

An Introduction to eduPass for Students

Introduction

Welcome to eduPass!

This course will show you how to register with your eduPass identity and also how to manage your eduPass account online.

My name is 'eduKate' and I'll help you remember the important things as you go through this course.

About eduPass

eduPass provides you with an eduPass identity – a username and password – so that you can register and have access to Department of Education and Training (the Department) secure systems. It is important the Department's systems are kept secure and unauthorised users are excluded.

This training will show you how to set up your eduPass account and how to perform common tasks, including:

- initial registration and changing your password
- if you are in Years 3–12 setting up your PIN (4-digit number) and secret questions and answers
- resetting your password if you forget it.

All of the training activities are quick and easy to follow.

Each answer must contain at least four characters, with no two answers being the same.

What was the name of a favourite childhood pet?

What is the name of your favourite colour?

Answer is duplicated or has less than four characters.

What is your favourite superhero or TV character?

What is the name of your oldest cousin/sibling?

What is your Mother's middle name?

What is your favourite team?

What is your favourite food?

What is your favourite holiday destination?

How to navigate the Training Modules

In each module you will learn about a different process, step by step, so that you can manage your own eduPass account.

As you go through the training modules, you will see that actions are indicated by a green arrow, while a red box is used to highlight other important things on the screen.

The responses you provide are stored by your organization in Forefront Identity Manager.
