About the Course:

Over the past decade, machine learning has developed into a well-defined discipline with clear goals that revolve around improving performance with experience. The field has strong experimental, theoretical, and applied arms, each with its own criteria for success. Most important, machine learning has substantially broadened its vision to incorporate a wide range of methods, some having their origins in AI but others coming from pattern recognition and

Environment, generate plans, execute those plans, and communicate with other agents. An intelligent agent must do more than perceive its surroundings and plan its actions; it must also execute those actions in the world.

Resources Persons:

The Sessions will be handled by the experts From **IITs/NITs/ Central University/U.S.A Universities who have more IEEE Transactions and SCI Journals.**
