

## ASSIGNMENTS

**Chapter 6: Read entire chapter** (including the example and practice problems)

### **Terms / Concepts**

1. addition reactions
2. mechanisms
3. transition state, activation energy, exo vs. endo thermic
4. rate limiting step
5. electrophile, carbocation, and carbocation stability

### **End of Chapter 6 Problems:**

11, 12, 13, 15, 19, 20, 21, 22, 27, 29, 30, 31, 33, 37
