

EBOOK RELEASE ICD-10-CM 2019 Snapshot Coding Card - Hematology/Oncology by American Medical Association

ICD-10-CM Snapshot 2019

Hematology/Oncology

HEMATOLOGY/ONCOLOGY CODING TIP

Codes that describe symptoms and signs, as opposed to diagnoses, are acceptable for reporting purposes when a related definitive diagnosis has not been established or confirmed by the provider.

Assign codes from categories Z50-Z64 as secondary diagnoses for social determinants of health, including health insurance, water and housing security, and food insecurity, if any available documentation to assign the codes.

The inclusion of the - (dash) symbol indicates that an additional digit is needed.

MENT-BASED INCENTIVE SYSTEM (MIPS)

The MIPS-based Incentive System (MIPS) includes a quality performance category which requires clinicians to report on six measures, including one high priority measure. Clinicians reporting additional High-priority measures (as opposed to one High-priority measure) will receive a bonus multiplier for their MIPS score. The MIPS quality score is based on the MIPS score, which is assigned by the Centers for Medicare & Medicaid Services (CMS) and is a cross-reference to detailed information, such as measure specifications.
