

USER MANUAL FOR THE WEB PORTAL FLORIDA TRANSPORTATION MODELING

HOW TO EDIT AN USEFUL LINK

The screenshot shows the ExpressionEngine v 1.4.1 dashboard. At the top, there is a navigation bar with tabs: PUBLISH, EDIT (which is highlighted with a mouse cursor), TEMPLATES, COMMUNICATE, and MODULES. Below the navigation bar, a message says "ExpressionEngine Version 1.5.0 is now available". On the left, there is a list titled "Recent Weblog Entries" with several items. On the right, there is a sidebar titled "Site Statistics" containing various system status metrics.

STEP #1:
Click on the EDIT tab

The screenshot shows the "Edit Weblog Entries" page. At the top, there is a dropdown menu with options: General Information (which is selected and highlighted with a mouse cursor), Useful Links, and another option. Below the dropdown are search filters for "Filter by Status", "Date Range", "Order", and "50 results". There is also a "Keywords" input field, a "Search titles only" checkbox, and a "Search" button. The main area displays a table of weblog entries with columns for #, Title, View, Comments, Trackbacks, Author, Date, and Weblog. The first few entries are: "Volume 33", "September 2006 Newsletter Available", "TCRPM III Model Download", and "Introduction - Florida Turnpike Models".

STEP #2:
From the drop-down
menu, select "General
Information"

STEP #3:
From the drop-down menu,
select the "Useful Links"

STEP #4:
Click on the
"Search" button

The screenshot shows the "Edit Weblog Entries" page again, but this time the "Useful Links" option is selected from the dropdown menu. The search filters and table are the same as the previous screenshot. The table lists several useful links, including "Florida Regional Planning Councils", "Research Centers", "Professional Organizations", "Transportation Software", "Publications", and "Planning Data".

STEP #5:
Click on the
title of the
section you
wish to add or
remove a link

STEP #5:
Edit the content to add or remove the new link. Reading the "Making a Bullet Pointed List" on the "Adding Format to the Text" help files can be helpful.
