Have a look at these timesavers!

- There is no easy trick for finding out if a number is in the 7 times table. But there is a way of remembering the tricky sum 7×8 :

$7 \times 8 = 56$. Just remember - 5,6,7,8.

- Try **reversing the sum** if you are having problems. 7×5 is the same as 5×7 : **35**.

- You can make rectangular patterns on a piece of paper to help you. Have a look at this one - 4 rows of 7 which is the same as the sum 4×7 .

```

o o o o o o o
o o o o o o o
o o o o o o o
o o o o o o o

```

Count them up - there are 28. It is **the same as 7×4** - 7 rows of 4.
