

# The Plasma Evolution. 2 Day Workshop

## 13 – 14 Oct 2018

### Kingston Art Centre, Moorabbin Victoria

This 2 Day Workshop will focus on creating an understanding of the basics of plasma science that we can all understand, with a special focus on health and emotional wellbeing. Participants will be taught plasma concepts and how to apply them in their daily lives. Nanomaterials and GANS, the newly revealed state of matter, will be demonstrated and the applications for creating health clearly explained. A range of plasma tools will allow participants to understand how they can move, add or take out plasma energy from the body to allow the body to find balance and correct itself to best function.

Our special guest Gilda Trajano will show results she has achieved incorporating plasma technology into her repertoire of healing modalities. Gilda is a healer who uses the Keshe Foundation plasma technology and a range of other alternative healing technologies, such as the Rife machine, ozone therapy and many other modalities, to assemble a treatment regime for the individual client. Besides being trained in the Keshe Foundation plasma technology, she is qualified in some 30 other healing modalities. In her work with Dr Claudia Untar, a number of people have travelled long distances to avail themselves of Gilda and Claudia's skills. These include the Australian couple Robert and Caroline Balanda, whose testimonial [can be viewed here](#). Gilda believes that the best outcomes are achieved by combining other modalities alongside the Keshe Foundation plasma healing technology.

Jim and Lisa MacDonald have been studying plasma technology for 3 years and have helped extensively in the private teaching area of the Keshe Foundation, creating the [Understanding Plasma Science Series on YouTube](#). They have had ten years' experience in the education field and have a special calling to help bridge the gap between current understanding and plasma by creating comprehensive and understandable workshop materials. They are currently farming and testing plasma for agriculture and also use their love of herbal medicine to create helpful plasma products for the health of humans, plants and animals at [plasmainnature.com](http://plasmainnature.com)

**COST \$275      Tea, coffee, bottled water and parking facilities included**  
**KINGSTON ARTS CENTRE : 979 Nepean Highway Moorabbin Vic 3189**
