
Index

- associated Laguerre functions, 29, 171
- associated Legendre functions, 29, 170

- Banach space, **105**
- Bloch decomposition, 36
- Brownian scaling, 43
- Burger's equation solution map, 198

- Cauchy–Riemann equations, 3
- Cesaro integrability, 116
- complete orthonormal basis, 26
- conformal mapping, 2, 8, 99
- conservation law, 15, 34
- constitutive law, 31
- convex dual, 187
- convex duality, 187
- convolution, 46
- convolution algebra, 114

- d'Alembert's formula, 17
- Darboux equation, 127
- diffusion equation, 56
- Dirac δ -function, 49, 109, 110
- Dirichlet–Neumann operator, **86**, 88, 94
- dispersion, 151
- dispersion relation, 160
- dispersive equation, 34
- distributions, 110
- double layer potential, 85, 87
- Duhamel's principle, 19
 - heat equation, 53
 - wave equation, 19

- Einstein's equations, 6

- electrical impedance tomography, 91
- entire functions, 134
- entire functions of exponential type, 135
- entropy, 62
- entropy, relative, 64
- Euler equations, 196
- Euler–Poisson–Darboux equation, 129

- Féjer kernel, 117
- first-order quasilinear equation, 178
 - arrow of time, 185
 - Burger's equation, 178
 - characteristic curves, 179
 - characteristic equations, 179
 - conservation laws, 178
 - entropy condition, 185
 - Hamilton–Jacobi equation, 188
 - jump condition, 182
 - Lax–Oleinik solutions, 186
 - Lax–Oleinik variational principle, 189
 - Lax–Oleinik weak solutions, 190
 - noncharacteristic Cauchy surface, 180
 - Riemann problem, 183
 - shock curves, 192
 - shocks, 181
 - uniqueness, 194
 - weak solutions, 181
- flow of a dynamical system, 200
- fluid dynamics, 196
- Fourier multiplier, 154
- Fourier transform, 10, **105**
 - Fourier inversion formula, 10
 - isometry, 105

- Schwartz class, 110
- Fréchet derivative, 93
- Fréchet spaces, 108

- Gâteaux derivative, 66
- group velocity, 161

- Hadamard variational formula, **93**, 99
- Hadamard well posed criterion, 198
- Hamiltonian PDE, **139**, 140, 141
 - action integral, 139
 - Euler–Lagrange equations, 139
 - Hamilton’s canonical equations, 142
 - Kortweg–de Vries equation, 144
 - Lagrangian, 139
 - nonlinear Schrödinger equation, 144
 - nonlinear wave equation, 143
 - principle of least action, 139
- harmonic function, 3, 72
- heat equation, 4, **43**
 - conservation laws and moments, 56
 - contraction on L^1 , 60
 - contraction on L^2 , 60
 - Dirichlet boundary conditions, 52
 - energy functional, 65
 - entropy, 68
 - Fourier’s law, 57
 - Green’s identities, 55
 - heat kernel, 45
 - initial value problem, 49
 - initial-boundary value problem, 55
 - maximum principle, 48
 - method of images, 51, 67
 - Neumann boundary conditions, 52
 - nonuniqueness of solutions, 69
 - semigroup property, 46, 66
 - separation of variables, 68
 - weak maximum principle, 48
- Heisenberg uncertainty principle, **158**, 167
- Hermite functions, 28
- Hilbert space, 104, **105**
- Hölder continuity, 106
- Hölder continuity, lack of for solution
 - map of PDE, 200
- Hölder inequality, 119
- Hölder spaces, 106
- Huygens’ principle, 18, 132, 138
- hydrogen atom, 28, 40, 156
 - orbitals, 169
- hyperbolic rotation, 123

- integrable functions, 113

- John, F., 145
- joke, 2

- Klein–Gordon equation, 145

- L^p spaces, 105
- Laplace’s equation, 3, **71**
 - attenuation of oscillatory data, 91
 - conformal transformations, 99
 - Dirichlet problem, 72
 - eigenfunctions, 97
 - fundamental solution, 74, 95
 - Gauss’ law of arithmetic mean, 77, 98
 - Green’s function, 81, 98
 - Green’s function for $\mathbb{R}_+^n$, 81
 - Green’s function for $B_R(0)$, 82
 - Green’s identities, 72, 73
 - interior regularity, 76
 - Laplacian operator, 3
 - maximum principle for subharmonic functions, 79
 - maximum principle, strong, 79, 90
 - maximum principle, weak, 77
 - minimum principle for superharmonic functions, 79
 - mixed boundary conditions, 98
 - Neumann problem, 72, 84
 - Poisson kernel, **83**, 90
 - Poisson kernel for $\mathbb{R}_+^n$, 84, 87
 - Poisson kernel for $B_R(0)$, 84
 - Poisson problem, 72
 - Robin problem, 72
 - separation of variables, 95, 96
 - subharmonic function, 79
 - superharmonic function, 79
- Lax–Oleinik solutions, 186
- Legendre transform, 187
- Lipschitz continuity, 106

- Maxwell’s equations, 4
- method of characteristics, 12
- method of stationary phase, **162**, 163
- metric space, 108
- minimal surfaces, 7
- Monge–Ampère equations, 5

- Navier–Stokes equations, 8

- Paley–Wiener theory, **134**, 136
- phase velocity, 161
- physics of music, **29**

- Beals, R., 32
- clarinet, 31
- DeTurck, D., 33
- drum, 33
- oboe, 32, 37
- saxophone, 32
- strings, 29
- synthesizers, 33
- woodwinds, 30
- Plancherel identity, 105
- quantum harmonic oscillator, 27, 39, 156
- quantum mechanics, 26
- real analytic functions, 108
- Riemann–Lebesgue Lemma, 114
- Schauder spaces, 106
- Schrödinger’s equation, 6, **152**
 - bounds on moments, 168
 - complex probability amplitude, 152
 - conservation laws, 154, 166
 - Dirichlet boundary conditions, 167
 - Gaussian wave packets, 168
 - kinetic energy, 154
 - momentum distribution, 154
 - periodic boundary conditions, 167
 - position distribution, 154
 - potential, 166
 - quantum mechanical flux, 156
 - Schrödinger kernel, 152
 - separation of variables, 167, 169
 - Sobolev estimates, 155
 - wave function, 152
- Schwartz class, **107**
- self-adjoint operator, 27
- separation of variables, **24**
 - heat equation, 68
 - Laplace’s equation, 95
 - Schrödinger’s equation, 167
 - wave equation, 24
- shear flow, 196
- single layer potential, 84
- Sobolev embedding theorem, 106
- Sobolev space, 105
- special theory of relativity, 126
- strong Huygens’ principle, 18
- symbol, 160
- tempered distributions, 110
- transport equations, 10
- variation, 93
- variation of constants, 21
- water waves, **162**
 - dispersion relation, 173
 - Kelvin ship wake, 172
- wave equation, 4, **16**, 121
 - Cauchy problem, 16, 121
 - Cauchy problem in
 - Friedmann–Robertson–Walker space-time, 148
 - conservation of energy, 35, 122
 - Dirichlet boundary conditions, 21
 - domain of dependence, 134
 - domain of influence, 134
 - equipartition of energy, 35, 147
 - finite propagation speed, 18, 133
 - focusing singularity, 145
 - Fourier synthesis, 122
 - global existence, 145
 - Huygens’ principle, **132**, 138
 - Huygens’ principle, strong, 132
 - inhomogeneous problem, 19
 - initial value problem, 121
 - John, F., 145
 - Kirchhoff’s formula, 130
 - light cone, 17, 125
 - Lorentz transformations, 123
 - Minkowski space, 126, 148
 - Neumann boundary conditions, 21
 - propagation of singularities, 36
 - spherical means, 127
 - spherical means in $\mathbb{R}^2$, 146
 - spherical means in $\mathbb{R}^3$, 129
 - spherical means in $\mathbb{R}^n$ for n odd, 130
 - spherical means in $\mathbb{R}^{2m}$, 147
 - traveling waves, 35
 - weak solutions, 17
