

**PROGRAMMING FOR GIFTED AND TALENTED EDUCATION**

Sunrise School Division strives to provide appropriately challenging learning opportunities for all students by recognizing individual talents, strengths, interests, abilities and learning styles. We emphasize development of critical and creative thinking skills as a base for self-directed learning and problem solving which can be integrated into all curricular areas.

Advanced learners – those students who can learn more deeply, move at a brisker pace or make greater connections – are given opportunities to develop their abilities and set appropriate learning goals for themselves. Student Services team members can provide support and direction for individual-specific situations.
