**SOLUTIONS FOR YOUR  
FOODSERVICE NEEDS**

## OUR VISION

---

Meat production has shifted  
from problem to solution.

Healthy animals  
graze freely, as  
nature intended.

We are *the* beacon for  
delicious, clean, nutrient-dense  
animal protein.

We are Collaborative, Conscientious,  
Transparent, and Passionate.

# WHAT GRASS-FED AND FINISHED BEEF MEANS FOR YOU

## CHOOSE SIMPLE & CLEAN INGREDIENTS

Our food:

- ✓ No gluten
- ✓ No added sugar
- ✓ No nitrites or nitrates added

## OFFER A BETTER CHOICE FOR THE PLANET

Regenerative Agriculture — the system and management style of Teton Waters Ranch and our 100% grass-fed beef — is a system of farming that increases biodiversity, enriches soils, improves watersheds and enhances ecosystem services. This system of agriculture is important for not only the cattle and the land, but also the consumer.

## MEET THE HIGHEST STANDARDS OF ANIMAL WELFARE

Our cattle:

- ✓ Are never fed grain
- ✓ Are never given hormones or antibiotics
- ✓ Spend their entire lives on pastures
- ✓ Are treated with care and allowed to behave naturally

Every one of our products meets the Humane Farm Animal Care Program standards. This means our cattle live on a nutritious diet without antibiotics or hormones; are provided shelter, resting areas, and sufficient space; and enjoy the ability to engage in natural behaviors. [certifiedhumane.org](https://www.certifiedhumane.org)

## WHY PATRONS ARE CHOOSING GRASS-FED AND FINISHED BEEF

“100% grass-fed and grass-finished beef” means the cattle have eaten grass for the entirety of their lives, as nature planned for them to do. Raising grass-fed beef cattle on open pastured ranches has many health benefits for the animals, and also creates a higher quality beef product for you and your family. By following a “No Feedlot” commitment, animals roam freely and live harmoniously on the open grasslands, rather than the alternative of being packed into a crowded pen. In their lifetime, pasture-raised cattle forage for grass, never eat grain, and receive **no** antibiotics or hormones, ever. As a result, the end products contain higher levels of Omega-3 fatty acids, CLA’s, and Vitamins A and E – all of which are critical for human health and body metabolism, and support our immune systems.

Consumers know this is important, which is why, over the past five years, U.S. retail sales of grass-fed beef grew from \$17 million in 2012 to \$272 million, **doubling every year**, according to Nielsen data.\*

### BENEFITS OF 100% GRASS-FED AND FINISHED BEEF

- ✓ Improved living conditions and health for cattle
- ✓ Regenerative style of farming which nurtures grasslands
- ✓ Nutrient-rich beef products with higher levels of Omega-3 fatty acids, CLA’s, and Vitamins A and E

Our Burger Blends, Hot Dogs, and many of our Dinner Sausage varieties are approved by the Whole30 program. [whole30.com](https://www.whole30.com)
