## What is Challenging Behavior?

### What is Challenging Behavior?

January 2015

"Any repeated pattern of behavior, or perception of behavior, that interferes with or is at risk of interfering with optimal learning or engagement in pro-social interactions with peers and adults that interferes with children's learning, development, and success at play, is harmful to the child, other children, or adults, puts a child at high risk for later social problems or school failure. Challenging behavior is thus defined on the basis of its effects. While some children's challenging behaviors are developmentally or culturally normative and effectively addressed by adult vigilance and the use of appropriate guidance procedures, other children need evidence-based practices [Tarr 19] to prevent and/or address challenging behaviors that are persistent or unresponsive to those approaches." (<http://challengingbehavior.tmh.usd.edu/exploratory/dossary.htm>; Dunlap, Strain, Fox, et al, 2006)

“Examples of persistent challenging behaviors for preschool children may include: (1) physical aggression such as hitting, kicking, punching, spitting, throwing objects for harm, pushing, pulling, biting; (2) climbing on things in the classroom that are not permitted; (3) displaying property destruction; (4) displaying what another child is working on regardless of the other child's response; (4) taking away from other children for loss of focus; (5) running that poses a safety risk for the child or others or elopement from the classroom; (6) tantrum behaviors that might include behaviors such as kicking, screaming, crying, or elopement; (7) verbal aggression such as cursing, name calling, teasing, threats, screaming at another person, calling children bad names, and saying bad words; (8) ordering an adult to do something (e.g., “leave me alone”); (9) persistent or prolonged crying that is loud or disruptive or ongoing crying that interferes with the child's engagement in activities; (10) inappropriate use of materials (e.g., jumping off chairs, slamming materials, throwing objects); (11) inappropriate use of language (e.g., using inappropriate words); (12) inappropriate physical refusals (e.g., refusing to follow directions or to respond to appropriate touching, stripping, and other behaviors that are hurtful, disruptive, or dangerous to self or others.” (Hemmeter, Fox, & Snyder, 2014, p. 24)

"For infants and toddlers, challenging behavior must be considered within the context of the relationship of the child to caregivers. Behavior that is challenging, for example, may manifest as attachment difficulties, sleeping and eating difficulties, excessive crying, and difficulty in soothing. Challenging behaviors may be defined as behaviors that interfere with the development and maintenance of reciprocal, positive, and nurturing relationships with the parent or caregiver."

# Describing the Behavior

**Stating Behavior in Measurable Terms**  
Revised 2013

**Instructions:** Turn and talk to a partner. Discuss each of the behavioral terms in the left hand column. Discuss the form each behavior takes using more specific, observable, and measurable terms and write the behaviors in the right hand column.

Behavior	Behavior stated in more specific, observable, and measurable terms
Physical Aggression	
Disruption	
Disrespect	
Inappropriate use of materials	
Risk Behavior	
Exposing self or others inappropriately	

©2013 Pearson Education, Inc. All rights reserved. This document is a copyrighted work of Pearson Education, Inc. and may not be reproduced without written permission from Pearson Education, Inc.

- Instructions:**
- Turn and talk to a partner
  - Discuss each of the behavioral terms in the left hand column
  - Describe how each behavior looks using more specific, observable, and measurable terms
  - Write these terms down in the right hand column

9

# Classroom Behavior Record

Classroom Behavior Record

Classroom teacher: \_\_\_\_\_ Date: \_\_\_\_\_

**Directions:** Write each child's name in the left column who is demonstrating a persistent challenging behavior. Arrange the chart according to your classroom schedule. During each portion of the day, record instances of challenging behavior using the initial for that behavior in the box. Behavior categories are provided at the bottom of this form. Note additional instances of behavior.

	Arrival	Centers	Circle	Outside	Centers	Circle	Lunch	Nap	Snack	Centers	Dismissal
Child 1											
Child 2											
Child 3											
Child 4											
Child 5											
Child 6											
Child 7											
Child 8											
Child 9											
Child 10											

Comments (Substitutes, persistent absences, illness, family crisis, etc.)

**P** - Physical Aggression (hitting, kicking, scratching, biting, pushing, etc.)  
**D** - Disruption (yelling, screaming, noise with materials, tantrums, prolonged loud crying)  
**R** - Disrespect (taking someone else's toy, teasing, cursing, not following directions, etc.)  
**I** - Inappropriate use of materials (climbing on or jumping from furniture, destroying property or other children's work)  
**S** - Risking safety by running, sneaking away, or otherwise putting self in harm's way  
**E** - Exposing self or touching self or others inappropriately  
**T** - Behavior occurred during transition into the activity such as TP meaning physical aggression happening during transition into the activity. For example, TP-1, TD-2.

## Classroom Behavior Record for Tim

## Classroom Behavior Record

Classroom teacher: Jane Smith

Date: February 1, 2017

**Directions:** Write each child's name in the left column who is demonstrating a persistent challenging behavior. Arrange the chart according to your classroom schedule. During each portion of the day, record instances of challenging behavior using the initial for that behavior in the box. Behavior categories are provided at the bottom of this form. Note additional instances of behavior.

[illegible]

Comments: (Substitutes, persistent absences, illness, family crisis, etc.)

**P** - Physical Aggression (hitting, kicking, scratching, biting, pushing, etc.)

**D** - Disruption (yelling, screaming, noise with materials, tantrums, prolonged loud crying)

**R** - Disrespect (taking someone else's toy, teasing, cursing, not following directions, etc.)

I - Inappropriate use of materials (climbing on or jumping from furniture, destroying property or other children's work)

**S** - Risking safety by running, sneaking away, or otherwise putting self in harm's way

E - Exposing self or touching self or others inappropriately

T- Behavior occurred during transition into the activity such as TP meaning physical aggression happening during transition into the activity. For example, TP-1, TD-2.

13

## Developing a Precision Statement for Problem Behavior

## Description of a Persistent Challenging Behavior

January 2017

- Does he consider behavior as a habit? Why is it important? What does the behavior reflect? (see the next question)
- Is behavior an individual or a group phenomenon? and would this change depending on a person's role and/or position?
- **Why** does he consider behavior as a habit? Is it unique? Is it singular or is it habitual? Does this habit possibly reflect a habit that already exists in his culture or is it a cultural habit?
- **Where** does the behavior usually occur? How likely is it that it occurs at a particular time, place or during a particular event?
- **What** is happening just before the behavior occurs? What is it? What is going on the behavior?
- **What** happens just after the behavior? (Expectations that will affect the behavior, the decision that it is a habit, the consequence)
- **Why** are the previous questions important? Is there something that is likely to affect the behavior in a way that will change the behavior? What are the consequences that will be influenced and/or reinforced? For example, does the person have some other things that he is doing that also affect the behavior? Is there a habit that is being reinforced, which modification, does the behavior, decrease the probability of the behavior? Is there a reinforcement that is occurring in a way that will affect the behavior?

This is almost the maximum use of the facilities

15

## Precision Problem Behavior Statement Example for Samantha

During transitions from circle time to center time and from center time to outside play and back, Samantha runs, pushes, and shoves other children to get to be at the front of the line or to get to her favorite center on a daily basis. If a child gets in line in front of her, she hits the child and pushes her way to the front of the line. When the teacher tells her to go to the back of the line, she screams, cries, and falls to the floor kicking. The teacher allows her to stay at the front of the line. When circle time is ended, Samantha runs across the room to the housekeeping center. When the teacher asks her to come back to the circle to choose a center, she refuses to come and Samantha screams and cries and falls to the floor kicking and she gets to stay in her favorite center.

## Developing a Precision Problem Behavior Statement for Tim

Description of a Persistent Challenging Behavior  
January 2017

1. Describe the problem behavior and how often it is happening. <b>What</b> does the behavior look like? How often does the behavior occur throughout the day and week? How long does the problem behavior tend to last?	
2. <b>Where</b> is the problem behavior most likely to happen?	
3. <b>Who</b> is engaged in the behavior? Are there certain people who tend to almost always be involved before or during the behavior?	
4. <b>When</b> does the problem behavior most likely occur? Does it occur at a particular time of day or during a certain activity?	
5. <b>What</b> is happening just before the problem behavior occurs? What triggers the behavior?	
6. <b>What</b> happens as a result of the behavior? What do the adults do? What do the other children do? What are the consequences?	
7. <b>Why</b> is the problem behavior continuing? Is there something the child is able to avoid or obtain as a result of the behavior? <b>What</b> other lifestyle or setting changes tend to influence behavior? For example, does problem behavior occur more often when the child doesn't sleep well, uses a different form of transportation, takes medication, doesn't eat breakfast, doesn't get outdoor time when it's raining, has an unexpected change in a routine, arrives late or early, etc.?	

18

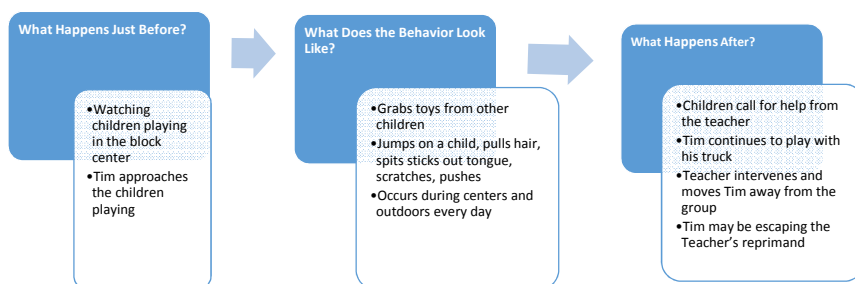

## Developing a Precision Problem Behavior Statement for Tim

Think about the sequence of the behavior:

19

## Precision Problem Behavior Statement Example for Tim

Every day during center time and outdoor play when children are involved in independent play, Tim watches the other children then moves into their play area and grabs the toys with which they are playing. When they resist giving him the toy, he jumps on them, pulls their hair, spits, sticks out his tongue, hits, scratches and pushes the other children. When the children call for help from the teacher, Tim moves away and continues to play with his truck. If the teacher intervenes to move Tim away from the group, he becomes "limp" and falls to the ground.

# North Carolina Preliminary Pyramid Assessment

NC Preliminary Pyramid Assessment (PPA)  
Version 2.0.17

This checklist can be used when working with a teacher who has a child with a challenging behavior in his/her class. This should be completed in conjunction with the following: 1) identifying when a challenging behavior is happening, 2) determining what exactly the behavior is, 3) identifying what happens before, during and after the behavior occurs, and 4) developing a precision problem behavior statement. Indicate Yes for each practice/strategy that is in place (or observed) and indicate No for each practice/strategy not yet in place (or not observed). Add additional comments or examples in the right hand column.

Universal Teaching Practice/Strategy	Yes	No	Comments/Examples
Great the child			
Communicate at eye level			
Interact during routine activities			
Respond positively during routine activities			
Show warmth and smile easily to child			
Provide positive attention throughout the day			
Provide a comfortable, welcome and safe space for the child			
Join in children's play to support interaction and expand ideas			
Use alternative strategies when communicating			
Monitor social activities with child			
Structure routines from beginning to end			
Explicitly teach responses of transition			
Prepare the child for transition			
Ensure child is actively engaged in transition			
Provide multiple opportunities to re-engage if disengaged			
Structure large group activities so child is seen/engaged			
Describe and post classroom expectations

# Developmentally Appropriate Instruction

North Carolina Early Learning and Development Progressions: Birth to Five

Home

Staff Login

North Carolina Early Learning and Development Progressions: Birth to Five

The North Carolina Early Learning and Development Progressions: Birth to Five are an expansion of the North Carolina Foundations for Early Learning and Development (FLED). Learning progressions were developed for each identified goal in four developmental domains, and show the steps through which children develop skills from birth to five years. During the first year of life, progressions are provided for skills achieved at two-month intervals; during the second year, three-month intervals; and from thirty-six to sixty months, skills are noted at six-month intervals. The comprehensive observation guidelines include age level, skill being observed, situation for observation of skill, strategies for eliciting the skill, if needed, what observed behavior indicates achievement of the skill, and routine-based intervention or embedded instruction. Instructions for navigating the NC Early Learning and Development Progressions: Birth to Five can be found [here](#).

Explore By Domain:

- Emotional and Social Development
- Health and Physical Development
- Language Development and Communication
- Cognitive Development

Explore By Age:

1-2 Months	12-18 Months	30-33 Months
2-4 Months	15-18 Months	33-36 Months
4-6 Months	18-21 Months	36-42 Months
6-8 Months	21-24 Months	42-48 Months
8-10 Months	24-27 Months	48-54 Months
10-12 Months	27-30 Months	54-60 Months

## Developmental Learning Progressions Learning Opportunity

Using the North Carolina Early Learning and Development Progressions: Birth to Five:

- Review the skills a child would be expected to have at each of the emotional and social skill areas from 24 to 42 months
- Determine which skills Tim is exhibiting in these age ranges
- Determine which skills might be next steps for Tim
- Review the Elicitation Strategies and the suggested Routines Based Interventions (Embedded Instruction) and determine what instruction you might utilize with Tim to facilitate development in these skill areas
