Digital transformation is more important than ever now that we're in the Fourth Industrial Revolution, where the lines between the physical, digital, and biological worlds are becoming ever more blurred. But fully 70 percent of digital transformations fail. Tony Saldanha, a globally awarded industry thought-leader who led operations around the world and major digital changes at Procter & Gamble, discovered it's not due to innovation or technological problems. Rather, the devil is in the details: a lack of clear goals and a disciplined process for achieving them. In this book, Saldanha lays out a five-stage process for moving from digitally automating processes here and there to making digital technology the very backbone of...

WHY DO SO MANY **INCOMPETENT MEN** BECOME LEADERS? (and how to fix it)

TOMAS CHAMORRO-PREMUZIC

HARVARD BUSINESS REVIEW PRESS

Acc. No : 39372

Call No : 306.3615 CHA-T

In this timely and provocative book, Tomas Chamorro-Premuzic asks two powerful questions: Why is it so easy for incompetent men to become leaders? And why is it so hard for competent people--especially competent women to advance. Marshaling decades of rigorous research, Chamorro-Premuzic points out that although men make up a majority of leaders, they underperform when compared with female leaders. In fact, most organizations equate leadership potential with a handful of destructive personality traits, like overconfidence and narcissism. In other words, these traits may help someone get selected for a leadership role, but they backfire once the person has the job. When competent women and men who don't...

Dilemmas in Reforming
Higher Education in India

With a Foreword by Yogesh Atal

Acc. No : 36598

Call No : 338.4737 TIL-J

Dilemmas in Reforming Higher Education in India, which includes a short selection of writings of eminent scholar of education, Jandhyala B. G. Tilak, brings together critical articles and discusses how higher education, a valuable and special public good, can counter the many tensions between tradition and modernity. Exploring the issue of whether higher education is a 'public good', these essays trace direct and indirect social benefits that are commonly overlooked and highlight the several inadequacies in our system. The author argues that the chronic shortage of public funds for higher education and the widespread introduction of neo-liberal economic policies and globalisation in every sector, has displaced this cherished view of...

Mainstream counselling in domestic violence often fails to address critical issues, such as gender socialisation processes and the abuse of power that allows violence against women, and focuses primarily on the intrapsychic nature of individual women. In contrast, feminist counselling is an effective alternative model, owing to its ability to address the fundamental correlation of abuse with power. In going beyond the individual, it helps women locate the source of their distress in the larger social context of power and control, manifesting in intimate, interpersonal relationships, and enables them to resist systemic oppression. This volume offers one of the first systematic documentations of feminist psychosocial interventions in...

India's air pollution is a deadly threat. Will its politics meet the challenge? Exposure to the world's worst air pollution kills over a million Indians each year. It also affects children's growth and threatens the economy and health of the next generation. No family can save itself from the collective danger of pollution. That is the task of governments, which, instead, have enacted showy, ineffective policies while neglecting to even measure the problem. With a smart package of policies, India could have healthier air. In fact, some strategies could bring down air pollution today, while also reducing the country's deep vulnerability to future climate change. But to do so would demand an honest reckoning with both challenges particles in the air and...

THE LEARNING LANDSCAPE

Is the learning that we need essentially different from the education that we receive? Prominent school Principals who have contributed to this book are of the view that if high-quality learning is going to be global, inclusive and lifelong, we will need to refine, extend and reinforce the existing model by re-engineering methodology, pedagogy and transaction. The contributors try to look at innovative strategies that blur lines between formal and informal learning, which is critical to transformation. Many of them speak from a lifetime's perspective on learning while others are on a personal quest, a journey where they see themselves as part of a complex, interconnected and interdependent world as they move towards...

At the heart of quantum mechanics lies the wave function, a powerful but mysterious mathematical object which has been a hot topic of debate from its earliest stages. Covering much of the recent debate and providing a comprehensive and critical review of competing approaches, this ambitious text provides new, decisive proof of the reality of the wave function. Aiming to make sense of the wave function in quantum mechanics and to find the ontological content of the theory, this book explores new ontological interpretations of the wave function in terms of random discontinuous motion of particles. Finally, the book investigates whether the suggested quantum ontology is complete in solving...
