

Index

(see also the alphabetical list of names in Appendix B and the terms in the Glossary)

- AAVSO Variable Star Atlas* (American Association of Variable Star Observers), 370
- Adams, George & Sons, 232, 234
- Adams, John Couch, 261–2
- Age of Exploration, 7–8, 117–27
- Almagest* (Ptolemy), 62–5, 110–14
- Almagestum Novum* (Riccioli), 268
- Almanacs, early American, 316–18
- al-Sufi, 115–117
- al-Tusi, 24, 71–2
- Alvin Clark & Sons, 315
- America, colonial, 315–6
- American Almanac and Repository of Useful Knowledge, The*, 318
- American Association of Variable Star Observers (AAVSO), 370
- American Universal Geography, The* (Morse), 319
- Anaxagoras, 51–2
- Anaximander, 51, 227
- Anaximenes, 51
- Anleitung zur Kenntniss des Gestirnten Himmels* (Bode), 180–1
- Antikythera mechanism, 242–3
- Apian, Peter, 89–91, 236–8
 - Astronomicum Caesareum*, 91, 236–8
 - Cosmographia*, 89–91, 236, 237
- Apollonius, 58
- Aratea* (Leiden Library), 134–5
- Aratus, 108–9, 133–5, 136–8
- Argelander, Friedrich Wilhelm August, 349–50, 351, 352, 353
 - Astronomische Beobachtungen ...*, 350, 351
 - Bonner Durchmusterung*, 350, 351, 352, 353
- Aristarchus, 56
- Aristotle, 55–6, 91
- Armillary sphere, 7–10, 247–8
- Asteroids, 261, 262, 263
- Astrognosia Synoptice et Methodice ...* (Strauch), 157
- Astrolabe, 69, 243–5
- Astrology, 8–9, 27, 34, 40–5, 79–82
 - ancient, 8–9, 27, 34, 40–5
 - astrologer's board, 43, 45
 - horoscopes and birth charts, 42–3
 - natal astrology, 42–3
 - syncretism, 42–3, 79
 - Middle Ages, 79–82
 - horoscopes and birth charts, 79–80
 - judicial, 80
 - microcosm and macrocosm, 81–2
 - mundane (natural), 80
 - natal astrology, 80
- Astronomia Nova* (Kepler), 101
- Astronomiae Instauratae Mechanica* (Tycho Brahe), 95, 247–8, 249

- Astronomiae Instauratae Progymnasmata* (Tycho Brahe), 96
- Astronomical Calendar, The* (Ottewell), 368
- Astronomical Companion, The* (Ottewell), 368
- Astronomical instruments (pre-telescope), 7–10, 242–58
- Astronomicum Caesareum* (Apian), 91, 236–8
- Astronomische Beobachtungen ...* (Argelander), 350, 351
- Astronomy of the Bible* (Mitchel), 298, 302, 303, 333
- Astrophotography, 273, 284, 355–6
- Carte du Ciel* project, 355–6
- lunar, 273, 355
- star atlases, 356
- Atlante Novissimo* (Zatta), 211–12
- Atlas Céleste* (Dien and Flammarion), 290, 292, 342, 344, 345, 346
- Atlas Celeste* (a.k.a. *Uranographia Britannica*, Bevis), 160–2
- Atlas Céleste de Flamsteed ...* (Fortin), 176, 289, 505
- Atlas Coelestis ...* (Doppelmayr/Homann), 209–11, 298, 299, 503
- Atlas Coelestis* (Flamsteed), 173–5, 504
- Atlas Coelestis* (Seller), 204–5
- Atlas Coelestis, seu Harmonia Macrocosmica*, see *Harmonia Macrocosmica ...*
- Atlas Coeli 1950.0* (Becvar), 362
- Atlas Contractus* (Schenck), 169–70
- Atlas des Gestirnten Himmels* (von Littrow), 342, 343
- Atlas Designed to Illustrate Mitchel's Edition ...* (Mitchel), 329–30
- Atlas Designed to Illustrate the Geography of the Heavens* (Burritt), 188, 321, 323–4, 329–30
- Atlas Maritimus* (Seller), 203–4
- Atlas Novus* (Lotter), 171
- Atlas Novus Sive Tabulae Geographicae* (Seutter), 170–1
- Atlas of Astronomy* (Ball), 349
- Atlas of the Heavens: Atlas Coeli 1950.0* (Becvar), 362–3
- Atlas of the Starry Heavens* (von Littrow), 188
- Augustine, 67
- Back-staff, 246
- Ball, Robert Stawell, 347–9
- Banneker, Benjamin, 316–17
- Bayer, Johann, 153–62, 303, 306, 307, 500
- derivative atlases, 156–62
- Uranometria*, 155–6, 303, 306, 307, 500
- Becvar, Antonin, 359, 362–4
- Atlas Coeli 1950.0*, 362
- Atlas of the Heavens: Atlas Coeli 1950.0*, 362–3
- Skalnate Pleso Atlas of the Heavens 1950.0*, 362
- Beer, Wilhelm, 272
- Bessarion, Cardinal, 78–9, 86–7
- Bessel, Friedrich Wilhelm, 349
- Bevis, John, 160–2
- Blaeu, William Janszoon, 231
- Bode, Johann, 129, 176–7, 179–89, 501
- Anleitung zur Kenntniss des Gestirnten Himmels*, 180–1
- Bode's Law, 181–2, 261
- derivative atlases, 184–9
- Uranographia*, 183–4, 501
- Vorstellung der Gestirne*, 176–7, 182–3
- Bonner Durchmusterung* (Argelander), 350, 351, 352, 353
- Book of Fixed Stars* (al-Sufi), 116–17
- Bouvier, Hannah Mary, 303, 305, 333, 335–6
- Brahe, Tycho, see Tycho Brahe
- Brattle, Thomas, 315
- British Celestial Atlas, The* (Rubie), 188
- Burges, Bartholomew, 319
- Burnham, Robert, Jr., 368
- Burnham's Celestial Handbook ...* (Burnham), 368
- Burritt, Elijah H., 188, 321, 323–4, 329–30
- Atlas Designed to Illustrate the Geography of the Heavens*, 188, 321, 323–4, 329–30
- Geography of the Heavens ... The*, 188, 321
- O.M. Mitchel's editions, 329–30
- Byzantine astronomy, 73–4, 76, 78–9
- fall of Constantinople, 78–9
- influence on Western Europe, 78–9

- preservation of Classical Greek works, 73, 78–9
 Calendar, *see* Time and the Calendar
 Cannon, Annie Jump, 357
 Capella, Martianus, 67
Carte du Ciel project, 355–6
Cartes du Ciel Réduites ... (Royer), 159–60
 Cary, John and William, 234
 Cassini Family (Paris), 219–21, 232, 270
 Cassini, Giovanni Maria (Rome), 221–3, 232
Catasterismi (Eratosthenes), 57, 109
Catasterismi (Pseudo-Eratosthenes), 109, 110–14
Catalogus Stellarum Fixarum (Hevelius), 164
Celestial Atlas, A (Jamieson), 185
Celestial Objects for Common Telescopes (Webb), 359
 Cellarius, Andreas, 191–4, 293, 296, 297, 502
 Center of the world (*see also* Planetary order), 50–65, 67, 91–103
 geocentric (Earth-centered), 50–56, 57–65, 67, 78, 91–2
 heliocentric (Sun-centered) with circular orbits, 56–7, 91–100
 heliocentric (Sun-centered) with elliptical orbits, 101–3
 Charlemagne, 67–8
 China, 18–25
 constellations, 20–3
 cosmology, 18–19
 influence on Korea and Japan, 23
 influences on, 24–5
 Jesuits, 24–5
 lunar mansions, 20, 22, 23–4
 Purple Forbidden Enclosure, 20
 time and the calendar, 19
 Chioniades, Gregory, 73–4
 Circles in the sky, 6–10, 28–9, 77
 colures, 10
 ecliptic (*see also* Zodiac), 7, 8, 28–9
 projection of Earth's circles (antarctic, arctic, equator, tropics), 6, 7, 8, 77
 Classical Greek astronomy, 49–65, 78, 91–2
 cosmological systems, 50–65, 78, 91–2
 basic principles, 59–60
 center of world, 50–65, 78, 91–2
 geocentric (Earth-centered), 50–56, 57–65, 78, 91–2
 heliocentric (Sun-centered), 56–7
 equant (*see also* Ptolemy), 65
 orbits of the planets, 57–9, 91
 eccentric model, 57–8, 91
 epicycle/deferent model, 58, 78, 91
 equivalence of these models, 59
 early Greek astronomers, 50–52
 influences on, 49–50
 Clepsydra (water clock), 28, 31–2, 50, 68, 245
Coelum Stellatum (Semler), 171
Coelum Stellatum Christianum (Schiller), 156–7
 Comets, 276–80, 318
Commentariolus (Copernicus), 92
Compendium of Astronomy ... A (Vose), 324–5
 Computerized star maps, 366–7, 370, 372
 Concentric spheres, 54–5, 56, 71, 75, 91, 96
 Constellations
 Age of Exploration, 117–27
 navigation and, 117–18
 northern skies, 126–7
 southern skies, 118–126
 boundaries, official I.A.U., 358
 Chinese, 20–3
 Classical Greek, 107–114
 Egyptian, 32, 34
 Hevelius, 127
 Hindu, 38–9
 Islamic, 114–117
 Keyser and Houtman, 120
 Lacaille, 124
 Mesopotamian, 28–9, 108
 obsolete, 128–31
 orientation, 11–12
 external, 11, 12
 geocentric, 11
 Plancius, 121
 Ptolemy, 111
Constellations Represented on XXX Tables (Reissig), 177

- Constellations, The* (Society for the Diffusion of Useful Knowledge), 177–8
- Copernicus, Nicholas, 5, 92–4
Commentariolus, 92
De Revolutionibus, 92–4
 motions of the Earth, 94
- Coordinate systems in the sky, 3, 8, 10
 ecliptic, 3, 8, 10
 equatorial, 3, 8, 10
- Coronelli, Vincenzo Maria, 199–202, 231, 232, 233
Corso Geografico Universale, 201
Epitome Cosmografica, 201
 globes, 231, 232, 233
Globi Differenti del P. Coronelli, 201–2
Libro dei Globi, 232, 233
- Corsali, Andreas, 118–19
Corso Geografico Universale (Coronelli), 201
- Cosmographia* (Apian), 89–91, 236, 237
- Cosmology, *see* Center of the world,
 China, Classical Greek
 astronomy, Concentric spheres,
 Egypt, India, Medieval (Middle
 Ages), astronomy in Europe,
 Mesopotamia, Planetary order,
 Renaissance astronomy
- Cross-staff, 246
- Croswell, William, 131, 320–1, 322
- Curtis, Heber D., 285
- Cycle of Celestial Objects* (Smyth), 359
- Daboll, Nathan, 317
- Dante, 75
- De Fer, Antoine, 214
- De Fer, Nicolas, 214–5
