equivalent of an NAIC 2 Designation and lessee's GAA anet worth is at least \$100 million at the time of origination, by self-incurance. If the credit rating of a lessee self-insuring falls below in NAIC 2 Designation equivalent, then the lessee shall obtain adequate casualty insurance from an insurer having a claims paying ability rating at least equivalent to an NAIC 2 Designation. Within 90 days of a rating downgrade, insurer shall provide evidence to the SVO that the required insurance coverage has been obtained.
- 9. If the lessee is not assigned an **NAIC 2** Designation or better, and the SVO shall consider it necessary to conclude its analysis, the insurer shall collect and send such additional information explaining the strategic importance of the premises to the lessee's business operations (whatever the nature of the leased premises—e.g., retail, office, warehouse, manufacturing plant).

# (F) Evaluation Form

The CTL Evaluation Form shall be deemed to be a part of the documentation submitted by the insurer subject to all pertinent rules of the NAIC and of state insurance departments regarding truthfulness, accuracy and completeness. However, the Evaluation Form is not intended to be a statement of criteria to assist structuring of CTLs. Acceptance of an Evaluation Form by the SVO does not imply that the transaction will be accorded <u>Schedule D</u> treatment. The SVO shall have discretion to vary the terms of the Evaluation Form as experience and prudent analytical judgment may suggest.

# (ii) Bond Lease Based CTL

# (A) Definition

A Bond Lease Based CTL is a transaction structured around the terms of a Bond Lease. A Bond Lease is a lease between a lesson of a lessee for a specified period of time with specified rent payments that are at least sufficient to repay the related note(s). The Bond Lease requires the lessee to perform all the blic atoms related to the leased premises. The investment community has distorically defined a Bond Lease as a "hell or high water lease," the general concept being that regardless of what occurs as to the disead promises, the lessee is obligated to continue to pay its renular herefore, the focus is on the credit of the lessee (or of the guarantor of lessee's obligations) under the Bond Lease, not the real property characteristics related to the premises.

# (B) Legal Characteristics of Concreases

A Bond Lease reflects the for wing legal characteristics:

- (1) The lessee is responsible for every obligation related to the leased premises, such a payment of all taxes and utilities, the performance of maintenance, environmental and ground lease obligations (in any) and the obligation that the lessee must indemnify the lesser against assess and claims relating to the leased premises. The letter or's on obligation may be to provide quiet enjoyment of the provises. The lessee.
- (2) he lessor makes no representations or warranties regarding the condition of the leased premises and the lessee accepts the remises "as is."
- (3) The lessee has no right to offset or abate rent or to terminate the Bond Lease upon the occurrence of obsolescence, condemnation,

casualty or for any other reasons, except that the lessee may terminate the Bond Lease (i) at any time, if the termination coincides with the lessee's purchase of the leased premises, for an amount at least sufficient to pay the outstanding principal balance and accrued interest or (ii) during a period no longer than the last three years of the lease term without such purchase, in the event of a condemnation and casualty, if the insurance proceeds (or self-insurance proceeds) and condemnation awards are payable to the lender of the second are in amounts sufficient to pay the loan in full.

- (4) The lessee is not required to occupy the red premises if the occupant is a subsidiary or affiliate of the credit enant. In these cases, the SVO may require additional information regarding the strategic importance of the leased premises.
- (5) The lessee may assign an subject if the lessee remains unconditionally liable for the performance of all lessee obligations.
- (6) The Bond Lease of a mended without the lender's consent.
- (7) The Bond Lase other relevant document(s) must specifically prohib a men or of estates.
- (C) Structural Charteristics of Bond Lease Based Transactions

  A Bond Lease and related documentation reflect the following structure charteristics:
  - (1) Paymer's under the note, including a balloon payment, con spond to a lease payment due from the lessee pursuant to the Bond lease that is equal or greater than the note payment. The term "ballo h" in the definition is intended to imply only a payment larger previous payments and does not contemplate permitting transactions with refinance risk.
  - (2) Neither the lease payments nor the debt payments need be level.
  - (3) The lessee is required to pay for all expense items.
  - (4) The lessee leases 100% of the real property securing the note.
  - (5) There is a valid first lien on the real property or the leasehold estate in favor of the lender/trustee.
  - (6) There must be in effect a fully executed irrevocable and perfected assignment of lease payments in favor of the lender/trustee

and the lender/trustee must be directly collecting lease payments sufficient to fully pay each and every installment of debt service.

- (7) To the extent the credit to be relied upon is that of a guarantor, the guarantee of the lessee's obligations must be irrevocable and unconditional, and must guarantee performance of all obligations of the lessee under the Bond Lease. The term "guarantor" excludes third party guarantees for purposes of credit enhancement but is intended to include support arrangements, which in the opinion of the SVO, are entered into as a regular part of the business of the lessee or the group of entities of which the lessee is a part.
- (8) Loan to value is not relevant and therefore not limited

# (iii) Credit Lease Based CTL

# (A) Definition

A Credit Lease Based CTL transaction is one structured around a Credit Lease. A Credit Lease is a lease between a lesso, and a lessee for a specified period of time with specified recommendate least sufficient to repay the related note(s).

The Credit Lease requires the lessee to perform most of the obligations related to the leased premises. A Credit Lease transaction is a corporate bond/commercial most age to associon whose primary risk/return characteristics are derived in most the creditworthiness of the lessee rather than from the faits of the mortgaged property. The principal difference between a bond Lesse and a Credit Lease is the small set of landlord obligations or real estate risks that must be explicitly addressed through wear-recognized mitigation methods discussed in paragument D belo.

- (B) Legal Characteristics of Cro. "t Leases

  A Credit Least reflects the following legal characteristics:
  - (1) The less be is responsible for most of the obligations related to the lased, remises, such as the payment of taxes and utilities, the erfort ance of maintenance, environmental matters caused by its occupancy and ground lease obligations (if any) and must indemnify the less or against most losses and claims relating to the leased premises. Any exceptions or other obligations must be addressed through insurance, adjusted debt service coverage ratios or other acceptable mitigants.
  - (2) The lessee accepts the leased premises, as evidenced by an estoppel certificate.

- (3) The lessee has limited rights to offset or abate rent related to casualty or condemnation or the failure to perform roof, structural or parking obligations.
- (4) The lessee is not required to occupy the leased premises if the occupant is a subsidiary or affiliate of the credit tenant. In these cases, the SVO may require additional information regarding the strategic importance of the leased premises.
- (5) The lessee may assign and sublease if the lesse remains unconditionally liable for the performance of all lesse, obligations.
- (6) The Credit Lease cannot be amen ed with out the lender's consent.
- (7) The Credit Lease or oth relevat document(s) must specifically prohibit a merger of estates.
- (C) Structural Characteristics of Credit Lease Bas. Transactions
  A Credit Lease Based transaction reflects the following structural characteristics:
  - (1) Payments under the local term including a balloon payment, correspond to a lose payment due from the lessee pursuant to the credit lease, except that the loan term may exceed the lease term by not more than ix months, and the outstanding principal balance at the end of the least term shall not exceed 5% of the original loan balance.
  - (2) leither the rent payments nor the debt payments need be leve.
  - (3) The lessee is required to either directly pay or to reimburse et sor for primary expense items (e.g., taxes, utilities, maintenance and other operating expenses).
  - (4) The lessee leases 100 percent of the real property securing the note.
  - (5) There is a valid first lien on the real property or the leasehold estate in favor of the lender/trustee.
  - (6) There must be in effect a fully executed irrevocable and perfected assignment of lease payments in favor of the lender/trustee and the lender/trustee must be directly collecting lease payments sufficient to pay the debt service fully.

- (7) To the extent the credit to be relied upon is that of a guarantor, the guarantee of the lessee's obligations must be irrevocable and unconditional, and must guarantee performance of all obligations of the lessee under the Credit Lease. The term guarantor excludes third party guarantees for purposes of credit enhancement, but is intended to include support arrangements that in the opinion of the SVO are entered into as a regular part of the business of the lessee or the group of entities of which the lessee is a part.
- (8) Loan balance shall not exceed initial appraised value of the property. An appraisal must be done in accordance with Member of the Appraisal Institute (MAI) standards. The value reported in the appraisal report must proceed from a comparison of each of the (I) cost, (ii) comparative and (iii) income approaches.
- (D) Risks and Acceptable Mitigants in Credit Lease Based Transaction. The following are acceptable forms of mitigation against la. Flord-retained obligations:

# Situation/ Mitigant:

- (1) Roof, structural and parking expenses no explicitly covered by Credit Lease:
  - (a) Deduct all appropriate costs a calculating an adjusted debt service coverage (DSC ratio Cat least 1.05x; and
  - (b) Provide that funds wall be escrowed in amounts estimated to be accumulated on a substantially level basis, to a level sufficient to allow for payment of the named costs at the time they be expected to occur.
- (2) Loan term ceeds initial lease term:
  - (a) Difference all not exceed six months; and
  - (b) Remaining principal shall not exceed 5% of original loan bance.
- (3) Casua.
  - Re closs insurance (or an obligation to pay rent regardless of a casualty) is required from an insurer having a claims paying ability rating equivalent to an **NAIC 2** Designation, or self-insurance by a tenant having a credit rating equivalent to an **NAIC 2** Designation, and whose GAAP net worth is at least \$100 million, at the time of the origination;

- (b) If the casualty does not result in termination of the Credit Lease, proceeds must be used to repair and restore premises; and
- (c) If the casualty results in the termination of the Credit Lease, awards go to the lender to the extent of the outstanding principal and interest. Termination is only allowed in the last three years of the lease term, unless the lessee is required to make a termination payment at least equal to the outstanding principal and corrued in prest.
- (4) Ground lease obligations not explicitly a dressed in credit lease:
  - (a) Credit Lease payments must be surmount to pay ground rent, with DSC adjusted according, and
  - (b) Attornment (non-distribute, or other agreement between fee owner and roder is required, obligating ground lessor to noth, lender of any default by ground lessee and be mittin, lender an opportunity to cure the default.

# (5) Condempa ion:

- (a) Where and emnation results in the termination of the Crear Lease, all awards go to the lender to the extent of the outstanding principal and interest; and
- whe condemnation does not result in the termination of the Credit Lease, the premises must be repaired and estored.

# (6) Environmental:

or, if the Phase I report shows a problem or the nature and prior use of the land indicates a substantial likelihood of preexisting environmental contamination, a Phase II report and an assumption of that cost by the lessee or other acceptable solution.

# v) Acceptable CTL Variants

An ACV CTL is a transaction that meets substantially all of the standards for a Bond Lease Based or Credit Lease Based CTL but that contains one or more of the variants described in the Guidelines for Acceptable CTL Variants as set forth in <u>subsection (v) below</u>. An insurance company may report an ACV to the SVO by submitting the Bond Lease Based or Credit Lease Based Evaluation Form, whichever is appropriate, specifically

identifying the items in the Bond Lease Based or Credit Lease Based CTL standards not present in the submitted transaction, explaining the differing language, device or mitigant put in place to substitute for the missing criteria and providing documentation to substantiate the different approach employed in the transaction.

# (v) Guidelines For Acceptable CTL Variants

# (A) Acceptable CTL Variants

Transactions that exhibit the following variations from the definitions of Bond Lease or Credit Lease Based CTL contained above will nevertheless be eligible for <u>Schedule D</u> treatment in accordance with these guidelines and the definitions if the following standards at met:

- (1) Transactions where lease payments are insufficient to cover required debt service. The shortfall would be covered fully by credit enhancement, cash escrow or excess rent extraside.
- (2) Transactions with balloon payments in each 5% for Credit Lease Based CTLs if lease when when you credit enhancement fund the balloon. The SVC will a per the extent to which the payment stream, whether provided by the lease or credit enhancement, covers the alloon ayment.
- Transactions where loan term exceeds lease by more than 6 months. The lessee is colligated either to renew the lease, purchase the property or terminate the lease and pay an amount equal to the outsteeling out. In the tenant renews the lease, the renewal term yould have to be for the balance of the loan term. If the tenant purchased the property, the sale and settlement of the landlord's loan abligation must occur not later than the date prior to which lease payments would cease and there must be a simultance us payment to the lender.
- (4) Frank stions that have been purchased by the reporting ins rance company from another institution via an assignment. If Bonk Leave or Credit Lease criteria are met, the fact that the transaction was acquired through an assignment does not jeopardize CTL treatment.
- Transactions in which the tenant occupies less than 100% of the premises. The reporting insurance company shall identify the credit tenant and the credit tenant's lease payments shall be

sufficient to cover the necessary escrow, common area maintenance and other relevant costs.

- (6) Transactions where the user of the property is not affiliated with credit tenant or guarantor. If (i) the credit tenant or a guarantor is liable for and agrees to make the required lease payments and (ii) despite lack of affiliation between the parties, there is a substantial community of interests between the parties, for example the relationship that might exist between an auto manufacturer and an auto supplier.
- (7) Transactions where the tenant hay to minute the lease despite the fact that the amount due under the lease is greater than 5% of the original loan amount. The tenant shall not terminate the lease without first puting on the loan or extending the term of the lease to a sign of client to amortize the remaining balance of debt
- (8) Transactions in which counted has obligations other than those specimely in the definition for Credit Lease Based CTLs. The SVO challe average all discretion to determine whether the level of risk associated with the retained landlord obligation is consistent with the mingant used. The SVO anticipates that the reporting a surant company will provide a structure that protects the case low. Devices like cash escrow or excess rent set asid a map a pappropriate mitigants.
- (9) To sactions in which the landlord retains obligations but there be lease requires the tenant to continue to make payments retardless of landlord's breach of these obligations, with tenant's or y remedy to pursue legal remedies for damages against the andlord. These transactions would be treated as Credit Lease Based CTLs, irrespective of the fact that the stated variation may be the only difference between the submitted transaction and a Bond Lease Based CTL.
- (10) Transactions that permit lease termination for casualty to all or substantially all of the property prior to the final three years of the lease term. The reporting insurance company must demonstrate that insurance by a third party acceptable to the SVO is in place and fully covers principal and interest in the event of lease termination. A key consideration in this variation is that it be clear that the insurance company lender would always "walk away whole."

- (11) Transactions that permit the lease to be canceled if the property is not restored within a specified time period after a casualty. The transaction shall incorporate a mechanism to assure that the casualty could be repaired within the term of the insurance policy then in force and the mortgagee would have to permit application of insurance proceeds to pay off the debt.
- (12) Transactions in which the tenant has a right to abate rent during a casualty, condemnation, repair or restoration event. The reporting insurance company shall provide (i) evidence of rent insurance of a duration of at least 1 year from a company rated the equivalent of an **NAIC 1** and (ii) evidence that the tenant is obligated to resume paying rent after the end of the insurance policy payments, regardless of the status of the dsuang condemnation, repair or restoration event.
- (13) Transactions that provide a right to terminate it lease and substitute property on substantial casualty or codem ation. The tenant shall substitute equivalent lead of rope.
- (14) Transactions where tenant has a right to condemnation award for value of leasehold estate of tening in provements. If the tenant has a leasehold interest in the premises because it has advanced funds for improvement CTL ligibility is not affected because the agreement world pen if the tenant to receive proceeds of the condemnation award, provided the tenant continues to be obligated to make the payments called for under the lease and those payments are sufficient to pay the loan in full, or the loan is spaid.
- (15) Transactions with an unsatisfactory Phase I or II report. Section 1(a)(i)(E)(2). Stais Part above is intended to provide the industry. If he a device through which it can communicate environmental issues to the SVO. Generally, the SVO anticipates that an explore the industry are provided in the sactions will have a Phase I report. If the Phase I report sets forth an unfavorable matter, a Phase II report shall provided or detailed study of the issue. If the reporting instance company wants to pursue the transaction it may present the Phase II and other material information to the SVO, detailing the manner in which it would mitigate the risk. The SVO would then determine whether the proposed solution serves as an adequate mitigant for the risk.

- (16) Transactions with a stale environmental audit. These transactions may be permitted if the tenant has been in the property since the date of the initial audit, the initial audit is available and acceptable to the SVO and the tenant's use of property is not environmentally sensitive. The documents shall include reliance on a strong net lease paragraph to establish that all environmental obligations are tenant obligations and not landlord obligations.
- (17) Transactions with appraisals submitting only one appraisal method. A transaction may be abmitted with an appraisal that lacks all three-valuation methods (cost, comparative and income approaches) if the appraisal is in accordance with MAI standards and makes clear at the other two methods were not applicable and this is stated in the MAI opinion.
- (18) Transactions with second ortgages. Rent must exceed aggregate debt service on an lebt up to required Credit Lease Based coverage som and a d the second mortgagee could not put lender into defau.
- (19) Transactions where the lender is the second mortgagee. Rent must exceed aggregate debt service on all debt up to required addit to se Based coverage standards and the lender shall be a right o cure first mortgage defaults.
- (20) Tan actions with minor lessor representations, was anticled covenants. Staff shall have sole discretion to assess the nature of the landlord obligation and the extent to which the miligant is appropriate. However, these transactions may be positive if the tenant is estopped from asserting these lessor obligations to abate or cease payment of rent, or if there is credit enhancement or other collateral available to protect against tenant non-payment.
- (21) Use of collateral trustee and issuance of trust certificates. The use of a collateral trustee, or trust certificates, has no impact on eligibility for CTL treatment. Staff will, of course, review appropriate documentation associated with the arrangement.
- (22) Transactions involving a "Dark Store." The SVO will raise no objection to CTL eligibility for a transaction in which the original lessee "darkens" the leased premises if the lessee remains

unconditionally liable for the performance of all lessee obligations.

#### (vi) Multiple Property Transactions (MPTs)

#### (A) Definition

An MPT transaction is a series of single property Bond Lease Based CTLs or Credit Lease Based CTLs (but not both) combined in one transaction. The MPT category does not alter the fundamental structure or principles of either the Bond Lease Based or the Credit Lease Based CTL. To qualify as an MPT CTL, each site or property must satisfy the existing Bond Lease Based or Credit Lease Base CTL definition, on a stand-alone basis.

## (B) General Legal Characteristics of MPTs

An MPT transaction reflects the following legal characteristics:

- (1) Each property or site qualifies as (i) a Bond Leas Based CTL or (ii) a Credit Leased Based MPT CTL, as den. ed be pw.
- (2) Either (a) a single credit tenant (b) "an liated" credit tenants with a quarantee by the parent.
- (3) Differences in the documents re identified and limited to dollar amount of rent or debt and state Yocal law differences.
- (4) Local counsel opinion(s) at a special counsel opinion regarding enforceability of documents, perfection of security interests in the collaboral at consiquently, the recordation of security documents are provided to the SVO.
- (5) For Crudit Lease Pased MPT CTLs, each property has a satisfactory Proce I environmental report and an Appraisal indicating the approcedualue of the property and containing the appraiser's name and certifications done in accordance with MAI standard.
- (6) Listin cross default and/or cross collateralization previsions re identified.
- Any variance must be consistent among all the properties or says in the transaction.
- Legal and Structural Characteristics of Credit Lease Based MPT CTLs
  - legal and structural characteristics of a Credit Lease Based MPT CTL shall be the same as the existing Credit Lease Based CTL definition, with the following modifications:

- (1) There must be a single lessor.
- (2) Either a single credit tenant or affiliated credit tenants with a guarantee by the parent; however, in all cases the lessee must occupy the leased premises.
- (3) Any guarantee of a lessee's obligation must be with respect to all properties in the transaction.
- (4) All risks and acceptable mitigants, as crurency described in the existing Credit Lease Based CTL of inition, must be uniform for each property.
- (D) Acceptable CTL Variants Eligible for MPT Treatment

  The following Acceptable CTL Variants ill by people for Credit
  Lease Based MPT CTLs:
  - (1) Transactions that have then puchased by the reporting insurance company from a other in litution via an assignment. If Bond Lease or Credit Lease site is are met, the fact that the transaction was acquired brough an assignment does not jeopardize CTL treatment.
  - (2) Transactions where the tenant may terminate the lease, despite the fact that the amount due under the lease is greater than 5% of the riginal loan amount. The tenant may not terminate the local without first paying off the loan or extending the arm of the lease to a term sufficient to amortize the recalning brance of debt.
  - Fransactions that permit lease termination for casualty to all r substantially all of the property prior to the final three years of the lease term. The reporting insurance company must demonstrate that insurance by a third party acceptable to the SVO is in place and fully covers principal and interest in the event of lease termination. A key consideration in this variation is that it be clear that the insurance company lender would always "walk away whole."
  - (4) Transactions that provide a right to terminate the lease and substitute property on substantial casualty, economic obsolescence or condemnation. The tenant would have to substitute equivalent leased property.
  - (5) Transactions with appraisals utilizing only one appraisal method (provided that the appraisal method is uniform for all

properties). A transaction may be submitted with an appraisal that lacks all three valuation methods (cost, comparative and income approaches), provided the appraisal is in accordance with MAI standards and makes clear that the other two methods were not applicable and this is stated in the MAI opinion.

## (vii) Variants Requiring an NAIC CRP Rating

An NAIC CRP rating is required for CTL transactions:

- (1) With two credit tenants in the transaction.
- (2) If lease payments do not commence until completion of construction, but cash escrow or credit enhancement is available during construction sufficient to negate risks.
- (3) If additional credit enhancement would up to the rating of the transaction above the credit rating of the conant.
- (4) Where self-insured tenants with a Designation glow **NAIC 2** are required to maintain a specified minimum net worth or to immediately obtain insurance.
- (5) Where environmental issues are not as dressed, but there is a strong net lease paragraph, indem affication, compliance with laws or maintenance covenants
- (6) With unaddressed and preex, ting environmental issues, if there is credit enhancement of other conateral to support the risk.
- (7) Where there is no appraisal of MAI equivalent.

Where landlord makes construction we santies or credit tenant has limited rights to offset rent for construction if estopped agreements are in place or there is agreement from a pdit ten it that set-offs are nonbinding against lender because the risk is fully progred.

#### SECTION 2. REPLICATION (SYNTHETIC ASSET) TRANSACTIONS (RSATs)

#### a) Definitions

The following terms shall have the meaning ascribed in this section. The definitions of derivative instruments set forth in <u>Part Six, Section 3 (c)(i)(B) of this Manual</u> are incorporated by reference to <u>this Section 2</u>.

## (i) Approved RSAT

Any transaction that meets either of the following conditions:

(A) Safe Harbor - Defined RSATs

Any transaction structured according to the following defined transaction types shall be presumed to be in Apple ved RSAT and should be submitted to the SVO pure antitle the paragraph (A). Transactions that are structured to contain elements of risk other than those normally associated with the Defined RSAT descriptions below, and transactions involving a rets that would not normally qualify for an NAIC Designation, are not eligible for safe harbor treatment and must be submitted to the SVO pursuant to paragraph (B) below. If the SVO is eives a ransaction that does not qualify for an NAIC Designation but you'd otherwise qualify as an Approved RSAT, the SVO of the structure of the transaction to the attention of the VOS/TF and aware instructions on how to proceed with it.

- (1) **Bond w. 'n Interest Rate Swap**—In this RSAT, the insurer enters in a a swap agreement to exchange a floating interest rate for a fixed interest rate or vice versa.
- Pone with Credit Default Risk Swap—In this RSAT, the insure entrys into a credit default swap to exchange the credit default risk of bond for that of another bond.
- **Bond with Total Return Swap**—In this RSAT, the insurer eners into a total return swap to exchange the return of one Basket or Index of bonds for the return of another Basket or Index of bonds.
- (4) **Bond with Foreign Currency Swap**—In this RSAT, the insurer enters into a currency swap to exchange the right to receive principal and/or interest in the currency of one country for that of another. A foreign currency swap can be structured on a fixed or floating rate bond. The swap can involve any currency.
- (5) **Bond with Equity Option**—In this RSAT, the insurer holds a bond and enters into a call option to purchase common stock or a call on an equity index

- Convertible Bond with Sale of Equity Option-In this RSAT, the insurer holds a convertible bond and enters into an agreement to sell the equity conversion rights connected with the bond to another party.
- Bond with Index Amortizing Interest Rate Swap—In this (7) RSAT, the insurer enters into an agreement to exchange fixed interest rate payments for floating interest rate payments or vice versa. The notional amount of the swap, and therefore the size of the interest rate swap, amortizes by reference to an index, usually also tied to interest rates.
- Bond with Interest Rate Swap and Swaption **Agreement**—In this RSAT, the insurer enters into two agreement. The first agreement is to exchange a fixed interest rate fol a float to interest rate or vice versa. In the second agreement, the insurer interest into a swaption agreement by which it allows itself the ption transferring its obligations under the swap agreement.
- Bond with Interest Rate Swap and Interest Rate Cap/Floor—In this RSAT, the insurer enter into two agreements. The first agreement is to exchange a fixed interest rate for a floating interest rate or vice versa. In the second arreer ent, we insurer limits its exposure above or below a certain it rest rat level by entering into a cap or floor agreement.
- (B) Transactions Subject to RSAT Appr var Review

Transactions that are not structured according to one of the transaction types defined about mutter submitted to the SVO for a determination of y lether r no the transaction is an Approved RSAT. This determination shall be made through a review of the submitted document that describe the characteristics of the derivative and cash complients of the transaction. The description submitted sha (include the following:

- An identification of the cash flows in the transaction; both (1)le inster to other parties and from other parties to the from
- An auentification of the resulting synthetic asset.
- demonstration of how the cash flows serve to produce the synthetic asset.

The documentation should demonstrate that the combined cash flows will achieve the economic performance sought to be produced by the insurer and, therefore, qualify the transaction as an Approved RSAT. If the SVO receives a transaction that does not qualify for an NAIC Designation but would otherwise qualify as an Approved RSAT, the SVO will bring the transaction to the attention of the VOS/TF and await instructions on how to proceed with it.

#### (ii) Basket

means composite of specific financial instruments that are determined by agreement between two parties to be used as a statistical benchmark.

Section 2.

#### (iii) Cash Component

means the instrument, or portfolio of instruments, owned the insurance company that is identified by the insurer as the cast first, ment component of the RSAT. In an RSAT, the credit quality of the Cash component may differ from the credit quality of the reference see rittee.

## (iv) Change in Credit Profile

means an RSAT where the credit risk, as defined pursuant to <u>Part One, Section 2(b)(i) of this Manual</u> and cooted by NAIC Designation and/or NAIC CRP rating, of the Cash Components different from the credit risk of the replicated (synthetic) and Examples of transactions that constitute a change in credit profile may include:

- (A) A Bond of the Credit Default Risk Swap where the risk of loss of principal results from the potential of default by an obligor different from the Cash Component obligor. This RSAT can also be structure not use the same obligor for the Cash Component and the replicate of yorth tick) asset, but where the replicated (synthetic) asset is in a lifferent position in the capital structure of the obligor. For example, the swap may result in a change from senior creditor's status to one of a subordinated debt holder.
- (B) A Bond with Total Return Swap where the obligors in the Component portfolio are different from those in the derivative instrument component.

Examples of transactions that do not, on their own, constitute a change in credit profile include:

- (C) A Bond with Interest Rate Swap.
- (D) A Bond with Foreign Currency Swap.

#### (v) Effective RSAT

means a reported transaction that meets the following conditions:

(A) The transaction is determined to be an Approved RSAT; and

- The replicated (synthetic) asset is an otherwise permissible (B) investment: and
- At the time the RSAT is entered into, the insurer's investment in the cash and derivative components have a market value that is not materially different from the market value ascribed to the RSAT; and
- The insurer's maximum potential loss in the Replicated (Synthetic) Asset does not exceed the sum of the book/adjusted carrying value of the Cash Component, and the derivative component; and
- The RSAT consists of a fixed income Cash Component and a (E) derivative component and the term of the derivative component do not exceed the term to maturity of the Cash Component; and
- At no time is there exposure to a derivative parsacle without a corresponding Cash Component assigned exclusive, to the Replicated (Synthetic) Asset.

#### (vi) Identical RSAT

means an RSAT entered into by multiple, yet legally spara, and distinct, insurance companies of the same insurance connany group through separate derivative contracts, but utilizing the sime to of derivative transaction, Cash Component, counterparty ransaction effective date, scheduled termination date and assigned a siggle USIP Identifier.

## (vii) Index

means a composite of financial instructions whose composition is determined by application of objective, pre-refined rules to be used as a statistical benchmark. Fina insurments may be added to or deleted from the index universe

## (viii) Reference Security

means a financial instrument of instruments whose creditworthiness is referenced in a der vative agreement (typically, a credit default risk swap) and that serves as an instrument by which a credit event is determined or triggered

## (ix) RSAT

stands to Replication (Synthetic Asset) Transaction and means a derivative transaction exered into in conjunction with other investments in order to coduce the investment characteristics of otherwise permissible inves ments. Notwithstanding the rule set forth in Part Two, Section 3 of th. Manual pertaining to short-term investments, the term RSAT includes long term transactions (i.e., those with a when - issued maturity of a year or  of a year or less). Although transactions structured with a futures or forward equity contract may not exactly reproduce a specific asset, these transactions are permitted to the extent such RSATs are permissible investments according to the insurer's state of domicile. A derivative transaction entered into by an insurer as a hedging or income generation transaction shall not be considered to be a replication (synthetic asset) transaction. The insurer shall be responsible for determining that a derivative transaction is considered to be either a leaging, income generation or replication (synthetic asset) transaction vior to ling the transaction with the SVO. For a definition of hedging and income generation, see SSAP No. 86—Derivatives.

Section 2.

## (x) RSAT Form

refers to the Replication (Synthetic Asset) ansac, on Form used to report the RSATs discussed and defined in this Section 2

#### (xi) RSAT-CCA Form

refers to the Replication (Synthetic A set) Fransaction - Credit Change Annex Form used to report ransactions where the RSAT results in a Change in Credit Profile from that of the Cash Component.

## (xii) RSAT Basket Form

refers to the Realization (Synthetic Asset) Transaction Form used to Report RSATs using Paskets discussed and defined in this Section 2.

## (xiii) RSAT Fixed Ir come Index Form

refers to the Reseation (Synthetic Asset) Transaction Form used to report RSATs using India adiscussed and defined in this Section 2.

## (xiv) SAT Inde List Application

RSA Ind List as discussed in this Section 2.

#### b) Instruction to Report Replication (Synthetic Asset) Transactions

#### (i) Instruction

insurance companies shall report all RSAT transactions, including RSAT transactions of duration less than 365 days, to the SVO and the SVO shall apply the instructions contained in this Section 2 to all reported RSATs including Baskets and Indices.

#### (ii) Special Instruction Regarding Identical RSATs

Only one insurance company that is a member of an insurance company group that has engaged in an Identical RSAT is required to file the RSAT with the SVO. All of the rules and procedures specified <u>in this Section 2</u> shall be applicable to that filing.

Notwithstanding this special instruction, all of the members of the insurance company group that have entered into an Identical RSAT shall nevertheless fully report their holdings as required by annual statement instructions for Schedule DB Part C.

Any state insurance regulator who questions whether the RSAT entered into by members of an insurance company group meets the definition of an Identical RSAT may require the members of the group to file relevant information with the SVO so that the SVO may verify whether transactions claimed to be identical are identical within the meaning of the definition and/or whether the insurance companies have otherwise appropriately reported the RSAT transaction.

The SVO shall have authority to make inquiries of insurance somparies and to request insurance companies to file relevant information was it so had may verify whether transactions claimed to be identical are identical with the meaning of the definition and/or whether the insurance convanies have otherwise appropriately reported the RSAT transaction.

## Counterparty Risk-Based Capital

The NAIC Designation assigned to a RSAT does not capture any counterparty risk associated with any derivative concorned of the RSAT. The credit risk of any particular counterparty a capture in the risk-based capital charge of the counterparty report in <u>Scedule DB - Part D -</u> Section 1.

#### c) Initial Reporting of Replication (Synt As et) Transactions

## Informational Requirements Gene

Each reporting insurance compan, is required to file the information listed under subsection (e) below for every RSAT filing. Additionally, for those RSATs exhibiting a sange of Credit Profile, the reporting insurance company shall be required to file the information listed under subparagraph (B) by ow.

#### (A) General Film Inst.

- any Jash Component is required to be filed with the SVO and a not on the VOS Process with a current year Designation, the reporting insurance company is required to follow the reporting conventions and file the required documents set forth in Part Two, non 10 (c) of this Manual.
- The reporting insurance company is required to file the prospectus, offering circular, detailed term sheet, trade confirmation,

or other agreement or document, as appropriate to the transaction, corresponding to each derivative component of the reported Approved RSAT.

- (4) If the derivative component of the Approved RSAT relies on a counterparty that is not on the List of Counterparties Designated by the SVO (refer to <u>Part Six, Section 3 (c) of this Manual</u> for a description of analytical procedures and <u>Part Two section 9(b) of this Manual</u> for a description of informational regularization.
- (B) Additional Instructions for RSATs with a Change Creat Provide
  - (1) RSAT-CCA Form.
  - (2) If the transaction is one that in alvest surities, including Reference Securities that require an L. IC De ignation, the reporting insurance company is required to follow the reporting conventions and file the required documents for successful securities as set forth in Part Two, Section 10(c) of this Manua.

# d) Procedures Applied to Initial ports of Replication (Synthetic Asset) Transactions

(i) Effective RSAT

The SVO shall visity that the reported RSAT meets those standards of effectiveness set form in subsections (A), (D), (E), and (F) of Section 2(a)(v) of this part above. The reporting insurance company shall have responsibility are not ing that the standards of effectiveness set forth in subsections (B) and (c) of Section 2(a)(v) of this Part have been met.

(ii) <u>edit Ass</u> sment

be SVO shill apply the procedures listed <u>under subsection (A) below</u> for every filing Additionally, for those RSATs exhibiting a Change in Credit Profile, he SVO shall apply the procedures set forth in <u>subsection (B) below</u>.

- (4) General Procedures
  - (1) If the Cash Component is of a type that is required to be filed with the SVO and is not on the VOS Process with a current year designation, the SVO shall apply the procedures set forth in <a href="Part Three of this Manual">Part Three of this Manual</a>.
  - (2) If any counterparty involved in the RSAT is not currently listed on the SVO's List of Counterparties Designated by the SVO, the SVO shall apply the procedures set forth in <u>Part Six</u>, <u>Section 3 of this Manual</u>.

- The SVO shall review the documents corresponding to each derivative component of the reported Approved RSAT to verify that the relationships and identities of the parties to the agreement(s) are as reported on the RSAT Form.
- If the SVO determines that the documentation provided comports with the reported RSAT, then the analyst shall assign the NAIC Designation of the Cash Component to the RSAT.

## Additional Procedures for RSATs with a Change in Credit Profile

- If the transaction involves securities, including Reference Securities, which are on the VOS Process with a current year designation, the SVO shall assign that Designation associated will the Reference Securities to the RSAT.
- If the transaction involves securities, including ference Securities, that are not on the VOS Process with a corrent designation, the SVO shall apply the procedures set forth a Part Three of this Manual, to the securities. Upon determ, ation of an NAIC Designation for such securities, the SVO stall apply that Designation associated with the Reference Securities to the RSAT.

## e) Subsequent Reporting of Replication (Syntheti Ass 1) Transactions

<u>Informational Requirements – General</u>

Each reporting insurance company is require to file the information listed under subsection (i) below for every AT film. Additionally, for those RSATs exhibiting a Change A Credit rolle, the reporting insurance company shall be required to file a information listed under subsection (B) below.

- (A) General Filing Instructions

  - There are no additional subsequent reporting requirements if there are no charges in any of the components of the RSAT. Any sale, to minal, nor modification of the component pieces of an orgold RSAT must be reported to the SVO within 30 days. This can a done by submitting to the SVO either a Material Change ATF Form 0. a Renumbering Request for the affected RSAT. Any such sale, termination or modification that results in the RSAT ceasing to effective pursuant to Section 2(a)(v) of this Part above will immediately terminate the replication (synthetic asset) transaction.

(B) Additional Instructions for RSATs with a Change in Credit Profile

File the documentation required by Part Two, Section 11 of this Manual for securities, including Reference Securities, on the VOS Process. If a security is no longer listed on the VOS Process, file the documentation required by Part Two, Section 10 of this Manual.

## f) Procedures Applied to Subsequent Reports of Replication (Synthetic Asset) Transactions

Section 2.

## (i) <u>Credit Assessment</u>

The SVO shall apply the procedures listed under subsection (i) below for every filing. Additionally, for those RSATs exhibiting a Change in Credit Profile, the SVO shall apply the procedures set forth i subsection (B) below.

#### (A) General Procedure

- (1) The SVO shall monitor the NAI Designation assigned to the Cash Component pursuant to Pa One, Section 3 (f) of this Manual.
- (2) The SVO shall ronitor the NAIC Designation assigned to the counterparties to the derivative component of the RSAT pursuant to Part Che, Section 3 (f) and Part Six, Section 3 of this Manual.

The reporting surance company must report a change in the documer attor relating to any derivative component to the SVO. The SVC stall a less the significance of such change.

(B) Procedures for RSATs with a Change in Credit Profile

The VO shall monitor the NAIC Designation assigned to any securit including Reference Securities, involved in the RSAT urstant to Part One, Section 3(f) of this Manual.

## g) Additional Procedures for RSATs Using Baskets

## (i) Initial Reporting

(A) Informational Requirements

Reporting insurance companies are required to file the information listed below for each replication they enter into using a Basket.

- (1) RSAT Basket Form
- (2) If any of the component instruments in a Basket are not on the VOS Process with a current year Designation, the reporting insurance company is required to follow the reporting conventions

and file the required documents set forth in Part Two, Section 10(c) of this Manual for each of those instruments.

If the derivative component of the RSAT relies on a counterparty that is not on the List of Counterparties Designated by the SVO (see Part Six, Section 3(c) and refer to Part Two, Section 9(b) of this Manual for a description of informational requirements).

#### Procedures Applied to Initial Reports of Baskets (ii)

#### (A) Effectiveness Testing

The SVO shall verify that the reported RSAT meets those standards of effectiveness set forth in subsections (A), (D), (E), and (F) Section 2(a)(v) of this Part above. The reporting insurance company shall have responsibility for ensuring that the stalldards effectiveness set forth in subsections (B) and (C) of Section this Part above have been met.

#### Credit Assessment

If any component instrument of a Basket is not of with a current year Designation, the SVO share oply th procedures set forth in Part Three, Section 1(a) of this Monual

## Counterparty

If any counterparty named in the Road is Not currently listed on the SVO's List of Counterparties Designate. by the SVO, the SVO shall apply the procedures set forth in Part Civ. Section 3 of this Manual.

## h) Subsequent Reporting

## Informational Requirement

Reporting insurance companies are required to file the information listed below for each replication they ever into using a Basket on an annual basis.

- If there are additions or deletions to the component Basket, the SVO should be notified within 30 days. instruments in If any new a moment instrument in a basket is not on the VOS toces, the reporting insurance company is required to follow the reacting conventions and file the required documents set forth in Part The Section 10(c) of this Manual for each of those instruments.
- If any of the existing or new component instruments in a Pasket are on the VOS Process, but do not have a current year Designation, the reporting insurance company is required to follow the reporting conventions and file the required documents set forth

in <u>Part Two, Section 10(c) of this Manual</u> for each of those instruments.

## (ii) Procedures Applied to Subsequent Reports of Baskets

- (A) The SVO shall monitor the NAIC Designation of those Basket components with NAIC Designations pursuant to <u>Part One</u>, Section 3(f) of this Manual.
- (B) The SVO shall monitor the NAIC Designation assigned to the counterparty to the derivative component of the RSA soursuant to Part One, Section 3(f) of this Manual and Part Ny, Section 3 of this Manual.

## i) Additional Procedures for RSATs Using Indices

## (i) Initial Reporting

## (A) Informational Requirements

Reporting insurance companies are received to file an RSAT Fixed Income Index Form with the SVD for each replication they enter into using an equity of xed in ome Index. An insurance company may only enter into an Rs. Tusing a fixed income Index if the Index is listed on the SVO RSA Index List Equity Indices are not required to be on the SVO'S RSAT Index List as no credit quality evaluation is a form. For equity investments.

## (B) Procedures splied to tial Reports of Indices

## (1) Effe tive less Testing

The S. 2 skill verify that the reported RSAT meets those standards of a fectiveness set forth in subsections (A), (D), (E), and (F) of Section 2(a)(v) of this Part above. The reporting insurance company shall have responsibility for ensuring that the standards of exactiveness set forth in subsections (B) and (C) of Section 2(a)(v) above have been met.

## (2) Counterparty

If any counterparty named in the RSAT Form is not currently listed on the SVO's List of Counterparties Designated by the SVO, the SVO shall apply the procedures set forth in <a href="Part Six">Part Six</a>, <a href="Section 3">Section 3</a> of this Manual.

## (3) Verification

The SVO will verify that any fixed income Index named in the RSAT Form is on the SVO's current RSAT Index List.

## j) Subsequent Reporting

## Informational Requirements

- Reporting insurance companies are not required to file any (A) annual information with the SVO for RSATs using an Index as long as the Index, if it is a fixed income Index, remains on the SVO's RSAT Index List. If a fixed Income index is removed from the list, any RSAT utilizing such Index will no longer qualify as an Approved RSAT.
- The SVO shall monitor the NAIC Designation assigned to the counterparty to the derivative component of the RSAT pursuant to Part One, Section 3(f) and Part Six, Section 3 of this Manual.

## k) Procedures for Compilation of the RSAT Index List

## Compilation of List

The staff is instructed to compile and maintain a list of fixe, income indices that meet the standards identified in subsection (ii) below Index List). The RSAT Index List may be used by reporting in drance companies when filing fixed income Index RSAT with the SVO. If the SVO determines that an Index does not meet the eligibility equirements set forth below, the Index will not be included on the list. Publication of an Index on the RSAT Index List does not imply a opinion of the quality of such Index or of the Index vendor.

#### Eligibility Requirements

on the RSAT Index List if A fixed income Index may be digible the Index meets the following requirements

#### (A) Rule-Based

The Index is consosed and valued based on the application of objective, pre-defined siteri

Additions to deletions from the list must be made based on the application of uch criteria.

#### Informa on A. ilabi

ating information about the components is, or can be made av a ble, .....e SVO.

#### Components Rated

All, or substantially all, of the Index components are rated, or have by ors that are rated, by an NAIC CRP or have received a current year NAIC Designation from the SVO. In the event that not all of the Index components are NAIC CRP rated or have a current year NAIC Designation, the reporting insurance company may either (1) file the component with the SVO to obtain a Designation pursuant to Part Two, Section 10(c) of this Manual, or (2) assign an NAIC 5\* Designation to the unrated instrument, as long as it is current on principal and interest or an NAIC 6\* Designation if it is not or if the status is not determinable. Instruments assigned an NAIC 5\* Designation or NAIC 6\* Designation, on a combined basis, can represent no more than 5% of the Index's total value.

## (D) Independent

The Index is predominantly composed of instrume to whose issuers are unaffiliated with the Index vendor.

## (iii) Initial Reporting

In order to apply for listing of a fixed it some order on the <u>RSAT Index</u> <u>List</u>, a reporting insurance company should submit the following to the SVO:

(A) A listing of all Index co. ponen

Section 2.

- (B) The ratings of all MalC C. Drated Index components from all NAIC CRPs that has rated to component.
- (C) The actual MAIC Designation for each Index component with an NAIC Designation of an equivalent NAIC Designation for each component ated by an NAIC CRP using the conversion instructions so forth a Part Two, Section 4(d)(i)(A) and (B) of this Manual and the rate of equivalents set forth in Part One, Section 7(d) of this Manual, if rated and monitored by one NAIC CRP, the equivalent NAIC Designation; if rated and monitored by two NAIC CRPs, then the lowest rating and if rated and monitored by three or more IAIC CRPs, then the second lowest rating. In the case of a security rated and monitored by three or more NAIC CRPs, the NAIC CRP ratings for a security are ordered according to their NAIC Designation equivalents and the rating that is second lowest will be selected, even if that rating is equal to that of the first lowest.
- (D) A demonstration and certification by the insurance company, as evidenced by an executed certificate by an officer of the insurance company, that the eligibility requirements set forth in subsection (k)(ii) of this Part above have been met.

## (iv) Subsequent Reporting

The reporting insurance company shall annually submit to the SVO the items listed in subsection (k)(iii) of this Part above for each fixed income Index it desires to maintain on the RSAT Index List. Any Index on the RSAT Index List for which the required documents are not submitted, or

any Index that no longer meets the eligibility requirements set forth in section (k)(ii) of this Part above, shall be deleted from the RSAT Index List.

## <u>Publication</u>

The SVO shall publish the RSAT Index List quarterly in subparagraph (I) below.

## I) RSAT Index List

## Index Name

Markit CDX NA IG Index

Markit CDX NA HY Index

Markit CDX EM Index

Markit CMBX Index

Markit iTraxx Europe Index

Markit MCDX Index

#### SECTION 3. THE RTAS – EMERGING INVESTMENT VEHICLE

#### a) Emerging Investment Vehicle

## (i) <u>Finding</u>

The VOS/TF finds that the pace of financial innovation and extent of financial engineering requires close cooperation between regulated insurance companies, investment banks and other financial market participants and the regulators who must assess the solve as implications of financial innovation and engineering. This sub-section establishes the mechanism for an insurance company or another market participant ("Applicant") to apply to the SVO for the purpose or determining the probable regulatory treatment to be accorded to a Emerging Investment Vehicle ("EIV") before it is sold to an innurance somposity, or for any other security.

## (ii) Definition of Probable Regulatory Treatment

For purposes of this sub-section, probable regulatory treatment means the professional opinion of the SVC and the adit quality designation; and or asset classification for **statumy** repoling purposes; and or the valuation that would be accorded to the LV under this Manual if it were purchased by an insurance company and appoined to the SVO.

Probable regulatory realizant includes a statement by the SVO that in its opinion: (1) the exist of regulatory framework already captures the risks posed by the security ermer through the mechanism of credit ratings, valuation polynor and lassification methodology, (2) that the existing regulatory in mewhold does not capture the risks posed by the security and that it is secess sy to apply to the VOS/TF to develop an appropriate regulatory as rommodation for the instrument or (3) that the SVO lacks an appropriate rethodology that could be used to assess the risks contained in the England that it is necessary to apply to the VOS/TF to develop an appropriate methodology.

#### (iii) Definition of EIV

For purposes of this sub-section, an EIV is an investment security or other financial product that is newly offered and that contains characteristics or features not previously reviewed by the VOS/TF or the SVO for a determination of the probable regulatory treatment to be accorded to the EIV. An EIV may be "newly offered" in the sense that the security or financial product has not previously been known (and hence none of its characteristics or features are known) or in the sense that a security or financial product whose primary characteristics or features are understood has evolved to incorporate substantially different features or to contain

significant innovation such that it should be considered as never having been reviewed by the VOS/TF or the SVO.

#### (iv) Who May Request an Analysis Under This Section

An EIV may be filed: by an insurance company or by another market participant (without the requirement of insurance company sponsorship); or by a state insurance regulator for any security owned by an insurance company under the authority and for purposes discussed in this Section 3(a) above, subject only to the conditions imposed in this sub-section and in other referenced sections.

The SVO is not authorized to require anyone to file a transaction as a EIV. However, nothing in this sub-section limits the obligation or the authority of the SVO to report to the VOS/TF any transaction, whether or not filed with the SVO, that presents issues or contains features that require guidance from the VOS/TF, either pursuant to Part Con Section 2(f) of this Manual or otherwise.

## (v) <u>Submission Procedure</u>

To request an analysis of probable regulatory treath and on an EIV, the Applicant submits an original completed Application for Regulatory Treatment Analysis Service ("Application") to the Director, SVO (the "Director"), or the Director's designated representative. An Application shall be accompanied by written and substratially analized documentation showing all material terms with the same speciality and clarity as the SVO requires to complete a purchased transaction. A copy of the prospectus or private placement memorandum will not be equired if it is unavailable at the time of the filing of the Tophestion, however, it may be required before a determination of the EIV in question can be made by the SVO.

## (vi) Requirement of a Substant, Vy Finz zed Transaction

Analysis of probable regular treatment will be provided only for securities and finantial products that have been substantially finalized in all material respects. It is SVO is not authorized to assist the Applicant to structure a transaction in attain specific regulatory objectives. The SVO shall take it ill discription to determine that the terms of a security or financial product is reflected in the documentation submitted with the Application indicate that the security or financial product is not substantially finalized.

## (vii) Disc, tion

The Director shall have full discretion to reject an Application if, in the Director's sole discretion, acceptance of the Application would not meet the objectives of the NAIC Financial Conditions Framework. The Director

will communicate any such rejection to the Applicant and will return the Application fee and may communicate such rejection to the VOS/TF for informational purposes.

#### (viii) Communication of Determination

At the conclusion of the processing of the EIV, the SVO will provide a letter to the EIV Applicant setting forth its conclusions with respect to the issue(s) raised by the EIV.

If the SVO concludes that this Manual does not a rovide sufficient guidance to determine an NAIC Designation, valuation or Passification for the EIV, or that in its opinion the NAIC Financia Concludes Framework does not clearly specify standards or criteria for responding to the issue(s) raised by the Applicant, it will so inform the Applicant and the VOS/TF pursuant to Part One, Section 2(f) of this Natival.

Information provided as part of the RTA. Emerging Investment Vehicle Application shall be treated as conficutial by the SVO. The Applicant may communicate the content of the other actions provided the Applicant also communicates that the propose of the analysis reflected in the letter is regulatory. The Applicant may also provide copies of the SVO letter to anyone provided a complete clay of the SVO letter must be given.

If, after the SVC has a mmunicated its decision to the Applicant, an insurance company purshases the ETV and reports it to the SVO, either on its own initiative or at the direction of an insurance regulator, the SVO may be required to after its determination into NAIC systems, including systems accessible to the market participants for regulatory purposes. This shall not be ansidered a breach of the agreement to hold our sterminatic confidential.

The squ' cory expectation is that Applicants who advise insurance companies will make full disclosure of the SVO determination to any insurance company that requests such information, even if the conclusion is contrary to the Applicant's initial expectations.

Standing of EIV Application in the NAIC Financial Condition Framework. The activity authorized by this subsection is intended solely to facilitate the business and regulatory objectives of the NAIC and the financial solvency function of the VOS/TF. The SVO's acceptance of an Application does not convey any regulatory status or recognition to the EIV.

A preliminary NAIC Designation assigned under the procedure specified in this sub-section is only valid for the day issued as such designation reflects

the preliminary draft of documents and other information that have been presented to the SVO.

A preliminary NAIC Designation will not be published in the Database or the AVS+ Products and, therefore, cannot be used to report the credit quality of the security to the NAIC or any state insurance department. Only NAIC Designations published in the AVS+ Products may be used to report an investment to an NAIC member's state insurance department.

If an insurance company subsequently purchases the security, the purchasing company must file an Initial Report or, if the security is filing exempt, report the security in accordance with that procedure. The SVC shall apply its usual procedure for initially reported securities befor assigning an NAIC Designation and publishing such NAIC Designation in the AVS+ Products.

#### SECTION 4. CATASTROPHE-LINKED BONDS

## a) Catastrophe-Linked Securities

#### (i) Definition

For the purposes of this Manual, Catastrophe-Linked Bonds are financial instruments that:

- (A) Are specifically designed to transfer underwriting risk associated with the occurrence of a natural catastrophic event, such as a hurricane, an earthquake or a flood (a "Ca strophe Event"), from an originating insurer to the reporting insurance company investor and other security holders, and
- (B) Are structured so that payment of increst or principal to the reporting insurance company depends on the occurrence of a Catastrophe Event of a defined magnitude or, that causes an aggregate insurance loss in excess on stipulated amount, and
- (C) Are structured so that other all or a portion of the principal invested by the reporting in cancel pany is at risk.

## (ii) Filing Exemption Status

Catastrophe-Linked Borols re en ole for the filing exemption in Part Two. Section 4 (d) of this Manual, provided that: (1) the transaction has been rated by a NAN CRP; (2) the NAIC CRP rating will be continuously monitore and (3) the NAIC CRP's rating results from application of a methodology that incorporates historical information, as well as stochastic profability models and computer simulations; assesses the methodology that incorporates historical information, as well as stochastic profability models and computer simulations; assesses the methodian for loss of interest and/or principal from underwriting risk; and correct as the probability of the occurrence of the Catastrophe Event and the loss associated with the damage caused by such event to the statical robability of bond default and its severity reflected by the NAIC CAP's alphanumeric ratings.

## (iii) Procedure for Other Catastrophe-Linked Bonds

catastrophe-Linked Bonds that have not been assigned a credit rating by an NAIC CRP and those that have been assigned a credit rating by an NAIC CRP based on the use of a methodology other than that specified in Section 4 (a) (ii) above are subject to the Special Reporting Instruction in Part Two, Section 5 (i) (vii) of this Manual.

#### SECTION 5. MILITARY HOUSING BONDS

#### a) Direction

The SVO is directed to assess investment risks of military housing bonds or securities, as defined below, using the certification process discussed in <u>this Section 5</u> to assign such bonds or securities an NAIC Designation and any other appropriate analytical values it deems appropriate.

#### b) Definition

For purposes of <u>paragraph (a) above</u>, military housing bonds are defined as bonds or securities that:

- (i) Are issued to finance the construction of housing for U.S. militate personnel and their civilian families in projects developed in conjunction with the U.S. Department of Defense (DOD);
  - Provide for ongoing construction of new and/or rehabilitation of existing housing to be located on and/or off U.S. military basis over a time horizon that may exceed 40 years;
  - Involve significant federal government involver entry the project, such as: the grant of land and/or housing stock or the onstruction project; or payment by the federal government of a central allowance for military personnel and their dependents dire. By into the project account;

## (ii) Were issued before Dec. 31, 2009, and ee:

- (A) Initially assigned a credit rating by an AIC CRP on the basis of a financial guaranty issued by an NCIC CRP ated monoline insurer where the NAIC CRP subseque by a wng, ded or withdrew the rating on the military housing bond or security solely as a result of a decision to downgrade or withdraw as rating assigned by it to the monoline insurer; or
- (B) Never insured by a monoline or rated by an NAIC CRP but which nevertheless meets be underwriting standards and criteria typical of transactions that we underwritten by monoline insurers, as determined by the SVO in a sole a alytical discretion.

## c) Status of On or Minitary Housing Bonds

#### (i) Ronds with Stand-Alone Ratings

In tary housing bonds or securities issued before Dec. 31, 2009, that have en a ghed and retain a stand-alone credit rating (sometimes referred to as a underlying rating) by an NAIC CRP continue to be subject to the

filing exempt rule and process discussed in <u>Part Two, Section 4 (d) of this</u> Manual.

## (ii) Bonds Newly Issued and Bonds Rated by an NAIC CRP

Military housing bonds or securities that were issued on or after Dec. 31, 2009, and were rated by an NAIC CRP shall be subject to the filing exempt rule in Part Two, Section 4 (d) of this Manual.

## d) Certification Process for Military Housing Bonds

#### (i) <u>Documentation</u>

An insurance company filing a military housing bond or so unity with the SVO under this Section 6 shall provide the SVO with a stailed analytical memorandum, a certification and the other documentation as described in Part Two, Sections 10 and 11, respective of the Manual.

#### (ii) <u>Certification</u>

## (A) Finding

Military housing bonds or seculities require expert and ongoing evaluation to determine that the construction process is in compliance with equire pents set forth in the loan and other documents governing the susing project, as well as periodic determinations of how the construction process impacts financial assumptions iderly a the transaction. Most of this risk assessment centers around the effectiveness of the construction and development access, the consequent availability of housing, the generation of real from that housing, and the sufficiency of that rent for debuservice, both in the current and future time periods. Military housing bonds or securities also incorporate complex contractual provis ins that govern the distribution of cash flows received from cent algorithms to project purposes or to equity and other investors.

Mintary housing bonds and securities are structured with financial guaranty policies issued by monoline insurance companies and are assigned credit ratings based on the rating of the financial guarantor. As NAIC CRPs downgraded or withdrew the credit ratings assigned to monoline insurance companies, military housing bonds or securities were also downgraded or became unrated. Often, the stand alone credit quality of the bond or its issuer is higher than that of the financial guarantor. Because credit ratings for rated military housing bonds or securities no longer accurately reflect the quality of the bond or security, and because some military housing bonds or securities are no longer rated, it is necessary to have an alternative

credit assessment procedure to assess risk for statutory risk-based capital and other state insurance regulatory reporting purposes.

#### (B) Analytical Memorandum and Certification

An insurance company filing a military housing bond or securities for analysis under this Section 5 shall provide the SVO with a detailed analytical memorandum that discusses key risk factors in the project. The general format of the memorandum and the key risk factors that must be addressed are more fully discussed in Part Two, Sections 10 and 11 of this Manual. The insurance company shall also provide the SVO with a certification in such form as the SVO shall require, in which an investment officer of the filing insurance company, familiar with the status of the project/investment, attests to the accurate volume facts and data and analytical conclusions in the allytical memorandum provided to the SVO. The certification process approved by this Section 5 begins with the submission or both of these documents to the SVO.

## (C) SVO Due Diligence Obligation

## (1) Completed Certification Required for Celian

Upon receipt of a completed certification from an appropriate insurance company investment profes anal, the SVO shall be entitled to rely on the facts and the appropriate in the analytical memorandum to reach an analytical determination and to treat the facts, data and analytical confusion contained in the analytical memorandum as true and acsurate in all material respects, subject to its own due diligence analytical specified below.

#### (2) Independent /O Analys

The SVO shall use the dor mentation provided by the insurance company to perform an expendent analysis of the transaction and to assign an LAIC Designation and any other appropriate analytical values to it. In particular, the SVO shall use third-party information such as the public prospectus, audited financial statements and other ocumentation to verify and confirm key aspects of the financial, legical and cluctural aspects of the transaction described in the analytical memorandum. The SVO shall then proceed to form an independent opinion of the risks in the project, utilizing appropriate sorporate and other analytical methodologies.

(3) Obligation to Pass on Sufficiency of Analytical Memorandum

Where the analytical memorandum is deemed to be unclear or
deficient in any respect, the SVO shall require the insurance company
to update it or to provide a written supplement on the issues or
concerns identified by the SVO. The SVO shall assign an NAIC
Designation that reflects its level of confidence in the analysis.

## a) Regulatory Objectives

A reporting entity that maintains an asset valuation reserve (AVR), for example a life insurance company, that owns a bond that has been assigned a NAIC 6 Designation or a preferred stock with a NAIC 4, 5, or 6 Designation, and a reporting entity that does not maintain an AVR, for example a property and casualty company, that owns a bond or a preferred stock that has been assigned an NAIC Designation of 3, 4, 5 or 6 must carry the security at the wer of cost or fair value. In addition, a reporting entity that does not maint in an VR must carry a perpetual preferred stock that has been assigned a NAIC 1 or 2 Designation at fair value. In these cases, fair value determined accordance with this Section 1 is extended to the fair value coumn and the Book/Adjusted Carrying Value column of the NAIC Financial Statem at Brank. In addition, and irrespective of statutory accounting guidance qual tatement instructions require all insurers to report a fair value, irrespective the credit quality of the security or the nature of its owner's insurance beiness. Accordingly, even an insurer entitled to use amortized value in the "Bolk/Adjusted Carrying Value" column, must use fair value in the 'Ra e Use' to Report Fair Value" column.

See, the NAIC Accounting Practices and Procedures Manual, in particular;

- SSAP No. 26R—Bonds
- SSAP No. 30—U. Silian Common Stock;
- SSAP No. 32—Preferr. Stock

- SSAP No. 9 Westi ents in Subsidiary, Controlled and Affiliated Entities, and
- SSAP No. , ~?R— air Value,
- IC warterly and Annual Statement Instructions.

## b) Gen. al Valua lon Process

## (i) Obliga to Report a Fair Value

Any insurance company domiciled in any state of the Unites States, or any of its territories or possessions, and required by the law of their domiciliary ate or territory to report Association Values for their investments in the NAIC Financial Statement Blank, shall follow the procedures described below to obtain a fair value to be used for reporting consistent with Section 1(a) above.

The existence of a filing exemption for a security does not eliminate the requirement to report a value on the NAIC Financial Statement Blank for the security in accordance with <a href="Part Five">Part Five</a>, <a href="Section 1">Section 1</a> of this Manual.

#### (ii) Valuation Procedure

An insurance company shall either report the fair value determined by the SVO for a security or determine a fair value in accordance with one of the valuation methodologies described in paragraph (c) below.

When selecting a valuation method, the insurance company shall seek to obtain a fair value that reliably reflects the price at which the security would sell in an arm's length transaction between a willing buyer and seller in possession of the same information. Only where a market valuation based fair value is unobtainable, should the insurance company select a valuation method that would yield an analytically determined fair value.

The insurance company shall identify the valuation method used to obtain fair price to determine the Rate Per Share Used to Obtain Fair value in Schedule D.

## (iii) Valuation Methodologies and Corresponding Reporting Codes

The valuation methods permitted to an insurance company and to codes that correspond to the valuation methods are as follows:

- **a** For securities where the rate is coter linear by a pricing service.
- **b** For securities where the rate i determined by a stock exchange
- **c** For securities where the rate is a termined by a broker or the insurer's custodian. To use this method. I) the broker must be approved by the insurer as a content arty for buying and selling securities or be an underwriter of the accurity being valued and 2) the insurer shall obtain and region to pricing policy of the broker or custodian that previded the quotations.
- **d** For securities there the rate is determined by the insurer. The insurer is required to maintain a record of the pricing methodology used.
- **e** Curvies where the rate is determined by the valuation ablished in the NAIC Valuation of Securities database.

## c) SVO Valua on Ividuodologies

## (i) <u>Instruction an Disclosure</u>

SVO shall apply the methodologies provided in this section to provide fair value for the regulatory purposes discussed in <u>Section 1 (a) of this Part above</u>.

The fair value of any specific security produced by the SVO may be determined from application of one of many methodologies, as may be deemed appropriate by the SVO to determine a reliable value for NAIC regulatory purposes. These methodologies may include the use of public prices obtained from acceptable vendors of pricing information, through the <a href="NYSE">NYSE</a>, <a href="AMEX">AMEX</a>, <a href="National NASDAO">National NASDAO</a> or from acceptable financial institutions; use of pricing models or matrices; application of book value; and any other method deemed appropriate by the SVO in fulfillment of the regulatory objective.

Irrespective of the methodology used to determine a fair ralue, nothing in this Part shall be construed as implying that the S' on space or that in a specific case the methodology employed to determine a bir value for the purposes described in Section 1(a) of this Pare about our of the price at which a security could or shalld be bought or sold in the marketplace.

## (ii) Use of Publicly Available Prices as F ir Value

The SVO may use any publicly available arising source that it deems to be reliable to determine a fair. The for any publicly traded security owned by an insurance company. Once selected the SVO shall enter the fair value into the VOS Process are supergreatly publish it.

## (A) Pricing of Shares of Each hange Traded Funds

The fair value of the scares of an Exchange Traded Fund ("ETF"), discussed in Part L., Section 2 of this Manual, reported by an incurant company on any day in which reporting of a fair value is required shall be the public price of the ETF shown on the listing executing or the last trading day.

#### (iii) nalytical D terminations of Fair Value

When a fair value cannot be obtained from a public source, the SVO shall attempt to determine a fair value analytically in accordance with the procedures discussed below.

#### (A) Special Instruction for Private Placements

Where a price is not available because the security is a private placement which does not trade in the public marketplace, the price field of the VOS Process will contain a (--). If a private placement requires an estimated market price for valuation purposes, the SVO staff will analytically determine such value, or the SVO, at its discretion, may accept a value determined by an independent organization approved by the SVO.

#### (B) Bonds

#### (1) General Procedure

In conjunction with its credit assessment of a private placement bond, the SVO shall calculate a fair value for the security using the spread over the equivalent credit curve updated at year end using the interpolated yield curve on a spread basis.

An insurance company who desires to obtain a fair value other than as described above in this paragraph may provide the SVO with the fair value, determined by two price quotes obtained from financial institutions acceptable to the SVO and written on the letterhead of such financial institutions, or another method acceptable to the SVC. The SVO shall use such fair value to determine the unit price for th bond.

If the SVO is satisfied that for whatever reason, it is not possible for the insurance company requesting the fair value to obtain the price quotes from financial institutions acceptable to the SYO, the SYO may apply the comparability analysis described impossible to www.

• The SVO may in the first instance a termin a fair value for the security by assigning the crice of a comparable publicly traded bond of the same issue.

As used in this section, comparability of fers to the credit standing and structure of the two bond issues. We be a shall be considered to be comparable if they have been assigned equivalent credit rating symbols by the same NAIC RP, by the or more NAIC CRPs or if they have been assigned in same NAIC Designation by the SVO.

- If a comparable publicly traded bond of the same issuer is not available, the SVO may apply the price of a comparable publicly traded bond issued by another issuer in the same industry.
- If a comparable publicly traded bond of another issuer in the same industry is not available, the SVO may apply the price of a publicly traded bond issued by another issuer in different industry.
- The fair value of the comparable bond shall be used to determine a yield for the reported bond and that yield, adjusted to the extent the analyst deems appropriate, will be used to determine a price for the reported bond.
- If a fair value cannot be determined in accordance with this procedure, the SVO may apply whatever other

procedures it determines would yield a reasonable estimate of the fair value of the asset.

## (2) Pricing Bonds of Companies in Orderly Liquidation

For purposes of this paragraph, a company in orderly liquidation is any business entity for which the owners have agreed to a voluntary cessation of business operations and dissolution of the business entity (liquidating company).

The SVO may determine the fair value for the bon of a siguidating Company by reference to an appraisal submitted to the SVO by the insurance company, provided that the appraisal submitted to the SVO by a recognized independent appraisal firm a ceptable to the SVO.

If such an appraisal is not available, or if the SVC determines that the appraisal is not acceptable, the SVC soll determine the fair value by applying the following procedur. The SVO shall obtain the Liquidating Company's latest Audited Sinancial Statement for the purpose of determining net real able value of assets. The analyst shall then identify app or late or teria to be applied to each asset class shown on the balance speet. Using these criteria the analyst will determine the value on the company's assets. This amount shall then be adjusted by an amount qual to the liability shown on the balance sheet, and any other amount that the analyst believes is unrealizable under the circumstances, to arrive at an amount likely to be available to apportioning the amount to the bonds and/or any other salurity issued by the company in accordance with the bond's prion of thaim on the assets of the Liquidating Company.

## (3) R structured Bond Obligations

purposes of this paragraph, a Restructured Bond is one for which the lender and the borrower have agreed to amend or waive a material credit term due to financial distress of the borrower. As used herein, a material term includes the interest rate on the loan, the maturity date of the bond or any financial covenant in the agreement. Upon receipt of a Subsequent Report, as defined in <a href="Part Two.section 11">Part Two.section 11</a> of this Manual, the SVO shall adjust the fair value of a Restructured Bond to reflect the restructured terms.

#### (4) Bonds in Default

For purposes of this paragraph, a Bond in Default is a bond for which the issuer has failed to perform a term or condition required to

be performed by the agreement (after all applicable grace periods have expired). The fair value for a Bond in Default shall reflect SVO's estimate of the dollar value of the defaulted bond as of the end of the reporting period, adjusted for the costs of the proceedings necessary to protect bondholder rights and discounted to reflect the time period before payments will actually be made. In estimating a fair value, the SVO may apply any procedure reasonably calculated to provide a useful measure of recovery value and it may consider any factor that it deems relevant, such as the reasons for the issuer's default, the value of the issuer's business operations to a competitor, the likelihood of a liquidation or a successful reorganization and other similar factors. The fair value shall reflect the status discussions between the issuer and its creditors, in particular who the the bond is newly defaulted, whether subsequent to bond wallt have issuer has filed for liquidation or for reorganization subsequent to the filing the issuer has proposed a reorganiza on plan or whether a reorganization has been accepted and prove by a bankruptcy court. In the case of any negotianal reorganization plan, the SVO may use the estimates of it rovery value and payout time set forth in the reorganization lands a basis to arrive at a fair value.

#### (C) Preferred Stock

The fair value of preferred stock not publicly priced for the year in which the preferred stock has been purchased by the reporting insurance company shall be the shar cost of the preferred stock to such reporting insurance company.

For any subsequent year, and in conjunction with its credit assessment of a preate placer ent security, the SVO shall calculate a fair value for the security using the spread over the equivalent credit curve updated at year end using the interpolated yield curve on a spread basis.

An insurance concany who desires to obtain a fair value other than a described at ove in this paragraph may provide the SVO with the fact value determined by two price quotes obtained from financial institutions acceptable to the SVO and written on the letterhead of such financial institutions, or another method acceptable to the SVO. The SVO shall use these price quotes to determine a fair value for the preferred stock.

If the SVO is satisfied that for whatever reason, it is not possible for the insurance company requesting the fair value to obtain two price quotes from financial institutions acceptable to the SVO, the SVO shall seek to apply the yield of a comparable publicly traded preferred stock of the same issuer to determine a price.

- As used in this section, comparability refers to the credit rating standing of the two preferred stock issues. The two preferred stock issues shall be generally considered to be comparable if they have been assigned equivalent credit rating symbols by the same NAIC CRP, by two or more NAIC CRPs or if they have been assigned the same NAIC Designation by the SVO.
- If a comparable publicly traded preferred stock to the same issuer cannot be identified, the SVO staff will us to yields from any NAIC CRP index of preferred or convertil e preferred stock yields as of the close of the week preceding the and of the quarter and published in the AVS+ Products.
- Fair value shall be derived from the yill either by application of a suitable pricing model or by reference to the price of a preferred stock of a comparable yield.
- In the case of a convertible purificult stock, the fair value may be set by reference to the price of the is user's common stock into which the preferred stock may be converted. If the method discussed above is inapplicable for an irrease of the SVO may use any other procedure or method real problems alculated to result in a reasonable fair value.

#### (D) Limited Life-Preferal Shares

Limited fe procured shares are defined as Medium Term Fixed Rate Preferred shares (DARTS), and the Adjustable Preferred Stock (FRAPS), Stated Term Aucting Preferred Shares (STRAPS), Fixed Rate Exchangeable Preferred Stock (FREPS), Marketed Auction Preferred Shares (MALS), Stated Rate Auction Preferred Shares (STAR) and Share Adjusted Broker Remarketed Shares (SABRES), or other similar preferred securities. The reporting insurance company shall provide the SVO with at least two price quotes for the preferred shares from recognized financial institutions on the letterhead of such institutions.

#### (E) Common Stock

The fair value of a common stock for the year in which the common stock has been purchased by the insurance company, shall be the per share cost of the common stock to such reporting insurance company.

For any subsequent year, the insurance company reporting ownership of the common stock of a private company shall provide the SVO

with two price quotes for the common stock. The price quotes shall be obtained from financial institutions acceptable to the SVO and shall be written on the letterhead of such financial institutions. The SVO shall use these price quotes to determine a fair value for the common stock.

In the absence of two price quotes from financial institutions acceptable to the SVO, the insurer may file a copy of the issuer's Audited Financial Statement with the SVO. The SVO shall use these statements to derive shareholder's equity and issuer's retained earnings (net of the value of any preferred stock) and then use these figures to calculate the price per share.

If the method discussed above is inapplicable for any reason the SVO may use any other procedure or method reasonably abula to result in a reasonable fair value.

See <u>Part Three, Section 1(a)(ii)(B) of this Manual</u> for instructions for issuers of foreign common stock with unaudited financ. I statements.

#### (F) Shares of Mutual Funds

Fair value of mutual funds, including money tarket und shares, shall be equivalent to the net asset value of so his has a calculated as of the close of business of the reporting a riod.

#### (G) Common Stock of Insurance Companies

The fair value of a private componists ledissued by an insurance company is its book value. Blok and shall be calculated by (i) ascertaining capital of the sourance company as reported on the company's latest New Sinancial Statement Blank or report of examination, (ii) a certaining the company's surplus (excluding from surplus any reserved required by statute and any portion of surplus properly allocable to policy budgers), (iii) subtracting the greater of par or redemption value of the company's preferred stock and the face value of surplus notes (other than 144A note offerings) from the total amount of such appital and surplus and (iv) dividing the remaining amount by the number of shares of the company's common stock of tank sq.

#### (H) Stock Vorrants

The fair value of a warrant convertible into private common stock for the year in which the warrant has been purchased by the reporting insurance company shall be the cost of the warrant to such reporting insurance company.

For any subsequent year, the fair value of a warrant convertible into private common stock shall be the difference between the Association Value of the common stock as determined pursuant to either <u>Paragraph</u> (E) or (G) of this section, as applicable, and the exercise price. The result is then discounted for illiquidity.

The fair value for a warrant with no public market, exercisable into shares of common stock that do have a public market, shall be the difference between the value of the common stock and the exercise price of the warrant. In the case of a warrant exercise into restricted common stock, the fair value shall be the difference between the common stock share price exercise pursuant to paragraph (I) below and the exercise price.

Warrants for which the first exercise date is subsequent to the date of the <u>NAIC Financial Statement Blank</u> hall nove no value unless a publicly available price can be brained for <u>NAIC Financial Statement Blank</u> purposes.

(I) Common Stock and Prefer a tock usued Under Investment Letter or Restricted As to Transferact v

When determining to various be assigned to shares of private common stock issued by a public company whose public shares of the same class traction a public exchange, the insurance company shall provide to SVO with the information required in <a href="Part Two, Section 1" (ix) coadis Manual.">Part Two, Section 1" (ix) coadis Manual.</a>

The restricted common or preferred stock of an issuer unaffiliated with the reporting insurance company and held by the insurance company to a period of less than three years shall be priced by the insurance company, and the fair value, together with a written justification of the fair value, shall be submitted to the SVO.

The staff shall review the insurance company's analysis and render an opinion as to the reasonableness of the price valuation basis used by the insurance company. Upon a finding that the valuation basis used is reasonable under the circumstances, the staff will provide the results of its conclusion to the state insurance department for the affected insurance company and, upon request, to other insurance companies holding the restricted common or preferred stock.

The SVO shall not publish these opinions or the fair value for these securities in the AVS+ Products. If the SVO disagrees with the price valuation basis used by the insurance company, the insurance company may either accept the price as determined by the SVO or

report its own price with a " $\mathbf{V}$ " suffix on the NAIC Financial Statement Blank.

#### d) When Price Is Not Determinable

#### (i) General Procedures

If the SVO determines that there is no sound basis upon which to determine a fair value, or the fair value is not readily available, it shall apply the Administrative Symbol "**UP**" if the security is a common or preferred stock, the Administrative Symbol "--" if the security is a debt instrument that is rated, or the Administrative Symbol "**NR**" if the security is a debt instrument that is not rated.

#### (ii) Restriction on Use of the Administrative Symbol NR

Notwithstanding any other instructions contained in this Manual, the SVC shall not apply the administrative symbol **NR** to any private security that has been assigned an **NAIC 6** Designation. If the application is the analytical methods in this Part is insufficient to enable the VO to determine a fair value for a private security designated **NAIC 6**, the SVO shall assign that security a fair value of zero (0).

#### SECTION 1. LIST OF QUALIFIED U.S. FINANCIAL INSTITUTIONS

#### a) Regulatory Purpose and Objectives

The List of Qualified U.S. Financial Institutions established in this Part Six implements Section 3 C. (1) and Section 4 A. of the NAIC *Credit for Reinsurance Model Law* (#785) (Model Law).

Section 3 C. (1) of the Model Law permits an asset or a reduction from liability for reinsurance ceded by a domestic insurer to an assuming insurer. The asset or reduction may be in an amount held by or on behalf of the ceding insurer, including security in the form of a LOC issued or confirmed by a qualified U.S. financial institution. Section 4A of the Model Law defines the term "qualified U.S. financial institution," which is hereby incorporated by reference.

The List of Qualified U.S. Financial Institutions is a compilation of the times of banks and nondepository lenders (financial institutions) that have applied the NAIC to be identified as issuers of LOCs in support of reinsurance arrangements under the Model Law or state law provisions based on the Model Law.

The placement of the name of a financial institution on the Last of Quarmed U.S. Financial Institutions indicates that the SVO has verified the the applicant meets the financial and other eligibility standards specified in this part and that the financial institution has agreed to provide the SVO with any information necessary to permit the SVO to evaluate whether the financial institution continued to meet the eligibility standards specified in this part.

The List of Qualified U.S. Financial Institutions is mintained for the use of state insurance regulators administering credit for reinsurance provisions in state law based on the Model Law and may be used by insurance companies to identify financial institutions willing to support it insurance arrangements as identified in Section 3 C. (1) and Section 4A. If the Model Law.

The List of Qualified U.S. Financial resitutions implemented under this Part is not intended to be used for any other purpose or by any other person or entities. The placement of the name of a financial institution on the List of Qualified U.S. Financial Institutions is not an opinion as to any aspect of the financial institution's perations, the appropriateness of doing business with the financial institution or as sun billity or unsuitability of any financial institution on the list to serve as a province of credit enhancement for securities transactions.

#### b) Directive to Compile the List of Qualified U.S. Financial Institutions

The SVO half compile the List of Qualified U.S. Financial Institutions in accordance with the procedures and instructions provided in this Part Six.

#### c) List of Nationally Recognized Statistical Rating Organizations

i. <u>Establish a List of Nationally Recognized Statistical Rating</u>
Organizations

The SVO shall establish a List of Nationally Recognized Statistical Rating Organizations (NRSROs), as specified in this Section, to be used to administer the List of Qualified U.S. Financial Institutions. The SVO shall place on the List of NRSROs any credit rating organization that:

- A) Is registered with the U.S. Securities and Exchange Commission (SEC) as an NRSRO, as that term is defined in the applicable fee and statute.
- B) Has criteria and methodology for assigning crudit ratings to banks and nondepository lenders—sometimes herearter referred to as nonbank financial institutions (NBFIs)—that the EVO his commend is consistent with the needs of the NAIC for purposes of the Model Law and which at a minimum:
- Utilizes an analytical framework that as esses the incremental risk of banks and NBFIs (i.e. notate, asito, lenders) relative to each other and incorporates as crucia in it bank and NBFI methodology the nature and robustnes, of a subdon, access to the central bank for contingent liquidit and a stability of funding.
- Results in Loc exp. ssion of an opinion of the bank's or NBFI's likelihood of about ow an LOC obligation and or long-term debt obligation.
- Results have as ignment of a stable credit rating, defined to mean that the NRSSS considers it unlikely that the assigned credit rating would be lowngraded within one year under the moderate stress scenar specified in its credit rating criteria.

#### ii. Proces r

(A) The SVO may place an NRSRO on the List of NRSROs either on its own initiative or upon the application of the NRSRO, after confirming that an analytical matter and in its sole discretion the NRSRO's criteria and methodology meets the minimum standards specified above and is otherwise consistent with the needs of the NAIC for the purposes of the Model Law. The SVO may delete the name of an NRSRO if, as an analytical matter and in its sole discretion, it determines that changes in the NRSRO criteria and or methodology no longer meet specified minimum standards or are otherwise no longer consistent with the needs of the NAIC for purposes of the Model Law.

(B) The SVO shall place on the List of NRSROs the name of the NRSRO, the titles and dates of publication of the criteria, and methodology for banks and NBFIs that the SVO has determined will provide the NAIC a credit rating suitable for the administration of aspects of credit risk pertaining to reinsurance arrangements under the Model Law.

#### iii. Policy and Legal Disclosure Pertaining to the List of NRSROs

The NAIC uses publicly available credit ratings, when available, as one component of the services it provides to state insurance regulators concerned with financial solvency monitoring of insurance company investments. In adopting or in implementing the procedure described in this part, the NAIC acts solely as a private consumer of publicly available credit ratings. The sole NAIC objective in obtaining and using publicly available credit ratings is to conserve limited regulatory resources—a example, the resources of the SVO. The Valuation of Securities (E.) Task Force has established the procedure specified in this section salely to ensure that the NAIC can avail itself of publicly available credit rating opinions for the purposes identified in this part.

The NAIC is not selecting, approving or ce. lifying NRSR is or other rating organizations or distinguishing among them or any public or policy purpose whatsoever. Nor is the NAIC ends sing to credit rating or analytical product of any NRSRO or distribution, a between NRSROs for any specific public purpose. The NAIC discisus any authority to regulate NRSROs.

#### d) List of Qualified U.S. Financial Inditionors

i. Application to be on the Laton value U.S. Financial Institutions

(A) Process

A representative of a chancis institution may apply to have the name of the financial institution added to the List of Qualified U.S. Financial Institutions by completing and submitting to the SVO the QUSFI application and paying the applicable fee. The QUSFI Application is the obtained at this Web address:

#### www.aic.org/documents/svo\_qusfi\_list\_app.pdf .

The CSFI application requires that the applicant:

- Describe whether it is a bank or nondepository lender, as well as identify its federal and state regulators and corporate affiliations.
- Represent that it meets the definition of a qualified U.S. financial institution as specified in the Model Law (as printed in the Application).

- Describe its experience in the issuance of letters of credit.
- Provide evidence of a credit rating grade, assigned by an NRSRO on the List of NRSROs developed using the criteria and methodology specified in the List of NRSROs.
- Provide initially and agree to provide on a periodic basis the financial information identified in the application as the financial institution's profile and metrics to enable the SVO to monitor the financial institution's credit rating and financial coulte. (The best method of data collection and the most approxitate day sources to be used for this information are still being a termined and thus may change based upon a allability and system modifications.)

#### ii. Procedure

#### (A) Initial Application

An application is submitted to the S.O. (The mechanics of the application process and of requires information has not been finalized). Upon recent the S.O. shall review the application and supporting documentation and communicate in a writing its determination whiches the application has been approved and whether the name of the mancial institution will be placed on the List of Quality 1 U.S. Signancial Institutions.

#### (B) Annual V vates

Ohan appear b sis, the SVO shall contact all financial institutions whose same chall then appear on the List of Qualified U.S. Financial Institution by mail, requesting each financial institution to indicate whether it requests to be maintained on the List of Qualified U.S. Financial Institutions by submitting the annual update portion of the appearance of the property of the list.

#### (C) Failure to Timely Respond

The failure to submit a response to this inquiry and or to provide the required annual update application documents and or the renewal fee shall be interpreted as a request that the name of the financial institution be removed from the List of Qualified U.S. Financial Institutions. The SVO shall accordingly remove the name of the financial institution from the List of Qualified U.S. Financial Institutions without further communication or notice.

### e) Eligibility Standards to Be Placed on the List of Qualified U.S. Financial Institutions

#### (A) Eligibility Standards

The SVO shall place on the List of Qualified U.S. Financial Institutions the name of any financial institution that is:

- (i) A domestic financial institution authorized to issue or confirm LOCs that have been assigned a credit rating from an NRSRO on the List of NRSROs generated pursuant to the criteria and methodology specified on the List of NRSROs for that NRSRO of "Baa/BBB" or better for its LOC or long-term debt obligation.
- (ii) A U.S. branch or agency of a foreign financial institution:
  - (A) Authorized to issue LOCs for reinsurance.
  - (B) That is a part of a foreign institution that (a) has stained credit rating from an NRSRO on the List of NRSROs generated pursuant to the criteria and methodology specified in the List of NRSROs for that NRSRO of "Baa/BBL" of bette for its LOC or long-term debt obligation.
  - (C) Domiciled in a country with a silvereign debt rating of (a) "Aa/AA" for long-term debt and/on "P1/A1" for short-term debt by an NAIC credit rating provider (CDP).

# f) SVO Monitoring of Movements in the Cross Quality of Financial Institution on the List of Qualified U.S. Financial Institutions

#### i. SVO Monitoring

The SVO shall monitor the credit quality of financial institutions on the List of Qualified U.S. Fine sial Institutions by:

- (A) Monitoring NRSRO acts of relative to the financial institution's assigned LOC or long-term debt obligation credit rating, including whether the NRSRO considers the rating to be stable or has indicated that the financial institution may be placed on Negative Outlook or Negative Watch
- (B) Conducing independent analysis of the financial institution's profile and metrics. The objective of the independent analysis is to monitor the pountial for and actual deterioration of the credit quality of a financial actification on the List of Qualified U.S. Financial Institutions in order to profide notice to the regulatory community and insurers including to determine whether the entity should be added to the SVO Watch List so

the regulatory community and insurers may consider the implications of the noted credit deterioration for reinsurance arrangements with the financial institution, if any.

#### ii. Outline of Methodology

On a quarterly (or semi-annual) basis, the SVO shall:

Calculate the following financial ratios or items for each financial institution on the SVO Watch List or for those financial institutions on the List of Qualified U.S. Financial Institutions:

- Net interest income to total income
- Net Interest Margin
- Efficiency Ratio
- Charge-Offs / Allowance for Loss
- Tier 1 Capital Ratio
- Total Capital Ratio
- Financial Leverage Ratio

The SVO will compare the next to obtained for the metrics discussed above to the ranges published by nationally recognized statistical rating organizations (NRSROS) for a minimum NAIC credit rating requirement (Baa3/BBB-) as they per ain to: total assets; total equity capital; annualized cash from operation, debter capital; and, EBITDA to interest coverage. This information will be used to estimate the likelihood that the financial institution will dreads on whe required minimum credit rating.

**Note:** The n. sucrar metrics (i.e., ratios and data points) for specific credit rungs are sublished by NRSROs and may be adjusted from year to year to the NRS Os to relate changes in market conditions to the financial profess associated with their credit ratings.

#### iii. Notice of Credit Deterioration

The SVO shall provide notice to the NAIC Reinsurance (E) Task Force and state insurance regulators more generally and to insurers about the credit quality of financial institutions on the List of Qualified U.S. Financial Institutions as described below.

(i) If a financial institution is rated by an NRSRO at "A-/A3" or better and the SVO determines that a financial institution no longer meets one or more of the financial metrics specified above, the SVO will monitor the institution to assess the likelihood of the NRSRO to take a potential negative rating action against the institution.

(ii) If the SVO determines that a financial institution on the List of Qualified U.S. Financial Institutions rated "BBB+/Baa1 or below but not lower than BBB-/Baa3" by an NRSRO no longer meets one or more of the financial metrics specified above or that it has been placed on Negative Outlook or Negative Watch by an NRSRO, the SVO shall perform a more detailed review of the financial condition of the institution.

If the SVO determines that the noted credit deterioration suggests that the financial institution may soon no longer meet the required minimum, the SVO will place the name of the financial institution or its Watch List. If the name of the financial institution is place on the SVO Watch List, the financial institution will not be allowed to be exparticipation on the financial institution list for the next year

- (iii) If a financial institution on the List of Quality d. U.s. Financial Institutions is downgraded below "BBB-, Raa3" by an NRSRO, the SVO shall remove the name of the financial List of Qualified U.S. Financial Institutions.
- (iv) A financial institution whose name is a leteo som the List of Qualified U.S. Financial Institutions because its N. SRO credit rating dropped below the minimum credit rating hay renew participation on the financial institution list when the financial institution's credit rating is restored to BBB-/Baa3 or higher with a stable outlook.

#### g) LOC Requirements Under the Moul Law

#### i. Not an SVO Activity

The SVO does not review included LOCs, trust agreements or reinsurance arrangements. The racement of the name of a financial institution on the List of Quanted U.S. Financial Institutions does NOT imply that the Nodel Law requirements pertaining to LOCs, trust agreements or reinsurance arrangements have been met.

#### ii. Information

For in, make p about LOC requirements, see Sections 10 A. (3) and Section 12 f the NAIC *Credit for Reinsurance Model Regulation* (#786).

#### h) List of Qualified U.S. Financial Institutions

EXPLANATORY NOTE: State insurance regulators and insurance companies may use this list for the purposes discussed above.

A specific financial institution must apply to be listed only once. This means that an insurance company may do business with: (i) a listed domestic parent bank entity, and any of its unlisted domestic branches; (ii) a listed domestic branch of a domestic parent bank entity, the unlisted domestic parent bank entity and any other unlisted domestic branches of the same domestic parent bank entity; and (iii) a listed U.S. branch of a foreign bank entity and any other unlisted U.S. branches of the same foreign parent bank entity and to the equivalent relationships when a financial institution other than a bank is an Applicant.\* Notwithstanding the above, any entity related to a domestic listed entity, its domestic branches and U.S. branches of a foreign parent bank entity with no related entity on the list that wants to be listed must apply to the SVO.

This list is updated monthly. For the latest version, please v. the Securities Valuation Office webpage: http://www.naic.org/svo.htm.

\* This policy only applies to financial institutions that share the same or similar product in separately chartered, and bank subsidiaries, that want to be listed, must apply inon the ly.

#### SECTION 2. MUTUAL FUNDS AND EXCHANGE TRADED FUNDS

#### a) SVO Administration

As set forth in <u>Part Two, Section 9(e) of this Manual</u>, the SVO is charged with verifying whether a money market fund is eligible to be listed on the <u>U.S. Direct Obligations/Full Faith and Credit Exempt List</u>, and whether a bond mutual fund is eligible to be listed on the <u>Bond List</u>. Eligibility requirements for the aforementioned lists are described below and apply notwithstanding the definition of the term "short-term investment" set forth elsewhere in this Lianus.

#### b) Mutual Fund Lists

(i) U.S. Direct Obligations/Full Faith and Credit Exertipt Lis

Section 2.

A money market fund is eligible for listing on the <u>U.S. Direct Obligations/Full Faith and Credit Exe.</u> if the fund meets the following conditions:

- (A) The fund maintains a money parket fund rating of AAAm from Standard & Poor's or Aaa of from Moody's Investor Services or an equivalent money makes fund rating from any NAIC CRP.
- (B) The fund mainter's a state net asset value per share of \$1.00.
- (C) The fund all as a recumum of seven-day redemption of proceeds.
- (D) The fixed in sests 100% of its total assets in securities that are direct obligations of the United States Government and/or in securities and are backed by the full faith and credit of the United States Covernment or collateralized repurchase agreements compared of ach obligations at all times. Refer to Section 2(e) beta for slist of securities considered to be direct obligations of the United States Government and entities that are entitled to the full faith and credit of the United States Government.

#### (ii Bond Fund List

A bond mutual fund is eligible for listing on the Bond List if the fund meets the following conditions:

- (A) The fund shall maintain the highest credit quality rating given by an NAIC CRP.
- (B) The fund shall maintain at least the highest market risk rating given by an NAIC CRP to a fund that invests in bonds that are issued or guaranteed as to payment of principal and interest by agencies and instrumentalities of the U.S. Government, including loan-backed bonds and collateralized mortgage obligations, and collateralized repurchase agreements comprised of those obligations.

- (C) The fund shall allow a maximum of seven-day redemption of proceeds.
- (D) The fund shall invest 100% of its total assets in the U.S. Government securities listed in <u>Section 2(e)</u> of this Part below, class 1 bonds that are issued or guaranteed as to payment of principal and interest by agencies and instrumentalities of the U.S. Government, including loan-backed bonds and collateralized mortgage obligations, and collateralized repurchase agreements comprised of those obligations at all times.
- (E) The fund shall declare a dividend of its net investment income each day prior to calculating its net asset value per share.
- (F) The fund shall not invest in any derivative instruments, a that term is defined in the <u>NAIC Accounting Practices and Proceed Research</u>
- (G) The fund shall not invest in any bonds that receive some all of the interest portion of the underlying collateral and little is no principal, or in any bonds with coupons which reset periodically based on an index and which vary inverse which changes in the index.
- (H) The fund shall not invest in the following types of securities: (a) leveraged or deleveraged notes that per a muniple or fraction of an index or indices, (b) notes that per orine, all or interest linked to foreign currencies, non-U.S. dollar interest rates, equity or commodities indices or any other indicates that is not composed of U.S. dollar denominated fixed-income instruments, or (c) notes that pay principal or interest links to more than one index.

#### c) Approval of Listing

If the SVO determines that a money market fund has met the eligibility requirements for the <u>U.S. Direct Ob. vions/Full Faith and Credit Exempt List</u>, or that a bond mutual functions met the eligibility requirements for the <u>Bond List</u>, the SVO will confirm so he eligibility to the person who applied for the confirmation, in writing.

#### d) Exchang Traced Funds

#### (i) Regulatory resumption

Exchange Traced Funds ("ETFs" or "ETF") are similar to mutual funds but they also differ from mutual funds in important ways. This section crates presumption that shares of an ETF owned by an insurance con pany are to be reported as common stock. The presumption may be

overcome if the ETF meets the conditions specified in <u>sub-paragraph (d)</u> (ii) below.

#### (ii) <u>ETFs Eligible for Classification Analysis</u>

An ETF is eligible for classification analysis under the procedure specified in <u>Part One, Section 3(b) (ii)</u> and <u>(iii)</u> of this <u>Manual</u>, if it operates pursuant to the terms of an exemptive order granted by the SEC (the "SEC Order") that requires the:

- (A) ETF not advertise or market itself as an or in-end fund or as a mutual fund.
- (B) ETF sponsor not register a future F FF with the SEC (that would rely on the requested relic.) unless the sponsors have requested and received with respect to such that ETF either an SEC Order from the Commission of a new ction letter from the Division of Investment Management of the Commission that contains the condition stated in paragraph (A) above, and
- (C) ETF be listed on a nation Used rities exchange for as long as it operates in reliance on the SL Order, provided, however, that:
  - 1) Any regular schemic to the SVO for classification analysis of an off that is believed to meet these conditions, shall be submitted at ough the Regulatory Treatment Analysis Service Application proces. (the "Application") described collectively in Part Tool, Section 3 and Part Two, Section 9(g) of this Manual.
  - 2) The insurance company shall submit copies of the promettee or other document describing the ETF, the a plication of the fund sponsor requesting regulatory exemptions an identifying the agreed upon conditions (the "SEC A plication") and the corresponding final SEC Order, to the sVO.
  - 3) The SVO shall have verified that the SEC Application and SEC Order include the conditions stated above.

<u>Determining whether an Eligible ETF has Debt or Preferred-Stock Characteristics</u>

Subject to the right of the SVO to reject an RTAS -- Emerging Investment Vehicle Service Application, the SVO is authorized to conduct classification analysis of any ETF that meets the conditions specified in <a href="sub-paragraph">sub-paragraph</a> (d) (ii) of this Part. In its analysis, the SVO shall determine whether the component securities held in the ETF portfolio have the characteristics of debt or of preferred stock instruments and whether the

ETF structure permits a "look-through" analysis of its portfolio securities on a daily basis.

If the SVO concludes that the ETF should be classified as a debt instrument, it shall place the name of the ETF on the <u>List of Exchange Traded Funds Eligible for Reporting as a Schedule D Bond</u> (the ETF Bond List) in <u>Section 2 (i) of this Part</u>.

If the SVO concludes that the ETF should be classified as a preferred-stock, it shall place the name of the ETF on the <u>List of Exchange Traded Funds Eligible for Reporting as a Schedule D Preferred-Stock</u> (the ETF Preferred-Stock List) in <u>Section 2 (ii) of this Part</u>.

#### (iv) The ETF List

Any ETF on the ETF Bond List may be reported as a bond on <u>S. b. dule.</u> Without the need for an insurer to file a further RTAS -- Energing Investment Vehicle Service Application.

Any ETF on the ETF Preferred-Stock List may be reported as pre-ared-stock on <u>Schedule D</u> without the need for an insurer to ane—further RTAS -- Emerging Investment Vehicle Service Application.

Any insurance company interested in an ETF that is not as wently listed on either the ETF Bond List or the ETF Preferral Stock List may follow the procedure discussed above to determine in the ETF List eligible for listing on one or the other ETF List.

(v) Relationship between the Regulation reatment Analysis Service Application Process and Initial and Subsequent Reporting of ETFs

The RTAS -- Emerging Incests at V bicle Service Application process is used solely to determine whether the ETF is eligible to be reported as a debt or preferred-stock in trument. Accordingly, the Regulatory Treatment Analysis Service Application process is not a substitute for the procedures that govern the initial or subsequent filling of insurer owned securities with the SVO.

An Initial Export of the purchase of shares of an ETF is made in according with the instructions contained in <a href="Part Two, Section 10(c)(viii)">Part Two, Section 10(c)(viii)</a> of this a pual. Cubsequent Report of the purchase of shares of an ETF is made in accordance with the instructions contained in <a href="Part Two, Section">Part Two, Section</a> (a)(vi) of this Manual.

#### e) List of Securities that are Considered "Exempt Obligations" for Purposes of Determining the Asset Valuation Reserve and the Risk-Based Capital Calculation

This Section Is Used To Determine Those Securities That Are Included In The "Exempt Obligations" Category For Purposes Of Determining Asset Valuation Reserve And The Risk-Based Capital Calculation.

The securities issued, guaranteed or insured by entities shown in <u>Part Two</u>, <u>Section 4 (c) (i)</u> are considered to be in the "exempt obligations sategory for purposes of determining Asset Valuation Reserve and the sk-Base Capital charge calculation.

Securities issued, guaranteed or insured by entities on the Filin Exempt Other U.S. Government list are not "exempt obligations", and s. "The reported in the Special Revenue and Special Assessment Oblig ons category, not in the U.S. Government category.

The loan-backed and structured securities that are exempt obligations" and are reported in the U.S. Government category are each ties that have a full guarantee for their interest and principal evenents of the United States Government. Examples are the pass through securities and collateralized Mortgage Obligations guaranteed by the Government National prortgage Association (GNMA) or the U.S. Department of Veterans of fairs (v. ).

#### h) List of Exchange Traded Funds Eligible for Reporting as a <u>Schedule D</u> Bond

An insurance company that purchases an ETF whose name was added by the SVO to either the List of Exchange Traded Funds Eligible for Reporting as a Schedule D Bond or to the List of Exchange Traded Funds Eligible for Reporting as a Schedule D Preferred Stock, must file the ETF with the SVO to obtain a final NAIC Designation for reporting purposes.

The Regulatory Treatment Analysis Services ("RTAS") process used to evaluate ETFs under <u>Part Six</u>, <u>Section 2(d)</u> only results in the assignment of a preliminary NAIC Designations to the ETF.

Preliminary NAIC Designations are indications of the likely SVO response if the ETF were purchased by an insurer and reported to the SVO for require repurposes and therefore cannot be used to report the ETF to the NAIC state insurance regulators.

Please refer to <u>Part Four, Section 3 of this Manual</u> for text discussing the TAS process and to <u>Section 3 (a) (ix) of that Part</u> for a detailed discussion of the preliminary status of NAIC Designations assigned under the TAS process.

#### i) List of Exchange Traded Funds Eligible for Reporting as Schedule D Preferred-Stock

An insurance company that purchases an ETF whose name was added by the SVO to either the List of Exchange Traded Funds Eligible for Reporting as a Schedule D Bond or to the List of Exchange Traded Funds Eligible for Reporting as a Schedule D Preferred Stock, must file the ETF with the SVO to obtain a final NAIC Designation for reporting purposes.

The Regulatory Treatment Analysis Services ("RTAS") process used to evaluate ETFs under <u>Part Six</u>, <u>Section 2(d)</u> only results in the assignment of a preliminary NAIC Designations to the ETF.

Preliminary NAIC Designations are indications of the likely SVO response if the ETF were purchased by an insurer and reported to the SVO for regular or purposes and therefore cannot be used to report the ETF to the NAIC or state insurance regulators.

Please refer to <u>Part Four, Section 3 of this Manual</u> for text discusting the TAS process and to <u>Section 3 (a) (ix) of that Part</u> for a detailed discustion of the preliminary status of NAIC Designations assigned under the TAS process.

#### Exchange Traded Funds - Preferred Stock

FUND NAME		CUSIP
iShares S&P U.S. Preferred Stock Index Fund	7	464288687
PowerShares Preferred Portfolio		73936T565
SPDR Wells Fargo Preferred Stock ETF		78464A292

#### SECTION 3. COUNTERPARTY EXPOSURE; NETTING ELIGIBILITY

#### a) NAIC Designation

The SVO will convert the counterparty's or the guarantor's financial strength ratings as assigned by an NAIC CRP (e.g., S&P Financial Programs Ratings, Moody's Counterparty's Ratings or Fitch Counterparty Risk Ratings) into an equivalent NAIC Designation. In the absence of an NAIC CRP counterparty financial strength rating, the SVO may convert the counterparty's senior unsecured rating, as assigned by an NAIC CRP, into the quivalent NAIC Designation. In the absence of an NAIC CRP counterparty financial strength or senior unsecured rating, the SVO will conduct a review of the nunterparty's financial statements to assign an NAIC Designation. For purposes of the application of this Section, all U.S. domiciled exchanges as assigned an NAIC 1 Designation.

#### b) Netting Eligibility

(i) The VOS/TF has determined that there cadequate legal certainty to permit netting of exposures for contentraties domiciled within the United States. Netting of the sures or a foreign (non-U.S.) counterparty will be permitted if its dom. Viary prisdiction has been approved for listing in the List of Jurichicions Ligible For Netting. Other jurisdictions may be added to the set of Jurisdictions Eligible For Netting if, in the opinion of the Sychafter sonsultation with the VOS/TF, legal opinions or analyses provide a leguate legal certainty that upon default of the counterparty close of netting would be enforceable.

## c) List of Count roarties (ated by the SVO for <u>Schedule DB—Part D—Section</u>

/ Gener

(A) Assoc' lion Values

A sciation values for derivative instruments, where such derivative instruments are permitted by law or regulation of an insurer's state of domicile, shall be equal to the Statement Value reported in Schedule DB, Parts A (Options, Caps and Floors Owned), B (Options, Caps and Floors Written), C (Collars, Swaps and Forwards) and D (Futures) that is calculated according to the procedures found in the NAIC Accounting Practices and Procedures Manuals for Life and Health, Fraternal, and Property & Casualty companies.

(B) Accounting and Documentation Guidance

The <u>NAIC Accounting Practices and Procedures Manual</u> contains general accounting guidance, documentation guidance, and specific accounting procedures for derivative instruments.

- (ii) <u>Procedures for Determining NAIC Designations and Netting Eligibility for Derivative Instrument Counterparties</u>
  - (A) Purpose
    - (1) NAIC Designations: The purpose of assigning NAIC Designations or quality ratings is to assign counterparties into SVO Rating Categories for <u>Schedule DB Part D—Section 1</u>.
  - (B) Counterparties Rated by the SVO for Purposes of Assignment into SVO Rating Categories for Schedule DB—Part D—Section 1
    Below are counterparties rated by the SVO as of the publication date of this Manual. For an updated list prior to the next publication date of this Manual, see the AVS Bulletin Board.
    - (1) Administration
      - (X) Listing a Counterparty

An insurance company that wants to have a counterpant, listed on the List of Counterparties Rated by the SVO or Sociedule DB--Part D—Section 1 shall submit to the SVO:

- o A Counterparty Rating ATF Initial Filing For
- o Form CRR 1, as discussed in Part wo, Section 9(b) of this Manual.
- o Evidence of an NAIC CRP cot, orparty sating, an NAIC CRP senior unsecured rating or a pay of the most recent Audited Financial Statement for the course party, or the counterparty's guarantor, so that the SVO can asset a credit quality and assign an NAIC Designation.
- o Upon receipt a the above documents, the SVO shall convert the NAIC CRP rating into a sequivalent NAIC Designation, in accordance with the procedure discussed in <a href="Part One, Section 7(d">Part One, Section 7(d)</a> of this Manual, or perform a financial analysis of the counterparty, or the counterparty's guarantor, in order to assign an NAME Designation.
  - Ar lual Update of Counterparties on the List

n order to maintain a counterparty on the List, an insurance company must file the following information:

- A Counterparty Rating ATF Annual Update Filing Form;
- Evidence of an NAIC CRP counterparty rating, an NAIC CRP senior unsecured rating or a copy of the most recent Audited

Financial Statement for the counterparty, or the counterparty's guarantor.

If an insurance company doesn't file an annual update by June 1, XXXX, the counterparty will be deleted from the List effective with the July 1, XXXX Purposes and Procedures Manual and CD-ROM. If deleted, the insurance company will have to submit an initial filing in order for the counterparty to be placed on the List.

- d) List of Foreign (non-U.S.) Jurisdictions Eligible for Netting for Purposes of Determining Exposures to Counterparties for <u>Schedule DB</u> Part D Section 1
- (i) <u>Procedures for Determining NAIC Designations and Ne ling Exhibility for Derivative Instrument Counterparties</u>
  - (A) Purpose
    - (1) **Netting Eligibility:** The purpose of slentifying jurisdictions eligible for netting is to permit the calculation of credit risk exposures to counterparties in <u>Schedule DB—Pa. D—Section 1</u>. The netting of offsetting liabilities with a counterparty will only be permitted in this Schedule if there exists a master greement that provides for such netting and if there is adequate legal certainty that closeout netting would be enforced upon befault of the counterparty.
    - (2) Legal Certain to for Morting Eligibility: There is adequate legal certainty to permit petting of exposures for counterparties domiciled within the United States. Netting of exposures in Schedule DB—Part D—coction will be permitted for a foreign (non U.S.) counterparty if its comiciliary jurisdiction appears on the list in this supparation (1). Jurisdictions will appear on the list if, in the opinion of the VO, legal opinions and/or analyses provide adequate legal sertal by that upon default of the counterparty, closeout netting would be enforced.

#### SECTION 4. CREATION AND MAINTENANCE OF LIST OF BROKERS-DEALERS ELIGIBLE TO ACT AS **CUSTODIAN FOR INSURANCE COMPANY ASSETS**

#### a) List to be Compiled

The staff shall create and maintain a list of broker-dealers eligible to serve as custodian of insurance company assets. To this end, the name of those brokerdealers who apply for listing and who meet the minimum requirements identified in sub-paragraph (b) below, shall be placed on the List of Brokers-Dealers Eligible to Act as Custodian for Insurance Company Assets established as Section 5(e) of this Part below (the "List").

#### b) Purposes of the List; Status under State Law; Status of Broker-Dealer on List

#### Purposes of List

The List may be used by state insurance departments to monitor? broker-dealer holding assets of an insurance company meets the minin criteria identified in the NAIC Model Act on Custodial Agreeme. The Use of Clearing Corporations and the Model Regulation of Cu todial Agreements and the Use of Clearing Corporations and sectoring in subparagraph (c) below.

#### Status of the List under State Law

No inference should be drawn from anything this Section, that the List is approved for use in any state. Individe states may have guidance (as statutory law, by regulation, procedures bullet so practices or otherwise) for the custody of insurance compan (assess) If an individual state permits the use of a broker-dealer as a cistogram of thing stated herein shall be interpreted to suggest that the list created hereby is an approved list in any state or has any official status under the guidance adopted by a state. It is recommended that the ser of t is list contact the domiciliary state custodian for a particular insurance company.

#### Status of Broker-De lers on the List

This Section con. mpices a voluntary process whereby a broker-dealer may a ply thave it name placed on the List. The rationale that would guide a specific boker-dealer to apply to place its name on the List or to refrain from Joing so is entirely an internal business decision of the brokerlegiler. Broker-dealers who meet the requirements for placement on the List may choose not to apply to have their name placed on the List and is se who have previously applied to have their name placed on the List may choose to withdraw their name from the List. Accordingly, no rence should be drawn from the fact that the name of any specific broker-dealer does not appear on the List. And no inference should be drawn from the fact that the name of a broker-dealer formerly placed on the List no longer appears therein.

#### c) Eligibility Standards

Before being added to the List, the staff shall verify that the broker-dealer:

- (i) Is registered with and subject to the jurisdiction of the United States Securities and Exchange Commission (SEC).
- (i) (ii) Is a current member of the National Association of acurities Dealers or other self-regulatory organization.
- (iii) Has current membership in Securities Investors Protect on Corporation (SIPC).
- (iv) Maintains insurance protection for each a urane company's custodied assets in excess of that provided by SIPe in an abount equal to or greater than the market value of each respective in urance company's custodied assets.
- (v) Participates in a clearing congretion.
- (vi) Has Tangible Net Worth of all ast \$25,000,000 (where tangible net worth is defined as shareholders emity, as intangible assets, as reported in the broker/dealer's most a cent A qual or Transition Report pursuant to Section 13 or 15(cm) f the Securities Exchange Act of 1934 (S.E.C. Form 10-K) filed with the Securities Exchange Act of 1934 (S.E.C. Form 10-K).

For purposes of argrap 3(c)(v) above, clearing corporation means a corporation as decreated in Walform Commercial Code Section 8-102 (a)(5), that is organized for the purpose of effecting transactions in securities by computerized book-citry, except hat with respect to securities issued by institutions organized or existing under the laws of a foreign country or securities used to meet the deposit requirements pursuant to the laws of a foreign country as a condition of doug business therein, "clearing corporation" may include a corporation that is organized or existing under the laws of a foreign country and which is legally quified under those laws to effect transactions in securities by computerized book-entry. Clearing corporation also includes the "Treasury/Reserve Automated Dout Entry Securities System" and "Treasury Direct" book-entry securities systems established pursuant to 31 U.S.C. Section 3100 et seq., 12 U.S.C. pt. 391 and 5 U.S.C. pt. 301.

#### d) Administration

(i) A broker-dealer who meets the minimum requirements identified in Section 3 above may submit an ATF Initial Filing Form, a copy of its most recent Annual or Transition Report (pursuant to Section 13 or 15(d) of the

- <u>Securities Act of 1934 (SEC Form 10K)</u> and such other evidence as demonstrates that the broker-dealer meets the Eligibility Standards stated <u>in sub-paragraph (c) above</u>, to the SVO.
- (ii) Upon receipt of the required documentation and the filing fee, the SVO shall verify whether the broker-dealer meets the stated requirements and if so, the SVO shall place the name of the broker-dealer on the List. If the broker-dealer does not meet the stated requirements or has not paid the filing fee, then the SVO shall send a letter stating the deficiencies.
- (iii) On an annual basis, the broker-dealer may renew its listing by submitting the then applicable renewal fee and copies of the most recent Annual or Transition Report and other relevant documentation.
- (iv) A broker-dealer on the List that fails to provide the required document and renewal fee or who no longer meets the minimum eligibility strate, as identified in <u>sub-paragraph (c) above</u> may be deleted from the cokerdealer list without notice.

# e) List of Brokers-Dealers Eligible to Act as Custodian for Insurance Company Assets

**NOTE**: This List is intended to permit state insurance regulators to verify that a broker-dealer serving as a custodian of insurance company assets meets the criteria set forth in the NAIC Model Act on Custodial Agreements and The Use of Clearing Corporations and the NAIC Model Regulation on Custodial Agreements and The Use of Clearing Corporations.

Anyone using this List should familiarize themselves with the important disclosures about the status of this List under state law and the relationship of broker-dealers to the process envisioned by the List.

NO BROKER-DEALERS HAVE APPLIED F R LISTING AS OF THIS PUBLICATION DATE

#### THE NAIC STRUCTURED SECURITIES GROUP SECTION 1.

The NAIC has determined that it is necessary to establish a staff function to provide NAIC members with an internal analytical capability to assess risks associated with insurer-owned securitizations and other complex financially engineered securities. The SSG is established as the staff function assigned to assess credit and other investment risks in securitizations and other complex financially engineered securities owned by state-regulated insurance companies.

#### SECTION 2. DEFINITIONS

The following terms used <u>in this Part Seven</u> have the meaning ascribed to them below.

**ABS** stands for **asset-backed securities** and means structured securities backed by consumer obligations originated in the United States.

CMBS stands for commercial mortgage-backed securities and means structured securities backed by commercial real estate mortgage loans originated in the United States. The definition of CMBS may refer to securitizations backed by commercial mortgages, respectively, only ated outside of the Unites States if and to the extent that the vendor selected by the NACL to conduct the financial modeling: 1) has the necessary information about the commercial mortgage and commercial mortgage loans originated outside of the United States to fully model the resulting securities; and 2) can adapt the modeling process to account for any structural peculiarities associated with the jurisdiction in which the mortgage was originated.

**Initial Information** means the documentation required to be filed with a Unitial Filing of an RMBS or a CMBS CUSIP, pursuant to <u>Section 5 below</u> and pertaining to <u>Loan Information</u>, <u>Reps and Warranty Information</u> and <u>Structure and Formation Information</u>, for the transaction, where:

- <u>Loan Information</u> means a review of the loan 5 es by a third party to assess the sufficiency
  of legal title and other related issues;
- Reps and Warranty Information means the actual representation and warranties in effect for
  the securitization given by the portgag originator(s) to the Trust pertaining to loan
  origination processes and standards, ampliance with applicable law, loan documentation
  and the process governing put branks of declarive mortgages back to the originator(s); and
- <u>Structure and Formation Information</u> nears the waterfall, as described in the definition of Ongoing Information, information and documentation in the form of legal opinions and documentation governing be for nation of the securitization and its entities relative to issues such as bankrupted remotened, true sale characterization, the legal standards and procedures governing the security ration and other similar issues.

**Legacy Security**, for the purposes of this [section] shall mean any RMBS and any CMBS that closed prior to Jan. 2013.

Ongoing Information consists of: a) tranche level data; such as principal balance, factors, principal and into est does and poid, interest shortfalls, allocated realized losses, appraisal reductions and other similar its smaller for the specific tranche; b) trust level data, such as aggregate interest and principal and other payments received, balances and payments to non-trance accounts, aggregate performance data and other similar information; c) loan level performance information; and (d) a constitute model of rules that govern the order and priority of the distribution of cash from the pllateral pool ("i.e., the waterfall") to the holders of the certificates/securities—provided in the forms and modeling package used by the NAIC financial modeling vendor.

**Original Source**, with respect to a specific set of data, means the Trustee, Servicer or similar entity that is contractually obligated under the agreement governing the RMBS or CMBS to generate and maintain the relevant data and information in accordance with standards specified in applicable agreements or an authorized re-distributor of the same.

**Re-REMIC** is a securitization backed by (i) otherwise eligible RMBS from one or two transactions; or (ii) otherwise eligible CMBS from one or two transactions at closing. Re-REMICs cannot acquire any Underlying Securities after closing.

RMBS stands for residential mortgage-backed securities and means structured securities backed by non-agency residential mortgages originated in the United States, where the collateral consists of loans pertaining to non-multi-family homes. That includes prime, subprime and Alt-A mortgages, a well as home-equity loans, home-equity lines of credit and Re-REMICs of the above. Excluded fro this definition is agency RMBS, where the mortgages are guaranteed by federal and federally sponsored agencies such as the Government National Mortgage Association (GNMA) Federal National Mortgage Association (FNMA) or Federal Home Loan Mortgage Corporation (FHLMC) and loans against manufactured or mobile homes or collateralized debt obligations based by RMBS. The exclusion covers bonds issued and guaranteed by, or only guaranteed by, a rest exclusion agency. Also not included are loans guaranteed by the U.S. Department of Ve cran Afrans or the U.S. Department of Agriculture's Rural Development Housing and Community Facility's Programs. The definition of RMBS may refer to securitizations backed by residential sorts, and respectively, originated outside of the Unites States if and to the extent that the vend r selected by the NAIC to conduct the financial modeling: 1) has the necessary information and the residential mortgage and residential mortgage loans originated outside of the United States of fun, model the resulting securities; and 2) can adapt the modeling process to account for any structural peculiarities associated with the jurisdiction in which the mortgage was original

**Underlying Security** means the RMBS or CMBS data at REMIC. A Re-REMIC cannot be an Underlying Security.

**NOTE:** The definitions of RMBS and CMBS reject l'alitations associated with the financial modeling process, NAIC credit rating provider (CRI, internal naming conventions and SSG processes, as more fully discussed below are may, therefore, be subject to a narrower or a broader reading in any reporting period. *Please call in SSG with any concerns or questions about the scope of the definitions for a riven eponing period.* 

- It is possible that the scope of the RMBS and CMBS definitions may be broadened because the financial modeling vendors indicate other collateral or waterfall structures can be modeled.
- NAIC CRPs may adopt different internal conventions with respect to what market or asset segments re within their rated populations of RMBS, CMBS or ABS. This could affect the applica on of the adopted NAIC methodology or require the NAIC to select which parties occess it wishes to adopt.

It is possible that the SSG will acquire analytical assessment capabilities that permit the
assessment of existing, additional or different structured securities that cannot now be
modeled or that are not currently rated.

**Price Grids** means and refers to CUSIP-specific price matrices containing six price breakpoints; i.e., each price corresponding to a specific NAIC Designation category. Each breakpoint on a Price Grid is the price point that tips the NAIC Designation for the RMBS CUSIP into the next NAIC Designation (credit quality/credit risk) category. The plural is used because two Price Grids are generated for any CUSIP. This reflects the difference in RBC for those insurance ampanies that maintain an asset valuation reserve and for those insurance companies that do not

**Official Price Grids** means and refers to those generated by the SSG and revive different insurance company or insurance companies that own the security for regulators reporting purposes.

Group

#### SECTION 3. POLICIES DEFINING THE NAIC STRUCTURED SECURITIES GROUP

#### a) Directive to Conduct Ongoing Operations

The SSG shall conduct the following ongoing operations:

- (i) Develop and maintain expertise related to securitizations, including, but not limited to, knowledge of: market developments; issues and concerns related to applicable law; accounting regimes; structures, including waterfall arrangements, governing the cash flows and performance characteristics of different types of collateral; and the financial modeling and other technology relevant to assessing their valuation and risk assessment;
- (ii) Collaboration with the SVO to assess credit and other risks in nonsecuritizations including for the purpose of assigning NAIC Designations
- (iii) Collaboration with other NAIC staff functions to facilitate related regulatory objectives;
- (iv) Such other analytical assignments assigned or requested by the VOS F or other NAIC Regulator Group;

pursuant to and in accordance with, the directives, procedures and estrictions described <u>in this Part Seven</u> and those generally applicated to the VO or other Staff Functions in this Manual and other applicable NAIC gui, ance

#### b) SSG Regulatory Products

(i) NAIC Designations
The SSG is authorized to assign NAIC Designations

#### (iii) Price Grids

The SSG shall generate Price Grids as equired for the annual surveillance specified below in <u>Section</u> (a) <u>Section</u> in the exercise of its responsibilities under the Regulate Treatment Analysis Service (RTAS) as specified in <u>Section</u> <u>6</u> <u>Section</u> <u>6</u> <u>Section</u> ras shall otherwise be necessary in fulfillment of an assigned real onsitivity.

c) Other Applicable Policies – Application of Analytical Instructions; Responsibility for Intestment Risk Analysis in New Financial Products; Process for Placing Securities Under Regulatory Review

The policies and in fruction specified in <u>Part One, Section 2 (d), 2 (e)</u> and <u>2 (f) of this Manual</u> hade an alicable to the SVO shall be also fully applicable to the SSG, allowing for one sense inherent in structured securities, analytical assignment given to the SSG and methodologies to be applied by it.

#### SECTION 4. ADMINISTRATIVE AND OPERATIONAL MATTERS

#### a) Certain Administrative Symbols

The following administrative symbols are used in the Valuation of Securities (VOS) Products to identify RMBS and CMBS that the NAIC vendor has confirmed will be subject to the financial modeling methodology described in Section 6 (a) of this Part.

Section 4.

**FMR** indicates that the specific CUSIP identifies an RMBS that is subject to the financial modeling methodology.

**FMC** indicates that the specific CUSIP identifies a CMBS that is subject to the financial modeling methodology.

The use of these administrative symbols in the VOS Product neans the insurer should not use the filing exempt process specified in art two, Section 4 (d) of this Manual for the security so identified.

**NOTE:** The administrative symbols **FMR** and **FMC** are related to symbols that insurers are required to use in the financial statem and reporting process. Under applicable financial statement reporting the same after uses the symbol:

FM – as a suffix to identify modeled. MBS and CMBS CUSIPs;

**AM** – as a suffix to identify CLOIPs not modeled and not designated by the SSG but for which CRP ratings were used to derive the NAIC Designation.

The symbols FM and AM are inserted by the insurer in the financial statement as a suffix in front of the NAIC Designation category—i.e., 2FM.

#### b) Quarterly Reporting of RMBS and CMBS

To determinable IN. IC Designation to be used for quarterly financial statement reporting for an IN 1BS or CMBS purchased subsequent to the annual surveillance describe in Section 6 (a) of this Part, the insurer uses the prior year-end modeling data for the CULIP (which can be obtained from the NAIC) and follows the instructions in Section 6 (a) (iii) (3) (a) (v) of this Part Seven below or follows the instructions in Section 6 (a) (iv) of this Part Seven below, subject to, and in accordance with, SSAP No. 43R—Loan -Backed and Structured Securities.

#### c) Tiling Exemptions

Limited Filing Exemption for RMBS and CMBS

(A) RMBS and CMBS that can be Financially Modeled.

RMBS and CMBS that can be financially modeled are exempt from filing with the SVO.

NAIC Designations for RMBS and CMBS that can be financially modeled are determined by application of the methodology discussed

in <u>Section 6 (a) (iii) of this Part Seven</u>, not by the use of credit ratings of CRPs.

#### (B) RMBS and CMBS securities that cannot be Financially Modeled

#### (1) But are rated by a CRP

RMBS and CMBS that cannot be financially modeled but that are rated by a CRP are exempt from filing with the SSG. The NAIC Designations for these RMBS and CMBS are determined by application of the modified filing exemption discussed in <u>Section 6</u> (c) (iv) (A) of this Part Seven.

#### (2) But are not rated by an CRP

RMBS and CMBS that cannot be financially modeled and that are n rated by a CRP are not filing exempt and must be filed with the SSC as discussed below in Section 6 (a) (iv) (B) of this Part State. Section 5 (i) (i) and (ii) of this Manual.

#### (ii) Filing Exemption for ABS

ABS rated by a CRP are exempt from filing with the SSG pure part to the filing exemption contained in <u>Part Two, Section 41.00 (this handal</u>.

#### d) Review of Decisions of the SSG

Analytical decisions made through the application of manual modeling are not subject to the appeal process specified in Part Cone. Section 2 (g) of this Manual. In the absence of an appeal, the SSG shall provide thateve clarification as to the results of financial modeling is possible to any insurer to requests it and owns the security, provided that it is not uncally by addition e for the SSG to do so. Any decision made by the SSG that results in the assignment of an NAIC Designation and does not involve financial producing methodology, whether developed by the SSG on its own or in collaboration with the SVO, is subject to the appeal process in Part One, Section 2 (g) of this Manual.

#### SECTION 5. REQUIRED DATA AND DOCUMENTS FOR TRANSACTIONS SUBMITTED TO THE SSG

#### a) General Policy on Required Data and Documentation

The policy statement set forth in <a href="https://doi.org/10.25">https://doi.org/10.25</a> shall be applicable generally to any transaction filed with the SSG for an analytical assessment, including, but not limited to, a Price Grid or for assignment of an NAIC. Any filing with the SSG is deemed to be incomplete unless the insurer has provided the information, documentation, and data in quantity and quality sufficient to permit the SSG to conduct an analysis of the creditworthiness of the issuer and the terms of the security to determine the requested analytical value. It is the obligation of the reporting insurance company to provide the SSG with all necess to information. It is the responsibility of the SSG to determine whether the informational deficiencies to the reporting insurance company.

#### b) Documentation Standards and Procedure for Annual Surveillance of RMBS and CMBS

#### (i) <u>Documentation Standard</u>

In order for an insurer-owned Pines of Stabs to be eligible for the yearend modeling process, conducted pursuant to this <u>Part Seven, Section 6 (a)</u> below, the analysis must be base, on information, documentation and data of the utmost integrity.

A Legacy Security sist in at the Ongoing Information requirements.

An RMBS, CMPS or R PEMIC that is not a Legacy Security must meet the Initial Information and Ongoing Information requirements. For the purposes of determining a Re-REMIC's status as a Legacy Security, the closure, into on the Re-REMIC (not the Underlying Security) shall be used.

the SSG may, in its sole discretion, determine that the Initial Information and for Oncoing Information is not sufficient and/or not reliable to permit the RNP or CMBS CUSIP to be eligible for financial modeling. If the SSG determines that the Initial Information and/or Ongoing Information is not sufficient and/or not reliable to permit the RMBS or CMBS CUSIP be eligible for financial modeling, it will communicate this decision to the insurer and invite a dialogue to ascertain whether alternative information is available that would be deemed sufficient and/or reliable by the SSG.

#### (ii) <u>Initial Information Requirements</u>

An RMBS or CMBS meets the Initial Information Requirements if the security meets one of the following three conditions:

- 1. **RTAS.** The RMBS or CMBS was assigned a preliminary price grid or designation as described in <u>this Part Seven</u>;
- 2. **Initial Sufficiency Filing.** The RMBS or CMBS was reviewed by SSG through an Initial Sufficiency Filing; or
- 3. **Safe Harbor.** The RMBS or CMBS meets the Safe Harbor requirements.

#### A Initial Sufficiency Information Filing

An insurance company may file Initial Sufficiency Information with the SSG for the purpose of obtaining a determination that an RMBS or CMBS CUSIP is eligible for financial modeling under the annual surveillance process discussed in <u>Section 8(iii) below</u>.

Initial Sufficiency Information is only filed once for any given RMBs or CMBS. Reporting insurance companies are solely responsible for any viding the SSG with Initial Information.

A determination by the SSG that a given RMBS or CMBS C 'SIP is expible for financial modeling after an Initial Sufficiency Fill cass count is subject to the further and continuing obligation that the SSG betain or the insurer provide the SSG with updated Ongoing Information close to the date of the annual surveillance.

**Required Documents for Initial Sufficiency Filing** – An insurer that owns an RMBS or a CMBS for which Initial Information is not publicly available shall provide the SSG with the rollowing accumentation.

#### 1. RMBS

Unless otherwise spranes by the SSG in a Modeling Alert, as further described below, or Initial Fing for an RMBS consists of submission of Initial Information and Orgoing Information in the form of the following documentation

- Pooling and Strvicing Agreement or similar
- Prospectus, On ring Memorandum or similar; Accountant's comfort letter
- appleable, IDA Schedules and Confirmations or similar
- L. opinions given in connection with the transaction
- Any on a documents referenced by the above
  - Third-Party Due diligence scope document and raw results. If less than 100% due diligence, detailed description of the loan selection process.
- If applicable, loan purchase agreements or similar.
  - Loan Tape

#### **CMBS** 2.

Unless otherwise specified by the SSG in a Modeling Alert, as further described below, an Initial Filing for a CMBS consists of submission of Initial Information and Ongoing Information in the form of the following documentation:

- Pooling and Servicing Agreement or similar
- Prospectus, Offering Memorandum or similar; Accountant's comfort letter
- If applicable, ISDA Schedules and Confirmations
- Legal opinion given in connection with the trapsaction
- Any other documents reference in the above
- **Asset Summaries**
- Loan Tape
- Loan documents, including reliable in smaller about the terms of the transaction; including, but not imited to, financial covenants, events of default, legal renders also other information about financial, contractual or least aspect of the transaction in form and substance consistent with industry best practices for CMBS issuance.
- In certain cases, additional documents below will enable the SSG to verify and validate init. Uncerwriting information of the property securing the CME. These documents may be required in form and substance countent with best practices for typical CMBS issuance.
- Historica operating statements and borrower's budget
- Underwise a allysis of stabilized cash flow with footnotes of assum, "ions ad
  - Property to e specific, rent roll information
- Appraisals and other data from recognized industry market sources
- Inder Indent engineering report (Property Condition Assessment)
- E. Ironmental Site Assessment (ESA) Phase I/Phase II
- Documentation related to seismic, flood and windstorm risks
- Franchise agreements and ground leases, if applicable
- Management agreements.

#### SSG Modeling Alerts

The SSG shall at all times have discretion to determine that differences in the structure, governing law, waterfall structure or any other aspect of a securitization or a class of securitization requires that insurance companies provide Initial Information and or Ongoing Information additional to or different from that identified in this Part Seven. The SSG shall communicate such additional or different documentation requirements to insurers by publishing a Modeling Alert on the NAIC website and scheduling a meeting of the Valuation of Securities (E) Task Force to ensure public dissemination of the decision.

#### B. Safe Harbor

Safe Harbor options serve as proxies for the Initial Sufficiency filing. The options reflect publicly available information that a third party has analyzed the Initial Information. Because the structured securities market is quite dynamic, the list of Safe Harbor options may change frequently, with notice and opportunity for comment, as described in <a href="Part Seven">Part Seven</a>, Section <a href="Seven">5(b)(ii)(3)</a> of this Manual. An RMBS or CMBS meets the Initial Information requirement if:

- i. At least two Section 17(g)-7 reports issued by different CDPs or publicly available; or
- ii. A security that is publicly registered under the federal Sourities Act of 1933.

#### (iii) Ongoing Information Requirements

An RMBS or CMBS meets the Ongoing Information Reclirements if Ongoing Information is available to the SSG and the reclaim third-party vendor from an Original Source. The SSG, to its sold discretion and in consultation with the relevant third-party sindon may determine that the Ongoing Information is not sufficient or reliable to permit a given RMBS or CMBS CUSIP to be financially modeled. However, in making such a determination, the SSG shall take into account reasonable market practices and standards.

## (iv) Special Rules for Certai Re-REM

Re-REMICs are generally simple in structurings of RMBS or CMBS. An Initial Sufficiency Filing for a PerseMIC (a) which is not a Legacy Security itself but (b) where each Underlying Security is a Legacy Security shall not require submission of information regarding the Underlying Securities. In most cases, a specials for the Re-REMIC will be sufficient. If the SSG determines that additional information about the Re-REMIC structure or formation is a suited, it will communicate this decision to the insurer and invite a discipline to ascertain whether additional information is available that would be seemed sufficient by the SSG.

#### SECTION 6 ANALYTICAL ASSIGNMENTS

#### a) Annual Surveillance of RMBS and CMBS – Modeled and Non-Modeled Securities - General Instructions

#### (i) Scope

This Section 6 (a) explains the financial modeling methodology applicable to RMBS and CMBS (defined in Section 2 of this Part above) securitizations and the book/adjusted carrying value methodology applicable to modeled and non-modeled securities subject to SSAP No. 43R—Loan-Backed and Structured Securities. Please refer to SSAP No. 43R—Loan-Backed and Structured Securities for a description of securities subject to its provisions. The Valuation of Securities (E) Task Force does not formulate policy or administrative procedures for stationy accounting guidance. Reporting insurance companies are a pointage for determining whether a security is subject to SSAP No. 22R—Lo n-Backed and Structured Securities and applying the appropriate guidance.

#### (ii) Important Limitation on the Definitions of Roads and CMBS

The definitions of RMBS and CCRS in <u>Cation 2 of this Part</u> above are intended solely to permit the S G to a mmunicate with financial modeling vendors, insurance compared investors who own RMBS and CMBS subject to financial modeling and for the book/adjusted carrying value methodology and their investment advisors to facilitate the performance by the SSG of the facicial codeling methodology described below. The definitions contained in the Section are not intended for use and should not be used a lace on ing or statutory statement reporting instructions or guidance. It haders must refer to <u>SSAP No. 43R—Loan -Backed and Structured Sections</u> or applicable accounting guidance and reporting instructions.

# (iii) nalytical F ocedures Applicable to RMBS and CMBS Securitizations Substitute F nancial Modeling Methodology

- Fining Exemption Status of RMBS and CMBS
   RMBS and CMBS are not eligible for the filing exemption provided in Part Two, Section 4 (d) (i) of this Manual because credit ratings of CRPs are no longer used to set risk-based capital (RBC) for RMBS or CMBS. However, RMBS and CMBS are not submitted to the SSG. Please refer to Section 4 (c) (i) of this Part and Part Three, Section 3 (a) of this Manual for related instructions.
- Use of Financial Modeling for Year-End Reporting for RMBS and CMBS
   Beginning with year-end 2009 for RMBS and 2010 for CMBS, probability weighted net present values will be produced under NAIC staff supervision by an NAIC-selected vendor using its financial

model with defined analytical inputs selected by the SSG. The vendor will provide the SSG with a range of net present values for each RMBS or CMBS corresponding to each NAIC designation category. The NAIC designation for a specific RMBS or CMBS is determined by the insurance company, based on book/adjusted carrying value ranges. Please refer to SSAP No. 43R—Loan-Backed and Structured Securities for guidance on all accounting and related reporting issues.

#### 3. Analytical Procedures for RMBS and CMBS

The SSG shall develop and implement all necessary processes to coordinate the engagement by the NAIC of a vendor who will perform loan-level analysis of insurer-owned RMBS and CMBS using the vendor's proprietary models.

#### a. RMBS and CMBS Subject to Financial Modeling

(i) Setting Microeconomic Assumptions and Stress Scenarios

Not later than September of each year, the SSG shawbegin working with the vendor to identify the assumptions, stress scenarios and probabilities (hereafter model undia) and SSG intends to use at year-end to run the vandor financial model.

#### (ii) The Financial Modeling Process

The SSG shall obtain loan-level analysis of RMBS and CMBS using the selected vendor's proprior by financial model.

The financial model used by the SSG is expected to provide for each of the analytical seps the ollo is a macroeconomic process, a mortgage loan credit process and a waterfall process.

The <u>macroeco omic pro</u> <u>ass</u> projects the future performance of macroeconom. variables. These variables and various scenarios to be employed in his stop of the financial modeling process will have been determined through the meetings described in subparact oh (i) above.

The me tage loan credit process projects loan performance based on the projected macroeconomic variables and loan characteristics. The loan characteristics employed may be broadly identified and discussed in the Final Model Criteria Document to the extent the VOS/TF deems it necessary to ensure attainment of regulatory objectives, but subject to legitimate commercial and proprietary interests of the financial model vendor.

The results of the mortgage loan credit model provide the scenario inputs to produce a <u>tranche level cash flow "waterfall."</u>

What follows is, therefore, intended as a general description of one such process.

#### LOAN-LEVEL ANALYSIS

RMBS – Loan-level analysis begins with historical loan performance. Loans are classified as performing or non-performing. Based on loan characteristics and macroeconomic variables, transition probabilities are calculated. Because the parameters of the model are path-dependent, Monte Carlo simulation is used. A random drawing against these calculated probabilities decides the performance group are exit group (prepayment or default) that the loan will be assigned to during the next month. The loan-level prediction is then aggregated into pool level projected curve. For purposes of loss severity, the same default probabilities are applied to maintain consistency. Additional components that contribute to the ultimate loss severity analysis include collateral deficiency (unpaid blance was REO sales price), lost interest (accrued as servicer advances), expenses and fees, property taxes and brokerage fees) and mortgage insurance considerations.

CMBS – The vendor will review raw loan level data's circed from servicers and trustees for inconsistencies and inaccuracies, correcting the coal where applicable. Based upon SSG directions, the vendor will many ly review and re-underwrite certain loans in each pool based upon size, creditchistory or other criteria at the discretion of the SSG. In addition to loan level performance, the vendor's analysis will reasonably take into account of the factors known to bear on long-term property performance, such as age, such and recational characteristics. The vendor will then utilize market-derived mome growth curves and capitalization rates to project the collateral performance of call loan in a given CMBS issue. Based on parameters and triggers such as debt service coverage levels, extension parameters and workout period and costs, produce an outcome and loss estimate for each loan in the pool.

#### RMBS and CMBS

Once generated, pool cash flows are passed through the <u>bond waterfall</u>. The "terfall" is a set of rules derived from the terms of the contract governing the PML or CMBS securitization that determine which bonds get paid principal and interest and how losses are distributed at a particular point in time. Waterfall morels for individual RMBS and CMBS securitizations can be obtained from a reputable vendor (often referred to as a deal library).

The <u>net present value</u> for the insurer-owned RMBS or CMBS tranche is derived by applying a discount rate to the projected/probability weighted cash flow. In multiple scenario approaches, the mortgage credit model and waterfall model are used to calculate the present value of losses under each scenario.

The <u>final valuation</u> is the par value minus the probability weighted present value of losses. The interest rate used to discount the bond cash flow will be the bond coupon.

#### (iii) Validation of Modeled Results

The NAIC and SSG staff shall ensure that the vendor has extensive internal quality-control processes in place. In addition, however, the SSG shall conduct its own quality-control checks of the vendor's valuation process.

#### (iv) Publication of Final Results

Upon delivery by the vendor of values for the RMBS and CMBS portfolio and subject to the final modeling process are completion of all SSG quality control and validation process, the SSG shall cause the valuation file for the modeler paure, owned portfolio to be delivered to other appropriate VAIC taff for dissemination to insurance companies.

## (v) Use of Net Present Value and Carrying Value for Financially Modeled RMBS and CMBS

For each modeled RMBS and CMBS. final cial model determines the net present value at which the expected loss equals the midpoint between the Rancharges for each NAIC designation; i.e., each price point fexce led, changes the NAIC designation. Net present value is net present value of principal losses, discounte using the security's coupon rate (adjusted in case of original issue discount securities to book yield at original issue a case floating rate securities, discounted using LIBOP curve + Origination spread). Because of the difference in RC charge the deliverable is five values for each RMBS and CMBS cur'y for companies required to maintain an asset valuation reserve (AVR) and five values for companies not required maintain an AVR. This is illustrated in the chart below

RBC charge / NAIC designation (re-tax

RDC charge / 142		TC-taz
P&C	RBC	VIid, int
1	0.3%	65%
2	1.0%	1.5 %
3	2.0%	3.25%
4	4.5%	7.25%
5	10	20.00%
6	0.0%	
Life	BC	Midpoint
1	0.4.	0.85%
2	3%	2.95%
2		T 2001
3	4.0%	7.30%
4	4.0% 10.0%	7.30% 16.50%

The NAIC designation for a given modeled RMBS or CMBS CUSIP owned by a given insurance company depends on the insurer's book/adjusted carrying value of each RMBS or CMBS, whether that carrying value, in accordance with <u>SSAP No. 43R—Loan-Backed and Structured Securities</u>, paragraphs 25 through 26a, is the amortized cost or fair value, and where the book/adjusted

carrying value matches the price ranges provided in the model output for each NAIC designation; except that an RMBS or CMBS tranche that has no expected loss under any of the selected modeling scenarios and that would be equivalent to an **NAIC 1** Designation if the filing exempt process were used, would be assigned an **NAIC 1** Designation regardless of the insurer's book/adjusted carrying value. Please refer to the detailed instructions provided in <u>SSAP No. 43R—Loan-Backed and Structured Securities.</u>

- (iv) <u>Analytical Procedures Applicable to Securities Not Subject to Financial Modeling Methodology</u>
- (A) Securities Not Modeled but Rated by an NAIC CRP and Subject to Modified Filing Exempt Process
  - To obtain the NAIC designation for a CUSIP not more field by trated by an NAIC CRP, please refer to the detailed instructions in <u>SSAP No.</u> 43R—Loan-Backed and Structured Securities, paragra 11 20.
  - Securities assigned an NAIC CRP credit sting squivalent to an NAIC 1 designation are assumed to have zero expected lost and, therefore, the designation is not modified by the carry a value and remain NAIC 1. Securities assigned an NAIC CRP credit rating a quivalent to an NAIC 6 designation are not modified by the carryin value and remain NAIC 6.
  - The Table below is used to impleme the book/adjusted carrying value methodology for securit's that a subject to modified filing exempt process <u>SSAP No. 3R— pan-Bailed and Structured Securities</u>, except Excluded Securities as denoted in absection (C) below.

able Onc

Designation changes when book/adjusted carrying value exceeds the breakpoint						

(B) Securities Not it is deled by the SSG and Not Rated by an NAIC CRP or Designated by the SVO Securities subject to SSA. No. 43R—Loan-Backed and Structured Securities that cannot be modeled by the SSC and te not it ted by an NAIC CRP or designated by the SVO are either (X) assigned the NAIC are inistrative symbol NR (not rated), requiring subsequent filing with the SVO, or (Y) assigned the NAIC designation for Special Reporting Instruction; i.e., an NAIC 5\* or NAIC 6\* (No star or six-star), as discussed in Part Two, Section 5 of this Manual.

- Wousion of Certain Securities from Application of Book/Adjusted Carrying Value Methodology for Non-Modeled Securities
- (1) Exclusion and Excluded Securities

The book/adjusted carrying value methodology described in subsection (iv) (A), above, shall not apply (the Exclusion) to Credit Tenant Loans, Equipment Trust Certificates (whether rated by an NAIC CRP or designated for quality by the SVO) or to every other individual security to which the SVO has assigned an NAIC Designation, (collectively, "Excluded Securities"), effective with the 2011 year-end reporting cycle. Please refer to SSAP No. 43R—Loan-Backed and Structured Securities, paragraph 26c.

#### (2)Deriving NAIC Designations for Excluded Securities

The NAIC Designation for Excluded Securities that are Credit Tenant Loans or Equipment Trust Certificates shall be the credit rating assigned by NAIC CRPs after application of the filing exemption procedure described in Part Two, Section 4 (d) (i) of this Manual or the NAIG Designation assigned by the SVO. The NAIC Designation for Excluded Securities that a individual securities to which the SVO has assigned an NAIC Designation, shall be the Designation assigned by the SVO. Please refer to SSAP No. 43R—Loan-Backed and Securities, paragraph 26c.

#### b) Mortgage Referenced Security

#### (A) Definition

Mortgage Referenced Security is a category of d Note, as tructui defined above in Part Three, Section 3 (b) (vi) of the

In addition to the Structured Note defiction, e following are characteristics of a Mortgage Referenced Surity

A Mortgage Referenced Security's course and principal payments are linked, in whole or in part, to price of payment streams from, real estate, index or indices related to all estate or assets deriving their value from instruments related to the esternic including, but not limited to, mortgage loans.

#### Not Filing Exempt

A Mortgage Referenced Security is not eligible for the filing exemption in Part Two, Section (c) (ii) or the filing exemption in Section 4 (d) of this Manual, but is subject to the filing requirement indicated in Part Two, Section 2 (a) I the Manual.

## Pick A sessment

In determ, ing the NAIC designation of a Mortgage Referenced Security, the SSG may be the financial modeling methodology discussed in this Part en, Section 6(a), adjusted to the specific reporting and accounting eguit monts applicable to Mortgage Referenced Securities.

#### c) The RTAS - Emerging Investment Vehicle

#### (a) Purpose

Price grids are generated for the exclusive use of insurance companies and the NAIC regulatory community. Insurance companies use official Prices Grids by following the instructions in <u>SSAP No. 43R—Loan-Backed and Structured Securities</u> to derive a final NAIC Designation for the RMBS or CMBS, which they use to derive the RBC applicable for the RMBS or CMBS. <u>Please refer to SSAP No. 43R</u> for a full explanation of the applicable procedure.

#### (b) Extension of Authority

The procedure specified in <u>Part Four, Section 3 (a) of the Manual</u> for the SVO is extended to the SSG, and the SSG is authorized to determine probable regulatory treatment for RMBS and C. 185 persuant to <u>Section 5 (a) of this Part Seven</u> or for other securities, where, in the opinion of the SSG, financial modeling methodology would yet the necessary analytical insight to determine probable regulatory treatment or otherwise enable the SSG to make recommendations to the 10S TF as to regulatory treatment for a security, as discussed in <u>Part Four Section 3 (a) (ii) of this Manual</u>.

#### (c) Interpretation

To facilitate this purpose, who ever in <u>Part Four, Section 3 (a) (ii) of this Manual</u>, reference is man to the SVO, it shall be read to also refer to and apply to the SSO, adjusting for differences in the operational or methodological context.

Part Fox., Sec. (a) (ii) of this Manual shall also be read as authority for collaboration between SVO and SSG staff functions so as to encompass P AS assumed its that require the use of SVO financial, corporate, punicipal, It al., and structural analysis and related methodologies, as well as a financial modeling methodologies.

#### (d) Translation of Preliminary into Official Price Grids

Price Grids generated by the SSG pursuant to an RTAS under this Section (c) of this Part are preliminary within the meaning of that term as used in Part Four, Section 3 (a) (ix) of this Manual and accordingly cannot be used for official NAIC regulatory purposes.

Preliminary NAIC Designations are translated into official NAIC Designations by the SVO when an insurance company purchases and files the security and the SVO conducts an official assessment. However, the *Purposes and Procedures Manual* does not require the filing of RMBS and CMBS subject to financial modeling methodology with the SSG. It is, therefore, necessary to specify a procedure for the translation of

preliminary Price Grids into official Price Grids that can be used for NAIC regulatory purposes.

Preliminary Price Grids generated by the SSG become an official Price Grid within the meaning of this Section when an insurance company has purchased the security for which the Price Grid was generated and reported that security for quarterly reporting purposes using the SSG generated Price Grid.

A Price Grid for a security reported by an insurance company for quarterly reporting is effective until the SSG conducts the next annual surveillance pursuant to Section 6 (a) of this Part at which the time the Price Grids generated by the SSG at year-end shall be the official Price Grid for the security.
